The beef gave out on Saturday, but the hydro-carbons were in good store, and the catfish. The day following Saturday was given up to meditation and hunger, progress being impossible because of contrary winds. The fierce aggressiveness of the captains lessened as the prospect of indefinite fried catfishes became more pronounced. A captain would now and then shoot a hell-diver, to appropriate verbal accompaniment, but no real act of heroism aroused remark until late in the afternoon, when one of the captains steadied himself by the sbrouds and after a prolonged observation discovered that the tule was sailing away from the Catamaran. His announcement of the fact drew down upon him the six other captains who did some independent observing and voted the discoverer nothing better than a land lubber—the boat had gone adrift and "the dead stered by the paralyzed" had been going up with the tide for nobody knows how long. Matured deliberation convinced the captains that, as the boat had run itself all right it might as well be let alone, and the captains returned to a study of the miscibility of water, sugar and other things. They studied long and then hitched the faithful old Catamaran to something and had supper Monday was indeed a trying day. The cruise had already lasted long enough to convince each of the captains that all the others knew nothing at all about navigation, and every suggestion or request for assistance elicited a yowl like a bunch of coons on a tule float at dusk. The sailing was strictly a one man affair.

Whenever one captain grasped the tiller and pretended to know something, the rest all quit and went into the cabin, the result being that the course of that Catamaran was like the way of "an eagle in the air" or "a serpent upon a rock," a thing that no man could know.

However, a flood tide and occasional gusts of wind carried the adventurers past several willow trees and made it seem like going along. Monday evening's supper was a fine one of the kind—a new kind. No meat, no antiseptic, no nothing but catfish, tea and captains. Eaten with disrelish, digested under protest, assimilated by osmosis only, that evening meal will linger with the captains. Even Captain Budd usually bright as a star, paled and sought his damp bunk upon which wet clothing had so often been placed that the once neat bed needed wringing out. Two of the captains snarled over "coon—can." The rest didn't say much except "ante" and strange words like that. Cannibalism had lost much of its horror, and the edibility of Austin Sperry or Frank Lane was contemplated without a qualm.

Oscar Marshall was too fishy and Charley Rich was too tough, but a Sperry ragout or a Lane pate actually seemed inviting if dressed as Chalmers would gladly have fixed the dishes. Of course morning came after a while and with it a glimpse of the sun, the first of the trip. Comparative cheeriness ruled and the captains being but a few miles from camp, filed out on the mud after tying a tow line high up on the mast and dragged the obedient catamaran along like a thing of life, the wind whistling through the shrouds like everything, the other way. Nearly a half a mile was made in some time and the captains tugged away, never missing a tree with the tow line and speaking in tongues every time the bow sprit pierced the soft banks of Middle River.

While the captains were hustling along the shore, this scribe had the only opportunity of the trip to demonstrate his knowledge of sailing a boat.

He did not happen to see the other captains go ashore, and would not lessen their enthusiasm by asking them to wait while he got a grip on the line. So he stayed aboard and saved the ship by letting it strictly alone.

The next day it rained but the captains finally got to the shooting ground and anchored the famous Catamaran in a brush pile several miles from anywhere. No ducks, no geese, no shooting. Just a blind heedless scramble to reach Stockton, and get back to business after the enforced absence, three days longer than expected. A tule stage, fifteen miles of mud, with occasional hard spots by the roadside where short stops were made, and then routine was resumed. A most extraordinary trip and without a parallel in the experience of this correspondent, for solid, queer, unending joy. I am promised another opportunity to visit the Catamaran and enjoy some of the really grand duck-shooting reserved by the princely owners, and members of the Catamaran Club, after which visit some further points may be noted.

Nov. 12, 1889. PIMELODUS.

Tod. Robinson.

Particulars of the saddening accident which resulted in the death of Master Tod Robinson, son of our beloved friend, Crittenden Robinson, have come to hand, and to the gentle father and tender mother the fullest sympathy is proffered in what must seem a grief too heavy to be borne without seeking that nepenthe which alone can bring reunion. Tod, a loveable, manly and bright boy of fifteen years, was fond of the gun and the sports of the field, and on November 16th, in company with a young friend named Feely, visited San Bruno to shoot over the salt marsh adjacent to that scene of the many triumphs which have enrolled his father's name among those of the world's experts. The lads soon separated and Feely saw no more of Tod. As train time approached he turned back, took the train, and on reaching home informed his family of the facts. On the succeeding day a party went to San Bruno only to learn that a hunter had discovered poor Tod lying face down in shallow water, dead. The return of the coroner's jury was that death was the result of natural causes. Tod had long been troubled by epileptiform altaeks, and it is presumed that a seizure overcame him while crossing a little pool, and falling upon his face he suffocated. The untimely taking off removed a true little man, wise beyond his years, of high spirit, correct habits, persistent industry, and so loveable withal that his friends will miss him more than words can tell.

The Martinez Item says that a small herd of elk was seen near Corning, Tehama Co. on Nov. 15th. We shall be pleased to receive from some reader at Corning, the particulars: who saw the elk; how many were in the band; what was done in relation to them; and any other facts of interest.

One of our occasional contributors, Mr. Ed. M. Greene, has recently ventured into journalism as a proprietor. His paper, The Jury, published every Friday, at 126 Kearny St., city, is brightly written, smartly illustrated, handsomely printed and in every way creditable both to Mr. Greene who is the artist and to Mr. C. F. Davis, who is the editor.

There have been nearly 500 bales of deer hides shipped from this port during the year. This means an incessant war on the deer in this county, and some step should be taken to put a stop to it. Railroad and steamboat lines can be prosecuted for carrying deer hides. Perhaps Deputy Smith will catch on.—Humboldt Mail.

[If "Deputy Smith" does "catch on," we hope the Mail will spur up the District Attorney, the judges and possible jurors. Futile attempts to enforce the law are discouraging no end.—ED.]

The manager of the United States Cartridge Company has organized an exhibition team of trap shots with which he proposes to traverse the United States. Ten men are to be selected and shoot team matches, five men to the team. The scheme is of course, an advertising venture in the interest of the Cartridge Company, but if matches can be arranged between teams in the various cities to be visited, and the stock teams, it may be possible to infuse enough thoroughbred quality to give the events the interest which always attaches to a genuine contest.

The Dimick party professes a desire to come to San Francisco, and it is proposed, that if the party does come here, a local team be organized and shoot a match with the visitors.

A team in which A. W. Bruner, Crittenden Robinson, Martinez Chick, W. J. King, Austin Sperry, Major Kellogg, J. M. Morrison, C. J. Haas, C. M. Osborn, Ed. Fay, Dr. Knowles, Frank Coykendall, Joseph Delmas, or any others of fifty cracks might hold membership, would have good right to make a race with the peripatetics. We should like to bear from the Southern California men, the Pacific Gun Club, the California Wing Shooting Club, the Garden City men and others of our best shots.

No better proof of the essential growth of California is needed than the recent movement toward the establishment of great manufacting plants in favorable localities, some of them many miles from the centers of population. The latest enterprise and noise of the grandest in scope is that of the North Pacific Land and Improvement Company, whose interests lie in and about Ukiah, Mendocino Co.

The officers of the company are: President, N. W. Griswold Secretary, W. H. H Graves; Directors—S. Mervyn Donahue, President S. F & N. P. R Co ; A. P Overton, President Santa Rosa Savings Bank; N. W. Griswold, President Sonoma County Land & Imp. Co ; Wm. Center, Capitalist; W. H. H. Graves, Vice-President Sonoma County Land and Imp. Co.

The office of the company is at 29 New Montgomery street, and a pleasanter hour cannot be passed than one spent in listening to the chat of Secretary Graves or Mr Lamott about prospective improvements about to be initiated by the company

Ukiah is to be supplied with water, electric lights, electric motors and a railway operated by an electric appliance.

Robinson Creek and 8,000 acres of tributary watershed are controlled by the company, the creek being perfectly suited to fly fishing, and the land just right to maintain limitless quantities of game. Deer are extraordinarily plenty, and when the company stocks the ground with copper pheasants, ruffed grouse and bobwhites, a day passed there will be an ideal one from the sportsman's standpoint. The officers of the company are sportsmen in the best sense and are all men of position, influence and wealth. The tract reserved will benefit the whole of the neighboring territory, because it will be strictly preserved and the protected game it becomes too thick will naturally over run and stock the adjacent properties.

No grander opportunity has ever been offered for the establishment of a good sportsman's Club. The land is readily accessible. A grand hotel is to be erected; telegraphic and telephonic communication will be had within thirty days, and yet the place is as wild and picturesque as though it was in the heart of the Sierras. Mr. Lamott is about planting a lot of New Hampshire trout in Robinson Creek, and is in charge of the sportsmanly affair of the company.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 00
Two times	1 75
Three times	2 40
Four times	3 00
Five times	3 50

And each subsequent insertion 50c. per square.

Should an Advertisement run without change three months or more 50c. per square, counting from the first insertion.

Advertisements running six months are entitled to 10 per cent. discount on rate of 50 cents per square each insertion.

Those running twelve months are entitled to 20 per cent. discount on rate of 50 cents per square each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Nov. 23, 1889.

A Welcome to Robert Bonner.

Robert Bonner is on his way to California. He will receive warm and hearty greeting in California. This is a large State, with more miles of sea-coast and more productive interior than any other State in the expanded Union of forty-two States—and more a-coming. Mr. Bonner is as famed in the line of literary publications as he is in the field of fast trotters—the representatives of American sporting upon the turf, growing more popular every year. The English system is running; the American system is trotting. It is the development of the horse—the horse for usefulness, and the horse for profit. Racers are for the speed upon the turf. Trotters comprise the evolution which cultivates the speed and includes the every-day utility. Horses do not run, or lope, or canter, to market; they trot. As the Irish Councilman of New York said of the Venetian gondolas, let Nature take her course. Otherwise, make room for the trotters.

Robert Bonner gave impetus to the development of trotters when he paid $30,000 for Dexter. The fastest trotters had not been rated at any such value before that. He merits great credit for his foresight and magnificent appreciation of the worth of trotters. He is now the owner of the two fastest trotters in the world—of Maud S., aged, with her record of 2:08¾; of Sunol, a three year old, with her record of 2:10½. This would have been more than glory enough for any man, years ago. But the times have changed and the manners are otherwise. Now the objective point is to get down to even two minutes for the mile. Mr. Bonner is an apostle to this improved gospel of the turf—although he proposes to make the development according to his own method. No matter as to that; his welcome in California will be none the less cordial; his reception by the breeders and turfmen of California will be hearty and sincere.

Mr. Bonner is reported by telegraph as remarking of the superior climate and soil of California for raising horses, that here the "grass is particularly adapted for blooded stock." In this the proofs are before him. Also, he is reported as saying. "The men out there [in California] have got breeding down to a science, and I want to talk with them, especially about the advantages of cross breeding." These sentiments, from the source whence they come, are subjects for gratification in California, for deliberation at the East. It is the belief here that California is superior in climate and soil and everything else essential to the breeding of the best blood and fastest trotters and racers. As to the science of breeding, Mr. Bonner will have only to make account of the tests at any of the great breeding farms of California for confirmation of the best reports which have reached him.

As evidence of his partial convincement to this extent already, is the report that he has changed his mind since the purchase of Sunol; that he will leave the California filly at Palo Alto another year, to give Marvin a chance to drive her to beat her own record. It is a wise conclusion. It is evidence that Mr. Bonner is open to conviction. His method of training is, to his mind, complete. Still, a more thorough and perfect method may exist. He seeks the utmost. It is the manifestation of the inquiring mind and the noble spirit. Doubtless Mr. Bonner's curiosity will be satisfied. The chances are that, in Marvin's hands, Sunol will lower her record as a three year old, and in her fourth year will make the mile to the wonderment of the world.

The BREEDER AND SPORTSMAN joins in the welcome to Mr. Bonner, and is confident in the belief that he will enjoy his visit to the Pacific Coast.

An Intimation of the Coming.

An exchange, commenting upon the sale of Sunol, intimates that perhaps the wonderful filly was parted with because at Palo Alto is one more wonderful, which will in good time show a faster mile in public, and prove a greater record smasher. It may be so; there is no telling what a California bred colt or filly may yet do in that line. At all events, there is no telling, from any of the great breeding farms, what can be done. The proof is furnished the public of what is done as an accomplished fact. Brag is not indulged in. First comes the performance; after it the boast.

A Los Angeles Spring Meeting.

At a meeting of the Directors of the Los Angeles Agricultural Society, held last week, it was determined to hold a spring meeting, for both trotters and runners, to commence on Monday, April 14, 1890, and close April 18th. At the same time a committee was appointed to report a programme for colt stakes for the meetings of 1890–91–92, the time of closing to be arranged by the committee, who consist of Directors Robinson, Newton, Hinds and Wise. The treasurer reported as to the state of the finances, and he was ordered to pay off part of the outstanding indebtedness.

Mr. Bonner and Trotters.

In the New York World of recent date Robert Bonner published a letter animadverting upon an item in the BREEDER AND SPORTSMAN in reference to his noted purchases of great trotters and retiring them from the turf and from the further making of records. Mr. Bonner cites to his own vindication and to the support of the uses to which he puts his trotters a statement of the horses which he has purchased, of some that he has bred, and of their performances subsequent to the purchase. To all that he states it is not material to make more than general answer. But his statement does not affect the substance of the article in the BREEDER AND SPORTSMAN in respect to records—records recognized as official by turfmen and the general public.

Unqualified acknowledgment is made of the service Mr. Bonner has contributed to the breeding, the improvement and the increased valuation of trotters throughout the country. But this is not all to be considered. It is the record, together with the pedigree and blood of the trotter that makes the horse more valued. Records are made only on the track, agreeably to established rules. Performances on private tracks, or without attention to these rules, go for nothing, and are not officially accepted. Statements of marvelous performances in private are often reported, but these never count except among the few who place faith in them. Doubtless Sunol, Regal Wilkes, Palo Alto, Stamboul, and other famous trotters have made performances on the private tracks of their owners to warrant them in the confidence that each can trot the mile in lower time than either has yet made in public trial. The record, however, must go with the public performance according to rule. A record of this essential character cannot be made by any of Mr. Bonner's trotters so long as he adheres to his method in withdrawing horses from the track. This is the point mainly in issue. But it is not the only point.

The BREEDER AND SPORTSMAN is not alone nor unsupported in the opinion that Mr. Bonner's method so resolutely maintained, of withdrawing from the turf the great trotters which his abundant wealth enables him to purchase, is to the ultimate benefit of the animal, and it certainly militates against the renown of the turf. There are instances, no doubt, wherein his purchases assure better keeping, more careful training and more considerate handling, than could be had in the hands of others, with longer life, improved usefulness and better results in breeding. But it will be difficult if not impossible to convert the greater number of horsemen to the belief that even on the fine breeding farm of Mr. Bonner the trotter is better cared for and more skillfully trained, with promise of longer life and usefulness in breeding, than on the well-conducted farms of noted breeders—as at Palo Alto, at San Mateo, at Rosemead, at Pleasanton, and at similar farms throughout the Union. In the care of men, of whom Charles Marvin, John Goldsmith, Budd Doble and John Splan are the type, the trotter—from foal to extreme age—is intelligently, humanely, tenderly and thoroughly bred, and trained and handled in every respect. The prime motive of self interest in the care and use of a trotter worth a moderate fortune, as wealth is now accounted, will govern the owner and impress upon him the importance of avoiding everything which may impair or affect the animal.

Horses bred and used in this approved manner maintain the public interest in the turf, refine and ennoble the grand sport, delight the multitudes by their marvel of performance, and assure the continuity of superior lines to future generations. It also enhances values—a very material point with breeders and owners. The Bonner method unquestionally obstructs this development. In one sense it acts like the withdrawal of large sums from general circulation, locked in the coffers of individuals, and of account only to the pride of the possessor.

It is in this aspect that the BREEDER AND SPORTSMAN takes issue on the subject. It is not with regard to Mr. Bonner that our comments are expressed. It is solely with the method or system which he has inaugurated and pursues that we deal. There may have been a time—twenty or thirty years ago—for such a method; but if so, that time has passed away. Under the better, open system of breeding trotters, values have progressed, and records have been lowered. Give the record-breakers a fair and square chance to further lower them, down to the two-minute notch.

The Weather.

That much berated individual, "the clerk of the weather," has been at his old tricks again, and we are inclined to the belief that the cursings showered so liberally on his head are well deserved. The Blood Horse Association have become so accustomed to bad weather that they do not seem to mind a few postponements, and the horsemen who come to attend the fall meetings usually come prepared to stay a month. The rain has been a disappointment to many, but to none more so than the trotting horse drivers who had their horses just on edge and were ready to smash the records still further. Sunol would have lowered her record so far that the time of Maud S. would have been in danger. Palo Alto would have touched 2:10, and Stamboul would have won $5000 for Senator Rose. There is no guess work about these assertions. Provided the weather had been clear, all of these things would have come to pass to-day at Napa. Whether the horses can be put into condition before the close of the year is a question. At present it looks doubtful.

Sir Modred.

Some weeks ago our Australian correspondent wrote as to the amount of winnings of the get of Darebin on the Australian turf. The showing was a good one as he only stood two seasons in the antipodes prior to being shipped to America. That he will do equally well in America cannot be doubted. Sir Modred has had one more year in California than his stable companion, and it is with pleasure that we call attention to his wonderful prepotency to produce speed. When the Haggin sale took place last year a number of the get of Sir Modred were sold, and yet a majority of those present were afraid to speculate in the youngsters as he was an untried sire. What he can do has been demonstrated this year. He has only had eight starters and five of them are winners. Tournament, Ballarat, Sir John, Fanny G and Marie Lovell have all caught the eyes of the judges first during the racing season just passed, and each of them are full of promise for next year. Mr. Haggin has made a good selection in getting Sir Modred to grace the Rancho Del Paso harem, and if age spares him we expect to find Sir Modred at the top of the list of winning sires before many seasons roll by.

The Ten Broeck Case.

It is with extreme regret that we feel called upon to mention anything about the Ten Broeck affair, which has startled the community of San Mateo. Only a few weeks ago we had the pleasure of meeting the old gentleman on the cars while on a trip down the country, and most assuredly he appeared as sane as ever. We conversed about many matters, among others the Chicago Herald account of his death. He gave me a detailed account of the shooting, and laughed heartily at the obituary which was read to him. The following is the report of the Commissioners:

"We, your Commissioners, appointed by your Honor on Nov. 2nd, 1889, to inquire into a charge of insanity made against Richard Ten Broeck of San Mateo, in San Mateo County, find that he is not in a condition which warrants us in signing a commitment to take him to an insane asylum.

DR. A. E. BALDWIN.
DR. E. W. LOVELAND."

THE AMERICAN TURF CONGRESS.

A visit to Doble's Stable.

The BREEDER AND SPORTSMAN Eastern correspondent was in Chicago last week attending the meeting of the American Turf Congress. He sends us the following report:

The American Turf Congress held its annual meeting in the office of the Washington Park Club at the Palmer House Wednesday, November 13th. At noon President J. E. Brewster, secretary of the Washington Park Club, called the congress to order, and there were present General J. F. Robinson, Lexington Jockey Club; Colonel L. M. Clark, Louisville Jockey Club; Colonel Charles S. Green, St. Louis Jockey Club; Judge George J. Perkins and E. C. Hopper, Latonia Jockey Club; J. K Oglebug, Kansas City Jockey Club; Frank Shaw, Twin City Jockey Club; L. Ezekiel, Birmingham, Ala., and B G. Bruce, Lexington, secretary of the congress. President Brewster held a proxy for the Denver club. New Orleans was not represented. The minutes of the last meeting were read and approved, as was also the treasurer's report. On the suggestion of the president the rules drawn up by Secretary Bruce as amendments to the present rules were taken up for discussion. The first change made was in the preamble and by-laws, in which, section H which read, "The subscribing jockey clubs agree that no contract for betting privileges be made with any association of bookmakers," was stricken out.

Rule 3, which read, "Conditions referring to maidens shall mean maidens at the time of the start, unless otherwise specified," was amended to read; "Maidens at the time of entry."

Rule 19 was changed. It formerly was; "Where no entrance fee is required the declaration must be accompanied by 5 per cent of the whole amount of the purse." It now stands: "5 per cent of the first money."

Rule 21 was made to read; "No association running under these rules shall receive the entry of, or allow a horse whose name has been changed, anywhere or on any course, to run on their course" The addition of "anywhere or any course" was made to cover courses not connected with the congress, there having been one or two flagrant violations of the rules last year, when horses ran in one name on western tracks, went East and ran in another name and then came back West with their old name. The latter part of the rule making it take effect on Jan. 1, 1889, was eliminated as useless now.

In rule 24, regarding entries, the party making the entry to stakes must give his name and postoffice address. The obligation to give his racing colors was stricken out.

Rule 37, which deals with Liability for stakes and forfeits was altered. The old rule read: "A person entering a horse thereby becomes liable for the entrance money, stake or forfeit. A subscriber to sweepstakes is liable for the stake or forfeit, but if he transfer any entry or a right of entry therein to any other person he is liable only in case of default by the transferee, and in that case may recover from the transferee, and may, if he pay such stakes or forfeits, place them on the forfeit list as to himself." The words after "stakes or forfeits" where stricken out and these substituted: "Be entitled to a forfeit order as due to himself." In rule 42 the clause compelling the time of the first race to be indicated on the dial "half an hour in advance" was stricken out, and it was only made compulsory to "indicate it on the dial."

The alteration of clause A of rule 47 was the most important of the meeting and provoked some discussion. The clause read: "There shall be no races given for horses three years old and upward less than six furlongs." The amended rule is as follows: "There shall be no dash race for horses three years old and upward less than one mile." This was the only change that brought about a division, and the amended rule was carried by a vote of 6 to 2, the members voting against it being Judge Perkins, of Latonia, and L Ezekiel, of Birmingham. This rule is an excellent one, and it will banish from the race tracks a lot of worthless rubbish. This question of allowance of gelding came up, but at the suggestion of the president it was passed for the present Mr. Brewster said bothtthe committees from the East and the West had agreed that the allowance for geldings should be done away with, but they had not yet reported, nor had they been dissolved. He thought it would be more courteous to wait for their report than to act without it.

In rule 48 regarding over weight, and which makes the jockey declare the amount of overweight to the clerk of the scales forty-five minutes before the race if it exceeds two pounds, the words "owner and trainer consenting" were added.

Rule 51, defining a starter and bets on him, was made clearer than it has been formerly. It now reads: "Every horse whose jockey has weighed out, and whose number has been put up, is a starter, and shall be liable for his whole stake. If a horse is excused after he is weighed out all book bets on the race are void, and additional time before the race shall be granted by the judges. In auction pools or French mutuals the bets stand, but the money bet on the excused horse must be refunded."

Rule 58, regarding foul riding and fraud, makes the penalty for such misdeeds permanent. The rule now says: "Any one ruled off for a fraud shall stand ruled off for life."

In rule 92, on penalties and allowances, clause A, which states that in all races exclusively for two and three year olds, no penalty shall exceed five pounds, was stricken out, as was also clause C of the same rule, which says: "No horse shall receive allowance of weight or be relieved from extra weight for having been beaten in one or more races; provided, that this rule shall not prohibit maiden allowances."

Rules 102, 103, 104, 105 and 106, referring to jockeys' fees, suspension of jockeys, licenses for jockeys and trainers, fines and their disposal, the fund for trainers and jockeys, post bookmaking and corrupt and fraudulent practices, were referred to a committee composed of Gen. J. F. Robinson, Judge Perkins and B. G. Bruce, with instructions to report in the morning.

In rule 120, the clause limiting the issue of badges to any one newspaper to two was stricken out.

In place of rule 140, Judge Perkins, Latonia, moved the following: "If an ineligible horse be entered for the purpose of betting against him, and he finishes first, or if he be entered for the purpose of having him disqualified by objection made after the race, all bets made on such race shall be declared off." This was carried unanimously.

Rule 160 was changed to the following: "When two or more horses start in a race in the same interest, or owned wholly or in part by the same persons, they shall be coupled and sold as one horse in all pools, Paris mutuals and book betting."

The Congress adjourned at 4 o'clock, after having got through a good afternoon's work. President Brewster invited the members of the Congress and the representatives of the press to drive to Washington Park at one o'clock the following day and lunch at the club-house.

The American turf congress was late on Thursday morning in resuming its deliberations, and it was 11 o'clock before President Brewster called the meeting to order. All the member that attended on Wednesday were present.

The first business was the reception of the report of the committee appointed on rules 102, 103, 104, 105 and 106, relating to jockeys' fees, licenses for jockeys and trainers, post bookmakings and corrupt and fandulent practices. Judge Perkins, of the Latonia Club, was the only member that had drawn up a written report, and he advocated in it the creation of a board of license, to be composed of three officers of clubs belonging to the congress, and that all trainers and jockeys should procure their licenses from that board. The old rule required the license to be obtained from the secretary of the American turf congress by application to him or on recommendation by any association running under the rules Judge Perkins spoke in favor of his measure. He said the licensing system was not only for the creation of a fund for disabled trainers and jockeys, but it was for the purpose of keeping dishonest people off the turf. In other walks of life a license was not granted to a man unless he had a good character, and the same system should prevail in racing. There were some jockeys on the turf now whose character would not bear investigation, and yet no one liked to get up and say so. A board would inquire into these things, and, if it found anything wrong, refuse a license. They all knew that the characters of the jockeys were inquired into in England, and the jockey club there had frequently refused licenses.

General Robinson of Lexington, said he fully agreed with Judge Perkins as to having a board, and had always been of the opinion that no jockey of a known crooked character should be licensed. The only objection he had to Judge Perkins' plan was that he thought it would be hard work to get the three members of the board together to examine into characters. He was of the opinion that the matter might be obviated by making every applicant for a license have the recommendation of two responsible people in addition to the recommendation of the association.

R G, Bruce of Lexington, said he agreed with General Robinson, and did not think a board was feasible.

Colonel Louis Clark of Louisville, said if they were going to have licenses at all let them be strict about the matter. Of course the judges at the tracks had the power to revoke a license if they thought a jockey was doing crooked work, and he, for one, always did insist on this rule being carried out, and what was more, if he once did revoke a license he never voted to give it back.

After some further discussion Judge Perkins said that, as the majority of the committee was against him, he would withdraw his report. Eventually the committee was discharged, not being able to agree, and the congress as a whole took up the rules in dispute. Some minor amendments were suggested, but did not meet with favor, and rules 102, 103, 104, 105 and 106 were passed as they stood, the President remarking that the laws were stringent enough if the association would only carry them out.

Judge Perkins wished to add a new rule relative to bookmaking, to the effect that any one betting on credit with a bookmaker and not paying his bets should be ruled off. This was voted down on the ground that a bookmaker, like a merchant, need not give credit unless he liked. In addition to this it was claimed that it would make the associations responsible for all unpaid debts.

The Congress adjourned at 12:30, and on invitation of President Brewster took carriages for the Washington Park Club House, where a substantial and recherche luncheon was partaken of, the principal feature being a magnificent saddle of Southdown mutton. The Congress reassembled at the Palmer House at 5:30, and as soon as it was called to order Judge Perkins moved the following resolution, which was carried unanimously:

Resolved, That we tender to the officers of the Washington Park Club our grateful acknowledgments for the cordial hospitality extended during our stay in the city. The absence of President Wheeler has been the only shadow on the visit, and we desire to send him hearty greeting and Godspeed on his way to recovery.

The Congress then went into executive session. The following officers were elected for the ensuing year: President, T. J. Megibben, Cynthiana, Ky.; Secretary, B. G. Bruce, Lexington, Ky.; Treasurer, O. L. Bradley, Lexington, Ky. The dates for next year's meetings were fixed upon as follows:

Birmingham, Ala., April 9th to April 15th; Lexington, May 4th to May 13th; Louisville, May 14th to May 23rd; Latonia, May 24th to June 9th; St. Louis, June 7th to June 20th; Chicago, Washington Park, June 21st to July 19th; Twin City Jockey Club, July 23rd to August 2nd.

New Orleans will probably commence before Birmingham, and Nashville, which is not in the association, will no doubt come in between Birmingham and Lexington. Kansas City did not ask for dates; neither did Denver.

Some more alterations were made in the by-laws and rules. In section G of the by-laws on officers the following was added: "The term of the office of President shall be limited to one year, and no member elected President shall be eligible for re-election until after the lapse of one year."

Paragraph 4 of rule 91 was altered to read as follows: "Any horse qualified at the time of entry shall continue to be qualified unless otherwise specified in the conditions of the race.

On motion of Colonel Clark section D of rule 102 was altered so as to read: "This rule shall be applicable to trainers and jockeys, whether owners or not."

A new rule numbered 162 was added. It says: "Associations running under these rules may enforce the payment of all bets."

A committee consisting of General Robinson, Colonel Lewis Clark and Judge Perkins was appointed to inquire into the character of any trainer or jockey applying for a license, with full power to determine whether that license should be issued or not.

The committee of conference with the eastern clubs, composed of J. E. Brewster, Colonel Lewis Clark and Judge Perkins was continued until the new president should call a special meeting wherever and whenever he might select to receive its report.

All the alternations in the old rules, and the new rules, go into effect on June 1, 1890.

Cincinnati was selected for the next annual meeting, and the congress adjourned after having had a most harmonious meeting, and also having accomplished a great deal of good work.

After the meeting I visited the stables in which are quartered Budd Doble's horses, at Washington Park. While there I saw the great $105,000 colt, Axtell, and looking him over carefully, felt of him from head to toe. A more sound animal never lived—notwithstanding some reports to the contrary. Sunold's 2:10½ has detracted but little from his honor, but it cannot be denied that his owners and admirers are somewhat uneasy regarding Palo Alto. It is the honest opinion, however, of many (your correspondent included, if you please,) that if the William L. colt were given a chance on the Bay District track, under favorable auspices, he would knock certain records sky high I like California and her horses, and if I am prejudiced at all, it is in their favor; but in this case I candedly admit that were I to pick the fastest trotters in the world to-day, they would be Sunol and Axtell, and the toss of a coin would only decide my choice as to next season, if I were a betting man. All hail to them both; but if a life-long study of scientific breeding should receive its just reward, then the great filly should attain the fastest notch; and Senator Stanford's theory would be in the ascendent. It is a struggle between a 'phenomenal" trotter and a scientifically bred trotter—"may the best horse win.' Axtell has been taken to his winter quarters on Mr. Ijani's farm at Terra Haute, Indiana.

In charge of George Starr, Budd Doble's string leaves here next week for Fresno, Cal., over the Southern route. The string consistt of the pacers Johnston, 2:06¼, and Ed. Arwan, 2:16½; and the trotters Marie Jansen, three year old record 2:30; McD, 2:30; Maudlin, 2:25½; the great gray gelding, Jack, 2:15; Reina, three year old record 2:22¼; Gracie Lee, by Electioneer, three year old record 2:29¾; Heylin, three year old record 2:30; and the well known trotting mare Lady Bullion.

Johnston and Jack are looking splendid, and the little Ed. Arwan is looking as chipper as an unbroken cow pony.

The best of results are expectee in this string, after one of California's nourishing winters, and all will undoubtedly be in good fix for work next season.

LEON.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

R. J. H.

Will you ple se give the breeding of the dam of San Francisco Patchen and also record of the latter. Give also breed of Kentucky Hunter.

Answer—(1) Write to John Mackey, care Rancho Del Paso, near Sacramento, Cal. (2) Kentucky Hunter (Skenandoah) by Broken Legged Kentucky Hunter, son of old Kentucky Hunter, dam not traced.

C. E. C.

Will you please answer the following questions through the columns of your valuable paper. 1. What is the pedigree of Ashley, he trotted in 2:25¼ at Sacramento in 1884 I think. 2. Number of Plumas, register and pedigree. 3. Pedigree of Oregon George and number in register.

Answer.—(1) Ashley by Plumas, dam said to be by George. (2) Plumas 1699 by Werner's Rattler, dam Rose Thompson, pedigree not traced. (3) There is no horse of that name registered.

Fresno.

Please inform me if you can, the address of 'Samuel Gamble' who a few years ago was manager of the Cook Breeding Farm in Contra Costa Country, who is also a well known man among all horse men in this state. By doing this you will oblige.

Answer.—Mr. Gamble at last accounts was in Chicago, but he is expected back in California within a very short time. A letter addressed to him care of this office will reach him on his arrival.

S. C. B. Lakeview.

There is a dispute here as to the color of the horse "Arab." Will you kindly inform us what it is?

Answer.—Arab is a light bay.

G. H. B., Fresno.

Will you kindly inform me through your valuable paper the pedigree of Robson (thoroughbred), chestnut, five years old, formerly owned by T. Atchinson, now owned by Wm. Sutherland, of this city.

Answer—Robson, ch c, foaled 1884, by Joe Hooker, dam Lizzie Atchison by Norfolk; second dam Moss Rose by imp. Knight of St. George; third dam imp. Melrose by Melbourne; fourth dam Clarkia by Muley Moloch; fifth dam Sister to Righton by Palmerin; sixth dam Oceana by Cerberus, etc.

City Subscriber.

Webster defines half brother as being by one parent, but not by both. Upon what hypothesis do breeders of stock refute and conclude that two horses by the same sire are not half brothers?

Answer.—Horsemen, as a rule, call those half brothers and half sisters that are the progeny of the same mother by different sires—probably to mark a general belief that the mare plays a more important part in determining the general excellence or otherwise of the progeny. In crossing strains of blood that have hit, this distinction is marked. Numbers may have something to do with it, there being so many half brothers by a single stallion and so few by a single mare.

W. A. G.

Will you kindly tell me if a horse named Cumberland stood in California between 1860 and 1870; or if there is such a horse registered in thoroughbred stud book; also his pedigree?

Answer.—We do not know the horse you mention. The only one of the name in the stud book that could by any possible means be the horse that you allude to is Cumberland by imp. Scythian, dam Sally Roper by imp. Albion.

W. H. H. Visalia.

Will you please give me any information you can as to pedigree etc., of a gray mare Flora said to be by Gen. Taylor and to have a record of 2:30 made over the Oakland track. She was a grey mare with a brown spot on one hip. Her record was said to have been made many years ago. Perhaps some of your readers may remember her.

Answer.—The only grey Flora of which we have any knowledge made a record of 2:41 at Sacramento June 1st 1875. There is no pedigree given her. If there is, or was a Taylor mare that made the record you state, information can be obtained from Geo. Bement, Maple Grove Stock Farm, Walnut Creek Stage, Oakland. If you write to the gentleman address exactly as above.

Subscriber.

Please state age and pedigree of J. I. Case's stallion Phallas. Has Phallas ever produced a colt that has obtained a record of 2:30 or better?

Answer—Phallas, foaled 1877, by Dictator 113, dam Betsy Trotwood by Clark Chief, second dam by Ericsson 130. He has no representative in the 2:30 list.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

The Olympic club boxing tournament which ended on Saturday evening last was a grand success,

The athletics including runners, walkers, jumpers, oarsmen, swimmers and wheelmen after training hard for several weeks past are taking a few days rest before they enter the games during the comming week.

RUNNERS, WALKERS, JUMPERS, ETC.

Frank O'Kane's victory in the one hunered yards run at the University Games on Saturday last was quite a surprise to some of the sprinters.

Should it rain between Monday and Thursday next the Berkeley track will be too heavy for record breaking. As it is the track is very safe owing to the recent rains, but if the weather remains dry for three or four days the track will be in a pretty decent condition.

At the O. A. C. games next Thursday the sprinting event will be well worth witnessing. All the amatuer runners on the Pacific Coast are entered and exciting finishes may be anticipated.

The Bay District track has been entirely deserted by the athletes during the past week, owing to the wet weather. The O. A. C. runners and walkers, have been making good use of the indoor track in the gymnasian.

IN THE SURF.

The entries for the swimming races under the auspices of the Lurline Club, which will be decided at the Shelter Cove Baths to-morrow afternoon, are numerous. The entries will close this evening at the club rooms on Bay street.

The attendance at the Palace and Crystal Baths during the week was unusually large.

AT THE OARS.

During the week the Ariel and Pioneer crews devoted a great deal of time to training. The crews which will take part in the regatta at Sausalito on Thursday next are in splendid condition, and there is not the slightest doubt but that the record for four-oared shells will be broken.

The crew which will represent the Pioneer Club will be as follows: L Stevenson, bow; William H Growney, No. 2; Charles Long, No. 3. John Sullivan, stroke.

The Ariel crew will consist of Eugene Flanders, bow; Henry Tank; No. 3; H. Brown, No. 2; Al. Branch, stroke.

Henry Peterson has signified his intention of entering the single scull race.

The entries will close on Thursday next, Nov. 28th, 12 M. Oarsmen who desire to compete must send their names to A. S. Thompson of Sausalito before that time, and must state the name of the club to which they belong.

Should the weather prove fine to-morrow the scene in front of the Lurline Club House at North Beach will be a lively one. Crews from all the clubs around the Bay will be present.

W Growney, Fred Smith, John Muirhead, Leander Stevenson and Walter Blake of the Ariels and Pioneers will row over in their shells, while two Barge crews and a Lap Streak crews will also join in the procession.

The following crew from the Ariels will be on hand: J. J. Larkey, stroke; L. F. Nunan, 2; Ed. Finley, 3; H. G. Farrel. bow.

The following challenge was handed in late last night just as we were going to press:

ATHLETIC EDITOR BREEDER AND SPORTSMAN:—

I hereby challenge any and all professional four-oared Barge crews to row a three-mile rowing match on the Alameda mole course in best and best Barges for the sum of $500. Man and money to be found at 151 Taylor Street. The picked crew of the Dolphin preferred.

HENRY TANK.
Captain Ariel Rowing Club.

THE WHEELMEN.

The wheelmen have been unable to do much out-door practice during the week on account of the wet weather. The home-trainers, however, have been brought into use, and the boys are keeping their legs in good condition.

On Monday or Tuesday the track at Napa will be harrowed and then rolled, so that by Thanksgiving Day it will be in excellent condition for the race-meet.

The entries will close at 8 o'clock this evening.

For the ordinary Safety race, there are already six men entered. Seven Novices have signified their intention of competing in the Novice Safety race. It is generally believed that most of the crack riders back until the last moment.

Robert M. Welch has resigned from the Bay City Wheelmen. He has been tendered an honorary membership. Mr. Welch is one of the most enthusiastic wheelmen on the Pacific Coast. He was the first to introduce the Safety out here.

There will be a breakfast run of the Oakland Bicycle Club of '89 to-morrow morning.

Several new riders will make their appearance on the track next year.

CLUB JOTTINGS.

The benefit-exhibition of the Pacific Athletic Club, which will be held at the Mission Skating Rink, 2411 Mission St., near Twentieth, on Tuesday evening next, November 26th, should attract a large crowd of people. The sport will be good and wholesome, and a very fine programme will be given. The price of admission has been fixed at twenty-five cents. All the champion boxers, both professional and amateur, will lend their services.

Several well known amateur athletes will hold a meeting in the near future for the purpose of organizing an athletic club. The objects of the club will be to hold out-door meetings every month, and an in-door exhibition about every two months. The organization will be composed of young men of good social standing, and its chief aim will be to give athletic exhibitions both in and out-door to which the members may invite their lady friends with perfect safety.

We hope William Greer Harrison will withdraw his resignation as President of the Olympic Club. He should not allow the ungentlemanly conduct of a handful of ungrateful members to worry him. He is the best President the club has ever had since its organization, and the members should use every effort within their power to try and induce Mr. Harrison to re-consider his action. If his resignation is accepted, the members will sadly deplore his loss.

JOTTINGS FROM ALL OVER.

Donohue defeated Mack in a race of one hundred yards, for $300 a side, at Beacon Park, Boston, Mass, on Nov. 1, the race being won by a foot in 10⅘s.

Joseph Darby, the phenomenal English jumper, on Oct. 24, while fulfilling an engagement at Skating Rink, Ashton-under-Lyne, essayed the feat of beating the record for one and two single standing jumps, without weights. He proved successful, clearing 11ft 8½in. at one jump, and a distance of 23ft 11in. in two jumps.

Gus Guerrero has sent the following challenge to the New York Clipper:

BRIDGEPORT, Ct., Nov. 3, 1889.

EDITOR NEW YORK CLIPPER—*Dear Sir:* I see by this week's Clipper that Dan Herty has a challenge to run Geo. Littlewood, of England, a six days' go as you please race. Now I will state that I will enter a sweepstakes race, open to the world, to take place in New York City, in April, 1890, the race to be governed by the Sir John Astley rules. I would be very happy to have the opportunity of making a sweepstakes race, at $100 each, with George Littlewood, James Albert, and all of the good athletes, to decide the championship of the world. I am, yours respectfully,

GUS GUERRERO.

At Rochester, N. Y, Nov. 14th, E B. Treatman, a member of the Genessee Bicycle Club, who recently contested in the road race from Buffalo to Rochester, died from over-exertion in the race Deceased was 23 years old.

THE GROWING ACORNS.

Despite the chilliness of the atmosphere, which rendered heavy clothing and wraps necessary to insure comfort in the open air, there was a goodly crowd, including a number of ladies, at the first open games of the Acorn Athletic Association, held at the grounds of the organization, Fifty-sixth street and Second Avenue, South Brooklyn, on November 5th. The track was in good condition, and the sports, which were well managed, resulted as follows:

Seventy-five yards run—Won by David Sands, Pastime A C, 4 ft in 8 3 5s; C O'Malley, Jr, Acorn Athletic Association, 8 ft, second; E C Bowman, American A A, 2 ft, third.

One mile walk—Won by C L Nicoll, M A C, scratch, in 7m 15 2 5s; C F Lardner, M A C, 40s, second, in 7m 52s.

Four hundred and forty yards run—Won by A A McCausland, Prospect Harriers, 35 yds, in 56 1-5s; W C Johnson, Varuna Boat Club, 16 yds, second.

Two hundred and twenty yards run—Won by W P Slattery, S I A C, 13yds in 26 1-5s; George Jackson, Acorn Athletic Association, 12yds, second; J C Lally, Pastime A C, 12 yds, third.

Putting the shot—F L Lambrecht, Manhattan A C, scratch, first, 39ft 11in; J J Van Houten, New York City, 5ft, second, 34ft; P B Jennings, St George A C, 7ft, third, 32ft 3½in.

One mile run—Won by J McCrury, St George A C, 90yds, in 5m 2s; R. S Baird, St. George A C, 90yds, second; J F Wieners, Manhattan A C, 45yds, third.

Two hundred and twenty yards hurdle race—Won by J J Mullin, N Y City, 10yds, in 33 4-5s; P B Jennings, St. George A C 9yds, second.

Running broad jump—W P Henery, N J A C, 2ft. first, 18ft 2½in; P E Dehnert, S I A C, 2ft 6in, second, 17ft 6in.

There were nearly one thousand persons in the St. Henri Town Hall on Saturday evening, November 2nd, to witness a series of trials of strength between Louis Cyr, the champion heavy lifter, and Barre, another well known man in the same line of sport. Both men were loudly cheered on making their appearance on the stage. The first item on the programme was the lifting of the heavy dumb bells. Cyr was the victor, lifting a dumb bell weighing 265lbs to his opponent's 195lb. The next event was the most interesting one of the evening, and proved beyond all doubt Cyr's right to the championship. First, a platform weighing 140 lbs was put on the stage, on the top of which were placed seven dumb-bells, weighing in the aggregate 789 lbs, making a total of 929 lbs. Both men succeeded in raising the same from the floor. Next a barrel of flour weighing 218 lbs was also put on the table. This extra weight was also successfully coped with by the two men. Thirdly, a man weighing 175 lbs was added and lifted by them. Then three men weighing respectively 145 lbs, 155 lbs and 144 lbs, were put on the table, the whole affair now weighing 1,816 lbs. Cyr managed to lift the load, but Barre failed to do so and gave up. Cyr then had three more men, weighing altogether 562 lbs, making a total weight of 2,378 lbs added. Cyr, amidst breathless silence, approached the table, and putting his brawny arms around it, essayed to lift his heavy burden, which he did with apparent ease, rousing the enthusiasm of the onlookers to the wildest pitch. After a short rest Cyr once more appeared and went through a series of heavy lifting performances, the principal of which was the lifting of two dumb-bells tied together, weighing 479 lbs. He caught the rope in the middle, and with one finger lifted them some distance from the ground. This brought to an end one of the best entertainments of its kind ever seen in Canada.—Montreal (Can.) Herald.

Several hundred people shivered at the grounds of the defunct Brooklyn Athletic Association on the afternoon of Election Day, November 5th, the special attraction which had served to take them there on such a chilly day being the match contest between the all round champion athlete, Malcolm Ford, and his particular rival, A. A. Jordan. The match included three events only instead of the regular list at competitions for the general athletic championship, these being throwing the hammer, putting the shot, and throwing the 56lb weight. The result was in favor of Jordan, who won the hammer with a throw of 103ft 4½in, to 91ft 10½in for Ford; and took the weight with a throw of 21ft 11in to 21ft 10½in for Ford. As the agreement was that the winner of two events should take the prize, valued at $200, to be selected by the winner, this ended the contest in favor of Jordan, who was congratulated by his many friends among the crowd. The other events resulted as follows:

One hundred yards run, novice—Won by M Remington Nautical Boat Club; J Benson, American Athletic Club, second. Time, 11⅕s.

One hundred and twenty yards run—Won by E S De Lamm, Pastime Athletic Club, 7½yds; W M Christie, Titan Athletic Club, scratch, second. Time. 12 3-5s.

One mile walk—Won by Charles Wulf, Pastime Athletic Club, 30s; J E Keating, Pastime Athletic Club, 25s, second. Time, 7m 24 1-5s.

Running broad jump—Won by A Brown, Pastime Athletic Club, 3ft; Thos J Lee, New York Athletic Club, 2ft 6in second. Distance, 18ft 10in.

One mile run—Won by Charles Britton, A A C, 125yds; Fred W Kilbourn, of New Brunswick, N J, 110yds, second. Time, 4m 30 2-5s.

Two hundred and twenty yards hurdle race—Won by Bernard Strauss, A A C, 14yds; A Brown, P A C, scratch, second. Time, 27 1 5s.

Four hundred and forty yards run—Won by Clark V Mellen, New York City, 24yds; J V Connolly, B A A, 20yds, second. Time, 51 4-5s.

Half mile run—Won by H H Morrell, Pastime Athletic Club, 25yds; A B George, Manhattan Athletic Club, scratch, second. Time, 2m 1 4 5s.

One mile bicycle race—Won by F G Brown, New Jersey Athletic Club, 55yds; F G Burgess, Rutherford, N J, 40yds, second. Time, 3m 7 1-5s.

STUDENTS AT PLAY.

A fine day's sport on the campus at Berkeley. A large and enthusiastic audience encouraged the athletes.

The annual fall games of the University of California Athletic Club attracted about 3,000 ladies and gentlemen to the college grounds last Saturday afternoon The day from an athletic point of view was perfect. The track, owing to the recent inclement weather, was a trifle heavy and in consequence the time made the different running events was not as good as might be expected. The First United States Artillery Band was present and added much to the enjoyment of the day. Quite a number of students made their debut on the cinder path and the Olympians will need be very careful with their training previous to the championship games next May, in order to keep ahead of the 'Varsity. Moffett did not compete and his absence was greatly felt. The arrangements were perfect and great credit is due the Athletic Committee. Appended are the results:

120 yards hurdle—F W McNear '90, scratch. 1st, H M Willis Jr. '93, 7 yds. 2nd. Time, 19 3-5 sec.

100 yards maiden—R. Gallagher '91, 1st; H C Baldwin '91, 2nd. Time, 11 seconds.

Standing broad jump—S B McNear '93, 1st; D. Winter '92 and R Gammill '92, tied for second. Distance, 9 ft, 4 in.

Three-legged race—S B McNear '93, and E. J. Gates '93, 1st. Time, 12 3-5 seconds.

100 yards run—E Mayo '93, first; J. C. Ainsworth '91, 2nd. Time, 10, 3-5 seconds.

High kick—W J Terry, '90, first. Hight, 8ft 5½in, breaking the college record.

Two hundred and twenty yards maiden—E J Gates '93, first; S B McNear, '93 second. Time 25 3-5s.

Putting 16 lb shot—L E Hurst, '93 (3ft), first; I Bouse, '91, second. Distance 33ft 9in.

Running broad jump—F W McNear, first; H C Baldwin second. Distance 19ft, 8½in.

One hundred yard special Olympic—Frank O'Kane, first; S V Cassidy second. Time 10 3-5s.

Pole vault—H C Head, '91, first; E C Van Dyke, '93 second. Hight 8ft 3½in.

One milk walk—W Lubbert (40yds) first; A J Street (15 yds) second. Time 8m 26 4-5s

Two hundred and twenty yards run—E Mays, '93, first. Time 25 2-5s.

Half mile run—H C Head first. Time 2m 21s.

Running high jump—S B McNear, '93, first. Hight 5ft 1½in.

Four hundred and forty yeards Olympic special—W A Magee, scratch, first. Time 54 2 5s.

Four hundred and forty yards run—F W McNear, '90, first; A D Stoney, '90, second. Time 56 4-5s.

One mile run—A A Caldwell, '93, first; Phil L. Weaver, '91 second. Time 5m 4 2-5s.

One mile relay race—Won by the class of '90: F W McNear, C B Lakeman, E Coke Hill, A D Stoney and H. Howell;

The officers of the day were: Referee, Lieutenant G F B Harrison, U S A. Judges, Prof. F Soule, I A Hammersweet and John Parcell. Starter, G W Jordan. Judge of walking, F R Gibson. Clerks of course, H Dyer, '90, F T Hittell and E Coke Hill. Timers, Prof. F. Slate, I G Sutton; W McGee, Col. G C Edwards and W I Terry

GLOVED SPARTANS.

The amateur boxing tournament under the auspices of the Olympic Athletic Club which began Thursday evening Nov. 14 and ended Saturday last was in every way a decided success.

FIRST NIGHT.

About 2000 members and their friends packed the gymnasiam. The stage was elevated two feet from the floor. The ring was 24 foot and was excellently laid out.

The tournament opened with the heavy weight class. W. J. Kenealey O. A, C. 170 lbs. and J. Kitchen Jr, Acme of Oakland. 170 lbs were the first pair to face the audience, time was called at 8:05. Both men went at it hammer and tongs. In the first round there was much cliching on both sides In the second round Kenealey was floored several times and at call of time retired to his corner very groggy. In the third round Kitchen again rushed his man, but Kenealey who had freshened up a little retaliated in good style and struck the Acme man several good blows. Science however came out a head and poor Kenealey again retired very groggy. In the next round Kenealy received the quietus exactly one minute after time had been called. He was over matched as regards science, but made a game fight. Kitchen was at least three inches taller than Kenealey which gave him more advantage. Kenealey was completely covered with blood. This ended the heavy weight bouts as F. N. Zehfuss the only other entry was disabled owing to an accident.

The next bout was between M. Espinosa, O A C, and Frank Skuce, unattached, both bantams. The contest ended in favor of Espinosa, who displayed the most science.

F Bogan, G G A C and I W Donegan, unattached, also in the bantam class next faced the music. Both men proved themselves to be as quick as lightning and the bout was a hard fought one. Donegan was declared the winner.

Bantams, J Fitzsimons, unattached and E. B. Wilcot, A C. were next. Up to the fourth round the points were even. In the fourth round Wilcot had the advantage and held it. His science won him the bout.

J. F. Larkin, O A C, and A McSweeney, unattached, were the next aspirants for bantam honors. Larkin won. While waiting for the next pair of boxers to appear, Pres. Harrison addressed the members in regard to the new building on Post St. In less than 15 minutes, $17,000 worth of bonds was subscribed for, several members subscribing $2,000 each.

When boxing was resumed, E B Wilcox and J Donegan was declared the winner after a hard battle.

Larken and Espinosa were the next pair to meet. The former was knocked out in the second round.

J. Lucy, unattached, and R. Nicholson also unattached, were the first pair to fight under the feather weight class.

In the third round the bout was awarded to Lucy, Nicholson deliberately fooling him by trying to break his neck.

W. Kramer, unattached, and G F Green, O A C Juvenile, contested for feather weight honors.

At the end of the fourth round the points were even and an extra round was ordered. It was won by Green.

T. Rennilson, P A C and S Howard, O A C Juvenile, were next to follow. The bout was won by Rennilson.

The next bout was to decide the winner of the bantam class. Espinosa and Donegan were the winners so far. During the first four rounds the judges were unable to decide which of the men earned the most points and so ordered another round. Espinosa won the bout and the first prize. Donegan will get second prize.

SECOND NIGHT.

The first event of the evening was a continuation of the feather weights. E. L. Toadvin, unattached, faced J. G. Brady, O A C. Toadvin was declared the winner.

Following that J. Lucy, unattached, and T. Rennilson, P A C winners in the first preliminary bouts sparred off. Lucy won after a good hot fight.

T. McCord and S. Howard next sparred a bye.

The light-weight division next began with R. McArthur, O A C, and Otto Luhn, G G A C as apponents. Luhn quit in the third round.

G F Green, O A C, and E L Toadvin, winners in the first preliminary bouts of the feather weights, come on for a spar off. Green's strength and hitting powers won the bout for him.

H Gallagher, unattached, and C Bogan, G G A C, followed next in the first preliminary of the lights. In the third round Boyan received a smash on the jaw that knocked him out.

H Gendar, O A C, and H Mullen. G G A C, met in the third of the light weight preliminaries. Gendar easily got away with the boat.

McArthur and Gallagher, winners in the first light weight preliminary, then appeared for the second preliminary. McArthur apparently had the best of the battle but the judges awarded the victory to Gallagher.

P. Knack, unattached and J. D. Lafferty, O A C, were the first pair to spar in the welter weight class. In the third round Knack was unable to respond and the fight went to Lafferty.

The next event of the evening was a bout between John E. Mannix, unattached, and W S Nolan, G G A C. It was found necessary to order an extra round so even were the men watched. Mannix won by one point.

B Knack, unattached, and J L Lafferty, O A C, were the first pair to spar in the Welter weight class. In the third round Knack was unable to respond, and the fight went to Lafferty.

The last event of the evening was a bout between John E Mannit, unattached, and W S Nolan, G G O C. It was found necessary to order an extra round, so even by were the men matched. Mannit won by one point. This was the last event of the evening, owing to a dispute over the prelfminary winners in the feather weight. The final bouts in the feather weight class were postponed for thirty days. The audience was dismissed at 10:30 amid great excitement. Every one present was inclined to believe that the best bouts of the tournament were cut out of their evening's amusement.

LIST OF WINNERS.

Bantam—M Espinosa first, W J Donegan second.
Feather Weight—Decision reserved.
Light Weight—H Gallagher first, H Gendar second.
Welter Weight—J L Lafferty first, W Gallagher second.
Middle Weight—Robert McCord first, J Jones second.
Heavy Weight—J Ketchen Jr. first, W J Kenealey second.

THIRD NIGHT.

This being the winding-up night, the crowd present was even larger than on either of the previous nights.

Boxing began at 8:10. John Conlon, unattached, and W Gallagher, Acme A C, began the series of contests in the Welter weight class. This was a very bloody battle, which ended in favor of Gallagher.

J L Lafferty, O A C, and J E Mannix, unattached, gave the next exhibition. At the end of the fourth round the judges were unable to agree and a fifth round was ordered. Lafferty finally won. Both men were covered with blood and looked like Indians on the war path.

A bye was boxed by J G Brady and Thos. McCord, both of the O A C. The contest was awarded to McCord.

C Bogan, G G A C, then fought a bye with Harry Gendar, O A C. Gendar easily won.

R McCord, O A C, and J Jones, unattached, next tried conclusions.

In the second round Jones threw up the sponge.

H Gendar and H Gallagher next fought, and in the third round the former quit.

ROD.

Plenty of Salmon.

The run of salmon this year beats anything of the kind seen in ten years past. The river is not only alive with fish, but the creeks and gulches are full of salmon of all sizes from three to twenty-five pounds. Immense quantittes have been caught, and they are in good condition for food. In crossing Stillwater with a team one day this week the salmon were so thick that the horses almost stepped on them, and as they went between the spokes of the wagon wheels the water appeared to be alive. Thousands of them will necessarily perish as soon as the creeks dry up.—Redding Free Press.

Salmon Culture Costly.

[From the Toronto (Canada) Mail, Nov. 4.]

Fish culture in the great lakes has, it is believed, resulted in good. It has increased, so far as can be learned, the supply of whitefish. Salmon production by artificial means in the far East is not so successful. Mr. W. H. Rogers, who recently wrote to the Mail denying that the planting of salmon in the Pacific coast rivers produced the great run of the past season, is now out with a letter in which he calculates the results of the distribution of salmon fry in Nova Scotia. It appears that since 1882 7,174,000 salmon have been put into the Cape Breton rivers, yet no appreciable result is experienced by the salmon fishers. Mr. Rogers gives the cost of planting the fish, and, balancing it against the small additional yield, estimates that the artificially-produced salmon cost us $16 each, or at the rate of $1 34 per pound. Some time ago Mr. Rogers, who was a fishery official in Nova Scotia, left the service of the government. But his criticisms of the salmon-producing experiment are not novel. In his report for 1887 he calculates that every salmon produced through artificial means costs the country $8. It is, however, almost impossible to judge with accuracy the precise value of the hatchery system.

Blood and Breeding.

WRITTEN FOR THE BREEDER AND SPORTSMAN.

Since the very ancient period of Hippocrates, more than 400 years before the Christian era—the "Father of Medicine"—doctors have disagreed. It cannot be deemed singular, therefore, that the authorities on breeding horses for speed and endurance should still continue to disagree. As to running horses, only in which speed was made the desideratum, anything approximating to careful study in the breeding, and thorough methods in the training, cannot be clearly traced beyond less than two centuries ago. It should be taken into account that in that period of limited knowledge of the world as it is known to-day, from exploration and proofs of climate, soil and characteristics, the gathering of information embraced only Europe and the corner of Asia which Arabia occupies. The very few European explorers and travellers had found in Arabia the fleetest horses with greatest powers of endurance. Before that the horses of Barbary, introduced in Spain, had gained renown and were held at high estimation. In England, beyond any other country of Europe, speed and endurance were the ranking qualities to commend horses. Form and action—that which was showy—commanded attraction from royalty, from nobility and the aristocracy, and accordingly the greater attention was directed to the species. Only these could afford the purchase and procure the means of importation from foreign lands to supply their stud and enrich the native blood.

But there were rich men in England among the intelligent Commoners and some of these had superior pride in horses. In conjunction with the few nobles possessed of similar pride, they imported alike from Arabia and from Barbary the choicest stallions and mares that could be obtained. The speed testing qualities upon the turf began during the reign of Charles II. The Cromwellian period of Puritans and Roundheads would not tolerate it. The reactionary period of the Restoration wrought the change from perforced restraint to a liberty bordering upon licentiousness, to which the King himself was prone.

Arabian horses had been brought into the kingdom in the reign of the first Henry in the twelfth century, and King John imported from Flanders to recruit his stud for war horses, strong and capable of fatigue. But it was not until the enterprising Darley imported his famous Darley Arabian, the sire of Flying Childers, that what may be accounted thorough breeding for the turf became a distinctive class of culture in the horse. Still an essential quality, to learn the actual speed of horses, was wanting—that of time-pieces, by which to ascertain the minutes and the fractions of minutes. Now, even the seconds are split into quarters and less, and the reckoning is accurate This improvement in timing has had much to do with the rating of speed upon race tracks and the consequent reduction of records.

English turfmen have confined their breeding for speed and endurance, practically, to runners. They yield little attention to trotters. Nor do they hold the time-piece in hand to note the precise speed of the racer. The racers which make the better showing and best performance on the turf are the most prized, and the purity of blood in full line or in approved crosses is of first importance. Occasional and phenomenal trotters have appeared in England, but the breeding of trotters has never received attention as it has in America. Accordingly, while we must go back to England for thoroughbreds, it is to American blood, trans used, commingled, and untraceable as much of it is, that the qualifications of the trotter must be assigned. The origin is beyond accurate trace, the pedigree is questionable. It is only in performance, and in the prevailing traits through transmission for generations, that sound judgment can at length be seasonably founded. Whether the American trotter sprung from the Barbs brought from Spain by Cortez and other early Spanish conquerors and adventurers, or from the stock imported by the primitive settlers from England and the Netherlands, or is of the issue of the native Indian horses, remains the unsolved problem. It is noteworthy, however, that the trotting quality of the horse was made manifest in the northern portion of the continent, embracing the Canadas, and that it is still most remarkable in the latitudes north of the tropic of Cancer. With this quality, breeding and training had no appreciable agency. It was in the horse, as stature, brawn, bone and physical superiority, existed in the men of northern climes.

The debated question now is, whether the great trotter of the future—who shall make the mile in two minutes—shall be phenomenally bred from this undefinable American stock, without clear pedigree, and simply an individual marvel, or, shall be the result of studious breeding, from thoroughbred lines and through judicious crossings? The training, in either case, will not be disputed, as a very material factor. It is, however, the blood which tells. Since science has demonstrated that in heat is force, it is fair reasoning to assume that warm blood imparts more of activity, of vigor, of energy, and of everything which contributes to and accelerates motion, than cold blood. With these controlling attributes to speed comes the more essential quality of endurance—which warmth supplies and chilliness impairs, if it does not destroy.

No breeder or turfman need be told that in trials of speed, it is the horse of warm blood which outlasts in heats, and that the "cold strain" at length causes the high-grade horse to succumb. Unless this single fact proved the rule in every test, it might be held as accidental. But as it is a rule almost without exception, it must be held as strong inferential demonstration. Reasoning, accordingly, from the last to the greater cause toward effect, one cannot reasonably reject the conviction that to the production of the ultimate greatest performance in trotting—the same as in running—there must be a supremacy of warm blood; and that every drop of cold blood impairs the winning qualities.

But breeders, the same as doctors, disagree. Who shall decide? In the light of recent performance, premonitioned and upborn by the evolution of similar performances within the past forty years, it is not too much to assert that the better thorough sentiment is already authorized to declare decision, *ex-cathedra*, as it were. Those who cling to the early ideas of the phenomenal trotter, of which Lady Suffolk was the best type—with her mile in 2:26¾, under the saddle—are involved in the ugly predicament of supporting their theories with proofs. This is a practical and material Age, and ideal Faith has no standing in the presence of developed Fact. The breeding which has produced trotters within forty years to reduce the mile speed from 2:26¾ to 2:08¾—a total of sixteen seconds—requires no aid to its grand laudation. The performance is its own proudest testimonial. Yet this evolution is not phenomenal. Thirty years ago the number of trotters which could speed a mile in less than 2:40 was very small. It was not until within twenty-five years that any trotted in 2:20. Dexter broke the record to 2:18 in 1866; in 1876 Ethan Allen lowered it to 2:15, Goldsmith Maid reduced it to 2:14 in 1874. Dozens of trotters have since made the mile in 2:20 and less. On this Pacific Coast, 1873, Occident went in 2:16¾; later, St. Julian made the mile in 2:12¾, and at the East Jay-Eye-See has lowered the time to 2:10.

All of these performances were made by aged trotters. California now comes to the front with records which excel the world—the yearling filly, Norlaine, 2:31½; yearling stallion, Faustino, 2:35; two year old stallion, Regal Wilkes, 2:20¾; and the three year old filly, Sunol, 2:10½. Only Maud S and Jay Eye See, both aged, have made the mile in less time than Sunol. These record breakers are to the credit of California. Also, among the breakers of records and fast trotters of California breeding are Palo Alto, 2:12¼, and Stamboul, 2:12¼. The breeding farms on which these trotters were foaled and bred—Palo Alto, San Mateo, Pleasanton and Rosemead—are among the famous of the kind in America. On these farms are Electioneer and Benton, Wilkes and Sultan, besides other great sires, and among the dams are descendants of Abdallah, Hambletonian, Lexington, Boston, Harry Clay, George Wilkes, Lady Benton, Clay Pilot, George M. Patchen, Goldsmith Maid, Alice Carneal and Waxy. The direct lines of thorough blood and the careful selection in the mating have on each of these breeding farms satisfactorily demonstrated that the supremacy of thoroughbred blood is of uppermost importance in the breeding of trotters, not only in the instances of these that are named herein, but in the full product of all these farms, and in the many sons and daughters throughout the State and at the East which were bred thereupon. Taken altogether, the method of breeding adopted on these great California farms, of themselves, stand as invincible proof in support of thoroughbred breeding

It should be borne in mind that the breeding of trotters is comparatively, of recent date. Under the old method the trotter was discovered only through performance, and then followed the training for the turf, such as it was, agreeably to the fancy of owners and trainers. The horse was aged before he was put upon the turf. The idea of breeding trotters was not entertained, the trotting of colts and fillies was not thought of. It was the individual that developed speed that was prized; little heed was paid to pedigree; performance alone gave the value. Of these performers Lady Suffolk was the most famous. But since her time the breeding of trotters has grown into practical methods, the same as the breeding of thoroughbreds and the results are before the world, to approve the system in the gradual lowering of records, from the 2:40 speed, down to that of classes of 2.30, 2:20, and performances such as those of Axtell, Palo Alto, Stamboul, Regal Wilkes, Jay-Eye-See, Sunol and Maud S And now the belief is strong with experienced horsemen that the mile will yet be trotted in two minutes. Another thing to consider, to wit; Under the old system trotters were held in low value, compared with the estimation in which they are now held. Less than $2,000 would have bought the best trotter on the turf forty years ago, and the average trotter commanded a sum only in the hundreds. A yearling or a two or three-year-old, was not in the market. Even old turfmen were amazed and dumbfounded when Bonner paid $30,000 for Dexter, and Bonner himself was so confident that the 2:17¼ could not be beaten that he made public offer of a larger sum for the trotter that should beat it. He failed to make his offer good when the event occurred. Gloster, Rarus, Lulu and Goldsmith Maid subsequently lowered the record, and since their day, it has been lowered down to the 2:08¾ of Maud S—which will be further lowered during the coming year, as many think. Since the sale of Dexter, a little more than twenty years ago, sales of trotters have been made at prices from low thousands all the way up to $105,000—the price paid for Axtell. Large sums—from $20,000 to above $50,000—have been paid for yearlings and for two-year-olds. It is not for the individual or the extraordinary performance, that these grand sums are paid.

It is mainly on account of the pedigree and blood for breeding as well as the turf. The establishment of the standard, by which to rate trotters, is another consequence of the new system adopted of recent years, and it also adds to the valuation of the trotter. To the introduction of thoroughbreds in the breeding of trotters, in place of the old system of rating them solely by their performances upon the turf, must be attributed the great improvement in the horses, and this improvement carries with it the establishment of breeding farms, the employment of intelligent and skilled trainers and expert drivers, thereby causing improvement in the men as well as in the horse. Furthermore, these breeding farms add materially to the industries and to the wealth of the country. The annual sales aggregate millions. The improvement in horses is of incalculable benefit and the better treatment of the animals is not to be overlooked. In reckoning the sum of all this good, in distinctive and in public aspect, the conviction is irresistible that thoroughbred breeding in trotters is the better method and produces the superior trotter in every respect. The proofs are all to this purport, and there are no proofs to sustain the contrary proposition.

What Axtell's Owners Think.

"Were you surprised at Sunol's performance of 2:10½ Saturday?" asked a correspondent of W. P. Ijams, one-fourth owner of Axtell, the $105,000 stallion.

"Not in the least," said Mr. Ijams. "I was neither surprised nor chagrined. At the Chicago horse show last week, Conly, Doble and myself were talking over the matter, and we concluded it more than likely that Sunol would lower Axtell's record of 2:12. There were many reasons for this belief. We had been appraised of the care that was being taken of the track and the great amount of work put on it. The month that has intervened since Axtell made his great record here is virtually like trotting the filly in her four-year-old form, from the fact that while the raw autumn weather precludes working horses in this climate, the Californians can work their horses until January 1st. Sunol has had steady work for the past month, and this, with perfect conditions of track and weather, made it possible to lower the record. I do not say this in detraction of Sunol, for she is a great performer.

"But it does not detract from Axtell's marvelous performance. The ease with which he made his mile, finishing with but one light touch of the whip and cooling off without a puff on his legs or a sign of distress, shows that he could have trotted the mile much faster if he had been driven out. On the other hand you will notice that Sunol had the gad from the three-quarter post to the wire, and was driven hard for the finish." Speaking of Axtell, Mr. Ijams said that the colt would be here Wednesday for the winter. Early in April Doble's string of horses, consisting of about twenty of the finest horses in the country, will be brought here for work. Doble will come here with his horses, and will also work Axtell preparatory to taking him down the grand circuit, which opens at Detroit in June. Mr. Ijams says he has every reason to believe Axtell will show great speed next year. He is sure to be a drawing card on the grand circuit and wherever else he may go.

THE FARM.

How Far Should Crossing Go?

Crossing in sheep should go just as far as it is a cross, but no farther. There has never been a finer cross than that between the Border Leicester ram and the Cheviot ewe. The rams from this cross, at the shows in Scotland, are formidable rivals to the pure breeds, showing all the symmetry of the sires, with the hardiness of the mothers. The rams are found very valuable for crossing on the smaller cheviot ewes, the lambs being much superior, though having only one-quarter Leicester blood to the produce of pure Cheviot rams and ewes. But though understanding perfectly the value of a cross, these skillful shepherds are very careful to avoid raising mongrels. They breed in line, stopping generally at the second cross, and those who mean to follow sheep raising should be careful to study and, as far as practicable, follow their practice.—Winnipeg Farmer.

Prolific Improved Cattle.

We hear it charged at times, says the editor of the Iowa Homestead, that improved cattle are shy breeders. While it is true that some of them are, just as are some grades and scrubs, and that the tendency to shy breeding runs in families, our experience has been that on the average our short horns are even more prolific than our grades. We have on one of the Homestead farms had three pairs of twins from high bred shorthorn cows, dropped in a little over a year. In eight years handling of grades, on the same farm, there has been but one pair of twins. One of these cases of twins was from a very fine bred Young Mary, twelve years old, that has now four living calves under twenty-seven months old. Another was from a Miss Ramsden, ten years old, and another from her daughter, seven years old. We had a despised Seventeen that dropped a calf Nov. 5, 1885, another Sept., 1886, another July, 1887, another May, 1888, was drowned within two weeks of calving, March, 1889, and was thirteen years old when she died. Her calf of July, 1887 had a calf early in 1889. We might mention a good many cases of rapid multiplication of shorthorns and other improved breeds, both in our own herds and those of other breeders. We have said enough to show that the vice of shy breeding does not depend on the breed, but on other considerations altogether. As a rule good milkers are prolific breeders, while cows with a masculine look are shy and unprofitable breeders. The first consideration in a cow is that she should be a cow, and have the feminine, motherly look and the wide flank that indicates maternity, and not the tucked, trim appearance of the typical show heifer.

Breeding Draught Horses.

A paper on this subject was read by Mr. Ferguson Lessendrum, at a meeting of the Strathbogie Farmers' Club. The subject, he said, the breeder has in view is to produce an animal that will yield him the greatest profit, and looking to the fact that it cost as much to rear a bad beast as a good one, the first principle that "like produces like" ought to be well remembered in laying the foundation of a breeding stock. Only the best material that can be consistently procured should be selected; rejecting entirely those animals showing hereditary unsoundness. Where a foundation already exists, much may be done to improve the produce by judicious mating—selecting horses strong in points in which mares are weak, and vice versa. More consideration than has lately been given will be necessary in respect to shape and constitution of horses. Mares ought not to be served until they are three years old, and unless they are strong even then may be wisely left to another year. Before service particular attention should be paid to the state of the mare's system, for unless they are in a healthy state it is useless to expect them to breed.

At the ordinary season they have every likelihood to be deranged more or less, seeing that then they are at the hardest work of the whole year, and naturally consuming a maximun of food. Where a derangement is expected to exist, the animal should be thrown idle or comparatively so, and measures taken at once to restore her to fecundity. Prevention is always better than cure and to avoid such derangement, ought to be supplemented in part by mashes of a laxative nature and a little nitre given twice a week during the winter season. Too often the want of produce is laid to the horse's account, when the blame lies wholly with the mare. In selecting a stallion it is a penny wise and pound foolish policy to employ any but the best that can be had, unless of course, the terms are all the more extreme. Ten dollars more paid for a right good horse may be expected to be returned many times over when the produce comes to maturity. When stallions of sufficient merit cannot be had—this applies particularly to our State—breeders should join together and use their concentrated efforts to procure what they want by either hiring or purchasing. By hiring a horse a chance can be had every season as desired, but unless a guarantee of a certain number of mares can be got up a really good horse cannot be had except on extravagant terms. It is essential also to have a limit to a number, for if a horse chance to find favor and get in repute, the consequences would be that he would get over-employed and in proportion less sure.

In purchasing, the great difficulty lies in securing a proper animal; the surest investment would be a horse with an established reputation as a getter. When mares are known to be in foal their work and feeding will need to be carefully regulated. After foaling they must get a liberal allowance of food of a succulent nature to induce the flow of milk, and as soon as the weather and season will permit be put out to grass Before weaning, the foal should be handled and made accustomed to stall feeding. Foals ought to have their food given them sparingly and frequently, only as much being put in at a time as they will take clean up They ought to have plenty of exercise when the weather is dry, and when shut in for the night they should be put in airy places. As to the financial aspect, 7½ pounds of a well balanced mixture of oats, barley, bean and bran, has been found to be sufficient daily allowance for a colt during the winter months, the cost of which is nearly 75 cents per week. Take service at $10 and $10, and allow $10 more for slips, gives $30; grass for mare and foal $25; twenty-eight weeks for winter feeding at 75 cents, $21; twenty-four weeks first summer's grass, say $15 75; twenty-eight weeks second winter at 75 cents, $21; twenty-four weeks second summer, say $18 75; twenty weeks third winter, up to barrowing time, at 75 cents, $15; incidental expenses, say $3 50—$150. This figure represents fully the present value of an average non-pedigreed three-year-old. Good strong colts are worth more, and will continue to increase in value until they reach maturity, when they may be sold at a price both pleasing and remunerative to the breeder; while inferior ones are, from the time they are able to work, both a dead loss and an eyesore to their possessor.—London Ag. Gasette.

Favoring American Meat.

A strong movement has been set on foot by English butchers to have removed the restrictions upon the importation of American cattle Of a late meeting of the Mancester, Salford and District Butchers' Association, a reporter says: "The deliberations lasted a long time, and nearly all the speakers condemned the present law as unnecessary and unjust, it being pointed out that the importation of cattle from America was increasing enormously, that the animals were particularly strong and free from disease, and that compulsory slaughter at the different points of debarkation was unfair, alike to American farmers, English dealers and consumers and trades generally. It was unanimously agreed that the restriction ought immediately to be removed in the interest of all parties and that the strongest measures must be taken with the object of effecting the desired reform." It has been patent to even casual observers from the beginning that the charges of diseases among American cattle were for an ulterior motive, and their exclusion as live cattle was merely a measure for the protection of English farmers. British-American cattle from ranges adjacent to our own are admitted free of restriction; and it is plain that if a case of disease were found among the thousands of our cattle taken there we would hear of it, as all these cattle are inspected. The ban amounts simply to a hardship upon American owners without effecting benefit to any British subject.—N. W. Live Stock Journal.

Importing Butter.

Reports show that in the first ten days of October, Los Angeles received five carloads of butter from the East and has imported 227,000 pounds of butter in the past six months. These things ought not to be. During the flush days of the boom, when we put in our time laying out town lots, building hotels and entertaining an eager throng of tenderfeet, there was some excuse for the importation of supplies These are somberer times now, and we don't feel that it is as much of a disgrace to raise alfalfa and keep cows as we did in those days. When Los Angeles is importing nearly twenty tons of butter a month, there is no sense talking about the country's not having any opening for men of moderate means. Good dairy land, plenty of it, can be bought at reasonable prices, and good butter is sure of a market. There is lots of room in Southern California for fancy fruit growing, and the cultivation of the fig, the olive and the orange have an intellectual charm; but there is also ample opportunity for the profitable production of such staples as butter, eggs and corn. Let any man on our valley lands, bring to general farming the same enterprise and skill that has made orange-growing so successful in such localities as Riverside, and he may be sure of a comfortable living, with a priceless lot of climate thrown in.—Ontario Record.

Why and How Wool Varies.

There is a great deal of difference in the climate for producing wool, whatever is said to the contrary. This is demonstrated beyond the shadow of a doubt. Some of the New England mills pay a slightly higher price for wools coming from the region that embraces southern Ohio, western Pennsylvania, and portions of western Virginia, than any other part of the United States. There is a texture to it, a slightly different feel which manufacturers understand. There is a change in the wool if sheep are transported from those regions to other portions of the United States which are a little drier, whether it be directly due to the breed. One of the manufacturers of New England said he had been in the habit of buying wool of a certain farmer in southern Ohio. As the farmer's family grew up and swarmed one of the sons went into Kansas and carried with him a portion of the flock of the old farm. The manufacturer bought wool of both father and son, and gave me a sample not merely from the same flock, but the same individual sheep, taken two or three years apart, one when the sheep was an inhabitant of Ohio, and one when it was an inhabitant of a pretty dry portion of Kansas. They were colored in the same dye, the same mordant was used, the same vat, and yet there was a big difference in the wools. A gentleman of large experience in Virginia told me almost precisely the same story. He himself had attempted the growing of sheep with the purpose of getting wool just as good in one region as he had got in another, and failed.

There is considerable difference in the quality of wool produced in different climates that is due to the climate itself, directly or indirectly, and the food that is produced in that climate It may be brasher, there may be a certain harshness about it, and it may not manufacture quite so well. Now, while sheep are long continued to be bred in the poorer of these climates, they deteriorate unless the blood is kept good by an infusion from the better regions. And that is what will give some regions perpetually an advantage in certain kinds of stock growing over others; it will always be to their profit to produce animals to go somewhere else, just exactly the same as farmers living in one region may grow seed grain to be used in another.—Prof. W. H. Brewer.

Science in Agriculture.

There is many a man on the farm even in this enlightened age who feigns to believe there is nothing to be learned from newspapers about farming. But by and bye it is a noticeable fact that these men get on but poorly in this world. What they they do accomplish is by brute force and awkwardness. When we related that Mr. Coulehan of Wheat Ridge, had by scientific methods produced five hundred bushels of potatoes from the single acre of ground many of these old fogy fellows jumped up to say that it had not been done and there was no science in agricultural. Said one of these wise fellows: "I have raised pertaters these five and twenty years, and will say the only way to get a big yield is to plant in the full of the moon. And even a hundred bushels to the acre is a big crop."

Peter Henderson says a well read man can go to farming and in two years can learn more than one of these moon farmers can learn in a lifetime. Ignorance and prejudice form a shell that is hard to break. An intelligent farmer can accomplishla good deal in a short space of time and on a small amount of ground. He knew as asparagus grower near Atlanta whose crop gave for three successive years a net profit of $1,500 per acre; and as instancing departures from old methods, cites the case of a farmer residing near Rochester who, half a dozen years ago, timidly made the attempt of growing a half-acre of his fifty-acre farm in vegetables for the village market. His venture was so satisfactory that he gradually increased his area, so that he now uses thirty acres mostly in growing cabbage for the Rochester market.

He further informed me that the net profit from the cabbage garden last year was $6,000, or a little over $200 per acre, and that it was not a very good year for cabbage at that. And for that encouragement of those not "to the manor born," the same authority gives following case as being within his personal observation: "A college-bred man of twenty-eight, failing in health from office work, purchased a farm of sixty acres at Northport, L. I. The same year he tried a few acres in vegetables and small fruits, which he found sale for in the small village of Northport at more satisfactory prices. I was on his farm in the summer of 1882, and I must say for a man who got his knowledge almost wholly from books, his venture looked as if it would be a complete success."—Denver Field and Farm.

Keeping Stock in Good Condition.

The profit of farming, says the American Cultivator, as we have often remarked, depends more in these days upon the kind and condition of farm stock than any other one factor. At the approach of winter especially the condition of stock becomes a matter of the greatest importance. It used to be common to let animals run down in flesh at this season, not purposely, but because the farmer thought that as long as cattle and sheep could get a living on frosted grass, it would be a waste to take them into the barn and feed them. But it is much more easy to retain fat and flesh upon animals than it is to regain either after a period of starvation. During the running-down process there is weakening of vitality, and especially of the digestive organs, until at last even an abundance of the most nutritious food does the animal no good. Animals past their prime and whose vitality is naturally small, suffer worst. We have seen old sheep and even old cows get so poor in the fall that the most tender care during the winter would not save them until spring.

These are extreme cases, of course, but it is reasonable to suppose that any falling off in condition must result in some loss. Not that animals, especially those intended for breeding, should be fattened. Fat is not thrift. It is the hearty and in young animals growing condition that should at all times be fostered. There should always be an abundance of nourishing food, enough to properly distend the stomach, and give the digestive organs abundant exercise. This is especially necessary for animals bearing young, and that for a reason not often considered. The ability to feed well, important as it is known to be, is largely hereditary. We see this in all animals bred especially for fattening characteristics. Take the most thoroughly bred Shorthorn cow, herself an excellent feeder, falling into the hands of a careless, negligent farmer, and half-starved during the time she is bearing her calf, and what is the result? Nine times out of ten she will bear a scrub, inheriting not the thrifty characteristics of either parent, but bearing through life the conditions imposed on it during its prenatal existence by the starvation and suffering of its dam.

We have been much impressed while visiting fairs this year with the fact that the excellence of stock, no matter how thoroughly it is bred, must after all mainly depend upon the care and skill given to caring for it. Men sometimes say that people usually make for themselves the conditions of life. If this is true anywhere, it is especially so in stock growing. A careful, skillful and intelligent farmer will have good stock, even though he do not indulge in fancy and expensive strains of thoroughbred and registered animals. What he has will constantly and steadily improve in all desirable qualities. Such a farmer is blind to his own best interests, if in these days he does not avail himself of the progress that others have made, by purchasing, or at least using, pedigreed animals. But in the olden times, when pedigrees were unknown, the difference in farm stock of the good farmer and of the lazy and careless one was nearly as marked as it is now. The good farmer's stock grows better, while the other as steadily grows poorer.

Even for milk production, as is well known to most farmers, a hearty, thrifty condition is quite as important as it is for the production of fat. No cow was ever a good milker, or of much value for dairy purposes, that was not a good feeder. We may say the same of any animal bearing young The size, vigor and vitality of the unborn animal are fixed by the conditions of its dam while bearing it.

Many valuable colts are lost every year for the want of a little care. Hundreds die for lack of condition if colts are fed liberally and kept growing constantly from birth, there is not much danger to be feared fromworms. Yet it is always best to be on the safe side, and use all harmless means to prevent every form of sickness and suffering. Some Kentucky breeders practise mixing a little pulverized copperas with salt and placing it in boxes where the colts can help themselves as they like. Two tablespoontuls of pulverized copperas to a pint of salt is sufficient. Horses suffering from worms can be cured in time by feeding a teaspoonful of powered gentian every night for two or three weeks. It can be mixed with oats or turned down the throat from a bottle. Copperas and gentian is an excellent tonic. Breeders will do well to keep a small quantity on hand. Get the druggist to put up four ounces each, compounding in his motar so as to mix it thoroughly. Put the powder in a small box or wide-mouthed glass jar, label it, and when needed give to grown horses a teaspoonful in their feed at night, A yearling will require about one third as much as a grown animal, and weanlings a much smaller quantity.

Notes.

It is estimated that $1,000,000 will be invested in irrigating ditches in New Mexico this year.

Mr. Appleton's Jersey cow, Eurotisama, is now undergoing a yearly test for butter, and the Jersey Bulletin tells us that for the first twenty weeks she averaged 22 pounds 4 ounces of butter per week—a total for the twenty weeks of 490 pounds. At this rate she will make her weight in butter during the year.

If scrub stock does not pay try something better. The success of stock raising depends on the breed. A steer of beef-producing breed will weigh one thousand pounds, while a scrub steer of the same age will not reach one-half that weight. The large difference shows where the loss occurs from the use of the scrub.

James Nichols of Jackson Valley, has purchased a Jersey cow and calf at Sacramento, and two thoroughbred Holstein calves at Galt, and removed them to his ranch. A. D. Westmoreland, also of Jackson Valley, got a thoroughbred Berkshire boar a short time ago. Jackson Valley promises soon to become the home of thoroughbreds of all classes.

In a three days' trial of dairy cows at the Nebraska State Fair were six Holsteins, one of which was sick, and two Jerseys. Nip, a Jersey, made 3.08 pounds of butter; Kathrine, a Jersey, made 2 03 pounds; Empress Josephine 3d, Holstein, made 5 15 pounds; Hortense, Holstein, made 4.43 pounds; Blanche S., Holstein (sick), made 2.29 pounds; Jewell, Holstein, made 5.56 pounds; Rijaneta, Holstein, made 5.88 pounds, and Jewell 2d, Holstein, made 4.39 pounds of butter in the three days' test.

CHAMPAGNE

W. B CHAPMAN,

Sole Agent for Pacific Coast.

For sale by all first-class Wine Merchants and Grocers.

To Horse Breeders and Stockmen.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 857 acres; one mile frontage on Clear Lake; 340 acres alfalfa land; 120 acres now seeded to alfalfa, cuts six tons per acre; 70 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,000; three barns, capacity 350 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cold spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

THE IMPROVED NOYES ROAD-CART.

PATENTED JULY 17, 1883, AND JUNE 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheel—a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17¾ and Chanter a half-mile in 1:10¼ to a Noyes Cart, says he would not take $250 for it if he could not get another; W. J. Gordon, Glenville, O.; W. B. Fasig, Cleveland, O.; Dave Muckel, Cleveland, O.; R. J. Moorehead, North East, Pa.; W. J. Chamberlain, Cleveland, O.; H. P. Malone, Bradford, Pa.; S. A. Brown & Co., Kalamazoo Stock Farm; Charles Marvin, Menlo Park, Cal.; W. H. Crawford, Lexington, Ky.; S. L. Caton, who gave Bell Boy a mark at Los Angeles, Cal., of 2:19¼, and drove Chanter a half mile in 1:06¾ and Lowland Girl a full mile in 2:22 to a Noyes Cart; Mike Bowerman, Lexington, Ky.; James Golden, Medford, Mass.; John E. Turner, Philadelphia, Pa.; T. L. Newton, Beaver Dam, Wis.; P. V. Johnston, Marshall, Mich.; W. H. McCarthy, Los Angeles, Cal.; A. W. Dennison, El Dorado, Kan.; P. O. Shank, Cleveland, O.; Charles Barnard, Boston, Mass.; Johnson Bros., Greenville, Mich.; John G. Avery, Buffalo, N. Y.; General R. L. Howard, Buffalo, N. Y.; Howard Conklin, Buffalo, N. Y.; W. D. Ham, Hennepin, Ill.; R. G. Henry, Waterbury, Conn; J. E. Hayer, Newburgh, O.; J. C. Hart, Jefferson, Tex.; A. W. Harbison, Rock Point, Pa.; Carl Hodges, Battle Creek, Mich.; Barney Treacy, Lexington, Ky.; George Forbes, Cleveland, O.; Gifford Dudley, Topeka, Kan.; William and J. L. Thompson Lamont, Pa.; C. F. Emery, Forest City Stock Farm, Cleveland, O.; R. F. Jones, Minneapolis, Minn.; John Forbes, Elyria O.; D. J. Downs Battle Creek, Mich.; Frank Caton, Randall Station, O.; Arthur D. Sutton, Ind., Pa.; W. F. Neely, Grand Ridge, Ill.; Walter Clark, owner of Pilot Medium, Battle Creek, Mich.; H. R. Kingman, Battle Creek, Mich.; Dr. Sutton and H. C. Reed, Kalamazoo, Mich.; Budd Doble, Chicago, Ill.

BILLIARDS.

We have received a copy of the book entitled The McCleery Method of Billiard Playing, just issued by Payot, Upham & Company, and in justice to the noted expert must say that it is the most perfect work ever issued on the subject. The long lectures in the old books have been left out, and excellent illustrations, to which are added short instructions, are published instead. The book is a valuable acquisition alike to amateur and professional, and can be purchased for the small amount of one dollar. Professor McCleery is the manager of the Baldwin Hotel Billiard Parlor, the most handsome in the United States, and every evening his exhibitions are eagerly watched by the billiard enthusiasts who nightly throng the rooms.

J. R. Heiser has commenced practice for the proposed great handicap balk line tournaments for January next. He scored a run of 174 Nov. 2.

Schaefer won every game he played in the fourteen inch balk line handicap which was played in St. Louis during the Winter of 1888. The handicap was in points on the string, not in lines as proposed for the coming great tournament. There were ten contestants in the St. Louis tournament. It was great sport for Schaefer, but very uninteresting for the spectators and the tournament was, financially, a complete failure. Will the New York tournament be a failure also?

Frank Ives defeated Thomas Gallagher in Brunswick Billard Hall Chicago last week, in a five nights contest at 14 inch balk-line billard, 1 500 up in blocks of 300. Score, 1,500 to 1,340; grand average by Ives, 10.20-93; his best single average 15.1-23.

It is announced that Carter has forfeited to Ives the emblem he won last year in the Chicago lightweight tournament at 14-inch balk line billiards, on account of Carter's refusal to accept Ives' challenge, recently issued, for a contest for the emblem.

Al Smith and Richard Roche announce their intention of getting up a cushion carroom tournament for this city, wherein they will hang up $5,000 for the experts to battle for. They name dates in February, should they succeed in organizing the tournament.

Last Friday evening there was a large attendance at the Cafe Royal, to witness the game between J. F. B. McCleery, of this city, and Ben Saylor of San Jose. The match was for $1,000 a side, even up, and was the result of a game which took place some weeks ago, in which Saylor proved the victor. In the Friday night game he was not in it, for "Mac" proved to be in grand form, the wind up showing the score to be McCleery 1,000, Saylor 404. Thirty-two innings were necessary to complete the game, and the highest run of the evening was made by the winner, 612 points.

Billiard items are always acceptable, and I trust my readers may send many of them to CLENDENYONE.

Have Arrived.

Thoroughbred Clydesdale Stallions and Mares.

SAN MATEO STOCK FARM

HOME OF GUY WILKES,

Record, 2:15 1-4.

Guy Wilkes' Book is full for 1890, and positively no more mares will be received. Book now open for 1891, at $500 the Season.

Sable Wilkes, three-year-old record 2:18, will be allowed to serve 25 mares in addition to those already engaged at $250 the season of 1890. SABLE Wilkes, 15½ hands, black horse, by Guy Wilkes, first dam Sable by The Moor; second dam Gretchen by Mambrino Pilot; third dam Kitty Kirkman by Canada Chief; fourth dam by Fanning's Tobe; fifth dam by imp. Leviathan.

Leo Wilkes, brown horse, four years, 16 hands, full brother to Sable Wilkes, will be allowed to serve 30 mares at $100 the season

Mares not proving with foal may be returned the following season free of service fee. Parties engaging the services of any of the above horses must send a deposit of 10 per cent. of service money with engagement. Pasturage $6 per month, and when the condition of the animal requires it, hay or grain, or both, are fed, the charge will be $12 50 per month. Good care will be taken of all mares sent to the Farm, but no liability will be assumed for accidents or escapes.

All bills are due at time of service, but must be paid by August 1st of each year. No stock will be allowed to leave the place until all bills are paid.

Coney Island Jockey Club, SHEEPSHEAD BAY, L. I.

1890

THE FRIENDLY STAKES

To Close DECEMBER 2d, 1889.

A Sweepstakes for 2-year-olds, Foals of 1888,

To be Run at the Summer Meeting of the Washington Park Club, Chicago, and at the Autumn Meeting of the Coney Island Jockey Club, at Sheepshead Bay, L. I.

Of $50 Each, h. f.; $3,000 to be added by each Association.

Should the same horse win both races, $1,000 additional in plate or money will be given, half by each association. Horses entered at either place incur liability for one forfeit only and are entitled to start at either or both places; those starting for the Friendly Stakes at Washington Park are entitled to start for the FRIENDLY STAKES at the Coney Island Jockey Club without incurring liability for starting fees at the latter place.

Conditions of the Friendly Stakes, to be run at the Summer Meeting of the Washington Park Club, 1890.

Colts to carry 118 pounds, fillies and geldings 115 pounds. A winner of any two-year-old Stake race at Washington Park of the value of $2,500 to carry 5 pounds additional. Maidens never having run second for a race of the value of $3,000, allowed seven pounds. The winner to receive half of the joint subscriptions and $4,000 of the added money; the second $750 and the third $250 of the added money. Five furlongs.

Conditions of the Friendly Stakes to be run at the Autumn Meeting of the Coney Island Jockey Club, 1890.

Colts to carry 118 pounds, fillies and geldings 115 pounds. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750 and the third $250 of the added money. Winners of a race of the value of $10,000, or of two races of the value of $5,000 each, to carry ten pounds extra; or of one race of the value of $5,000, or of two of the value of $3,000 each, five pounds extra. Non winners of $1,000 allowed eight pounds.

FUTURITY COURSE, about three-quarters of a mile.

NOTE.—The Sweepstakes will be paid over on October 1, 1890. The added money by each Association immediately after each race.

The value of each of the above races to the Winner will probably be about $6,000, and the only liability is $25 for non-starters.

Nominations to be addressed to

The CLERK OF THE COURSE of the Coney Island Jockey Club, or to Fifth Ave, and 22nd St., New York.

THE

BREEDER AND SPORTSMAN'S

-:Futurity Stakes:-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

The "L. C. Smith" Guns.

As **PRIZE WINNERS** we challenge any other make of Gun to make a showing like the following.

All Previous Records Broken.

Never before were 100 live pigeons killed straightly in a similar match, under same conditions, until the L. C. SMITH GUN was made and did it. In the hands of Mr. Al Bandle, of the firm of Bandle Arms Co., Cincinnati, Ohio, this wonderful score was made. Capt. A. H. Bogardus scoring with a 12-gauge L. C. Smith in the match against Bandle, the very high score of 95. A remarkable score with a 12-guage.

——OFFICIAL SCORE——

Made in the mate h at 100 live pigeons, Hurlingham rules, barring gauge of gun, between Capt. A. H. Bogardus of Elkhart, Ill., and Al Bandle, of Cincinnatti, Ohio, on Independent Gun Club grounds, Cincinnati, Ohio, Christmas Day, December 25, 1888:

AL BANDLE, 10-gauge L. C. Smith gun.....	CAPT. A. H. BOGARDUS, 12-gauge L. C. Smith gun....

OSSIDINE

Results obtained at the well known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it: and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used. Very respectfully yours,

S. A. BROWNE & CO., Prop'rs.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to
Mr. JEROME I. CASE, Mr. FRED. GEBHARD, Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),
And hundreds of others from whom we have very flattering testimonials.

One Style Only. $3.00 per Bottle.

BREEDER AND SPORTSMAN

Vol XV. No 22.
No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, NOV. 30, 1889.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

In Years Gone By.

WRITTEN FOR THE BREEDER AND SPORTSMAN.

About two weeks since, immediately preceding the first advertised trial of Sunol, Palo Alto, Stamboul and others, for the avowed intention of lowering their records, some friends and myself were arguing the pros and cons of the subject, my friends thinking that Palo Alto was the only one liable to accomplish the task, while I contended that both would lower their records, but the filly would make the greatest reduction. Such has proven true, still I do not take much credit to myself in consequence. From record smashing performances we drifted to the subject of modern trotting race horses, I contending that no trotter of the present day was quite as good a race horse as some old-time stars of the trotting firmament, which I will attempt to show.

Since Sunol, Axtell, Allerton, Lillian Wilkes and Faust, the great three year old trotters, have appeared before the public, various and sundry horse writers, horse papers and horse authorities have endeavored, with more or less success, to enlighten the world regarding the only true reason of their greatness. Many articles, ingeniously compounded, have been published showing beyond a doubt the true cause of it all. In some instances Electioneer did it all; in others, Geo. Wilkes was solely accountable; while others knew that the thoroughbred cross carried them to the front. I suppose these people know something about it—not much, though.

None of these gentlemen have told us how the "sure enough" trotter can be bred with uniformity. Senator Stanford says, however, that he has arrived at a point where he can point to a colt a few months old and say, "Barring accidents, that colt will certainly trot in 2:20." A man has the breeding problem down to a fine issue when he can breed the 2:20 trotter with regularity. Let us inquire into the breeding of the 2:20 and better performers of long ago, the trotters that went to the front and stayed there for several seasons. The history of some of them reads like a romance. Breeders of this day and age would laugh at a great campaigner being bred that way now, but the fact remains that no campaigner of recent days has shown the ability to stay hard races year after year, like some of these old time horses. I will give a sketch of some of them, as it is interesting reading.

I will commence with the grey gelding Hopeful, 2:14¾. He He was foaled in 1866, and was 15 hands high. He was sired by Godfrey Patchen and his dam was by the Brigham horse. The admirers of the game little horse were to be counted by thousands, his electric bursts of speed year after year arousing to the highest pitch of enthusiasm assembled thousands at all the principal trotting tracks of the East. In 1873 Hopeful began his trotting career, and in 1874 became a prominent candidate for turf honors, scoring a record of 2:21 at Fleetwood Park, then considered a very slow track. He was purchased shortly afterwards by Mr. Gillender, of New York, for $25,000.

He closed the season of 1875 with a record of 2:17¼, at that time equalled or excelled by only six horses. In 1876 he was turned out. In 1877 his fastest heat was 2:18¼, but 1878 was the crowning season of his turf career.

At Minneapolis, Minn., Sept. 6th, against time, he placed to his credit his present record, and at Chicago, October 12th, placed to his credit a record to a wagon which has never been equaled; the fastest first heat, fastest second heat, fastest third heat and fastest three consecutive heats, excelling the best previous record four seconds, viz; 2:16½, 2:17, 2:17.

At St. Louis, Mo., against time, although losing, he trotted four heats, 2:15¾, 2:15½, 2:15, 2:15½, a most wonderful performance, though not a technical record.

In 1879 he was not in as good form, and was only able to show a mile in 2:16¼ as his best performance for that year. In 1880, although showing all his former speed, he was obliged to meet in the free for all classes St. Julien and Darby, and was not often a winner. His best race was at Rochester, N. Y., where, in the free for all class, he won the first two heats in 2:15½ and 2:16½, but lost the race to Darby.

In 1881, although starting in eleven races, he won but one, his fastest heat for the season being 2:18¼. During 1882 he was not on the turf, owing to the death of his owner, Mr. A. W. Richmond, but his driver, Dan Mace, drove him over Fleetwood track, early in the season, a repeat mile in 2:18, and claims to have been able to drive him two or three seconds faster. During his trotting career he has been placed first in forty nine races, winning 139 heats in 2:30, or better, and in purses $86,400.

Darby was a brown gelding, 15 hands and 1 inch high; foaled in 1871; sired by Delmonico; dam by Glencoe. When a colt he was an ungainly thing, with a mixed gait, and scarcely considered worth his feed, and his owner traded him to a neighbor for a calf. One day he struck a trot that surprised his driver, and with proper weighting he soon began to trot fast. He was subsequently sent to New York and became the property of Mr. Wallace, and was placed in the hands of Dan Mace.

In 1876 he was brought out and obtained a record of 2:36. In 1877 this was reduced to 2:25. In 1878 he closed the season with a record of 2:23. The season of 1889 was his best and he won every race in which he started. At Utica, N. Y, August 22d, he dropped the first heat to Dick Swiveler, and in the second was laid up too long, Swiveler beating him out by a head in 2:18, Swiveler's best record. The third heat, not being a fast scorer, he was given the word a length behind, and the pace was so fast that at the half he was still the last horse. Here Mace pulled out and sent him to the front, trotting the third quarter in 32½ seconds—a 2:10 gait—and cutting down the others, collared Swiveler at the three-quarter pole. The race home was for blood, record was no object, but Darby landed a winner in 2:16½ (his record) and the remaining heats in 2:20 and 2:19¼.

In 1880 he was driven by Mr. James Dustin, and in the free-for-all was obliged to meet St. Julien, and of course could not beat the then king of the trotting turf.

In 1881, owing to the death of his owner, he was not trotted. In 1882 he was placed in the late John Murphy's hands, but his speed seemed to have left him. He was afterward handled by Mace, but never "rounded to" his old form. During his turf career he is credited with winning first money in thirty-three races, with ninety-three heats better than 2:30, and in purses $43,680.

Charley Ford was a grey gelding, 15 hands 3 inches high; foaled in 1873; sired by McKisson's Grey Eagle. This horse began his turf career under the name of Billy Bastader, and in 1878 got a record of 2:33½. In 1879 this was reduced to 2:20½. In 1880, at Chicago, July 23rd, he placed to his credit his present record, 2:16¾, and at Hartford, Conn., August 25th, won a sixth heat in 2:19½, being at that time the fastest sixth heat on record. In 1881 he trotted sixteen races, winning seven, his best heat being 2:18¾.

In 1882 he was not on the turf. The records show that he was first in thirty-eight races, with seventy-seven heats won in 2.30 or better, and in purses $42,350. He was a remarkably game horse; no race was too long for him, and when heats were split he was liable to win in most any company. He was owned by Jerry Munroe of Chicago, at one time a wealthy man, but through reverses he was reduced to abject poverty and was forced to sell Ford, of whom he thought a great deal. It is said that Jerry, after reaching the foot of life's rugged hill, was one day walking through the streets of Chicago when he saw his old favorite tied in front of an elegant place, shivering from the cold. Instinctively he drew the shabby overcoat from his own back and placed it over the horse. Then scanning the house for a moment, he hesitatingly ascended the steps and rang the bell. The gentleman of the house responded and asked the old man what he wanted. Jerry pointed to the horse, and said, "He's cold; I hate to see him cold; I owned him once—years ago—and it kind of makes me feel bad to see him neglected." The owner went down the steps and put a blanket around the horse, while Jerry went on, happy in the thought that the old horse was comfortable. Many a man could take a lesson from old Jerry Munroe.

Captain Lewis, the "plowhorse," as he is often called, was a chestnut gelding, sixteen hands high, foaled in 1874, sired by a horse called Spink, dam a mare of unknown blood, called Lady Jones. In 1882, at Lyons, N. Y, June 7th, he trotted his first race, winning the 3:00 class. Time, 2:35, 2:33, 2:35¾. His career from this time was most remarkable. He was then owned by Mr. A. H. Towar, of Lyons, who purchased him of a farmer for $300. The farmer had used the horse on his farm at all kinds of work, from plowing to pulling a mowing machine. Mr. Towar shortly afterward sold him to Mr. B. L. Sheldon, of Rochester, N. Y., for $6,000, and he was placed in competent hands for training. At Buffalo, on the third of August, he won the 2:30 class in straight heats. Time, 2:22¼, 2:25¼, 2:22½.

At Utica, N Y., he repeated his victory in the same class, best time 2:24½.

At Springfield, Mass., Sept. 6th, he obtained his record of 2:20¼.

This horse was the sensation of the year. In all his races up to that time, he had never lost a race, nor ever been forced to show his best clip, and it was confidently asserted that he could go a mile in 2.15. Unfortunately, however, he had been hurt at one time by having one of his hind leg come in contact with a mowing machine, and although it was believed it would not trouble him, he could not stand work when he had to go miles better than 2:20, and he broke down.

John H, 2:20, was a bay gelding, foaled 1866, sired by Blumberg's Black Bashaw. In 1872, he began his turf career, and in 1875 had obtained a record of 2:23. This was reduced in 1876 to 2:21½. In 1877, he knocked off the fraction, leaving it 2:21. In 1878, at Hartford, Conn., August 23rd, he made his record. After that, although campaigned several seasons, he was not a prominent winner, although in his eleven years upon the turf he gathered in $21,550: was first in twenty-three races, winning seventy-eight heats in 2:30 or better. He trotted to the pole with Lady Martin to a road wagon in 2:23½, and with a running mate a mile in 2:16.

Lulu 2:15, was a little brown mare about fifteen hands one inch high. She was sired by Alexander's Norman, her dam being by imp. Hooten. She was bred by Col. Crockett, of Kentucky, up to five years of age. Lulu filled the place of saddle horse for Col. Crockett. She was afterward placed in the hands of a professional trainer, and during the fall of 1870, or when Lulu was six years old she trotted her first race at the fair of the Scott County Agricultural Association, which was held at Davenport, Iowa. The purse was $1,000, with five starters, and Lulu won the first heat in 2:35, but lost the race. The same year she appeared at Iowa City, Keokuk, and Canton, Ill. At the lower place she trotted against the stallion Logan, being defeated, although she won the first heat in 2:27½. She done nothing in 1871. The following year she was sold to Joseph Hooker, of New York City, and her name changed to Lulu. Her bursts of speed were wonderful, but she was too nervous to be reliable.

At Prospect Park, September, 1873, she beat a field of four good ones, the best time being 2:24½. In 1874 she started at Cleveland, in the 2:24 class, and won, lowering her record to 2:20¼. She was handled at that time by a driver named Green. Two weeks later, at Rochester, she placed herself in the very front rank of trotters by capturing a third heat in 2:16¾. She was afterward beaten in much slower time. In

1875 Green commenced the season with the mare at Cleveland, where she met Goldsmith Maid and American Girl, finishing second; the Maid won. At Buffalo, a week later, she defeated Nettie, by Rysdyk's Hambletonian, driven by John E. Turner, in straight heats; time, 2:22½, 2:18½, 2:15. At Rochester, five days after her race with Nettie, she met a great field of horses in the free-for-all. They were Goldsmith Maid, American Girl and Nettie. It may not be amiss to give an account of that race, written by an eye-witness.

"The Maid was a hot favorite. In the first heat American Girl made the trotting as far as the three-quarter pole at a rate of speed which, if kept up to the finish, would have carried her to the wire in 2:14, but there she gave it up, and Goldsmith Maid went to the front, winning in 2:15¼. In the second heat the Maid led the way until reaching the homestretch, when Lula began to close the gap of five lengths which had separated her from the leaders at the half-mile, and catching the leader at the distance stand, a neck and neck contest ensued to the wire, Lula finally winning by little more than a head in 2:16¼. The third heat was a still more signal triumph for Lulu. Making a bad break around the first turn and another on the backstretch, she was seven lengths behind when the Maid reached the half in 1:07½, but, squaring herself, she seemed to fly rather than trot, so agile and graceful and swift were her movements, and passing the Maid at the distance stand, she won the heat by two lengths in 2:15½, having trotted the last half in 1:06. In the concluding heat Lula had the best of the start, and at the quarter she was two lengths ahead in 34 seconds. The half was reached in 1:07½, and she trotted the third quarter in 32¾ seconds, a 2:11 gait. Just as she turned into the homestretch, however, she made a bad break, and Goldsmith Maid assumed the lead. Lula caught well, and settling quickly to her work, another desperate contest between the rival leaders ensued down the stretch, and gamely the great Maid, then 18 years old, fought every inch of the way. There was no quitting, no flogging, no giving up, but at the finish of the then fastest fourth heat, and of the second fastest race that had ever been trotted, Goldsmith Maid was beaten under the wire a head in 2:17."

Lula was afterwards bred to Gov. Sprague, and in 1881 foaled Lula Sprague. She afterwards was bred to Geo. Wilkes, and in 1882 foaled Lula Wilkes. On January 20, 1884, she foaled a filly by Electioneer called Lulaneer, having previously been purchased by Senator Stanford. It was claimed at the time that this filly Lulaneer could trot an eighth of a mile in 26 seconds when she was eight months old. Surely some of the produce of this mare should trot fast, especially when bred to such horses as Electioneer, Geo. Wilkes and Gov. Sprague.

M. Y. D., 2:20¾ (formerly Yellow Dock), was a chestnut mare 15 hands 3 inches high, sired by Clark's Mohawk Jr., dam by Copperbottom. She was brought out in 1881 under the name of Mohawk Maid, and at Cleveland, O., September 6th, gained a record of 2:29¼. She was then purchased by a patent medicine firm, and as an advertisement given the name of Yellow Dock. In 1882 she proved herself possessed of great speed. At Utica, N. Y., August 16th, she won the '29 class in straight heats, getting her record in the second heat. At Providence, R. I., November 2d, she was driven by John Murphy to the pole, with running mate, a match race against Billy D. and mate, driven by Dan Mace. It was a race that excited a great deal of interest, Billy D. having a record for that way of going, of 2:14¾, and about $75,000 changed hands on the result. The mare won hands down in straight heats, trotting the third in the unprecedented time of 2:11.

To not particularize further, I may mention Mountain Boy. Few horses of to-day could beat him down the stretch, when he was just at an edge. Col. Lewis, Bay Frank, Occident, and dozens more were fast horses in their day. Their day is past! We now have more fast horses—the 2:30 list is getting large—and it would seem that the breeding problem is being more nearly solved, though in the minds of some, rearing the trotter is yet, to some extent, a lottery. How long will it be before we will look back upon the performances of Sunol, Axtell, Palo Alto, Stamboul and Norlaine, and say, "Yes, very fair work for those days, but quite ordinary now!" In my humble opinion it won't be very many years, and when they reach 2:00, what then? It will cause 30 days talk and wonderment—and then somebody will try to raise one that can go a mile in 1:57¼. If I live 25 years I expect to see several horses beat 2:00. I am aware of the fact that many men regard that as a foolish prediction, but I believe 25 years will see its fulfillment. Nobody can disprove the assertion—they can ridicule it, but ridicule isn't argument. It requires some knowledge to produce good argument, while any ignoramus can ridicule a subject upon which he is not competent to speak.

HARVEY W. PECK.

The Woodard Sale.

LEXINGTON, KY., Nov. 16th, 1889.

EDITOR BREEDER AND SPORTSMAN:—I wish to direct your readers' attention to my next sale, which commences at Lexington, Ky., Feb. 17th, continuing to March 1st, 1890. Entries close Jan. 1st, and the books are now open for consignments. Remember the pedigrees will be catalogued in the order in which they are received and I would advise all contemplating selling at that time to write at once for entry blanks, send in their entries and thereby receive full benefit of advertising. For particulars address

W. F. WOODARD, Lexington, Ky.

120 E. Main Street.

Preserve your horses' health by sprinkling Darbys Fluid freely about their stables.

For animals—the best cure for Sprains, Sores, Swellings, Bruises or Cuts is Darbys Fluid.

Our Australian Letter.

SYDNEY, NEW SOUTH WALES, AUSTRALIA, Oct. 30, 1889.

DEAR BREEDER AND SPORTSMAN: The principal race meeting in Australia since last communication was that of the Victoria Amateur Turf Club, held at Caulfield, The Caulfield course is picturesquely situated some ten miles from Melbourne, Victoria, and holds the unenviable notoriety of being the course on which perhaps the greatest smashing up of horses and men ever occurred. It happened on the Caulfield Cup of 1885, for which no less than 41 horses sported silk. All went well until approaching a nasty turn into the homestretch, when the field commenced to race. Two horses collided, and in an instant fifteen horses and their respective riders were mixed up in a heap. Donald Nicholson, one of Australia's most promising jockeys, was killed on the spot, and several others were seriously maimed; and then occurred the most peculiar finish ever seen in a race, as a 30 to 1 chance. Grace Darling won, followed in by half a dozen riderless horses, with saddles torn and some minus bridles. After the accident an alteration was made at the dangerous turn, but the smash-up frightened jockeys and owners, and it was not for a couple of years afterwards that some of the principal owners started their horses.

The big handicap this year, the Caulfield Cup, started away with a dash which took the ordinary lot clean off their legs. Bravo, who started favorite at 3 to 1, did not appear to get going until too late to give him a chance of winning. Rounding into the straight there were only four in it, The Charmer, Meteor, Boz and Bravo, and after a well-fought battle Boz won from The Charmer, the favorite Bravo coming with a brilliant rush within half a length of second horse. Boz is a fairly performed five-year-old by Bosworth from Hypathia, and his win proved a perfect godsend to the bookmakers. Had the favorite Bravo won, there would have been weeping and gnashing of teeth amongst the children of Israel.

The sensational item in connection with the Caulfield Cup was the backing of Moorebank for fabulous sums, and the eagerness of the "Books" to lay all the money they could about him. We have in Australia a young squatter known as the Victoria Plunger, a sort of miniature "Jubilee Juggins," and he dropped it in thousands of pounds upon the strength of reputed wonderful private time trials. The amount of money available at the back of the horse ran him up a boiling favorite in the betting market, but he was backed by very few, the general public who had not seen him flogging the watch, not thinking him well enough performed to risk their dollars on, and they did well, as Moorebank never showed prominently at any portion of the race and finished last but one.

Tom Hales still continues to be our leading jockey so far as winning mounts are concerned, but it must not be lost sight of that Hales has first mount in the first stable in the colonies. Hales is the jockey Australia would like to see mounted on Mr. White's pick in the English Derby, but independent of the fact that Tom is required in Australia, he is a martyr to asthma, and a winter in rainy and foggy England would finish him off to a certainty. Out of ten mounts at the Australian Jockey Club (Sydney) Spring Meeting, the crack jockey scored 7 wins, 2 seconds and one out of place.

During the season of 1888-89 over £227,000 have been paid away in stakes at the principal race meetings in Australia, the Hon. James White taking the lion's share with £14,496.

Although low down on the list of winning sires the expatriated Darebin and Sir Modred will no doubt prove of as much, if not more, interest to Americans than our crack sires. Musket (deceased) his son Martini-Henry, Chester, Goldsbrough, Swiveller and Grandmaster, each of whose progeny scored over £5000. Three of Darebin's stock proved winners, the unlucky three year old Australian Peer, from Stockdove, heading the list with two races for £721; Grand Chester, a two year old out of Esmeralda, winning £648; and Maggie, a three year old from Margaret, won one race and £315. Sir Modred can only answer for one winner, the clinking two year old Antaeus, out of Nellie, who put £580 into his owner's pocket.

Musket heads the list of winning sires with five winners for the sum of £10,008 (independent of £9,410 won in New Zealand), of which Carbine, the champion three year old of his year, appropriated £5776 for nine wins. Additional honor attaches to Musket from the fact that his son Martini-Henry is second sire on the list with three two year old winners—Rudolph, Sinecure and Singapore—who won fourteen races for £6151, Rudolph being the winner of eight events and £4312. The trio are owned by the Hon. James White. Chester ranks third with seven winners, thirteen races and £5703. Mr. White owns six of them—Spice, Abercorn, Plutarch (now in England), Carlyon, Pippo and Dreadnought. The get of Goldsbrough, Swiveller and Grandmaster each won £5000. These statistics may at first sight appear "stale pastry," but I give them as America is now turning her attention to Australian sires.

Big sweeps, or "Consultations," as they are here termed, are the rage just now in this country, and from the millionaire to the office boy who can beg, borrow—or more often steal—a sovereign, they all have their pound in a big sweep. Some idea of the magnitude of these consolations may be arrived at from the fact that one sweep promoter alone, George Adams of the Tattersalls Hotel, Sydney, has one £50,000, one £10,000 and a couple of £2000 on the Melbourne Cup. These sweeps are against the law of the land, but they are winked at by the authorities. They summons Adams now and then to the police court and fine him £20 or so, but as Adam's commission on the Melbourne Cup sweeps alone amounts to over £6,000 the fine does not hold any great terror for him. Another form of betting which if continued will play havoc with the bookmakers is the place consultation. In this the backer puts half a sovereign or a sovereign on the horse of his fancy. A few hours before the race is started, after deducting his ten per cent commission, the promoter divides the money into 50 per cent for first horse, 30 per cent for second horse and 20 per cent for third horse. According to the number of subscribers on the respective horses the dividends depend. In some cases only one lucky individual may be "on" an outsider who wins or runs into a place, when he takes the whole of the first, second or third money, as the case may be.

Antaeus, the colt by Sir Modred from Millie, is very much fancied for the Melbourne Cup, and holds a foremost place in the betting. Unfortunately he is not engaged in the Victorian Derby, as he is the only three year old considered to have any show with Mr. White's cracks. Before my next the Victorian Racing Club spring meeting, which is considered the biggest racing event in Australia, will have been a thing of the past, so your readers may look forward to the salient points being given them by yours,

"THE JUNGLE."

The Chicago Horse Show.

The following are the principal awards in the trotting department at the Chicago Horse Show:—

CLASS 1—The American trotting stallion herd; prize $3,000. For trotting stallions with best herd of five colts five years old and under, the colts shown to decide the award. First, $1,750; second, $650; third, $400; fourth, $200. Animals in this ring to be shown at will. Five hundred dollars of the first prize in this class will consist of a silver cup intrinsically worth the sum it represents, especially designed and manufactured for this event by Spaulding & Co., gold and silversmiths, Chicago, and donated by them.

First—King Rene, 2:30½, b s by Belmont, dam Blandina by Mambrino Chief.

Rectitude, b s, 1884, dam by George Wilkes.

Samovar, b f, 1886, dam Carrie, 2:24¼, by Volunteer.

Pequa, ch f, 1886, dam by Triton.

Serpolet, b f, 1887, dam Belle Hewett by Belmont.

Hall, b c, 1888, dam by Thorndale.

CLASS 2—American trotting stallion prize; $1000 for best stallion of any age. First $300; second $250; third $150; fourth $100.

First—Kalamazoo Farm's black stallion Ambassador, 2:21¼, by George Wilkes, dam Lady Carr by American Clay.

Second—Village Farm's chestnut stallion Mambrino King by Mambrino Patchen, dam by Edwin Forrest.

Third—Ashland Farm's bay stallion King Rene, 2:30½, by Belmont, dam Blandina by Mambrino Chief.

Fourth—W. K. Crockett's brown stallion Star Hambletonian, 2:23¾, by Felter's Hambletonian, dam Belle Pitts by American Boy.

CLASS 3—Stallions, four years old and over. First, $50; second, $30; third, $20.

First—Village Farm's chestnut stallion Prince Regent, 2:21¼, by Mambrino King, dam Estabella by Alcantara.

Second—Village Farm's chestnut stallion Gallopin by Hamlin's Almont Jr., dam Gerster by Hero of Thorndale.

Third—Sandwich, bay stallion by Lord Russell, dam Rosabella by Belmont.

CLASS 6—Colts, one year old and under two. First, $50; second, $30; third, $20.

First—Kalamazoo Farm's black colt Sir Consul by Ambassador, dam Shadow by Saddlerville.

Second—Village Farm's bay colt Chimes Boy by Chimes, dam by Mambrino King.

Third—Village Farm's bay colt Palo Alto Chimes by Chimes, dam by Mambrino King.

Class 10—Fillies, one year old and under two. First, $50; second, $30; third, $20.

First—Village Farm's bay filly by Chimes, dam by Hamlin's Almont Jr.

Second—Kalamazoo Farm's bay filly My Darling by Ambassador, dam Grace Darling by Grand Sentinel.

Third—J. Brennock's bay filly Flossie McGregor, 2:13¼.

Class 11—Two colts, three years old and under, the produce of one mare. First, $50; second, $30; third, $20.

First—Village Farm's bay colt Salvator and bay filly Gracious by Hamlin's Almont Jr., dam Gerster, by Hero of Thorndale.

Class 15—Special prize offered by R. W. Roloson. Money or plate, $100; the association adds $50, $25. Colts and fillies three years old and under four.

First—Village Farm's bay stallion Salvator by Hamlin's Almont Jr., dam Gerster by Hero of Thorndale.

Second—J. Tabor Mather's brown mare Georgia L. Wilkes by Lumps, 2:21, dam by Clark Chief.

Third—Village Farm's brown mare Daphne by Hamlin's Almont, Jr., dam Miranda by Mambrino Patchen.

Class 16—Special prize, offered by Warren F. Leland, Chicago. Money or plate, $100; the association adds $50, $25. Colts and fillies two years old and under three.

First—Ashland Farm's bay filly Serpolet by King Rene, dam Belle Hewitt by Belmont.

Second—Village Farm's bay filly Pansy by Hamlin's Almont, Jr., dam by Kentucky Prince.

Third—Kalamazoo Farm's brown filly Belle Vara, 2:38, by Vatican, dam Nell by Estill Erie.

Class 17—Special prize, offered by F. S. Gorton. Money or plate, $100; the association adds $50, $25; colts and fillies one year old and under two.

First—Village Farm's bay filly Miss Chimes by Chimes, dam by Hamlin's Almont, Jr.

Second—Kalamazoo Farm's bay filly My Darling by Ambassador, dam Grace Darling by Grand Sentinel.

Third—Ashland Farm's bay colt Hail by King Rene, dam Thorndyke by Edwin Thorn.

Class 25—Roadster mare or gelding, any age. First, $75; second, $50; third, $25.

First—Village Farm's brown mare Belle Hamlin, 2:12¾, by Hamlin's Almont Jr. dam Toy by Hamlin's Patchen.

Second—Charles Schwarts's bay gelding Oliver K, 2:16¼, by King Wilkes, dam Bessie Turner by Virginius.

Third—B Voan Bokelen's black gelding Bert Bashaw, by Green's Bashaw.

CLASS 21—Special prize offered by George P. Smith. Money or plate $100. Pair to pole, any age, mares and geldings. The association adds $50 and $25.

First—C Schwartz's bay gelding Oliver K, 2:16¼, and Charley Hogan, 2:18¼.

Second—John T. Hughes' bay mares Maggie and Cara.

Third—W D Moore's bay geldings Dave and Captain.

CLASS 22—Pair of roadsters to pole, five years old and under. First, $75; second, $50; third, $25.

First—Village Farm's chestnut mare Nightingale and brown mare Dalphine.

Second—Edward B. Rutler's bay mares.

Third—O. A. Russ' brown geldings Tony and Jack.

A Case of Reversion.

Mr. Darwin mentions as quite an unusual occurrence the case of a black mare that was bred to a bay horse, producing a dun colt, the dam of the mare having been a dun, says the Kentucky Stock Farm. A similar instance of reversion occurred in Montgomery county last spring. A black mare (whose dam was a dun) was bred to a bay horse (whose ancestors had been bays for several generations) and the resulting produce was a dun. In the same lot and on the same night, another mare foaled a bay colt. This was a bay mare by Solicitor. The colts got together before the mares got on their feet, and the Solicitor mare (dam of the bay colt) seemed to prefer the dun to her own colt, and it had to be removed before she would perform maternal duties to her own offspring. The dam of the dun colt never manifested any hesitation in claiming it as her own.

How He Won Her.

A Little Kentucky Mare That Won a Wife and Fortune for Her Owner.

"That man has had a strange experience, and that accounts for his white hair," remarked a well-known turfite to a small collection of kindred spirits who were seated in his office at Lexington, Ky., a few years ago.

The party referred to had but left the office, and the above remark was called forth by a reference to the gentleman's appearance.

Truly, he was a peculiar combination. Tall and erect, with the form of an Apollo Belvidere, fine features, jet black eyes and moustache, and pure white hair. His age—well, that is too much to guess, but dating back a few years, he should be about 35 to 38 years. The white hair, his black moustache, and face untouched by time's rude hand, gave him a very distinguished appearance, one that caused perfect strangers to stop, turn around and look after him as he passed them. He is well known in Kentucky, his native State, and, while the story is well known there, it may interest the public to learn the cause of the changing of his raven locks to snowy whiteness in a few brief seconds. It was related to us that evening at Lexington by the speaker of the first paragraph, and I made careful notes of the same at the time. I give them now in full, only changing a few localities and names in order to save my life should I ever visit the old Bourbon State again.

"Well, boys, it's a long story, but I'll try to tell it just as I know it. It was just after the war that Harry's father died. The colonel was one of our few real old Kentucky gentlemen. He was a good liver, and had taken life easy up to the time of the war. The end of the struggle found him broken in health and poor in pocket. He depended a great deal on young Harry to look after things, and all orders for the men at the 'Oaks,' the name of the old homestead, passed through the youth's hands. It was quite a load to place on such young shoulders, but he was equal to the task, and soon all referred to Harry as the master. Years rolled around, the youth reached man's estate, and, as usual, fell in love. He adored the only daughter of a neighbor, and was her equal in all but wealth. She was an only child, the pride of her father and mother, generally impetuous, ruling the household in everything, but when her father rather sternly ordered her to frown on her lover, she seemed to have lost her ambition and obeyed. It was a bitter blow to Harry, and his friends became alarmed at his strange behavior at times.

"For some years matters had been going wrong at the Oaks. Poor crops and pressing debts had placed mortgages on the old homestead until it was impossible to get another cent through that channel. All this had been carefully hidden from the colonel, who, though an invalid, was fond of life, and made frequent demands for sums of money from his manager, who would generally find some way to supply the money needed.

"Matters grew from bad to worse. Harry's love had been forbidden to hold any conversation with him, and Harry himself was, to use his own expression, 'all broken up.' About this time some defaulted interest was called for, and Harry could not raise the funds to meet the demand. Then foreclosure was threatened, and the young man was in despair.

The colonel was the owner of a thoroughbred chestnut mare, in whose veins flowed the most royal running blood of the land. He had raised the filly, as she was called, having had her mother in his family for years. In due time the colonel's mare dropped a chestnut filly, the fac simile of herself, and the youngster was presented to Harry. The colonel always contended that his old mare had a wonderful burst of speed and could outrun anything in Kentucky when she was in shape.

"As Harry's filly was by Glenelg, the old man used to say that she was the finest in the land, barring her mother, and was proud to see that the fleet-footed filly could race ahead of the old mare around the pasture.

"At the proper age Harry broke her to the saddle, and she learned to carry him everywhere. He now says that she used to fly over the roads with him and that she could run any number of miles. No person so far as I know had ever seen the mare run, and no person ever suspected that she had so much speed. The filly was four years old when she was called on to run the race of a life's stake.

"Matters had been getting worse at the Oaks. Harry had lost his heart since his lady-love had turned from him, and utter ruin started him in the face. From the sudden termination of his love affair Harry appeared to drop all thought of himself and appeared to think only of his old father.

"He had been in town all day and learned at the bank that the father of his lady-love had purchased two mortgages on the Oaks. As the estate adjoined, Harry thought the old man intended to press him and get the homestead. This made him moody, and he has since told me, for the first time in his life he began to realize that he had work ahead of him and that he must be up and doing.

"That evening Harry visited the now sadly depleted stables, and, accompanied by Uncle Zeke, the old negro trainer, he wandered sadly through the long rows of empty box stalls.

" 'Marse Harry,' said the old man firmly, 'dat ornery nigger from de track was ober yere dis afternoon, an' he done tole me dat de white people war goin' to hab one ob de ole time gemmen's race dis fall, an' he asked me if we had any ting ready fur to start. He done said dat when de ole marsa war young dat he mos always hab some likely colt fur to run.

" 'Yes, that's true, Uncle, but times are changed now, and all I have is the chestnut filly,' sadly answered the young man.

"Now dot's jes' hit, an' I say to myself, says I, Uncle, you jes' git dat filly in shape, an' wid Marse Harry up she done clean out dat whole caboodle an' win all de money in de lan' fur dat blamed filly hab de blood of ole Glenelg in her, an' she's goin' to drap down dead 'fore she let any anmile beat her out. Say, honey, jes' let ole Zeke put dat filly in trim an' den you rides her to victory an' a whole lot ob money.'

" 'Hush, Uncle,' said Harry sadly, 'I have no money to bet, and then the filly is all untried, and we don't know how she would act.'

" 'Why, Marse Harry, dat blamed orney critter done know nuffin' but run. Look at her mammy look at her daddy, an' den ask ole Zeke ef he ever done make a mistake abont colts afore. No siree; dis yere ole coon say when dat filly were borned dat she were de bestest in de lan', an' ole Zeke never done make no mistake.'

" 'But, Uncle, you're simply talking nonsense. I have no money and it would scarcely pay me to train her for the purse alone,' sadly answered Harry.

" ' Golly, chile, you can jes' do like dem odder white gemmens. Make a book, an' doan't put up de stuff. You cawn't lose, an' you'se boun' to git dar wif all four feets.'

" 'And if by accident I should lose the race, then I would have to blow my brains out, for I could never pay my debts any other way.'

" 'An' dat's nuffin'. Hasn't lots an' lots ob gemmen, white an' brack, done gone dat way afore. You jes' tink dis obber, chile, an' den tell your ole brack uncle, an' we kin fix dat filly up an' win dat race an' a big bar'l ob money, too.'

" During the night Harry dreamed about the race—dreamed that he had won it and cleared off the mortgage on the Oaks. It made a deep impression on his mind, and the next morning he had decided to make the experiment. He well knew that a fine bay stallion belonging to his neighbor would be a strong favorite, and to beat him would be a double revenge for the loss of his love, and the attempt to take the Oaks from his family. Uncle Zeke was almost wild when he learned of the decision, and at once commenced work on the filly. In order to avoid attracting attention, and, as he would carry welter weight, and the race was for gentlemen riders, it was decided that Harry should ride her in the exercise. Outside of Uncle Zeke, Harry told no one of the secret until just before the race. Then he came to me and requested that I enter the mare in my name. As she had never been named, we picked out Kentucky Nan, knowing that such a common title would not attract any attention. We also failed to give her pedigree, as the mention of old Glenelg would be sure to find her friends.

"The entries closed with seventeen nominations, the distance, a mile and a half, keeping all the light-weight sprinters out. No attention was paid to 'Nan,' all the talk being about the big bay. Books were quickly opened, with the stallion at 2 to 1 shot over the field. Harry eagerly snapped up all the offers, and soon had over $20,000 booked. The betting seemed to nerve him, and he made several trades in which he received considerable cash, so that when his vindictive neighbor made him a $5,000 offer, Harry called him with the cash. This act gave his book additional credit, and $20,000 soon became $40,000, then $50,000, and suddenly Harry stopped betting. I wondered at this, but on going to the Oaks found that Harry and Nan had both gone away for several days, and that Uncle Zeke had left home for the first time since the old colonel had been sick. I suspected something was in the wind, and awaited their return with considerable anxiety. In a few days, Harry came riding into the barn on what I supposed was Nan. His face was aglow, and I knew that he had something to tell me, which was the case. He had taken the mare to the track at the Corners, and given her several trials. She ran the distance in 2:45 and 2:36 the first day. Two days later she turned the track in 2:34¼, finishing with plenty of speed left. But this was not all, for Harry had caught a stolen trial of the stallion's in 2:41½, and saw him take the whip and spur freely, during the last four furlongs and finish very tired. This fully confirmed Harry's opinion of the filly being the winner of the race, and he bet fast and furious from that time on.

It was the day of the race, and the excitement was at fever heat. No one had discovered that "Kentucky Nan" was none other than Harry's chestnut filly, for he had deceived them all by using the old colonel's mare, Nan's mother, for his business trips, while the filly was at home being thoroughly trained for the big race. Harry had prepared a grand surprise, for hidden under his every-day clothes was the jockey suit, the famous black and orange colors carried for years by his father's horses. As the young man sauntered along the quarter stretch he met his neighbor.

" 'So, so, young man, you don't think my horse will win, do you? Well, I like your grit, if nothing else, and I'll just bet you my place against the Oaks that he can and will outrun anything in the race.'

"It was a tempting offer, and Harry came near taking it, but, fearing some trick, he made a counter offer to bet $5,000. His banter was called, and when Harry started off saying he would go and get the money to put up he was surprised on being told that such a step was unnecessary, as his word was sufficient.

"When the race was called Harry galloped through the stretch on Nan, and as his colors were recognized the handsome rider and beautiful filly were the recipients of many rounds of applause. The filly was in perfect condition, fit to run for a man's life. The gloss of her deep chestnut glistened in the sun, her eyes flashed clear and bright, showing that all the latent energy in her was coming to the surface, while her clear cut limbs trembled with excitement. Her stately head and arching neck, her clean, round barrel, and her Glenelg hind quarters were pictures worthy of an artist's pencil. Harry rode her like a hero, she obeying the slightest press of the knee and hand, or a low-spoken word. As the horses went to the post old Zeke hobbled after the filly and whispered to Harry:

" 'Lay close to de bay and doan't leab him till you gits in de stretch comin' home.'

"Harry had the pole, with the big bay next, and, as the field of seventeen had dwindled down to six, no trouble was experienced in starting them. I looked at Harry, expecting to find him nervous, for seated in the stand was his former lady love, wearing the cherry and old gold colors of her reported lover, who was up on the bay. Instead of the pale, worried look I found the usual peach and cream complexion so marked even now in Harry's face, and then I felt that the race was almost won.

"When the flag fell Nan and the bay cleared the field and raced side by side. I noticed that Harry was riding light and Nan was running free, and I also observed that the bay was fighting for his head. It was a grand sight; the trim, racy looking filly and the large, powerful stallion thus fighting for the life and wealth. All eyes were on the pair as they raced side by side, stride for stride, and jump for jump. A blanket would have covered them both for the mile. Harry was close to the pole, and had he been less of a gentleman and more of a jockey, he would have made the big horse travel many feet more by carrying him out on the turn. At last the pair ran into the stretch neck and neck, and the pace was terrific. The whip falls on the bay and he jumps a head in the lead. Another swish of the whalebone and the mare's nose is at the girth; still another and she hangs at his stifle. They were out in the middle of the track, and the bay, on the outside, lays too close for Harry to use his whip, but he doesn't seem to intend to, for he never lifts it. They reach the last furlong; the bay is being furiously ridden, getting the whip and steel at every stride, but he cannot shake off the chestnut at his flank. Suddenly Harry drops lower in his seat and speaks a word to Nan. The effect was electric; the little mare in a bound reaches his shoulder; another low whisper goes over her plaited mane and reaches the thin, tapering ears; another bound and the chestnut nose in front. The whip falls unavailingly on the heaving flanks of the bay, but he is done; he has run a good race and is beaten by the game blood of his opponent. Harry rides like a demon, but his closed mouth utters no sound, his whip is held firmly across his thigh, and still the filly flies. The shout that greets the mare as she reaches the end of the grand stand causes her to bound forward, and the next second she dashes under the wire, the winner of the race by two lengths in 2:39¾.

"Harry pulled the mare up easy and rode back to the judge's stand slowly, while the crowd rose up, yelled themselves hoarse, and rushed into the stretch to lift him from his horse. He had saluted the judges and received permission to dismount, just as the crowd reached him. Responding to the manly cheer that emanates from true Kentucky throats, Harry lifted his jockey cap, and as he did so the impetuous rush was checked, the half-uttered cheer died away in the throat, and the crowd fell back dismayed.

"Harry's hair had turned white.

"It was not noticed when he rode under the wire at lightning speed, but several at the rail now swear that it turned after he had won the race. Jumping from his gallant mare, he rushed to the stand where the old Colonel sat, and, throwing his cap ahead of him, he called out:

" 'Father, the Glenelg blood has saved us. We are rich! rich!! rich!!!' and then he fainted at his father's feet.

"The attack of brain fever that followed carried the boy to the very brink, but he weathered the storm and found himself a rich man. His winnings paid all the debts on the Oaks, and placed the grand old place in a prosperous condition once more.

"In a glass case in the old parlor is a black cap and jacket, with orange sleeves, white corduroy jockey pants, a pair of riding boots and a whip, while out in a spacious, separate barn, stands Nan, fat, sleek and well. She has never had a saddle on her since the race, and lives a life of luxuriant ease."

"After the race and his sickness, Harry grew foolish, and, finding that his neighbor had ruined himself by backing the bay, he forgave all, and bound himself by sacred ties to provide for the daughter, who is now as proud of those white hairs as she is of Harry, and who leaves her husband many times a day to go out and pet old Nan in the stable. Yes, siree, he won a fortune and his wife by his first and only race."—Rocky Mountain News.

Very Big Wagers.

Enormous Sums Won and Lost on English Races.

To give some idea of the extraordinary wealth of men in this occupation and the way they obtain it, I may mention that Davis lost £40,000 to Mr. Bowes, the owner of Daniel O'Rourke, in one bet when the horse won the Derby. While at dinner the day after the race Mr. Bowes expressed some anxiety as to whether Davis would be able to meet his engagement, for he knew of others to whom he had lost largely, and in fact Davis was said to have been hard hit. Mr. C. C. Greville, being one of the guests, sat at the table that evening and hearing the conversation, mentioned the circumstance to Davis the next morning on the course, who immediately wrote Mr. Bowes a check for the amount and gave it to him. This wealth was made, and tens of thousands of pounds more, by small sums received at the list in shillings and half crowns by a carpenter—for that was once the daily occupation of Davis, the greatest better ever known.

We had then as owners of race horses, the Duke of Beaufort, Newcastle, and Hamilton, Lord Stamford, and the indomitable Marquis of Hastings, Messrs Saville, Chaplin, Strut (now Lord Arlington), Sirs Frederick Johnstone and Hawley, all of whom know how and when to bet. Lord Stamford lost over Hermit for the Derby £70,000, and Lord Hastings did the same, but on Lecturer for the Cesarwitch the latter won £75.000 and he thought but little of winning or losing £10,000 on a race. If Lord George Bentinck could fairly be called the Napoleon of the Turf in 1839 Lord Hastings was deservedly entitled to the appellation in 1867, for he had no superior in the magnitude and value of his stud or the price he gave for yearlings, He paid Mr. Padwick £11,000 for Kangaroo. His three 2-year-olds—Lady Elizabeth, See Saw and the Earl—were perhaps at one time equal to, if not better than Sir Joseph Hawley's trio—Blue Grown, Rosicrucian and Green Sleeves. Goodwood was then at the height of its prosperity with its 36 races and 35 starters in a race. The Duke of Beaufort, always one of the best supporters of the turf, had 19 starters in one year at Goodwood and won four races, which included both the Cup, the Stakes and Three Hundred Sovereign Stakes won with Vauben. The Marquis of Hastings won the Lavant and the rich Post Sweepstakes of three hundred sovereigns each with Ines.

These stakes were run for at the Bibury and Stockbridge meetings. His lordship's lucky star was in the ascendant, and the racing had never been so good before. In the 33 races that were run for, his horse started 34 times, winning ten races of the value of £7,200. Whether we look at his gigantic betting transaction or the number and value of his horses and the stakes they won, it cannot be denied that the Marquis of Hastings was then the first man upon the turf. I may now allude to yearlings and the price they then fetched. At Middle Park, about 1867, or soon after, yearlings fetched extraordinary prices; as much as 1,500 guineas, and 2,400 guineas were given, and out of a lot one year the average price was 500 guineas, or 20,000 guineas for the forty. Such prices no one thought would be exceeded, or even ever reached again. But prices have still gone up, and brood mares have increased in value as much as the yearlings, and, in fact, every sort of race horse has augmented in value in like proportion, till now over 3,000 guineas are given for a broodmare and over 4,000 guineas for a yearling. Stallions have fetched 16,000 guineas, 20,000 guineas have been offered and refused for a horse in training, and 5,000 guineas was a sum not sufficiently attractive to secure a yearling that was offered for sale at private contract this year.

But these facts and figures, gigantic and surprising as they are, dwindle into utter insignificance when compared with the value of Hermit. This wonderful and lucky horse stands alone as a race horse and stallion, for Hermit has won in stakes and bets for his fortunate owner, Mr. Chaplin, somewhere about £150,000, and has since earned at the stud at least as much more, and may still further augment this almost incredible sum. Again, Donovan, up to the present time, has won in stakes more than any other horse ever did, and may, and most likely will, add many more thousands to his record. He has already secured £39,963, and may yet even surpass the mighty deeds of Hermit at the stud, as he has triumphed over his performances on the race course. Ayrshire, another lucky horse, has won for the same ducal owner nearly as much as Donovan himself, having secured in stakes alone over £36,000 up to the present date, and may, like him, yet increase largely this magnificent sum before his racing career is terminated, and afterward be at the stud as great a success as either of the two extraordinary horses just mentioned. These few cases, to which many others may be added, will show us the present value of our race horses, and how greatly it exceeds the worth of those of any other age or country.—Wm. Day in Fortnightly Review.

A Point of Record.

EDITOR BREEDER AND SPORTSMAN:—As I looked over the pages of your journal, dated Nov. 16th, to read the account of the record breaking by Sunol, and other particulars of the races not supplied in the accounts published in Eastern journals, I was somewhat astonished to find myself honored (?) after the following fashion "a number of so-called sporting journals have seen fit to deride the supposition that 2:12 could by any possible means be rubbed out by a three-year-old. The writers are only "pencil shovers," and know nothing whatever about California, its horses or its climate. Among the worst of the lot is one who should know better, his education and experience having fitted him for thoughts of a liberal nature, and he is not supposed to be biased by the mean little prejudices that warp the mind of the bigot. His writings are well known to all horsemen, and the articles from the pen of "Aurelius" are read with avidity by all students of the trotting horse."

I cannot let this criticism of my article go down without protest to the future historian who, twenty centuries from now will be hunting the records to find what the BREEDER AND SPORTSMAN thought of Aurelius.

I have a few friends in California, and least they might not reserve a place for me at their boards, I hasten to assure them of my distinguished consideration, and everything else that good manners call for in the present crises. There are several matters implied in the article, and, as I am the only one named as one of the wickedest, I accept the honor (?) conferred and ask your readers, as the diplomatic friend of Cæsar did, to "lend me their ears." It is charged that a number of so-called sporting journals have seen fit to "deride the supposition that 2:12 could by any possibility be beaten by a three-year-old." I am not spokesman for the so-called sporting journals, and may not assume to answer for them, but can say that as I receive about twenty journals devoted to the discussion of the horse; from various cities from Prince Edward's Island to San Francisco, I have not seen in a single one any "derision of the idea" referred to in the Sportsman, consequently the journals referred to must be other than those which are guilty of publishing the communications of "Aurelius."

You say: "The writers were only pencil shovers and know nothing about California, its horses or its climate." This is really hard. If the offenders mentioned do not commit hari-hari on reading that criticism they must be classed among the pachydermatous orders of animals. "Aurelius" is evidently meant, as the journal says he is "one of the worst of the lot." But Aurelius begs respectfully to say that when it comes to committing suicide he positively refuses, and desires to live on. He can fill a niche in the temple of fame as an "awful example" if nothing better be the verdict of prosperity. Moreover he is a user of the caligraph, and if honors were flying about to "pencil shovers" he might insist on a figurative construction of the term, but as no honors or filthy lucre is being distributed to the class aforesaid, he calls for a strict interpretation, though the journal "knocks me silly" with a regular Peter Jackson hypnotizer when it says that I am one of the "worst of the lot" of pencil shovers. It says further on that I am an "able writer," and restores me to consciousness by saying that my writings are "read with avidity." I confess I am, like Lord Dundreary, unable to reconcile such contradictories. What I chiefly object to is the implication that I was one who "derided the idea that 2:12 could be rubbed out." If Sunol had not reduced the record, I might have passed that statement of my position as a tribute to my sagacity, but as Sunol has reduced the record I want it distinctly understood that I always said so, particularly in the article to which the SPORTSMAN took exception. I have made several bad breaks in the prophet line this season and must not be denied of my honors when I happen to make a lucky hit. It was as follows:—

I had no desire to depreciate the greatness of Sunol. I will even go farther and say that if she had been at Terre Haute the day that Axtell made his record, and she was in as good "fit" as she was at Fresno, she would have what the Southerners call a "right smart" chance of dividing the honors with him. My reasons for such a belief are based on the circumstances under which the two records were made. All the papers agree that the track at Terre Haute was in first class shape and very fast. If the papers had not said so the uniformly fast time made would have told the condition of it. On the other hand the spectators at Fresno did not expect that the record would be beaten, and their belief was based upon the poor condition of the track. It is not at best a fast track, and the uniformly slow time made shows that it was very slow at the time of the races. At Terre Haute records were broken in almost every race, and by long distances at that.

As regards the two animals concerned, no one will claim that Sunol is a "quitter." In fact we have been told repeatedly that her thorough blood was strictly fire-proof against such a theory. Had she not the "four mile blood of Lexington" to carry her one short mile? At least let us do justice and say that both animals were equal in condition.

At Fresno the trotting races were alternated with running races, two of each having been contested the day previous. As any tyro knows, the runners cut up a track considerably, especially one with the sandy consistency of Fresno. Moreover, the last quarter was more than average in badness, and when Sunol struck it she was almost anchored. On Terra Haute track no running was allowed, and the track was in the finest condition. Let us compare the time made. Axtell went to the quarter in 33 seconds, Sunol in 32½ seconds; Axtell to the half in 1:05¼, Sunol to the half in 1:05½, Sunol to the third quarter in 1:38½, Axtell in 1:37¾; Axtell home in 2:12, Sunol in 2:13¾.

It is true that the Terre Haute finish is a little up grade, but this necessarily includes the theory that some other part of the mile is down grade. Axtell's finish was made on terra firma; Sunol finished through a deep, sandy stretch, Marvin plying the whip to keep her moving through it. All this being considered, the performance of Sunol must be held equal in quality to that of Axtell, the difference in time being explained, not by any deficiency in speed, but by the difference in favoring circumstances. If the performance of Sunol be equal in quality to that of Axtell, is it going beyond bounds to say that the public must not consider the record beyond danger? I think it reasonable to believe that Sunol will take the record, provided she keeps in condition and trots on a track as good as that at Terre Haute.

The above is the way that I "derided the idea" that Sunol would break the record. It was written on October 26th, long before Sunol showed the wonderful half mile in 1:04½. It was written merely upon what is called the "public form" of the two animals, the only just way of summarising the probabilities. Whilst the writer pleads guilty to pride in seeing the great accomplishments of Eastern bred horses, and that the day has passed when California has the field to herself in such contests, I venture to say that your readers, or you yourself, on second thought will not say that such an article, written in the midst of Eastern glorification, bears any evidence of a "mind biased by the mean little prejudices that warp the mind of the bigot."

I have no apologies to offer for anything I have said. I believe that Senator Stanford has been a patron of the trotting turf worthy of all honor and praise. He has devoted years of study and observation to the subject of breeding horses, and his marvellous success shows that he has studied to a purpose, I believe that most people whose thoughts are worthy of consideration, have abandoned the idea that Gov. Stanford did not know what he was about when he bought Electioneer and started his trotting stud. I had a long talk with Mr. Marvin several years ago at Rochester, when Chimes was a yearling. With his characteristic modesty, he had much to say of the honor due to Gov. Stanford in the conception and development of what may be called the "Palo Alto idea." I believe he told the truth, and my belief was confirmed from time to time by other observers. Mr. Stanford had great assistance in the unrivalled Electioneer, and in Mr. Marvin, though the latter will not, perhaps, thank me for saying so. I wish to say here again, in all soberness, that I have nothing but congratulations to offer to Mr. Stanford on the wonderful feat of Sunol. I can also, with all my heart, congratulate Mr. Bonner on the purchase of Sunol, and still more in the determination to leave her in California for another season's training. We will, I hope, be able to determine which is the faster animal, Axtell or Sunol; though Sunol has the record, she had not shown in public the possession, up to the time of Axtell's retirement, of the ability to beat him at any distance from the jump of a dog to mile heats best three in five. I will say further that I do not believe she can beat him, both coming to the wire under equal circumstances.

It must be remembered that Axtell is a stallion, that he was driven by a telegraph operator who was far from being a Marvin or a Budd Doble. Both horses are in the hands of people abundantly able to give them every chance, and I think my old friend Marvin will concede that Budd Doble is in no way his inferior either, as a conditioner or a driver. Axtell came to his speed and to fully as much speed, after his 2:14 record was beaten by Sunol, as fast as Sunol did after he had retired. There is no reason to believe that he would have improved on as fast as she did. Still this is a hypothetical question which the unequal conditions East and West of the Rockies, will prevent from a settlement this or any other year. Given any two horses fully equal in speed, as I believe Sunol and Axtell were the day he made his record one East, and the other in California, and the probability is that the horse that has the longest time, will make the best record.

Hoping that you will do me the justice to give this a place in your colomns, I close with the wish of a happy Christmas to all my California friends. Though I may admit that I do not "know California, its horses or climate", I hope I will some day.

AURELIUS

What Trotting Blood Does.

EDITOR BREEDER AND SPORTSMAN:—At the risk of being by some thought heterodox, I wish to say a word about this furor over thoroughbred blood in the trotter. In the first place, not enough has been claimed for horses bred as Sunol, Maud S., and others are. The fastest at one mile, the second and third fastest, the fastest three-year-old, are all bred alike The fastest two miles is by Fanny Witherspoon, 4:43. She is by the great Almont, and her dam by a thoroughbred horse.

Now it is claimed by some—it seems to me not very logically—that all this is due to thoroughbred blood. It is claimed that it is the thoroughbred blood that produces *extreme* speed at the trot, and the above instances are cited to prove it. Now I believe in pedigree as strongly as any one, but my experience, as well as teaching, has been that like begets like as a general rule, to which there are exceptions. I have never yet heard of a pure thoroughbred trotting to a record of 2:30.

Two trotting sires, Almont and Electioneer, have become celebrated as the sires of a number of trotters whose dams possessed more or less thoroughbred blood. It was to be expected that such horses would beget speed when mated with trotting bred mares. It accorded with reason and experience of the general course of nature. But when they were able to overcome the running tendencies of the mares in those instances, it was thought phenomenal; and truly it was so. It was exceptional, and was due beyond doubt to special and hidden causes operating in those particular cases by which the influence of the trotting sire predominated in the gait of the offspring to the practical extinction of the influence of the dam. Instances of this kind are numerous in other animals. Galloway bulls bred to Shorthorns show how this may happen where the result is black-Polled cattle. Other examples will suggest themselves.

Hambletonian had his greatest success when crossed with American Star mares, and American Star was nearly a thoroughbred, if indeed not quite so.

Taking the list of 2:30 performers, one is surprised at the number of dams whose breeding is unknown. Even when the sire of the dam is known, the pedigree beyond the second or third dam in a vast majority of cases, is shrouded in darkness. Now Beautiful Bells produces speed by Electioneer to a certainty. Dame Winnie has two fast ones by Electioneer and one by General Benton.

Some mares are known—as the phrase is—to breed *after the horse*. Dame Winnie seems to be one of this kind. Gen. Benton is a trotting-bred horse of great potency as a sire. It is reasonable to expect his daughters will be producers of speed, receiving from him an energetic impulse in that direction.

The dam of Sunol is by General Benton, her dam being the mare Waxy by Lexington.

It is perhaps idle to speculate upon these dark and mysterious questions. For my part I should think it reasonable to believe, if Waxy had been by Alexander's Abdallah, Almont or Mambrino Chief, and her dam by Lexington, the breeding to trotting horse men would have been better. And if the third dam had also been by a great sire of trotting dams, it would have been still further improved. In that case I should be very glad if the fourth dam were by Lexington, Trustee, or some such horse and out of a thoroughbred mare.

In short, I want as many first-class *trotting ancestors* as I can possibly get, and then *when I can get no more trot*, I want it to terminate in a thoroughbred—not because I believe thoroughbreds can trot, but because they came from carefully selected animals of *soundness* and beauty, and as a *background*, are infinitely better than *plugs*. But thoroughbreds do not, as a rule, trot fast, nor do they when mated together produce fast trotters. How many foals are there in the world by trotting sires out of thoroughbred mares? What proportion of these have records better than 2:30?

Almont and Electioneer are exceptional in their power to beget trotters out of any kind of mares, and we hear nothing of their failures.

But those who are claiming that it is the thoroughbred blood that makes trotters claim that it gives stamina.

This is gratuitous. There has so far been no need for trotters to go *any where* for stamina. The distinguishing characteristic of the trotter is his endurance. Phallas by a brother of Electioneer out of a Clark Chief mare, won a fourth heat in 2:13¾. Goldsmith Maid by another brother of Electioneer trotted 332 heats in 2:30 to 2:14. Westmont by Almont paced 107 heats in from 2:30 to 2:01¾.

These performances have an additional merit, viz: That from 200 to 300 pounds weight was dragged after them in each case. These were all mile heats. Besides, the training of trotters subjects them or at least heretofore did subject them to much more terrible strain and hard labor than the training of runners. In our times no runner is expected to carry more than 128 pounds nor to run further than one and one-half miles. Indeed by far the greater number of running races are at short distances with light weight and in nearly all cases are single dashes at that.

The history of the two breeds of horses proves that the palm of endurance belongs not to the thoroughbreds, but to the trotters.

The three fastest trotters are *mathematically* bred alike. Each begotten by a son of Hambletonian, the father of trotters. Maud S. and Jay-Eye-See had for dams two daughters of Pilot Jr, who was a sire of trotters, but more especially a sire of mares which when bred to trotting sires produced fast and valiant trotters. Sunol by Electioneer had for her dam Waxana by General Benton a great sire of trotters and of mares that when bred to trotting sires produce first class trotters. The impress and stamp of Pilot Jr. and General Benton was placed upon these three great mares. They had trotting blood *engrafted* on the thoroughbred and it was *on top*. It lay there on the *surface* as it were. Had these three mares been bred to *thoroughbred* horses or to Clydesdales, there would have been no Maud S., Jay-Eye See nor Sunol. But the trotting blood of Harold, Dictator and Electioneer, found this kindred trotting blood of Pilot Jr. and Gen. Benton sleeping there as it were on that ancestry which was better than an ancestry of *scrubs* and woke it into life and the happy chance gave the world these three world's wonders. They each have *two trotting* crosses The third dam of Sunol and Jay-Eye-See were each by Lexington. These speediest of all trotters, one would think owe their capacity to go fast at that gait to ancestors who had that kind of inheritance to impart to them. It seems less absurb to attribute their amazing trotting speed to that branch of their ancestry whence other horses with speed at the same gait have sprung than to say they trot fast because Lexington could *run* fast.

The best thoroughbred is no doubt but for a *background* for trotters, as it would seem rational to believe it best for any purpose where soundness is required. These great trotting sires have had no choice heretofore except scrubs *or* thoroughbreds for a background. Indeed the dams of trotters in a vast multitude of cases have been scrubs.

But these great trotting sires even with scrub dams have given the world "a breed unmatched for courage, breath and speed." When in a few more generations we have produced mares like Sunol—mares worthy to be bred to such horses as the sons of Almont, Electioneer, George Wilkes and Sultan—and *breed* them to these great progenitors of trotting speed and matchless value we may expect results.

In the meantime public spirited men of vast wealth like Senator Stanford can afford to experiment with thoroughbreds if they like and breed hundreds of failures to get a Palo Alto. They can *stand* it. But the man who breeds for profit or for his daily bread had better breed on lines that promise a reasonable *certainty* of a 2:25 horse than go into bankruptcy attempting by the thoroughbred route to produce a two minute trotter.

Respectfully,

W. H. ASHBY.

OAKLAND, November 18th, 1889.

A Word to Young Trainers.

The secret in the art of horse-breaking consists in a correct knowledge of the horse; and when that is understood, the trainer finds his whole efforts must be devoted to improvement of the natural intellects of the animal; no other method can ever succeed. It is impossible to give a horse either an artificial intellect or memory. A horse is naturally well disposed to man, though fearful of and obedient to him. No human art can effect anything contrary to the nature of the horse, though the animal may be easily imposed on. Therefore; in training, there must be a reason for every natural and beneficial result looked for, or capable of being produced through the means employed. If the trainer can give no substantial reason for any particular stratagem he employs, whatever the result produced, it can have no lasting or beneficial effect upon the horse. But if nature be obeyed, and her order strictly kept, it follows as a certainty that the end desired will be attained. So that if art be employed with reason, it must be in accordance with the instinct of the animal, for nothing in the art of horse training is reasonable that is contrary to the nature of the horse. And these, the first principles of the art, should be kept constantly in mind; for nothing is easier than to impose on a horse, because the animal unconscious of imposition, and is, besides, fearful and obedient to a man.

Neither force nor violence should be used in training colts: they must be won by gentle treatment, for violence is opposed to the three fundamental principles of the art. Whatever a horse does by violent compulsion is of no avail in training, because the horse knows not what is required of him, or how to obey; therefore no useful impression is made upon the animal when the teaching is accompanied with violence. Correction should be administered without violence, and immediately after the fault. For instance, if a horse does wrong, and the trainer has to go and get a whip before administering the chastisement, it is unreasonable to suppose that the horse (which is not gifted with the power of reasoning) can know for what purpose the chastisement is administered; therefore corrections should never be resorted to any other time than the instant the horse commits a fault. An impatient man is totally unfit for the art of training colts.—The Horse World.

To purify the air in stables, use the best disinfectant known—Darbys Fluid.

P. C. Blood Horse Association.

Last Saturday evening was the date appointed for the annual meeting of the Blood Horse Association, and, pursuant to call, some thirty members of the organization met to elect officers for the ensuing year and transact such other business as might come before the meeting. In the absence of Mr. M. F. Tarpey, who has acted as President since the death of David McClure, on motion Col. H. I. Thornton was called to the chair, but just as the proceedings opened Mr. Tarpey arrived and occupied the place of honor. Secretary Culver read the minutes of the previous meeting and they were approved. A short time ago, under instructions from the Directors, the Secretary had sent out circulars requesting members to pay up the annual dues of $25, and those who were present but had not yet complied with the request took advantage of a lull in the proceedings to assist the depleted treasury. Five hundred and fifty dollars was collected, which is the first dues ever collected since the Association was organized. At the annual meeting of 1888 a committee was appointed to look up suitable land for a race track, and Mr. Tarpey reported that the gentlemen had examined all the available land in the vicinity of San Francisco and Oakland, and referred to three eligible sites, one about six miles from the city and the other two in Oakland. In the course of his remarks Mr. Tarpey said it was rather a difficult matter for the committee to go around pricing land when there was not a cent in the treasury, a fact that seemed to be concurred in by all the members present.

On motion it was decided that the old officers should hold over until the beginning of the year, so as to enable the present officials to finish the fall meeting.

A discussion ensued as to the amount of dues which should be charged next year, and after several amendments had been voted down the sum was fixed at $15.

The election was the next thing on the programme, and Ariel Lathrop was selected to fill the position of President for 1890; Col. H. I. Thornton was elected first Vice-President and P. A. Finigan for second. On a vote being taken Thomas H. Williams, J. B. Haggin, R T. Carroll and James P. Kerr were declared elected as Directors, but the latter named gentleman resigned in favor of Mr. Gunst.

A long discussion ensued between the members as to who should be allowed on the club house stand, and it was finally decided that city guests should not be allowed the privilege, but that visitors from the East or the country might be invited to the private stand.

Meeting adjourned until next November.

Southern California News.

After the marvelous exhibitions of trotting at the Bay District Track on November 9th, and at Napa on November 16th, Californians can well exclaim, "We are the people." I have always had great expectation for Sunol since the day she beat Vesolia at Los Angeles, but even my most sanguine anticipations did not conjure up 2:10½ for a three-year-old. The record at that time was 2:18. When Sunol, as a two-year-old, showed 2:18 it certainly justified the opinion that, bar accidents, she should at least reach 2:15 as a three-year-old, but there is no longer any telling where the California production will get to in the course of a few years.

There are only three stallions in the world who have beaten 2:12½. Two of these are California bred. How is that for a record? But the end is not yet, and I confidently expect to see Axtell's record knocked into smithereens by either Stamboul or Palo Alto, or probably both. Stamboul's 2:12¼ at Napa pleased me immensely. As you are doubtless aware, I am a Stamboul enthusiast and have written more about the grandson of Sultan than any newspaper man in the country.

All Southern California horsemen will rejoice to hear that L. J. Rose has won his wager with Mr. Crawford of Kentucky. Stamboul's improvement has been consistent. His record at the end of each year was: Two-year-old, 2:37; three-year-old, 2:26½; six-year-old, 2:14¼, and seven-year-old, 2:12¼. Here's to 2:11 at his next attempt.

L. J. Rose's new venture in the thoroughbred line is not a surprise. He has been contemplating this move for several months past. It will help racing in this part of California wonderfully.

Los Angeles is making a bold bid for the patronage of horse owners. A meeting has been arranged for Christmas week. The Sixth District Agricultural Association have also announced a week's meeting of running and trotting for the middle of April, while it is expected that the Southern California Racing Association will give an exclusively running meeting some time in March. San Diego will also fall into line. Mr. Babcock is building a race track at Coronado Beach, and contemplates holding a brilliant initial meeting early next year.

With a track at Coronado and Pacific Beach, San Diego is unusually well supplied with race tracks. The success of the San Diego horses Mikado and Tycoon has stimulated the patrons of racing in this country. Sam Caton, the former driver of Bell Boy, is located at Pacific Beach. He has a big string of untried trotters from the frozen East. A number of them are especially well bred.

Mr. Seamans, who formerly owned Bell Boy, has returned to San Diego. He saw Guy trot in the East.

Jim Roarke now drives Jim Leach, one of the gamest trotters ever hitched to a sulky, on the road every day.

I recently met Steve Stroud at Los Angeles. The old man is pleased as punch with King David. He wants him for stud purposes.

W. J. Robinson, one of the leading dry-goods merchants of Los Angeles, and a Director of the Sixth District Agricultural Association, has purchased a fine breeding farm near Rosemeade. He recently imported some choicely-bred trotters from the East.

I ran across Jim Madison, of Julian, the other day. Mr. Madison owns Shiloh, who, by the way, if he had had the mares, would have ranked with the best stallions in the country. One can count on his fingers the thoroughbred mares bred to Shiloh. Every reader of the BREEDER AND SPORTSMAN has heard of Mikado and John Treat.

Ben Hill has at his Bakersfield ranch three full brothers of Gladstone, which he expects to train for next season.

Mr. Newton, one of the leading men in this section, has an Alcazar youngster which is a perfect model of symmetry.

The pacers and trotters taken East by "Knapsack" McCarthy from Los Angeles, were on the sick list nearly the entire season.

Fair directors down this way are beginning to appreciate the fact that the bang tails draw out the crowd.

A brother of Walter Maben is handling the youngsters at the Robinson Ranch, near Rosemead.

Mrs. Ben Hill has deputed me to name the next Reveille youngster. It will not be called Pinafore.

The Sixth District Agricultural Association cleared $3,200 by their recent meeting, notwithstanding the postponement. This result will be an incentive to offer the biggest purses on the circuit next year.

A score of horses are domiciled at the new track at Escondido where the first fair of the 22d district was recently held.

DAGWORTH.

The Palo Alto Catalogue.

We have received from the office of Senator Leland Stanford the new catalogue of the stock at Palo Alto for the year 1889. As a natural consequence, Electioneer starts the reading matter, and it is pleasant to state that he has made a large addition to the number in the 2:30 list as compared with last year, and has added greatly to the reputation of California as a horse-breeding State. The work shows that forty-eight trotters are credited to him, which is a larger number than any living stallion has in the list, and one pacer (Peruvian Bitters) is also attributed to him. Of the new comers this year, there are:

Norval	2:17¼
Hattie D (three-year-old)	2:22
Palo Alto Belle (three year-old)	2:22½
Campbell's Electioneer (three-year-old)	2:22¾
Gov. Stanford (four-year-old)	2:23¾
Arol	2:24½
Emaline	2:27½
Pedlar (two-year-old)	2:27¾
Egotist	2:29
Ella	2:29
Grace Lee	2:29¼
Del Mar	2:30

Of those who have reduced their records during the present year, we find:

	Former Record.	New Record.
Sunol	2:18	2:10½
Palo Alto	2:20½	2:12¼
Express	2:29½	2:21
Arbutus	2:30	2:24½

The above is a grand showing, and is in direct proof of Senator Stanford's rare judgment in the selection of horses. Of no other stallion in the country can such a showing be made, and, while his owner may feel a gratification in the possession of such a prolific sire, every horseman in California has the satisfaction of knowing that the honors of Electioneer reflect a credit and glory to the State at large. As to his ability to breed on, we have ample proof, his son, Anteeo, having two in the list in California this year; Alfred G., 2:19¾, and Redwood, 2:24. Of a truth it may be said, Electioneer's is a family that will not only train on, but will breed on as well.

Among the other stallions enumerated in the catalogue are Ansel, 2:20, Palo Alto, 2:12¼, Clay, 2:25, Whips, 2:27½, Azmoor, 2:24¾, Electricity 5344, by Electioneer, dam Midnight (dam of Jay-Eye-See, 2:10, and Noontide, 2:20½), Nephew 1220, Piedmont, 2:17¼, and here it will be appropriate to say a few words for the magnificent horse, of whom it was once said, that, "there never was his equal going down the line." Last year he had to his credit one solitary entry in the list, Pequot, 2:26; to-day he has seven, having added half a dozen this year. They are, Sport, 2:22¾, Lorita, 2:22¾, Ira, 2:24½ (his first race), Carlisle, 2:26¼, Marion, 2:26¾, and Stanford, 2:30.

All the great speed producing lines of the celebrated trotting families are centered in Piedmont, together with a cross of thoroughbred blood through the grandam, who was by Grey Eagle. This noted horse is now on the high road to success, and much may be expected of him. Still another of the stock stallions is Liberty, a son of Piedmont. Benefit 5327, Macbenton, Wildnut, Wildboy, Beverly, Alfred 5328, Alban 5332, Benton Frolic, Mohawk Chief, and last, though not last to bring up the rear is Gen. Benton 1755, with fifteen in the list. Here on the coast we have this season two fine sons of this great sire, Lord Byron, four years old, who trotted the first and fifth heat of a race at Sacramento in 2:18, and all five of the heats were under 2:20. Big Jim, out of the dam of Palo Alto, made a record of 2:23½. Of the broodmares, it is sufficient to say that there is no establishment in existence that can compare with it in point of numbers, and as to the breeding of the matrons, none can surpass them in excellence. A hasty glance through the book shows 333 broodmares on the broad acres of the two farms, and for blood lines and individuality, they are the equal of any to be found in the country. Among the young stock there are twelve stallions; also seven colts of 1885, twenty of 1887, and forty-seven of 1888; there are also eighteen geldings and nine fillies.

The thoroughbred department is not forgotten, and thirty-seven pages are devoted to the bangtails. Of the stallions there are Flood, by Norfolk, dam Hennie Farrow; Shannon, by Monday, dam Hennie Farrow; Argyle, by Monday, dam Cuba, and imp. Cyrus by Wenlock, dam imp. Teardrop. Every broodmare in the list has been selected for individual merit, combined with royal pedigree, and it is not to be wondered at that the establishment can turn out such famous racers as Racine, Flambeau, Rico, Faustine, Peel and Muta In the introduction to the catalogue, an invitation is extended to visitors to call and examine the stock, whether they contemplate purchasing or not, on all days except Sunday. The trotting department is under the superintendency of Charles Marvin, while Henry Walsh has the charge of the thoroughbreds.

The Standard.

[AS REVISED AND ADOPTED BY THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS, DECEMBER 14, 1887.]

IN order to define what constitutes a trotting-bred horseand to establish a BREED of trotters on a more intelligent basis, the following rules are adopted to control admission to the records of pedigrees. When an animal meets the requirements of admission and is duly registered, it shall be accepted as a standard trotting-bred animal:—

FIRST.—Any stallion that has himself a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

SECOND.—Any mare or gelding that has a record of 2:30 or better.

THIRD.—Any horse that is the sire of two animals with a record of 2:30 or better.

FOURTH.—Any horse that is the sire of one animal with a record of 2:30 or better, provided he has either of the additional qualifications: (1) A record himself of 2:35 or better. (2) Is the sire of two other animals with a record of 2:35 or better. (2) Has a sire or dam that is already a standard animal.

FIFTH.—Any mare that has produced an animal with a record of 2:30 or better.

SIXTH.—The progeny of a standard horse when out of a standard mare.

SEVENTH.—The female progeny of a standard horse when out of mare by a standard horse.

EIGHTH.—The female progeny of a standard horse when out of mare whose dam is a standard mare.

NINTH.—Any mare that has a record of 2:35 or better, and who sire or dam is a standard animal.

Best Trotting Records.

1 mile—2:08¾, Maud S., against time, in harness, accompanied the distance by a running horse, Glenville, O., July 30, 1885.....2:13½, best time in a race between horses, Maud S., Chicago, Ills., July 24, 1880.....2:12, Axtell, against time, accompanied by running horse—fastest stallion time, Terre Haute, Ind., Oct. 11, 1889.....2:13½, Phallas, fastest heat by a stallion against other horses, Chicago, July 14, 1884.....2:12¾, Palo Alto, third heat in race at Stockton, Cal., Sept. 26, 1889.....2:15½, Jay-Eye-See, half-mile track, Lincoln, Neb., Sept. 14, 1887 .....2:15¾, Great Eastern, under saddle, third heat, Morrisania, N. †Made in a heat race.
*Doubtful, and made in a heat race.

Jockey Club Receipts.

ALBANY, Nov. 18th—The State Controller has received the following sworn statement of the gate receipts for admission to the track of the New York Jockey Club for its two meetings this year. The total receipts for twenty days' racing were $64,111. The tax on these receipts, 5 per cent, is $3,205 55, which goes into the fund to be used for prizes at agricultural fairs, under the provisions of the Ives Pool bill. The receipts for the several days of the two meetings are as follows:

Tues., Aug. 20	$8,319 00	Tues. Aug. 27	$4,470 00
Wed., Aug. 21	3,181 00	Wed., Aug. 28	2,838 01
Thurs., Aug. 22	3,714 50	Thurs., Aug. 29	3,494 01
Friday, Aug. 23	2:837 00	Friday, Aug. 30	3,339 50
Sat., Aug. 24	6,758 50	Sat., Aug. 31	7,857 50
Total for August			$46,759 00
Wed., Oct. 2	$2,919 00	Wed., Oct. 9	$1,813 00
Thurs., Oct. 3	1,813 50	Thurs. Oct. 10	1,340 00
Friday, Oct. 4	1,337 50	Friday, Oct. 11	1,022 00
Sat., Aug. 5	2,871 00	Sat. Oct. 12	2,098 50
Tues., Oct. 8	1,587 00	Tues., Oct. 15	1,120 00
Total for October			$17,326 60

Blood Horse Meeting.

SPECIAL DAY.

The Blood Horse Association on Tuesday had an extra day for the benefit of the speed driveway. The weather was rather cold, and doubtless prevented many from going out, but still a goodly crowd assembled at the tracks, prominent among whom were Rudolph Spence, George Fiddes, Samuel Vallean, W. H. Barnes, Thomas Doolan, John Hughes, J. M. Ketchum, Joseph Hopkins, Captain H. H. Hobbs, Frank Dunn, Walter Huie, Robert O'Connell, Charles Goewey, Oliver M. Sanders, Henry Boyd, John Martin, Peter J. Donahue, Judge W. H. Levy, Joseph Livingston, Andre Potentini, Harry Adler, Colonel Harry I Thornton, John Morrison, Romeo Harris, Samuel Edwards, Samuel Parker of Honolulu, David McIntosh, John Oliver, Austin Tubbs, Emil Pissiz, Geo. Hubbard, Edward Fay, Peter Brandow, T. Carey Friedlander, Capt. T. F. Meagher, B. C. Brown, Joseph E Snain, Dr. Gerrar, J. M. Chenoweth, ex-Governor Salomon, M. H. de Young, Frank Hubbard, Colonel William Forsyth, M. H. Hecht, J. W. Young, Colonel Dickey, Frank Maskey, C. H. McDonald, M. T. Kearney, Colonel Moorhead, J. L Herbert of Honolulu, Adolph B. Spreckels, Colonel W. W. Stow, Robert B. Milroy, J. B. Crockett, C. G. Hooker, James Smith, Ed F. Smith, C. H. Harrison, J. B. Chase, J. J. Coffee, W. S. Hobart, George A. Knight, Richard Tobin, John Mackey, John White, Dr. W. H. McLaughlin, A. A. Sanderson, Lieutenant Rafferty, Lieutenant Burr, Major F. F. Bennett, A. L. Phillips, George Taylor, Drury Melone, Robert Crockett, W. H. Crawford, Ed Bither, Captain Smith of Oakland, Carleton C. Coleman, Augustus Casserly, Dr. John Abrams, G. M. Ashe, Ed Barreda, E. E. Eyre, F. A. Zech, Richard O'Neil Harry Risley, M. A. Gunst, Will Tubbs, Charles Ascher, George Bates, Judge Sabine, Harry Pinto, Judge Frank Lawler, Simon Seymour, John Brown of Petaluma, Sol Jacobs, Richard Dwyer, Ira Ramsdell, Colonel Harry Brady, Nick Steiner, James Hope of Santa Barbara, John Tormay, William Rogers, Jesse Marks, Eugene Folsom

The programme included five races, but owing to the delays at the post, only four were run off. Col. Thornton's Abi scored a popular victory in the first race, and although she got badly away, she won handily at the finish.

The Vestal Stakes was won by Hazlett's superior judgment in selecting the hardest and best going while Faustine ran in the deep ground in the middle of the track. Kitty Van readily captured the five furlongs and Guido wound up the day by upsetting an s. t. b. certainty in Marigold.

The one particular feauture of the day was that every winner came down the stretch on the outside, which was the only place where the track was fairly good.

The officials for the day were: Judges—R. T. Carroll, J. N. Bailbache and W. Coombs. Timers—E Bither, O A. Hickok and A. Gonzales. Starter—Capt. T. F. Meagher. Sec'y—E. S. Culver.

Punctually at two o'clock the first race was called up, ten horses facing the starter for a three-quarter dash. Betting was not very lively in the auctions, but in the books a good deal of business was done, the Montana contingent plunging heavily on Jubilee, while the local talent backed Abi and Daisy D. The auctions sold Jubilee $25, Abi $18, Tycoon $7, and the field $8.

In the books, Jubilee 8 to 5 straight and 3 to 5 for a place; Abi 3 to 1, 1 to 1; Daisy D. 6 to 1, 2 to 1; Tycoon 5 to 1, 8 to 5; Songstress 8 to 1, 3 to 1; Jubilee, Coloma, Fannie F., Dewdrop and Jou Jou each at 30 to 1, and 10 to 1 for a place.

A long time was passed at the post breakaway after breakaway taking place and to increase the delay, Dennison's stirrup broke. When a fresh one had been procured several more false starts took place, Jubilee being in front every time while Dew Drop and Nabeau stood still. At last the flag fell to a fairly good start. Jubilee and Fannie F. having a little the best of it, were soon a length in front of Songstress and Daisy D. while Abi was last but one. Narvice sent Songstress to the front and at the half mile post was half a length in front of Jubilee with Fannie F. a length back third and Daisy close up fourth. Songstress increased her lead round the turn while Abi came out from the rack. When the stretch was reached the field all went wide on the hard going and Daisy D. soon showed in front looking all over a winner at the furlong pole but Abi on the extreme outside came with a rush and despite Dennison's effort on Daisy won easily by an open length, Fannie three lengths back third just clear of Tycoon, Jubilee and Songstress.

Purse $400; $50 to second, $25 to third for three year olds and upwards. Winners of any race over this distance (handicaps and selling races excepted) to carry three pounds; of two such races five pounds; of three or more ten pounds extra Beaten maidens allowed three pounds. Three-quarters of a mile.

H. I. Thornton's br m, 5, Abi, Red Boy—Abi, 115.....Casey 1
H. D. Miller's b m, a, Daisy D., Wheatley—Black Maria, 125.....
.....D. Dennison 2
M. Storn's b m, 4, Fannie F., Wildidle—Sallie Hart, 115.....Pierce 3
Jou Jou, 115, Bally; Dewdrop, 115, Williams; Nabeau, 115, Hitchcock; Tycoon, 115, Murphy; Jubilee, 110, Hazlett; Songstress, 110, Narvice; Coloma, 118, Harmen, also ran.
Time—1:17.

The Vestal Stakes had five starters. Faustine was at once made a red hot favorite in the auctions, selling for $40 to Glen Ellen's $20 and the field's $18. In the books betting was: Faustine 7 to 10, Glen Ellen 2 to 1, Louise M 10 to 1, Bessie Shannon and Joe Viva each 30 to 1. Place betting: Faustine 1 to 4, Glen Ellen 2 to 5, Louise M 3 to 1, Bessie Shannon and Joe Viva each 6 to 1.

The flag was dropped at the first attempt. Joe Viva cutting out the pace, led past the stand with the others close up. Going round the first turn Hazlett, on Louise M, who had gone on the outside in the hard going, cut across and soon opened up a gap of four lengths, which she kept all the way up the back stretch, and on the upper turn was three lengths in front of Faustine, with Joe Viva two lengths further back. Louise M was in front at the furlong pole and the heavy going not suiting, Hazlett pulled across Faustine and again took the lead, going on the outside, and after a hard finish beat Faustine by a short head. Glen Ellen was a bad third.

The Vestal Stakes. For three year old fillies (foals of 1886). Thirty-one entries. $5 each, p p, with $50 added; second to receive $100, third to save stake. One mile and a quarter.

.....Monahan 2
J. R Chase's ch f, 3, Glen Ellen, Kyrle Daly—Mistake, 115...Pierce 3
Bessie Shannon, 115, Narvice; Joe Viva, 115, Murphy, also ran.
Time—2:16½.

The third race—a five furlong dash—had ten starters. After a good deal of chopping and changing Kitty Van settled down favorite in the books, and red hot too. Pools sold: Daisy D $25, Kitty Van $15, Susie S $10 and the field $20

In the books Kitty Van 8 to 5 straight, 3 to 5 place, Daisy D 5 to 1, 8 to 5, Sunday, Peregrine and King Hooker each 6 to 1, 2 to 1, Susie S 8 to 1, 3 to 1, Sleepy Dick and Applause each 20 to 1, 8 to 1, Jessie C 25 to 1.

After a long delay, caused by one or two who did not seem anxious to get away, the flag was dropped, with Kitty Van having a little the best of it. Hazlett sent her right along, followed by Sunday, to the head of the stretch. Hazlett again took the outside and won easily by a couple of lengths. Painkiller and Applause came fast in the stretch, the former getting the place, while Applause was beaten a head by Sunday for third.

THE RECORD STAKES.

For all ages; $25 entrance, with $500 added, of which $50 to second $25 to third. Weight for age. 16 entries. Five furlongs.

Time, 1:02.

The fourth race, a two-year-old handicap, seven furlongs, had seven starters. Marigold was deemed such a certainty that she sold in the auctions for $25, while Guido brought $10 and the field $7. Book betting had Marigold 7 to 10, Guido 3 to 1, 1 to 1, Ede 5 to 1, 8 to 5, Captain Al. Jessie C and Sheridan each 12 to 1, 5 to 1, Morton 20 to 1, 5 to 1. After several breakaways the flag fell, Ede having a length the best of it was ridden right out, followed by Guido, Captain Al and Sheridan, half a length apart. Marigold closed up a little on the backstretch, but Ede and Guido had a good lead when the homestretch was reached. Ede came on the rails in the deep, going while Guido took the outside and Marigold the center. The favorite closed up rapidly and was only beaten half a length by Guido, while Ede was two lengths further back, third.

SUMMARY.

Handicap; for two-year-olds: $10 from starter; $5 declaration. First horse to take the purse; second horse 70 per cent. and third horse 30 per cent. of starting money and declarations. 16 entries. Seven Furlongs. Purse $560.

Time, 1:32.

THIRD DAY.

The San Francisco public are unwilling to turn out, no matter what the inducement at the race track, unless the sun is shining brightly. Thanksgiving Day was dark and cloudy yet the atmosphere was pleasant and agreeable and ten thousand people should have passed the gate, but not more than two thousand were present to witness an enjoyable afternoon's sport, and see some of the best thoroughbreds in America. The bookmakers were present in full force, there being also a combination stand, in addition to the regular auction pools. The ladies were their in goodly number and added greatly to the lively scene by the brilliancy of their dresses and enthusiastic applause whenever one of thier favorites won.

There were many familiar faces present, and the lovers of the Sport of Kings were to be seen at every turn. As four of the Palo Alto thoroughbreds were to start, it is only natural that Mr. Ariel Lathrop and the faithful trainer, Henry Walsh, were on hand. Good natured Dan Donnelly from Sutter Creek was a keen spectator, but he was heard to say that he would rather see Stamboul trot in 2:10 than see all the bangtails in the country. The judiciary was represented in J. M. McShafter, the owner of Louise M. and Judges Levy and Lawler. The trotting horse contingent were out in full force, there being, Hickok, Dustin, Bither, Brandow and Davis of the drawing fraternity, while the owners of horses with the acquired gait, were to numerous to mention. Lot Slocum and C. S. Crittenden were seen hobnobbing with their friends, and John McKerron had a pleasant word for everybody. C L. Woods, the owner of Allorita 2:28½, was up from San Luis Obispo, and Tim Bernard was down from Chico.

An old familiar face, but one now rarely seen, was that of Mr. Judson, the owner of the great race horse Wildidle. Simon Seymour, of the Russ House, San Francisco, and Mr. Perkins, of the Holton House, Portland, were conspicuous personages. Mose Gunst was trying to arrange for the new event which will be called the Tobacco Stake. L E. Clawson had forgotten for the moment all about sewer pipes and was expatiating on the merits of a horse that was going to beat Big Jim's record. Dr Ross, owner of imp Cheviot, was rubbing elbows with Jeff Knight to whom belongs imp Intruder. As usual the visitors from the Blue Grass region were there as was also Mr. Du Bois, the owner of Superior 2:19½. B. C. Holly was on hand from Vallejo, talking about the merits of Mountain Boy. A. B. Spreckles was there to enjoy the sport and have a good time. Charley Chase and Ed Smith were discussing the probability of Whisban being able to win, and both had to confess that the chances were in favor of Racine. L. J. Rose was up from Los Angeles arranging to take Stamboul down there to beat 2:12. In fact all the gentlemen of the State with sporting proclivities were to be seen on the members' stand or around the pool box. At the time of writing (Friday morning) the sky looks over cast with a strong probability that it will rain shortly. However, if the weather remains clear, the meeting will terminate tomorrow with the best card of the season.

The day's racing all round was very good, large fields turned out in every instance, the first race was won by Oro who was heavily backed by the Hazlitt Coterie, the half mile and repeat was won in straight heats by Rondo, the big Mon, tana chestnut winning cleverly. The Autumn Stakes left every one in doubt as to whether Racine or Flambeau was the best, neither of them were touched, and Muta from the same stable finished third. The Fame Stakes was considered a very open race. Hotspur beat Picnic and Wild Oats at Sacramento in a mile and a half while Faustine was next expected to stay the route but after Louis P. had run himself out, she went to the front and won after a desperate finish with Picnic who came fast in the stretch. In the last race Painkiller was never headed; the favorite, Black Pilot, judiciously kept in the middle of the procession and did not run any better than in his previous essay.

The officials for the day were: Judges—Col. H. I. Thornton, Ariel Lathrop and Carleton Coleman. Timers—O. A. Hickok and L. J. Rose. Starters—Henry Walsh and W Coombs. Secretary—E S. Culver.

Promptly at one o'clock the horses came out for the first race, a mile and a sixteenth, with thirteen starters. No pools were sold, but a good deal of money was invested in the books. Kildare and Tom Daly 3 to 1, Oro 4 to 1; Jack Brady and Nerva 8 to 1; Applause, Black Pilot Forester and Ida Glen 15 to 1; Perigrine and Bessie Shannon 20 to 1; Morton and Jou Jou 30 to 1.

A start was effected at the second attempt, with Ida Glenn a little in front and sent right along. She set the pace to the head of the stretch with Forester hard ridden to keep up with her. Going round the upper turn Jou Jou came fast and looked like winning but died away again, and Kildare, Oro, Tom Daly and Brady all challenged the leader and after a tight finish Oro won by a neck, Tom Daly a length in front of Brady, who was just clear of Kildare and Applause. Perigrine finished a bad last. Myers was suspended for six months for suspicious riding on Black Pilot.

SUMMARY.

Selling purse of $350; $50 to second; for all ages. Fixed valuation $1200. Two pounds allowed for each $100 less down to $800, then one pound for each $100 down to $500. Mile and a sixteenth.

(Carried two pounds over).
W. L. Davis' b h, 5, Jack Brady, Wildidle—Sour Grapes, 105.Cooper 3
Also ran—Jou Jou, 109, Bally, carried four pounds over; Nerva, 107, Narvice; Applause, 115, D. Dennison; Black Pilot, 104, Myers; Forester, 104, Pierce; Ida Glenn, 105, Morton; Peregrine, 106, Leonard, carried four pounds over; Morton, 91, C. Dennison; Bessie Shannon, 95, Murphy; Kildare, 104, Casey.
Time—1:52.

The second race, a half mile and repeat, brought out another good field, eleven horses facing the starter. The book betting before the first heat was Kitty Van 6 to 5; Daisy D. 3 to 1; Sunday 4 to 1; Susie S, Rondo and Painkiller 6 to 1, Sleepy Dick 10 to 1; Johnny Gray, Applause and Dewdrop 20 to 1; Stoneman 30 to 1.

A long delay occurred at the post and after breaking away innumerable times the flag fell with Rondo and Painkiller in front. Rounding the turn the order was Rondo, Painkiller, Sunday, Sleepy Dick, with Daisy D in the middle of the rest and Applause last. Rondo won easily from Sunday a length in front of Kitty Van, Painkiller next, Stoneman and Applause distanced. Time :48¾.

The second heat was productive of sharp betting. Kitty Van sold favorite in the pools at $30 to $20 each for Rondo and the Field. In the books Kitty Van 6 to 5, Rondo 8 to 5, Daisy D 4 to 1, Sunday 5 to 1, Susie S and Painkiller 10 to 1, Johnny Gray, Dewdrop and Sleepy Dick 30 to 1.

After a long delay at the post a start was effected, with Kitty Van two lengths in front. Painkiller and Rondo followed her round the turn, with Sunday just clear of the rest. At the head of the stretch there was nothing much to choose between Rondo, Kitty Van and Painkiller. Rondo and Kitty drew away in the stretch, and with Kitty swerving across the track, Rondo won easily by two lengths, Kitty Van a length in front of Painkiller.

SUMMARY.

Purse $350; $50 second; for three-year-olds and upward. Weight for age. Half-mile heats.

Time, 0:48¾, 0:49¼.

The auction stakes had seven starters, three from Palo Alto. The stable sold in the auctions for $200 to the field $30. Book betting: Racine 1 to 4, Flambeau 4 to 1, Whisban 12 to 1, Guido 20 to 1, Mohawk and Muta 30 to 1.

A good start was made without loss of time. Muta made the pace to the quarter, with Racine half a length back pulling double. Up the backstretch Racine drew out, the order being Racine, Muta, Guido, Flambeau. Guido and Flambeau closed up on the turn, and going outside Racine were level with him at the head of the stretch. Racine and Flambeau in the middle of the track galloped home together easily. Racine a head in front. Muta outstayed Guido and got third place. Mohawk was last all the way. Time, 1:44.

SUMMARY.

The Autumn stakes; for two-year-olds (foals of 1887). $50 each; $25 forfeit or $10 if declared out January 1, 1889, or $20 if declared out August 2, 1889; all declarations void unless accompanied with the money; with $750 added; second to receive $150, third to save stake. Winners of three stake races to carry five pounds extra. One mile.

Mohawk, 110 (C. Dennison); Whisban, 107 (Narvice); Guido, 110 (Barger), also ran.
Time, 1:44

The Fame stakes for three-year-olds had six starters. Pools sold: Hotspur $80, Wild Oats $60, Faustine $60, Field $40.

The flag was dropped at the first attempt. Louis P and Joe Viva set the pace, soon opening a gap of ten lengths on Faustine, Wild Oats and Hotspur with Picnic last. Louis P kept going and passed the stand for the first time an open length in front of Joe Viva, who was seven lengths in front of Faustine, Hotspur and Wild Oats in the order named. Joe Viva fell back, pumped out, and the other four went on after Louis P and passed him on the upper turn, Faustine leading into the stretch, and despite a vigorous finish by Narvice, won by a neck, Hotspur three lengths back, third, and Joe Viva pulling up a bad last. Time, 3:09.

SUMMARY.

The Fame stakes; for three-year-olds (foals of 1886); $100 each, half forfeit, or $10 if declared out August 1, 1888, or $20 if declared out January 1, 1889, or $30 if declared out August 1, 1889; all declarations void unless accompanied with the money; with $750 added; second to receive $200, third to save stake. One mile and three-quarters.

Time, 3:09.

The fifth and last race had nine starters. Black Pilot was made a hot favorite in the books. Pools sold—Field $25, Nabeau $18, Pilot $10. Books—Black Pilot 8 to 5, Nabeau 3 to 1, Painkiller 4 to 1, Forester 6 to 1, Billy D and Ida Glenn 8 to 1, Lucky Dan 12 to 1, Johnny Gray and Minnie B 30 to 1.

After one breakaway the flag fell to a moderate start, Lucky Dan and Forester being left at the post. Painkiller got well away second; up the backstretch Painkiller strung the field out, Billy D. Nabeau, Minnie B, Ida Glenn and Pilot being the order at intervals of two lengths, Nabeau closed on the turn and ran a hard race to the wire, but could never quite get up to Painkiller who won by a length. Time, 1:45.

SUMMARY.

Grim's Gossip.

It is settled now that Clifton will race every day.

Attention is called to an advertisement in this issue of Stock ranches for sale in Los Angeles County.

Badge, who was bought by John Mullins, of Brooklyn, on Saturday, will be turned over to Jimmy McCormick to train.

Guido's dam, Aurora, will be bred to Stamboul next year. This season she was stinted to Director, and last year to imp Oatcake.

Stamboul is working well at Palo Alto at present. If the weather holds good he, Palo Alto and others will start next Saturdry to lower their records.

The barbed wire fence law about which so much has been said, did not pass the last Legislature as was supposed. It passed the Senate by a vote of 37 to 2, but died a natural death on the Assembly file.

G. H. Hammond, of Detroit has purchased for $5,000 the fast four year old pacer Cæsar by Steinway which was recently sold for $2,650 at the auction sale of Dan McCarthy's horses in New York.

Mr. Robert Bonner, accompanied by his brother, David Bonner, arrived in this city last Sunday. The gentlemen will examine all the prominent stock farms of the State before their return to the East.

In a letter sent to this office a few days ago, Mr Moore, of Shawhan, Ky., speaks very highly of his yearling colt Banner Bearer, and states that it would take more money to purchase him than Mascot sold for.

Hickok, when he expresses an opinion, is generally pretty near the mark. A race horse owner said the track was so slow on Tuesday that they would not run the six furlong in 1:17. Hickok won the money.

The totting breeders in the state will have their eyes opened when they see the Haggin catalogue. Many are the treasure that John Mackey has hidden away on the Rancho Del Paso and Bakersfield ranch.

Had Faustine belonged to any one but Palo Alto, there would probably have been an objection lodged in the Vestal Stakes, for Hazlett, on Louise M., deliberately crossed in front—and very little—of her in the stretch.

Dr. Monsaratt, late of Lexington, Ky., has been in the city all the week attending the races. He has been appointed as Government Veterinarian by the authorities of the Sandwich Islands, and he will start for his future home on December 6th.

Mr. Valensin has suffered a severe loss by the death of a colt by Sidney, dam Fernleaf. He was valued at $5000 and was a very promising trotter. Mr. Corbitt has also lost a valuable colt by Director, dam Sweetness, 2:21¼, for which he had refused $4000.

Pacing talk is again to be heard in the land. Hickok says he is ready to make a match race, but does not want to go for a purse: while Davis, the owner of Roy Wilkes, claims that he has a chip on his shoulder, and wants some one to knock it off.

Pittsfield, Mass., boasts of having on the farm of Mr. W. R. Allen one of the finest collections of purely bred trotting horses in the United States. In less than a year Mr. Allen has expended about $300,000 in purchasing horses and building stables.

The overhead check for the horse is refined and steady torture, not for the strain of the neck backward, but because the animal cannot see the ground on which he is stepping. The swaying of his head from side to side is evidence of his trying to find relief.—Boston Transcript.

Senator Stanford of California has been a most important factor in the advancement of the breeding interest of the country. No one envies him his great success He is now reaping the legitimate fruits of his great liberality, intelligence and enterprise in the business.—Horseman.

There was a large attendance present on Tuesday at the Bay District Track, the occasion being a benefit for the purpose of adding to the fund being raised, with which it is hoped that the Speed Drive in Golden Gate Park may be completed. Almost $900 was taken at the gate.

Mr. Corbitt, of the San Mateo Stock Farm, is about to have a minature track built for the purpose of showing visitors what the young colts and fillies can do. These short tracks are desirable acquisitions as the prospective purchaser can get a better idea of what the youngsters are capable of doing.

Mr. Salisbury wishes he were twenty-five years younger, so that he might serve as an apprentice to Budd Doble, for the old gentleman thinks that Budd is the greatest driver in the world. He watched him closely while back East and admires the genius of the celebrated knight of the sulky.

W J. Gordon, Cleveland O., has sold to C. C. Seaman, of San Diego, California, the bay colt Josiah A. by Clingstone II (brother to Clingstone 2:14), dam Miss Wilkes by George Wilkes, and the colt Thomas Rysdyk by Rysdyk, dam Largesse 2:25 by Scott's Thomas 919, her dam Fanny Howard by Woful.

When the seven furlong race for two-year-olds was handicapped it provoked a good deal of criticism, some few going so far that they said Matt Storn had better take down the purse at once with Marigold. Henry Walsh judiciously scratched the Palo Alto entries and Guido won after a pretty race all round.

Henry Walsh tells me that in all probability he will go with the Rose thoroughbreds to the East next year, and if if he does Racine and Elambeau will be in the string. He will still remain in the employ of the Palo Alto Stock Farm, but will have full charge of the Rose Stable. Henry is one of the very best trainers in the country and will carry the colors of the front.

Some weeks ago the bay gelding Pliny was severely injured in the head by running against a piece of wood projecting in his stall. He will not be able to face the starter again this season, but Kelly and Samuels are in hopes that he will be all right by next year. The loss of his running qualities has been a severe blow to the stable, as when the accident happened he was fit to race for a man's life.

The Brighton Beach Racing Association, in accordance with the Constitution, reports the grand total of gross receipts for admission to race tracks of the association was $44,227.50. Of this amount the tax on gross gate receipts was $2,211.37, a cheque for which was forwarded to Albany.

A new feature will be inaugurated at Prospect Hill Farm' Franklin, Pa., the coming winter. Mr. Sibley intends to have his half-mile track thoroughly sprinkled as soon as Jack Frost puts in an appearance, and by following this plan should the winter be ordinarily cold, a good coating of snow and ice will soon be formed. Then the youngsters will be shod sharp and the winter training begun.

There are some horses that are apt to have sore shoulders in spite of all care in fitting the collar. Washing with strong salt water or vinegar is a common remedy for hardening the shoulder, but according to a German authority much better results can be obtained by washing every night with water in which a quantity of bark of the red oak has been steeped. Two hands full of the bark to a pail of water is the right proportion, and two days' steeping is said to make the liquid strong enough for use.

The sooner all racing organizations throughout the state use coupon tickets the better it will be from a financial point of view. The Directors at Napa and several other places were robbed on the circuit by the use of season tickets, and now the Blood Horse Directors have discovered that season tickets have been shoved through the fences to outsiders and there is no telling how many persons have obtained entrance on one ticket. Use the coupon tickets it may cost a trifle more to start with, but it will save money in the long run.

Mr. A. J. Cassatt has presented Eurus to his trainer, Mr. John Huggins, who will train the well-known son of Eolus next season in connection with the public stable he is about to open. As will be remembered Eurus broke down after winning the race for the Monmouth handicap at Monmouth in August last. Mr. Cassatt did not offer him at his recent sale, but reserved him, hoping the horse might yet be trained, although he thought it doubtful. Huggins, however, thinks the horse will stand, and proposes to try it.

A rather good story—a true one, by the way—comes from Bananaland. A and B made a private match to run their horses for quite a respectable stake. B "got at" the lad who was to ride A's horse, and the B party "went Nap," all the money in the market. A. who is a tip top horseman, had quitely sweated himself down to the necessary weight, and, upon the eventful day, put his colors on under his ordinary rig-out. Just before the start A stripped off, and, telling the jockey he would not require him for the race, took the mount himself, won in a canter, and—tableau.

A turf writer excepts to the use of the word "performers" as applied to the horses that made records of 2:30 or better. If life was not so short, it might be better in each instance to specify whether the animal that made such a record was a pacer or trotter. But this is not always necessary, and it is easier, briefer and therefore in many instances better to use the generic instead of the more specific term. Where it is necessary to make the distinction it is entirely correct to say pacer or trotter as the case may be. This objection comes from a writer who is opposed to admitting the pacer to the standard.

A capital way to dry a horse after a sweat when the weather will permit, is to bring him straight from his race to some sunny spot out side the stables, sponge him freely with water, either warm or cold, over every part of his skin, and quickly scrape with hoop iron, and rub dry with towels. This will refresh the horse and make him dry and comfortable in a much shorter time than he could be dried without water. It is a most refreshing process for any heated horse to go through at any time, one that they thoroughly enjoy, and that will prepare them for a second exertion more quickly than anything else we know of.

During the days that racing was impossible, the BREEDER AND SPORTSMAN'S office was the recognized headquarters for racing men. As a natural consequence many boasts were made as to the relative merits of various horses. At least three owners got together and arranged a race in which $200 a side will be put up, the winner to take the money, and the owners of the second and third horse will throw the dice to see who shall have the winning horse, as the owner of the winner has to relinquish all claim to the animal. The money taken in at the gate will go to some charitable institution. The day has not yet been set for the race.

Arrangements have been made by which George Hankins, Eugene Leigh and Tom Kiley will be equally interested in the Chicago stable next season. All will pool their horses Leigh and Kiley will train, Kiley will ride the heavy-weight mounts, and Bob Francis and Gerhardy will do the light-weight riding.

Kiley, in outlining next season's work, said: "We shall begin at Nashville and stay on the Western circuit till the close of the Washington Park meeting. Then I shall go East with most of the stable, while Leigh will use the rest at the West Side track here. The stable will be large enough to keep three jockeys and two trainers."

Railroad Commissioner James W. Rae has the nucleus for breeding fast trotters on his place of eighty acres just north of San Jose, says the Redwood Times and Gazette. The farm is well watered and finely equipped. On it he has the Electioneer Stallion Antinous, out of American Girl; also the following well-bred mares: Magdallah, with a record of 2:22¼; Big Liz, 2:23¼; the thoroughbred Lillie McEwing, a full sister to Modoc Chief; Lexita by Partisan; a filly by Abbottsford, out of Baby Mine; a filly by Piedmont, out of Bonnie; a mare by Nutwood, out of Lady Farmer, and a mare by Electioneer, out of Lady Farmer. For a starter Jim has a fine string and the racing world will hear from his colts in the near future.

The St. Louis Republic says that Gen. Robinson, president of the Kentucky Association, proposes the establishment of a new stake, to be called the Kentucky Jack Pot stake, for three-year-olds and over, to be run every spring over the three Kentucky courses, Lexington, Louisville and Latonia, in the order of the dates of their meetings. There are to be three races for the pot at one and an eighth, one and a quarter and one and a half miles; one race at each track. By the terms of the stake, the jack pot, if not won by one horse in a single year, may in a series of years amount to a great deal of money and become one of the great stakes of the country. Gen. Robinson will submit his proposition to the other clubs, and upon their acceptance the stake and its conditions will be given to the public.

The new Guttenburg race track is a very different affair from the old one, and is fully the equal of any of the New York tracks. Over $350,000 have been expended in making it what it is, $40,000 of which went to provide the most perfect system of drainage that could be devised. The grand stand and betting ring are inclosed in glass, so that winter racing at the track does not mean exposure to bad weather while at the track. The course is a full mile, and so graded that water runs from it as from a duck's back.

W. S. Hobart has suggested a first rate idea for putting tracks in condition to race upon within a short time after rain ceases to fall. He fancies that the large iron rollers used by the layers of bituminous rock pavements, those with fires inside of them, might be used to advantage in drying out the upper strata of dirt, which would enable the scrapers, rollers etc., to be used the following day after a rain, and on the afternoon of that same day races might take place. The owner of Stamboul has hit upon a happy idea, and it might pay to try it.

Jockey Garrison last week, at Clifton, purchased a race horse for $300. This is not an extensively large price to give for a thoroughbred, and such a well known one as Banbridge, who was formerly the property of Senator Hearst; but still that was more than some were willing to give. Then, after getting the horse, Garrison offered to match the horse against his late owner's Troy, the winner to take both animals, but Alfey could not see it in that light.

BASE BALL.

Manager Robinson's Reprehensible Action—Arrival of the Boston Team.

Who flies the pennant? That is a question that ought to have been decided last Sunday, but the peculiar action of Colonel T. P. Robinson in reference to the last game of the season has left the matter for the Board of Directors of the California League to settle. The race for the flag was a magnificent one, and nothing ought to have been thrown in the way of a fair and square finish, but the Oakland manager, unnerved by the loss of Saturday's game, resorted to tactics that he knew could not succeed, and which anybody with a grain of sense would have seen could not but cast a lasting reflection upon the honesty and integrity of the California League. Colonel Robinson knew when he engaged Van Haltren, Carroll and Brown to play with his team, that the former two were already under contract with clubs of the League for the season, and that his action was in direct violation of the rules of the California League and the National Agreement; besides he had previously filed a formal protest with the Directors against allowing these men to participate in any championship games of the League. But this is not all. When Manager Finn learned on Saturday that Robinson intended to play these men, he immediately notified the latter that he (Finn) would not allow his team to play. Yet despite this notification, Robinson persisted in taking the National League men onto the field and insisted upon using them. Finn was right in refusing to allow his team to play under the circumstances, and after Sheridan declared the game forfeited to Oakland, filed a protest with the League Directors.

The 20,000 people present were clamoring for play to proceed, and Robinson, who began to realize that he had made a monkey of himself asked Finn to play an exhibition game. The latter was obdurate and told the Colonel that as long as he had got the pennant, he could give the people back their money; that he would not let his men go in against the Easterners. Robinson finally agreed to withdraw the objectionable men and the game proceeded with the distinct understanding that it was to be an exhibition. Finn has since filed another protest setting forth that Veach had not been released by Sacramento and asking that all the games he had played with Oakland be thrown out. The directors will meet and undoubtedly either order the game to be played over or declare the San Francisco Club entitled to the rag. In the former event Finn says the game must be played with open gates, or else the proceeds must be divided among the charitable institutions of the city.

Manager Jim Hart and his ball players selected from the Boston team arrived Wednesday. Hart is more than pleased to be in San Francisco again, and has been kept busy ever since his arrival, greeting his countless friends in this city. Mr. Hart is the best known and most popular baseball manager in the country, and his winter visits to this coast are looked forward to with the keenest delight by the patrons of the game, for he always brings the best attractions to be obtained with him. This year he has Clarkson and Radbourne, the greatest pitchers in the business; Bennett and Ganzel two noted catchers; John Morrell, the great first baseman; Billy Nash, who disputes the title of king of third basemen with our Jerry Denny; Dickey Johnson, who is equalled by none in the outfield; besides Tom Brown and Smith, both of whom are too well known to need further mention. Baseball will boom in this city this winter, as both Harris and Robinson have abandoned their foreign trips.

Jimmy Fogarty of the Philadelphia club arrived Wednesday from the East, via Los Angeles, and will be seen in the uniform of one of the local clubs at the Haight street grounds during the winter. Thus far since his arrival he has been busily engaged in making life unbearable for Senator Gagus.

And so Kelly the Great is to be with us this week. The ostensible object of "Kell's" visit is to secure the signatures of the Boston players to Brotherhood contracts, but it is more than likely that he will be seen in uniform while he is here.

Clark has been offered $2,500 a year to join the Brotherhood. He would like to remain in this city if he could secure his release from Omaha.

Finn says that at the annual meeting of the League Directors he will make a strong effort to have Robinson expelled for violating the rules in engaging men who were already under contract with other clubs. It looks as though there might be some fun between these two magnates before long.

Clarkson may be, and undoubtedly is, a great pitcher, but it is more than doubtful if he could go into the box and pitch as strong a game as either Coughlan or Clarke did last Sunday, and under the same conditions. The excitement was intense, and the strain on these two men must have been very great, yet their movements were like clockwork, and their delivery the most puzzling. Coughlan pitching the great game of his life, while the work of his opponent was but little behind. When it is taken into consideration that it was the fourth game the latter had pitched in as many days, and that he had won the first three, his work was phenomenal, and taking his record for the week, it was the greatest ever made by a base ball pitcher. Clarke and Coughlan both deserve to be classed in the front rank of twirlers.

Bets on last Sunday's game should not be paid until the action of the Directors is made known.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

The sporting events of the past week were numerous.

On Monday evening the regular monthly exhibition of the Occidental Club was held.

On Thanksgiving Day the Olympic Athletic Club held its annual fall games.

On the same day the Oarsmen held a regatta at Sausalito, while the Wheelmen held a race meeting at Napa.

RUNNERS, WALKERS, JUMPERS, ETC.

Thanksgiving Day, 1889, has passed by and the athletes are happy once more. Even those who were defeated cannot refrain from giving a sigh of relief because the hard and monotonous task of training has been temporarily finished. The boys can now conscientiously put by their spikes until after the holidays.

A *resume* of the Olympic Athletic Club's out-door meeting which was held on the campus at Berkeley on Thursday last, will appear in these columns next week.

The in-door athletic meeting of the P. C. A. A. A., which will be held in the Mechanics' Pavilion in January next, will be the opening athletic event for 1890, and on Washington's Birthday, a month later, the new out-door grounds of the Olympic Club will be formally opened. The regular annual championship games under the auspices of the P. C. A. A. A., will take place on May 30th. On July 4th the O. A. C. will probably hold a mid-summer handicap meeting, and on Admission Day the chances of another field day being held are good. Thanksgiving Day the annual fall games of the O. A. C. will wind up the year. On the whole, the athletic prospect for 1890 is very bright, and the athletes will scarcely have any cause to growl.

In about two weeks a new amateur athletic club will be organized. The club will be composed of several of the leading men on the Pacific Coast, including many of the crack amateurs of the Golden Gate, Pacific, California and Olympic Athletic Clubs. The club will have its own out door grounds and a fine gymnasium. The committee who have the undertaking in hand will address a lengthy circular to every athlete whom they think would make a good member, and every effort will be made to bar out the rough element so commonly met with in the different athletic clubs. The objects of the club will be manifold: the chief object being to foster out-door sports. Inducements will be offered the members to keep in constant practice so that when they represent their club at open athletic meetings, they will be fully prepared to battle with the other champions for victory.

The organization will not be an aristocratic one; it will be conducted as a gentleman's club and one member will be considered as good as another. There is room for two first-class amateur athletic clubs in San Francisco, and as the Olympic is the only one in existence at present, we earnestly hope that the proposed amateur club will prove as big a success as its promoters anticipate.

Some of the old 'uns will be surprised at the next championship games. The new men already in the field are numerous but by next May there is no telling how many more record breakers will have taken up their residence on the Pacific Coast. Hennessey, Haley and Cassidy, the latest importations, are looked upon as being bad men to cope with and the present champions cannot afford to let the grass grow under their feet for two months previous to May 30th.

The juvenile boxing class at the Olympic Club in charge of Professor Corbett, is making rapid progress. Several of the youngsters already give promise of becoming famous in the fistic arena.

Immediately after the late boxing tournament, J. F. Larkin hurried to the barbers and had his magnificent muttonchops removed. It was a bright idea, and now he can walk abroad in peace.

The Lurline Club will apply for admission to the P. C. A. A. A.

AT THE OARS.

In our next issue an account of the Thanksgiving Day regatta will appear.

Ed. Finley of the Ariels is considering the advisability of buying a single shell. Mr. Finley, although a comparatively new man at the oars, shows signs of developing into an A 1 oarsman.

P. H. McDonald, H. Stokes, Ed Heinan and P. Brennan rowed to the Lurline opening on last Sunday.

The challenge from the Ariel Club which originally appeared in our last issue has not been accepted so far. It has evidently set the different crews athinking, and the Ariel crew are more anxious than ever to have a go for the championship.

Epsy Bros., C. Cummings and Ned Bennett constituted the crew that represented the Pioneer Club at North Beach on Sunday.

Efforts will be made to hold a monster regatta on Washington's Birthday. Should all the clubs join hands the affair should prove a grand success.

The membership of the Ariel Club increases daily. The members are all young men who take an active part in rowing affairs, and next year the club should certainly turn out several crack crews,

The idea of organizing a rowing club in connection with the Olympic Club has been abandoned for the present.

THE WHEELMEN.

The account of the race meet at Napa came to hand too late for insertion in the present issue. Next week however it will appear.

G. P. Wetmore of the Bay City wheelmen is a very promising young rider.

There is a posibility that Napa will be the scene of another race meet on July 4th.

The professional riders are at present giving exhibitions up North. Helen Baldwin won the six day race which ended at Portland, Or., on Saturday night.

CLUB JOTTINGS.

The exhibition given by the Occidental Club on Monday evening last was well attended.

The California Club is heavily in debt. The amateur annex is evidently on the wane, and a general bolt by its leading members may be expected at any time. When the California Club invited the best amateur athletes of the Golden Gate Club, including Egan, White, Gafney, Sexsmith, Yates, Sachs, Holland, and others to join its ranks without payment of the usual initiation fee, it also gave them promises which so far it has failed to keep.

The benefit-exhibition of the Pacific Athletic Club which took place on Tuesday evening last was a splendid success. Next week we will print a summary of the different events.

It is reported that several of the provincial athletic clubs will apply for membership in the P. C. A. A. A.

Now that W. Greer Harrison is no longer president of the Olympic Club, it would be a very difficult task to guess when the new building will be erected.

JOTTINGS FROM ALL OVER.

James Watts has been elected captain of the cross-country team of the Union Athletic Club of Brooklyn, N. Y., and G. Fitzgerald is now captain of the Star's team.

The benefit-meeting tendered Trackmaster F. S. Pitts by the New Jersey Athletic Club on Saturday afternoon, Nov. 16th, was largely attended. The following were the results: Four-mile run to beat record—F. H. Day, N. J. A. C., 1st, time, 20m 15 4-5s, beating the record. Day also broke the three-mile record, finishing the distance in 15m 8s.

One-mile bicycle race, club championship—Sydney B. Bowman first, in 3m 13s; A. C. Jenkins second.

One furlong run—E. E. Barnes, New Jersey Athletic Club, scratch, first, in 22⅕s; B. G. Woodruff, New Jersey Athletic Club, 14yds start, second; F. F. Sliney, New Jersey Athletic Club, 3yds, third.

100 yards backward run—Sydney S. Schuyler, Manhattan Athletic Club, scratch, first, in 15⅕s; B. G. Woodruff, New Jersey Athletic Club, 5yds, second.

Hurdle race, 120 yards—E E. Barnes, New Jersey Athletic Club, 8yds behind scratch, first; F. F. Sliney, New Jersey Athletic Club, 4yds behind, second; Frank Clark, Bayonne, 4yds behind, third.

The Board of Managers of the Amateur Athletic Union held a meeting on the evening of November 10th, at which it was decided that all organizations that desired to hold games under the rules of the Union should notify the secretary of the central body of the date wanted, and if the schedule committee had no previous application for the date, it would be awarded. It was found necessary to take this action for the reason that semi-professional organizations are in the habit of announcing athletic exhibitions and boxing tournaments as being held under the rules of the A. A. U., and it is desired to put a stop to the practice, which can be most effectually done in no other way than that decided upon.

Indoor Sports—A joint athletic meeting and reception will be held by Company K, Thirteenth Regiment, N. G., S. N. Y., and the Acorn Athletic Association, at the Armory, Flatbush Avenue and Hanson Place, Brooklyn, N. Y., on Saturday evening, December 28th, commencing at 8 o'clock. The following handicap events will be open to all amateurs: 50yds run, 220yds run, 440yds run, 880yds runs, one mile run, one mile walk, running high jump and two-mile bicycle race. Gold medals to first and silver medals to second in each event. The rules of A. A. U. and L. A. U. will govern. Entrance feel, 50 cents for each event.

Edward Hanlan, ex-champion oarsman, made his first appearance as the winning oarsman in the regatta scene of "The Dark Secret" at the Academy of Music, Scranton, Pa., Nov. 14th. He was well received.

John Teemer is at present employed at the Cafe Miller, McKeesport, Pa.

Herman T. Braun, the one mile champion swimmer of America, having removed to Jersey City has resigned from the Pastime Athletic Club and will join the New Jersey Athletic Club.

Jake Gaudaur and Al. Hamm are to give exhibitions in Florida during the winter season.

The first annual handicap meeting of the Boston Athletic Association will be held on Saturday, Feo. 15, 1890, in Mechanics' Hall, Huntington Avenue, Boston, commencing at 8 P. M. Following are the events: 50yds. run, one mile run, 440yds. run, 880yds. run, 220yds. run, (over 2ft. 6in. hurdles), one mile walk, pole vault, running high jump, putting 16lb. shot; 220yds. run, throwing 56lb. weight and tug of war (650lb. four men; two substitutes allowed; no contest unless two teams enter). The course will be a board track of about thirteen laps to the mile. The rules of the Amateur Athletic Union will govern all competitions. Open to members of recognized amateur athletic clubs only. An entry fee of fifty cents per man for each event, and $3 for tug of war teams, must accompany all entries and the committee reserves the right to reject any entry. The entries will close on Wednesday, Feb. 5, with Lawrence Tucker, secretary, Exeter Street, Boston, Mass. Silver cups (impressed with club seal) will be given to first, second and third in each event, and a handsome silk banner will be presented to the club making the most points, firsts to count five, seconds three and thirds one.

HIGH JINKS.

THE FIRST EXHIBITION OF THE LURLINE CLUB.

About 500 fortunate individuals received invitations to be present at the Grand Jollification of the Lurline Swimming, Boating, and Athletic Club at the Club rooms on Bay Street, last Sunday. An elegant lunch was served and many of the visitors preferred imbibing, whiskey, beer, or lemonade tinted with sherry in preference to the "hot tar, mucilage" etc., mentioned on the bill of fare A fine programme of sports was arranged and every thing possible done to entertain the guest of the Club.

Shortly after one o'clock the first event on the programme was announced, It was a wherry race, distance two miles. The entries were C. Artegues, Aug. F. Schuppert, J. B. Solomon, G. M. Duffeld and E. Seibel all of the Triton Swimming and Boating club. The race was won by Artegues by five lengths. Prize a gold medal.

The second event was a four oared barge race for which four crews were entered. The South end, Pioneer and Doephin crews, however, failed to show up and the Ariel crew stood alone at the scratch. Not wishing to disappoint the audience it was decided to allow a mixed crew from the Ariels to row against the regular crew. A good start was effected, and the mixed crew in charge of H. O. Farrell at once took the lead. The tide was dead against the boats and it was only by rowing several hundred yards ahead of the stake boat that it could be reached at all so strong was the current. The mixed crew owing to good managment reached the turning point several lengths ahead. The race home was exciting and the people on the shore yelled themselves hoarse.

The regular crew had practiced together previous to the race, and were fresher at the finish. They won by about five lengths. Time, 10 minutes 30 seconds. Prize, a Silver Rowing Goblet. The regular crew was made up of W. P. Hamahan, bow; M. Coffey, fd. waist; George Phelan, aft waist; H. Welkoff, stroke; A Carroll, cox. The mixed crew was composed of H. O. Farrell, bow; L. F. Nunan, fd. waist; C. A. Pless, aft waist; Ed. Finley, stroke; Ed. Carroll, cox.

The third event was a race for pleasure barges. The Triton Club was represented by two crews, as follows: Barge "Lady Washington," L. B. Solomon, bow; J. Fairchild, fd. waist; Aug. Schuppert, stroke, B. F. Kehrlein, cox. Barge "Argonaut," J. L. Kehrlein, bow; Chas Artignes, fd. waist; F. Aurregay, aft waist; F. W. Leibel, stroke; Val Kehrlein, cox. This race also proved to be an exciting one. The boats got an even start and kept close company all over the course until close to the finish, when the crew in the "Washington" spurted and won the race by about a foot. The prize was a silver goblet, presented by F. H. Taufenbach.

This ended the rowing events and the swimming matches began. The first race, intended to be a mile, but in reality only about three hundred yards, was won by H. Clark. H. Harmon coming in second. The first prize was a set of napkin rings, the second prize a scarf pin. The next race was a one hundred yards swim. This was a splendid contest, William Mitchell winning by about six inches. He received a gold medal. The one mile and one-half mile swimming races did not come off owing to the strong tide that was running. The aquatic sports being ended, the guests retired to the gymnasium, where a splendid athletic exhibition was given by prominent athletes. The programme was as follows:—

1. Wrestling—By Profs. Schwartz and Richter.
2. Boxing—Prof. P H Gay vs V A Hancock.
3. Boxing—H Gallagher vs I Gallagher.
4. Boxing—Prof. W Smith vs W M Cook.
5. Boxing—J Choynski vs Prof. M Hanly.
6. Boxing—Ed Greany vs Paddy Smith.
7. Boxing—J Lynch vs Young Frenchy.
8. Boxing—Ed Greany vs I Delaney.
9. Slack wire performance—Prof. Chas. Stanley.
10. Tumbling—F Steves and P Boula.
11. "Come on, boys, let's have a drink."

This ended a very enjoyable day's fun and all returned home happy and full of good-cheer.

The following were the officers of the day: Master of ceremonies, F H Taufenbach, assisted by C W O'Brien. Referee, Mr. M J Flavin. Starters. F H Taufenbach and C W O'Brien. Judges, H Dobbin and E McDevitt. Timekeepers, C Wetzel and D Barkley. Committee of Arrangements, F H Taufenbach, E McDevitt, D Barkley, T Crane. C W O'Brien and C Wetzel.

BILLIARDS.

The Brunswick-Balke-Collender Co. announced from Chicago, under date of the 16th inst., that they will give two tournaments at balk line billiards, the first to be a handicap in lines, and to be held in New York in January next; the second to be a handicap in points (Schaefer's pet project), and to be held in Chicago thirty days after the first tournament. The above firm offers $5,000 in cash prizes, or $2,500 for each tournament. Each contestant will have to pay $500 enfrance fee for the two tournaments, as a guarantee that he will play in both. Slosson, Schaefer and Vignaux are to be required to play fourteen inch lines against the eight inch lines of all other players; the games to consist of 500 points each. The Eastern players insist that the handicap in points on the string be announced before play is begun in the first tournament.

A dispatch from Chicago, dated Nov. 18, says: "Jacob Schaefer says that he will not enter the proposed balk line billiard tournament for the reason that a line handicap is unfair. If the originators of the project will give two tournaments in conjunction with Richard Roche,' he adds, 'and put up the prize money in equal amounts, they can name the games—cushion carroms or balk line—as they please, so long as they make the handicap in points, and they shall have the choice of city, time and style of game for their tournament, with Roche to have a like privilege in the second.'"

Missouri room keepers are having a legal tussle with what is known as the "Newberry Law," which went into operation Nov. 1. This law provides that no game of chance shall be allowed on premises where liquor is sold and specifies billiards, cards, dice, etc.; in consequence, several hotel keepers have been arrested for keeping a billiard room. As billiards is in no sense a game of chance, but one of pure skill, we can see no reason why the room keepers should not defeat this law.

It is probably that the following players will participate in the tournaments at balk line billiards to be held in New York and Chicago: Slosson, Sexton, Daly, Heiser, Ives, Carter of this country and Garnier and Beau to represent European billiards, with Scheafer, backed up by the profession in Chicago to be heard from.

Harvey McKenna is still lying at the New York Hospital in a critical condition. The physicians have given all hope, and says he may die at any moment or may possibly linger for a couple of weeks.

Catarrh.

Catarrhal Deafness—Hay Fever—A New Home Treatment

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has formulated whereby catarrh, catarrhal deafness and hay fever are permanently cured in from one to three simple applications made at home by the patient once in two weeks.

N. B.—This treatment is not a snuff or an ointment; both have been declared by reputable physicians as injurious. A pamphlet explaining this new treatment is sent free on receipt of stamp to pay postage, by A. H. Dixon & Son, 337 339 West King Street, Toronto, Canada.—Christian Advocate.

Suffers from Catarrhal troubles should carefully read the above.

Darbys Fluid cures Cholera, Scours, Rinderpest, Cattle Plague, Sheep-rot, and foot and mouth diseases.

Cattle are prevented from taking Epizooty, Pink-eye, etc., by using Darbys Fluid.

THE FARM.

Selecting Breeding Sows.

Before the young pigs are put up to fatten it is time to select and separate from the others those intended for breeders. These are better not to be fattened, or at least corn fed while growing. If they have a run in the orchard after the best fruit is gathered, and a little soured milk every day, they will make a long rangy growth, as unlike as possible to the sleek and fine boned animals shut up in the pen and given no exercise. It, however, takes pretty good feeding to bring a March or April pig up to the proper size or dropping her first litter of pigs when she is herself a year or 13 months old. Breeding from young sows always tends to drop the litter later each season, until the pigs become so late that it is not best or even possible to breed them before the following spring. This is one reason why, when a good breeding sow is found, it pays to keep her breeding three or four years. Her pigs will be more numerous and stronger than from a young, growing sow. If the sow is of some large, coarse breed, she will grow until she is 2½ or three years old, and all the time become a better breeder.

With Manure and Without.

Sir John Lawes has just issued his annual records of experiments in the growing of crops with various manures at Rothamstead, says the London correspondent of Bradstreets. On one field he has grown wheat for forty-six years in succession and it is not a little remarkable that the mean product of two plots never manured during thirty-six years has averaged for that period 13¼ bushels an acre, or more than the average yield of America, India, Russia or the Argentine Republic. On another plot, to which fourteen tons of farmyard manure per acre have been applied, the average yield for thirty-six years has been 33¾ bushels. The increase has paid handsomely for the manure. Much higher averages—up to 36½ bushels—have been obtained by the use of costly dressings of artificial manure, but the results have not been remunerative. Cheaper dressings of artificial manure have paid fairly. The most remunerative one for barley would probably have paid better than any other for wheat also, but has not been tried by itself. This consists of 375 pounds of nitrate of soda and 3¼ cwt. (392 pounds) of superphosphate of lime, which gave a crop of 45⅞ bushels of barley per acre on an average of thirty-six years, as compared with 17¾ bushels grown on the unmanured plots. This is the mixture most commonly used by English farmers for wheat as well as barley, only, as they pursue a rotation of cropping; they apply only about half the quantities named above, less manure being required in ordinary farming than when a white-straw crop is grown every year, as at Rothamstead.

Parthenaise Cattle.

In the department of La Vendee, in the province of Poitou, France, is bred a race of beautiful cattle. Few breeds can claim even two special excellences, and three pronounced qualities are extremely rare. The food produced should always rank first, whether it be milk or meat, and these are largely determined by the quality of the food elements. The labor produced also claims attention in the several breeds of cattle, as an item in the estimation of relative values.

The Jersey has the most beautiful head, the Shorthorn the best hindquarters, th Ayshire the broad deep loin, the Devon compact symmetry, the Hereford large and deep body, the Charolais length and rotundity, the West Highland roundness of rib, the Holstien the greatest flow of milk, and the other breeds their special qualities. But for beauty of color the the golden harvests have no richer shades than one Parthenaise, nor do any breeds of cattle show greater excellence of form, and such evenness of quality. Whether down in the fens, or up among the high wooded sections of La Vendee or on the rich plains about Chalet, they are always beautiful. In color a rich creamy and mellow brown; with deep black muzzles and legs; tapering and slightly upturn waxed horns tipped black and of medium length, soft, fine coats and mellow hides, small delicate heads, fine bones, low stature, well balanced bodies and level from head to tail, well sprung ribs and broad backs. The eyes are large, liquid, soft and anmiable, fringed with a pearly down, surrounded by a dark rim; the muzzles also are decked with the same shade of down as surrounds the eyes, rendering these animals the admiration of writers, poets, and artists; and yet not all of these, including George Sand and Rose Bonheur, have ever had influence enough on our matter of fact breeders to induce them to plant such manifold excellences upon American soil. As yet the Parthenaise does not beautify our broad, green pastures. —American Agriculturist.

High Prices for Sheep in Australia.

Australian papers to hand contain accounts of the Sydney annual sheep sales, which were held quite recently. Some big prices were paid for choice animals. Prior to the sale the leading auctioneer congratulated those present upon the magnificent quality of the sheep to be submitted, and the much brighter prospects before them in the future of the wool industry. The first sheep submitted belonged to Mr. James Gibson, and he was knocked out after a spirited competition for 205 gs to Mr. J. C. Manchy. Another ram of the same breeding, and shown by the same gentleman, fell to Mr. G. Mair for 120 gs. Mr. Gibson's rams averaged £56 16s 7d. Mr. David Taylor sent eighty-five rams and sold one of his best, a son of Little Wonder, the 205 guinea ram alluded to above, for 70 gs. Mr. W. H. Gibson's special stud ram (says the Melbourne Argus) excited keen competition. The three year old ram Sacramento 2nd, by Sacramento, was purchased by Messrs. Marshall & Slade for 145 gs; a three year old ram by San Jose, by Mr. D. Robertson for 80 gs; and a three year old ram by Sacramento, by Mr. Evans for 100 gs. Of Mr. Thomas Parramore's rams the principal was Collops, a five year old by Fortunatus, and this was secured by Mr. Bloomfield for 80 gs. No further notable sales took place until the ram Flashlight, a six tooth by Young Billy, from the flock of Mr. Charles Field, was purchased by Mr. T. R. Sutton for 300 gs. Another ram from the same flock brought 62 gs, and an animal bred by Mr. G. W. Keach sold for 60 gs. Mr. William Gatenby obtained 80 gs. for Kanaka, by Young Billy, which was purchased by Mr. Martin, and Abercorn by Ringwood, was purchased by Mr. R. C. Gatenby, obtained 100 gs. Mr. G L. Finlay's rams realized good prices all round. A ram by Matchlock, from Mr. W A. Gatenby's flock, was sold to Mr. Loader for 90 gs. A half American ram bred by Mr. F. C. Smith, realized 55 gs. Mr. W. H. Bennett's ram Too-too, by Sir Douglas, was sold to Mr. P. Jones for 77 gs. and Riccarton, by Sir George, from Mr. G. A. Jones' draft, realized 55 gs. The Tasmanian ewes and selected rams sold well. Mr. A. L. Faithful's sheep, as usual, attracted considerable attention, Mr. Kater paying 100 gs for Grand Prince 4th.

Delicate Dairying.

No matter how pure the dairy is kept, or how carefully the milk is strained, to secure absolute cleanliness it is necessary to strain the cream. Use a large square of linen cheese-cloth. It will catch the hair from the cow's bag, or the tiny speck which occasionally gets in the milk while set cooling. Straining the cream makes it smooth, and seems to facilitate churning. If the churn is a kind which cannot be set in ice water, and it is necessary to use ice to change the temperature, tie the ice in a thin piece of cloth before putting it in the churn. This will keep the grains of sand or other impurity frozen in the ice from getting in the butter. Having thus secured clean, firm, butter, work it well, adding a little sugar to the salt, and then pack in new stone jars and deposit in the cold-storage rooms where ice is manufactured, until such time as needed for home consumption, or when there is a market demand at good price. Always make brine, when possible, of distilled water. If there is no ice manufactured near, where the price for storage is a mere trifle, the next best plan is to dig holes, deeper than the butter-jars, in one corner of a cool, clean cellar, and bury the butter until cold weather or such time as the butter is needed. September and October are royal months for butter making.

Low Prices For Cattle.

It has been suggested, not without reason, that the low price of cattle is due largely to the extension of the railroads of the country during the last decade or two and the consequent increased facilities for getting stock to market. It is plain to be seen that if it were not for the railroads there would be no money in the great cattle ranches of the western States and Territories, and the probability is that they would not exist. Cattle from these extreme points can now be rushed into market in a few hours, and this fact has given great stimulus to the business of Western stock-raising until the point of overproduction has been reached and fabulous profits have ceased to be realized. Of course the situation is made all the harder to bear because of the rapid decline from fortunes quickly made to the plodding level of little more than living profits. But both the first and the last situation are due mainly to the rapid increase in our railroad mileage. During the last 15 years we have built more miles of railroad than we did in the previous 45 years. Since 1874, we have built over 85 000 miles of railroad, and much of these roads has been run into new territory in anticipation of profits in the future instead of realization in the present. All this has aided in the work of covering and skimming additional territory and thereby increasing production, especially in the line of beef cattle. But the time is near at hand when all this must cease. The Western territories are being covered by actual settlers who with their needs will more and more equalize demand with consumption, while the grasses in many sections of the great grazing country are giving out under the excessive demands made upon them. We may as well begin to look at the future and provide for changes likely to soon come.

Value of Oats in the Feeding Ration.

One of the benefits which may come from the great abundance and low price of oats the present season is the probability of their more general use upon the farm. Some yet hold to the old idea (much to their own loss) that this grain was created for the special and sole use of horses. One hundred pounds of oats contain about nine and one-half pounds of proteine, forty-four pounds of carbo-hydrates, and four pounds of fat. Compared with corn, oats are from 12 to 14 per cent. richer in proteine, which is the food that builds up the muscles; 30 per cent. poorer in carbo hydrates, which build up the fat of the body and are converted into energy, and 20 per cent. lower in oil, which serves the same purpose as the carbo-hydrates. Having less carbo-hydrates and oil than corn, oats, with their larger amount of proteine, come nearer being a balanced ration in themselves than does that grain.

If we were to burn 100 lbs of oats and 100 lbs. of corn there would remain but one and one-half pounds of ash residue from the corn, while the oats would give twice as much, or three pounds. It is in proteine, which goes to build up the muscular system, and ash, which forms such a large part of the bone structure, that this grain stands out conspicuous among those commonly grown on the farm. Many feeders consider that the density with which the food material is packed away in corn works against that grain in feeding, and that great advantage may be derived by "diluting" the corn so that it shall not pack in the stomach. They find ear corn fed with the husks on, or corn ground with the cob, superior to either shelled corn or corn-meal, not because of the value of the husk or cob particularly, but because they extend or lighten up the feed. The husk of oats, which certainly cannot be considered as having value, seems to play an important part in feeding—much, perhaps, as the husk or cob does with the corn. So valuable is the husk of the oat when surrounding the grain that all attempts to introduce varieties free from it have proved futile. The famous Bohemian oats are simply a hullless variety which has been grown for years past here and there over the country. The novelty of having an oat which had no husks, together with the immense profits promised by smooth-tongued agents, have caused many farmers throughout the Northwest to invest heavily in what proved but a scheme for catching gudgeons. The grain with hulls appears preferable to that without for feeding purposes.

It is a German chemist, we believe, who claims to have found a nitrogenous principle in oats similar to caffeine in coffee and theine in tea, which, because the Latin word for oat is "avena," he calls avenine. Caffeine and theine are supposed to nourish the muscular system, preventing its its waste and decay, and this investigator holds that avenine has the same effect. Whether he is correct or not, it is certain there is something about the oat grain which distinguishes it from all others for feeding horses. An observing driver can often tell to the day when the feed of a horse has been changed from other grain to oats by the action of the animal. The old idea of the oats tickling the ribs of the horse is significant, and expresses a general truth of much importance in a homely way. But we started out not to speak of oats for horse feed, for their value is there understood; it is for other animals on the farm that we enter our plea at this time; colts, cows, calves, and pigs will all respond rapidly and profitably to the feeder's liberality with oats at the present prices. They need not be fed heavily, for as a general food, corn is cheaper, but as a small feed in connection with it, oats will lend increased value. Where hogs have attained considerable size, and not too many oats are fed, it will be found by proper feeding that there is no need of grinding them. Instead, the best rule is to try to feed them whole, and only grind when the results from feeding unground are not satisfactory; but in this, as in nearly all other cases, an intelligent discretion on the part of the feeder will do much toward compassing the best results. It has been found by careful feeders that brood sows and stock hogs do excellently well on whole oats if the oats are scattered thinly over a clean feeding floor so that the animals can pick up but a grain or two at a time, necessitating slow mastication. Dairymen are coming to place a higher value on oats, and this year they will be used extensively on many farms in place of bran. For making solid, healthful flesh and strong bone, and giving to the animal great vigor and quality, no grain on our farms can equal the oat.—Breeder's Gazette.

Northern Cattle.

W. T. Cressler of Cedarville, informs a correspondent that as near as he can ascertain 6,000 head of beef cattle, besides a number of stock cattle, have been driven out of Surprise and Warner valleys within the past six weeks. Of the beef cattle, probably not more than 2,000 had been sold at prices ranging from $14 to $16. Several of the larger cattle owners, including Ayres & Poor, R. F. McConnaughby and G. W. Mapes, have driven out large bands, but are hunting a market, and will probably hold for better prices.

Notes.

W. Brazelton tells in Hoard's Dairyman how he kills the horns on his calves. He says get a stick of caustic potash, then when the calf is, say, ten days old, take it by both ears, stand straddle of it, then let an assistant have a little water, wet the place where the horn would come, then after wrapping a rag around one end of the caustic, rub the other end on the horn spot. It being wet, will dissolve enough of the caustic to cause a dry scab to form. If thoroughly rubbed for say one minute, one operation is all-sufficient. Mr. Brazelton's calves six months old thus treated have not a sign of a horn.

Mr. W. M. Coward of Yolo County, purchased at the recent Ashburner sale in Sacramento, nine head of thoroughbred cattle. The herd consists of one bull, 7 cows and one calf, all registered. Two of the animals were weighed after the sale. The bull tipped the beam at 2,200 pounds, and the cow at 1,450 pounds.

Dr. G. M. Dixon, owner of the Argonaut Stock Farm, in Yolo, reports that he is now cutting and successfully curing the fifth and sixth crop of alfalfa hay on his farm, the first crop being cut last April, and the total yield of a portion of his meadow being nine tons per acre this season. It will thus be seen that hay can be cut and cured in this valley during eight months of the year.

"I feel highly gratified at the result of our experiments with Texas fever," says State Veterinarian Paquin, of Missouri, to a reporter. "You remember we sent a bunch of fourteen cattle to Texas some time ago; ten were inoculated and four were not. Of those that were inoculated but one has died, and my information is that one has died of some other cause than that of the fever, while of the four that were not treated, three are dead, and the fourth is sick unto death. Our experiments at the Kansas City stock yards have also proven very satisfactory. I believe that we can now save the cattle from this disease if we are allowed to take hold of them in time."

London Live-Stock Journal: "Aberdeen-Angus breeders scored a decided win in the ordinary fat cattle classes at the Melbourne Show. Hitherto short-horn bullocks have had things pretty well their own way, a pair of Herefords being occasionally, but not often, sent for exhibition. This time Mr. F. G. Docker sent a pair of half-bred Polled Angus cattle, and they beat a pair of fine roan short-horns sent by Gibson Bros. of Top Creek. The winning pair were by a stud Polled Aberdeen Angus bull from short-horn cows."

Australia had 96,563,373 sheep last year. It is safe to predict 100,000 000 for this year. Nearly all the wool grown has to be exported, as the woolen industry in Australia is yet in its infancy. Great Britain is relied on to furnish their woolen goods and take their surplus wool. This is an excellent thing for the British, for it is the country that manufactures that gets the bulk of the profit out of the wool. The United States has room for and needs the wool of 100,000,000 sheep to supply her people with goods; and it is only good business sense to do what she can to render herself independent of other nations in this particular.—Michigan Farmer.

A curious industry in North Dakota, which will decrease in time, is buffalo bone picking. The vast herds of buffalo have been slaughtered and their skins sold, and now the pioneers make merchandise of the bones scattered over the prairies. The bones are shipped to St. Louis or Chicago and turned into glue or fertilizers. Kansas, Colorado, Nebraska, and even older states, have all been the scene of this strange contribution to wealth and no one knows how many thousands of carloads have thus been gleaned after the slaughter of the American bison.

Four lots of lambs of ordinary grades were fed by Professor Roberts, the well-known scientist, to determine the cost and ratio of increase, from different foods, not only of the carcass, but of wool also. From November to April—five months—the lambs were given quite a variety. The four lots contained three lambs each. One lot was fed on a carbonaceous diet, having all the whole corn and timothy hay they could eat, with half a pound of roots each, the estimated cost of the food being $2 70. Another lot was given food of a nitrogenous character, consisting of 233 pounds bran, 106 pounds cotton seed meal, 313 pounds clover, and 160 pounds roots, the cost being $4 66. The other lots were fed on mixed nitrogenous foods, for comparison with the first two lots. A remarkable result was that the lambs fed on nitrogenous food drank much more water than the others, nearly four times as much. While the cost of the carbonaceous food was $3 70, less than that of the food of the other lot ($4 66), the gain from the carbonaceous food in the five months was 48.70 pounds, the gain from the nitrogenous foods 71.31 pounds, the cost of the gain from the carbonaceous food $7 59; and the cost of the gain from the nitrogenous food $6 02. The increase in wool was also in favor of the nitrogenous food; the first lot shearing 4.25 pounds, and the second 7.31 pounds, or an increase of 72 per cent. in favor of the nitrogenous foods.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 00
Two times	1 75
Three times	2 40
Four times	3 00
Five times	3 50

And each subsequent insertion 50c. per square.

Should an Advertisement run without change three months or more 50c. per square, counting from the first insertion.

Advertisements running six months are entitled to 10 per cent. discount on rate of 50 cents per square each insertion.

Those running twelve months are entitled to 20 per cent. discount on rate of 50 cents per square each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Nov. 30, 1889.

Off for Los Angeles.

The barometer is acting in a very strange and unaccountable manner. So much so that the horses in training at Napa track have been removed to Palo Alto with the intention of sending them for records over the Bay District track when the running horse meeting is over. Mr. Rose has had an interview with Hickok and Marvin, and the impression is prevalent at present that the destined record breakers will be sent to Los Angeles at an early day to try and beat the time marks that at present exist. Sunol is now in apple-pie order, while Palo Alto and Stamboul are not far behind her. Only a little more work is requisite and then the eyes of the trotting horse world would be on California.

Mr. Bonner Purchases Ansel.

Mr. Bonner has for a long time been an ardent advocate of the thoroughbred blood in trotters, and has never minced matters when talking on the subject to reporters. Every reader of turf journals in the United States knows the gentleman's feelings, and they also know that he has been one of the most outspoken when engaged on the breeding point that is Senator Stanford's pet idea. His visit to this coast was ostensibly to have a look at his late purchase, the trotting queen Sunol, but he has gone farther and shown his belief in the Stanford theory by buying the magnificent stallion Ansel. Ansel is bred on the lines that Mr. Bonner believes in. He has the strong Abdallah strain on top and glorious old Boston is close up on the lower side. With the well bred mares that are at the breeding farm at Tarrytown Mr. Bonner should be able to show to the world in a very few years whether the thoroughbred cross close up is a success or not. Ansel will be sent to New York shortly, and Californians will await with some anxiety the solution of the problem that is now worrying all breeders of trotting horses in the United States. Mr. Bonner has also examined Sunol and declares himself more than satisfied with his new purchase. The great three-year-old was sent a fast quarter by Mr. Marvin to show her speed, and the time made was 31¼ seconds, a 2:05 gait. From what Sunol has already done every horseman in California knows perfectly well that she can come very near—if not quite—to touching the record of Maud S, and 2:08¾ is in danger of being lowered if the weather will only stay clear. Mr. Bonner has secured a priceless jewel in Sunol, and every one is pleased to hear that he will let Marvin handle the filly for another twelve months.

How to Breed the Fastest Trotters.

The great speed shown by Sunol at the Bay District Track and the 2:12 of Axtell made at Terra Haute has caused every prominent writer on horse matters to dip in on the breeding question, as the phenomenal three-year-olds are bred on diametrically opposed blood lines. The believers in the thoroughbred theory are jubilant when they write of Sunol, and the supporters of the strong trotting lines throw back in the faces of their opponents the case of Axtell as an example of what the recognized Registered blood will do. Free Lance, an able writer for the Rural World, has the following, anent the breeding question:

The phenomenal speed shown by the three-year-olds, Sunol 2:10½, and Axtell 2:12, will set the breeders of trotting horses wild with hope and expectation, that some that they are breeding may develop speed nearly as great. Such a performer makes a breeder a wealthy man. Axtell brought $105,000, and Robert Bonner paid a still higher price to Senator Stanford for the faster Sunol, he saying she sold for a higher price than any other horse ever brought.

Axtell, however, if he lives, is much the best bargain, for he will bring back to his owners in stallion service fees in the course of two or three years, all the money paid for him. It is said that forty mares are already engaged to him at $1,000 each for next season. Sunol can bring back no returns of this character, though, if put to breeding, her get would command the highest prices. What speed ought to be obtained by coupling these two remarkable trotters! A lesson of incalculable value might be taught to breeders, by uniting this king and queen of the three-year-olds.

I have been hoping that Mr. Bonner might put Maud S to breeding. She would doubtless make a great broodmare. It is possible that Mr. Bonner, seeing that the time of Maud S was in danger of being beaten by Sunol, and still desiring to be the owner of the fastest trotter in the world, concluded it was high time to take her in, and he may now put Maud S to the duties of maternity. It is very likely next season Sunol may be prepared to beat the time of Maud S., but whether she can do it in other hands than those of Marvin is somewhat problematical. Marvin's great success with her shows he understands the filly and she understands Marvin, and there is the best of feeling existing between the two, as there always should be between horse and trainer.

But the great question in the discussion of which every breeder is interested, is how to develop this wonderful speed at so early an age. I have seen Axtell, and he seems to be a fully matured horse, and the cuts indicate that Sunol is likewise fully matured. How few breeders, however, have their three-year-olds fully matured? There is generally much lacking in their make-up. They have not had the feed and care and judicious exercise and training that have developed bone and muscle and form and speed, to make them fully matured, and at their almost best estate at this early age. They have had too little or too much of some or all of these things. It is not all in blood. Thousands of foals have been as well bred as these two, and worth just the right kind of care and training. Some of them might have been as fast. Of course there is such a thing as individuality in brutes as well as men. A great difference will be seen in children from the same parents, some taking high rank as orators, poets, statesmen, warriors, while others, starting under the same circumstances, will never be known out of the immediate neighborhood in which they were born. But these differences arise more from mental traits than physical. They achieve success by the efforts of the mind rather than the body. Who shall say that the differences in horses may not be caused by the differences in mental traits, by a difference in temperaments, by a higher mental organization in the one than the other? No two horses by the same parents are just alike, any more than two children by the same parents. The conditions at the time of conception are different—both parents may be in a perfect state of health at the time, or one may be in that condition and the other not, or both may not be, and these varying conditions will cause great difference in the progeny. No breeder can expect to obtain the highest success unless he studies the principles of breeding, and follows those that have been demonstrated to be wise. By accident, probably, more than by preparation, the sire and dam of Axtell and Sunol and all of the great trotters and getters of trotters were in the pink of health and vigor at the time of conception. The trotting proclivities of the one or other or both were active, and hence predominating at the time, and the impress was left upon the progeny. How important to the breeder to have his sires and dams in the best physical condition during the breeding season—not weak and poor, not still overburdened with fat, which is almost as bad, but muscular, healthy, vigorous, in which condition they are ready to be coupled with the very highest hopes of vigorous, speedy progeny.

And I have for many years believed that when the very highest attainments in the breeding line are secured, the dam, while carrying her young, will be judiciously driven on the road and track, and given short brushes of speed with other horses to excite her own courage, to inspire her with a desire to win on the trot, and whatever effects her in this way, will have its influence on the progeny which she carries. I have seen the effects of hunting pointer and setter bitches, while carrying their young, on quail and grouse, and have never had any trouble in breaking pups that have been so carried, they seeming to know, the first time they enter the field, just what is wanted of them. They have been trained in their mother's womb, and I have not the slighest doubt if mares carrying their young and kept in proper condition are occasionally given contests of speed at the trotting gait that their young will take to trotting more naturally and will go faster than if no such exercise had ever been given to their dams.

2:11 and 2:13.

BY GRIM.

There are but few persons who are aware that 2:11 and 2:13 was made on a half-mile track in California many years ago, long before the phenomenal records of the present day were even dreamt of. The half-mile track was a very popular place, and the populace of San Francisco in the early seventies were always willing to turn out in goodly numbers to see a speed contest. There had been a race one day in which two of the entries were Eugene Casserly and Susie Bill, the former owned by W. Woodward and the mare was the property of Captain White, a well-known road driver, and one who, by the way, was no novice as far as track work was concerned. In the evening a few choice spirits met at Crittenden's Stable and the race of the day was talked over. The rain was falling in torrents and the company remained until a late hour. During the evening "Old Bill" Woodward came in and joined in the conversation, and he and Captain White locked horns as to which had the fastest horse. The result of the argument was that Mr. Woodward left a certificate of deposit with Crittenden for $2,500 and stated that White could cover any part of the amount before twelve o'clock that night, and that the horses could start next day, rain or shine, and that no restriction should be placed on the gait. White acquiesed as to the rules, and started out to raise money enough to cover the check. It was now so late that White could only get $1 225, and a few minutes before midnight that sum was placed in the stakeholder's hands. The next day a large number of spectators assembled at the grounds, but from the rain the track was in a terrible condition. The horses were hitched to the sulkies, and after a short delay the word was given and away went the pair, both galloping at the height of speed. It did look somewhat peculiar to see the well-known trotting horses imitating the example of the runners, but they were getting along at a rapid gait, and exactly one minute was recorded when Susie reached the half-mile pole. Here Casserley showed signs of weakening, but gamely kept up the pace. At the three-quarters Susie was several lengths ahead and she was never headed, winning handily in 2:11, the fastest mile up to that time that had ever been done in harness in California, and which has only been beat once, by Sunol, 2:10½.

When the usual time between heats had expired the horses were brought out for the second attempt and but little time was taken for scoring, as they came up well together the second time of trying. Casserley showed the effects of the excessive work performed in the first heat, and Susie looked none too fresh; however, both went off together as though life and death depended on the result. At the half Casserley was three lengths behind, but striving with his utmost to overtake the mare. She was too fast in her galloping propensities for the stallion, and ultimately won the second heat and race in 2:13. There was considerable rejoicing in the White faction as they had now considerable money, and a corresponding depression among the followers of Mr. Woodward. This occurred eighteen years ago, but there are still a few of the old timers who remember the celebrated go-as-you-please race.

The Dwyers Head the List.

The Dwyers had a greater number of horses in training than any of their competitors, and had the two year olds equalled expectations their winnings would have been over $200,000; but the youngsters with one or two exceptions are deplorable failures so far and the bulk of the money was earned by the three year olds and older division of the stable. The great three year old Longstreet heads the list with $38,860 to his credit, a most creditable showing for a colt that has been beaten oftener by a head in close finishes than any other horse on the turf this year.

Sale of Thoroughbreds.

Col. S. D. Bruce sold last week, at auction, at the New Jersey Jockey Club track, the horses in training owned by the firm of McClelland & Roche, also the two-year-olds and yearlings owned by Arthur M. Hunter. The McClelland & Roche lot were sold to dissolve partnership, and realize excellent prices, Badge selling to Fred Walbaum for $9,600, although it was subsequently said that the well-known Mullins, of Brooklyn, was the real buyer. Mr. Walbaum, however, paid $3,100 for Bradford and $500 for the yearling filly by Iroquois out of Boulotte by King Ernest. The others sold as follows: The Lioness, to Dick Roche for $1, 550; Heyday, to Charley Post for $1,700; Lord Peyton, to Ed. Brown for $1,000; Frederick I., to Matt Sharpe for $1,025; the yearling brown colt by Enquirer, dam Babel, by Bonnie Scotland, to W. B. Hanson for $850; the bay colt by Bramble, dam Annie C., to Abe Garson for $200; the chestnut colt by Iroquois, dam Wiregrass, by Jack Malone, to C. Boyle for $200, and the bay filly by Wanderer, dam imported Belle of Eltham, to W. C. Orr for $100.

The Arthur Hunter sold as follows: Mr. Pelham, to F. Eshner for $1 950; Bengalene, to Abe Garson for $200, who also bought Pall Mall for $825. For the yearlings, W. Lovell paid $200 for the gelding by Strachino out of Florentine by St. Martin; F. Krauss paid $200 for the filly by Bersan out of Sweetheart by Lever, and W. Lovell paid $325 for the filly by Strachino out of Alice May by Glengarry. The only supplementary lot was the four-year-old colt Salvini, by Sensation, sold to Arthur Hunter for $1,500.

Woodard's February Sale.

LEXINGTON, KY., Nov. 23rd, 1889.

EDITOR BREEDER AND SPORTSMAN:—The time for entries to close to the great Breeders' Combination Sale is drawing near and the books are rapidly filling. It is a little premature to enumerate the various consignments and consignors already entered, but suffice it to say that some of the choicest pedigreed animals on the continent are already received, and every popular sire will be represented in this aggregation of royal breeding, speed and style.

The sale held under my auspices last February was undoubtedly the most successful ever carried on in this country. It was at this sale that Bell Boy brought $51,000, which was at that time the highest price ever paid for a trotting hosse in America, and to-day stands as the greatest amount at which a horse was ever sold under the hammer.

The result of that sale in full: 520 head aggregated $313,875. Average of standard-bred animals, $1,010.40; general average, $603 60, which is a remarkable showing considering the fact that a majority of the animals were non-standard and business horses. If you contemplate selling at this sale write for blanks and send on your entries at once.

For particulars etc. address

W. T. WOODARD,
120 E. Main Street. Lexington, Ky.

Manhattan Food.

The merits claimed for this artificial by the manufacturers is endorsed by the highest testimonials from the many prominent horsemen and others who have given it a trial. It has been in use in Woodward's Gardens for some time with the best results. As an aid to digestion, and to fatten and keep horses in good condition, it gives entire satisfaction. Give it a trial. See advertisement on another page of this issue.

Purchases of Samuel Gamble.

Mr. Gamble has returned from the East where he has been several months and he brought back some highly bred mares. The list includes the following:

Carlotta Wilkes (1) by Charley Wilkes; 1st dam by Alcantara; 2nd dam Miss Buchanan by Clark Chief; 3rd dam by Monarch.

Modjeska (dam of Reference, 2:19¼) by Enfield; grandam Madona, by Zilcaadi Golddust. In foal to Electrotype.

Jessamine, 2:3½ (dam of New York Central, 2:29½) by Mambrino Bay; 1st dam (dam of Lida Bassett, 2:20¼, and Lady Mascotte, 2:25½) by Alcalde. In foal to Simmons, 2:28.

Patchen's Daughter by Mambrino Patchen, 1st dam Pinafore (dam of Critmore, 2:22½) by Strathmore. In foal to Simmons.

Four Corners, 2:20½ by Mambrino Time; dam by Hurst & Thornton's Abdallah. In foal to Bell Boy.

Redowa, bay filly, 1889 by Red Wilkes; dam by Mambrino Patchen; 2nd dam by Joe Dowing.

Wintona, bay filly, 1889, by Wilton; dam by Homer; second dam by son of Lexington; third dam by Bellfounder.

Bay filly, 1888, by Rysdyk; first dam by American Star.

Bay filly, 1888, by Rysdyk, first dam by Kentucky Prince.

Linnie B., b m by Mambrino Time; first dam by Joe Downing.

Bay filly, 1887, by Santa Claus, 2:17½; first dam Sweetheart, 2:22½, by Sultan; grandam Minnehaha.

Also three carriage horses and one saddle mare.

The Funny Business at Boston.

After the croakers and all others have had their say in regard to the stallion race, won by Nelson on his merits, I wish to state why I drove the race; also to ask a few pertinent questions. Until one hour before the race was to be called, I expected Budd Doble to drive Nelson. The night before the race, I received a dispatch from him saying he did not think he would be able to go to Boston and drive the race. I wired him to come without fail, but received no reply, I rested perfectly easy. At 12 o'clock Joe Hooker carried me to Boston to my hotel, the Quincy. There I found a letter from Mr. Doble from Philadelphia, Penn., saying that on account of a special race then pending, that no other party could arrange, he would be unable to go to Boston, and that he had no doubt but Nelson would win the race. I then went to the track with Mr. Hooker, and, thinking I would get John Splan to drive him, I asked Mr. Balch to send him to me if he saw him. I saw him and asked him to drive for me. He told me he was engaged. After the race he told me Mr. Doble hired him to "walk the earth" that afternoon before I saw him. (They had learned that Doble was in Philadelphia.) Mr. Splan told several reliable parties that he was paid $500, not to drive Nelson that day, or "walk the earth," as they called it.

I drove the race because I was forced to. I think all will agree with me that, taking the day, the track and the weather we had to work in that the three heats he trotted were better than any race he has trotted this year. His three heats could have been trotted from one to two and a half seconds faster than they were, as he jogged the first two heats from the head of the stretch, and the last heat to the distance. All who saw him in both races noted the difference in the way he scored with me from his movements at Hartford.

Now, as to the race and its merits; if this was a fixed race, as some intimate, why did Doble hire John Splan and then put $2,000 on Alcryon against Nelson. If he had sold the race, as my enemies assert, why did he not play a sure thing? Some may say this statement is not true.

Now for proof.

The check given to the pool box for the balance that Doble had not hedged out was $1560, or thereabouts. This check, for some reason, was not paid, and Alcryon was attached and held until said check was paid or arranged for.

These are facts that are straight. As to an official investigation we are ready, as we think it would be for our benefit; and while at this the board could consider several other matters that should nave been looked after before. Hoping this article contains nothing you will be unwilling to give space to in your columns. —C. H. Nelson in the Globe.

A Liberal Offer.

Every owner of a vehicle that goes on wheels is invited to call on Jas. O. Rountree & Co., 119 California Street, and receive free, a box of their Graphite Compound, known as the Perfection Axle Grease. As an axle grease, it excels any other lubricator ever placed ont he market, and the proprietors have such unbounded confidence in its merits that they take this liberal way of introducing it, feeling assured that anyone who gives it a single trial will thereafter use no other. This Compound is composed entirely of pure plumbago and mineral oils, and as an axle grease will prove a revelation to all who use it. In case you cannot call at their store, send your address, and you will receive a sample by return mail. It is also on sale by the trade generally.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

J. W. D.

Anteros is not in this State. He is owned by G. W. Morrison, of Connersville, Indiana. There are none of his get in the 2:30 list.

The American Trotting Association.

The following persons and horses are suspended for nonpayment of entrance and other causes, viz:—

Oct. 9, 1889. By order of the Floyd Valley Driving Association, Le Mars, Iowa.
Gene Hodgins, Cherokee, Iowa, and b m Authoress.
Chas. Ransom, Sioux City, Iowa, and b g Castleton.
F. L. Goway, Sioux City, Iowa, and b g Castleton.
Oct. 16 1889. By order of the Fenton Union Co. Agricultural Society, Fenton, Mich.
Frank Smock, Howell, Mich., and b m Dot.
Oct. 18, 1989. By order of the Paducah Jockey Club, Paducah, Kentucky.
E. F. Ward, Wichita, Kan., and b h Red Bird (runner).
Oct. 18, 1889. By order of the Fresno Fair Grounds Association, Fresno, Cal
Harry E. Rose, Los Angeles, Cal., and -- Dan Murphy (runner).
Oct. 21, 1889. By order of the 15th District Agricultural Association, Visalia, Cal.
R. O. Bozeman, Visalia, Cal., for one year.
A. G. Ray, Visalia, Cal., for one year.
B. F. Stokes, Visalia, Cal., for one year.
S. A Cooper, Sacramento, Cal., for one year.
Sept. 9, 1889. By order of the Iowa State Agricultural Society, Des Moines, Iowa.

C. G. Farber, Marshalltown, Iowa, and ch g Captain Edwards.
W. B. Elliott, Marshalltown, Iowa, and ch g Captain Edwards.
Sept. 20, 1889. By order of the Brown Co. Fair & Park Association, Green Bay. Wis.
Robt. Carnathan, Marinette, Wis., and blk g Little Mark.

Nov. 22, 1889. J. H. STEINER, Secretary.

Information Wanted of Max Purcell.

Max (or Malcolm) Purcell, formerly of Columbus, Ohio, and now supposed to be on some Pacific Coast race course, has fallen heir to a considerable estate. Information is wanted if dead or alive. Call on or address, Winfield Scott, Editorial Rooms *Evening Post*, San Francisco, Cal. *

Advice to Breeders.

It is an undisputed fact that our Golden State leads all the Union for breeding the trotting and running horse to its highest culture in breeding and performance; could there not be a greater number raised? There is no doubt but that the success of our stars will induce a great many Eastern breeders to come to our valleys and rolling hills to establish more breeding farms that will add further fame to our soil and climate. Still there are hundreds of the small breeders that are as fond of a level-headed fast roadster and desirous of improving their stock, and yet their life time is spent and nothing in that line accomplished. The reason is because they are not acquainted with the system of breeding, for the very reason that they are not posted on the horse of to-day. If every owner of stock horse should do his share of genuine horse talk to his patrons, show them the benefit derived from reading such papers as the BREEDER AND SPORTMAN, Chicago Horseman, etc., that will gradually open their eyes and create a topic of conversation with his neighbor that will be financially beneficial both to them and the owner of stock horse, and finally add greater fame to California as the producer of fine stock, good individuals in the respective breeds, and noted for the absence of the sent. Let us find some way to get rid of this half breed stock produced from common dung hill stallions and mares, and fill their place with something that will prove profitable to the breeder.

There are in all communities a majority of unworthy stallion owners that travel the country wide, breeding mares for as little as a night's lodging for himself and horse. Farmers are induced to breed by misrepresentation and undue praise, and fictitious pedigrees, etc. The result is always a disappointment to these breeders, and instead of an attractive youngster and a desirable horse at maturity, the produce is fit for nothing more than a China peddler's horse. What returns do such breeders realize for service fee, use of mare, and at least three years pasture and the breaking of colts? From $30 to $60 if any one makes an estimate of costs to place such stock in the market the result will show a balance in favor of loss and the more of such stock they raise the worse off they are.

It is the general cry of such would be stock raisers that they can not afford to breed to high priced stallions, and they are not able to own a good stallion themselves, etc., but they would do better to breed their best mare to some good horse and leave the rest idle than to loose time and money in raising dunghills. The price realized from one good colt will pay thrice the trouble and outlay of inferior ones.

To accomplish the banishment of so many dung-hill stallions is within the power of the horse associations and owners of imported Shires, Clydesdales, Cleveland Bays and last but not the least the high bred trotters and thoroughbreds; but a co-operation is essenial and without that we will always point out to a few successful breeders and wonder at their luck (?). I may be the subject of criticism by the majority of readers, but it is my earnest belief that by having all the lovers of horse flesh put their energy and co-operation together laws can be framed and made to pass in our wise legislature to enforce the license on stock horses and furnish them only to worthy individuals possessed of the required points, breeding, etc., to admit them to the circle of some fixed standard of excellence as may be accepted in the committees of the respective breeds of horses. Such horses as are not desirable should be hunted out from their dens and made geldings none too soon. The result is evident: Certificates identifying those showing the blood lines and acceptance of the horse by the authorities would immediately convince the farmers of the merits of the stallion. This plan of selecting stallions for service is followed in European countries and a heavy fine is the penalty to any one soliciting patronage without license. In some parts, such as France and Italy, the government furnishes the stallions and none others are used. The happy result would require only three or four years, when a marked difference in the stock would be seen throughout the country. In short, I will conclude by apologizing to the reader for the time given to this subject and acknowledge that it is simply an inspiration brought forth by the love of our country and the horse, and any further agitation by more learned correspondents on this subject will be studied by at least one reader of this paper with a final view of establishing a universal system of breeding man's best friend.

THE GUN.

Violation of the Game Law.

Notwithstanding the existence for many years in this State of laws for the protection of game and fish, there is still manifest the disposition on the part of hunters and fishers to disregard and wantonly violate the law, and in this the hunters are aided and abetted by dealers in skins and peltries in the interior and even in this city. Two or three cases of the kind have recently been brought to public attention through the vigilance of the local officers. It appears that there is a disinclination on the part of trial jurors to return verdicts, as they are sworn to do, in accordance with the law and the evidence. They seem to set up, in private judgment, in defiance of the law, their own peculiar ideas in the matter, and either return verdicts palpably in opposition to the law or disagree, so that the offenders are discharged from custody. Every case of the kind is not only a culpable failure of justice, but also an encouragement to offenders equivalent to a warrant to pay no heed to the law, and to continue in its violation. Under the operation of this intolerable disregard of oaths and duty by jurors, the law becomes of little account, and instead of game being protected, the more valuable species are ruthlessly slaughtered by skin hunters and unscrupulous butchers of game. The inevitable consequences must follow—the total destruction of choice game, so that in comparatively few years California will be as devoid of prized species as are the deserts. This will be the case with elk and deer particularly. Already the elk, which were frequently found in wild and mountainous regions have almost disappeared. Hunted and slaughtered for their skins and horns by the reckless and ruthless who adopted that means of livelihood, the elk is now rarely seen in California, and similar practice of slaughter has thinned their number in Oregon and Washington, to the north. Unless better protection shall be provided, elk will be exterminated upon this coast.

As to deer, the matter is equally or more aggravating and criminal. Against the small aggregate of venison brought into market every year, the large number of skins sent to the tanneries and found in the possession of similarly culpable dealers, justifies the conclusion that for every deer killed in the open season for food uses, in the close season ten are slaughtered for their skins only. Does and fawns—even the tender spotted fawns—are apparently as wantonly slaughtered as the bucks. For this the buyers of such skins, of skins in the close season, especially, are in some sense as responsible as the slayers. Unless the skin hunters find a market for these skins, they will cease the wanton slaughter. Powder and lead cost money, even though the time spent in the hunt is accounted as of no consequence. It is for lawless gain they slaughter indiscriminately. If they were arrested and subjected to exemplary penalty, such as the law provides, and were thus made to feel that the punishment fitted the offence—and it is a vicious crime—they would abstain from the violation.

No person of adult years who has resided in the State for one year or longer, should be allowed immunity for his culpability on the ground of ignorance of the law. This form of the "Baby act" is not allowed in other offences, in the State courts, or in cases of infraction of local ordinances and police regulations. The seizures, forfeiture and confiscation of immature flesh or diseased meat, fish or fowl, unfit for food, is enforced promptly and without further process. The officer is empowered to act as complainant judge and jury in every case. Some similar and adequate process ought to be enforced in the administration of the law for the protection of game. Every adult dweller of the State is supposed to know the law and should be held amenable for its wanton violation.

In extreme cases only, such as the absolute need of food, should the transgression be condoned. In cases wherein purchasers are involved—as tanners and dealers—no excuse should be entertained; certainly not the flimsy and false plea of ignorance of the law of the land. It is too often the plea of mild perjury to escape the just penalty. Neither ought courts to entertain it nor juries to allow it in the honest performance of their sworn duty. The idea is preposterous that an intelligent citizen of long residence in the State, who has occupied responsible and important official positions in the community, or that any who have for years been engaged in dealing in hides and peltries, or as a tanner, is so ignorant of the law, or so little versed in his trade and calling as not to be able to distinguish between hides and skins, as to whether they are bucks or does or fawns, particularly when they are offered for sale in the close season. As it is remarked above, these are the most culpable offenders against the law inasmuch as they encourage and support the wanton slaughter at which the game law is so clearly directed. It is their duty, and it should be their rule of action to make known to the proper authorities the offenders who come to them to dispose of their evidences of lawless slaughter in order that these should be duly dealt with according to the law. A few instances of exemplary and fitting penalty would caution repetition or continuance of the offence.

A reformation to assure the conviction and the imposition of due penalties upon offenders of the game law, to overcome and prevent the culpable action of jurors sworn to render just verdicts, but who give encouragement to offenders by non-observance of their sacred oath, and either acquit or connive at the acquittal by hanging the jury, could be wrought by citizens who feel interested in the maintenance of the law.

It is a reformation which ought to enlist the services of every supporter and advocate of the law for the protection of game. It simply requires fair vigilance in all cases of infraction—to give personal attention to the manner of prosecution and to the composition of the jury, to the end that the jurors shall be of good character and of just mind, determined to faithfully abide by their oath, without regard to the standing in community of the offender, and without fear or favor to render their verdict agreeably to the evidence and the law. Every member of the several associations and clubs for the observance of the game law, should be a ready volunteer in this effort at reformation—in better protection of game from ruthless slaughter.

A Protest from Napa.

EDITOR BREEDER AND SPORTSMAN:—The decision of Justice Thompson in the case of the Tanning Company, charged with the possession of the skins of deer unlawfully killed, will be regarded by the parties who engage in shooting this fine game in the close season, does and fawns as well as bucks, as warrant for them to go on with the lawless killing. The effect of it will be as a license to kill in the face of the law and to hold the offending possession harmless. The law is as clear as any in the statute book as to making the possession of unlawful game an offense. But in spite of this it appears that judges and juries hold it to be not an offense. It is now the case in Napa, and in a similar case in Sacramento last week the jury failed to convict, although the proof was direct and strong.

Many of us hereabout are eager now, in consequence of these miscarriages of justice, to learn how a similar case will be decided in your courts.

The plea of the offender is ignorance of the law. This absurd plea, from a prominent citizen who has been engaged for thirty years in the dealing and handling of hides and skins, and who is recognized as a shrewd and careful buyer, seems strange to us up here. But if any of us should go to San Francisco and transgress your city ordinances, in doing that which is allowed in Napa, and is not against any ordinance, the likelihood is that the plea of ignorance would not avail in the case before your Police Court. The game law is a statute of the State, and has been in force many years, too long to admit offenders to the plea of ignorance.

I call to mind cases of violation of the game law that were tried in San Francisco, in which the offenders were neither prominent nor rich, and as my memory serves me in these cases the defendants were subjected to the penalties provided. Equal and impartial justice should be meted out to all alike—the intelligent and the ignorant, the wise as well as the unwise. Judge Thompson has put the beam in our eye, but we don't want to discover the mote in yours at the Bay.

A PROTESTER.

NAPA, Nov. 16th, 1889.

Bird-Cramps.

The best shooting yarn of the season is one that reaches us from Mr. Ad. Pearson of National City, near the Lower California line.

Mr. Pearson is an enthusiastic sportsman and owns some fine hunting dogs, among others there being a thoroughbred pointer pup which promises great things in the future, and it is of this pup the story is written. The constable relates the tale in his own style. Says he: "You know Mr. ———; well he came to me the other day saying: 'Pearson, I want to go hunting one of these days and I wish you would loan me one of your dogs.' Now I didn't want to do anything of the kind, but I couldn't very well refuse him, as I had heard him speak of his hunting a great deal and hated to disoblige him, so I said: 'All right sir; you can have the pointer,' and next day he came around rigged out in hunting boots, leggins, hunting coat and hat, and carrying a fine hammerless gun (borrowed plumes as I afterward found out) and I gave him the pointer and saw no more of him until about dark of that day, when he walked into my office and said: 'Say, what in thunder did you want to send me out shooting with a sick dog for?' Visions of a dead pointer shot across my brain and I said: 'What do you mean man? Have you lost the dog?' 'No; but the cussed dog is no good.' 'What's the matter with him?' I asked. 'Well the dog has got St. Vitus' dance or something worse. You had better have him looked after unless you want to lose him.' I knew the dog was in splendid health when he left home and I was considerably puzzled to know what had happened to him so I demanded an explanation, and he said: 'Well I drove out about five miles, where I thought likely I could find some quail, and hitched the horse, loaded myself down with shells and started out with the dog.

I had traveled maybe a half a mile when looking around I missed the pointer, and finally saw him off about a hundred yards. The dog looked so strange that I immediately knew something was the matter with him, and I ran over to where he was. The dog looked like he had a terrible cramp in one of his hind legs, and he just stood there quivering all over, one hind leg stuck straight out behind, and his eyes seemed ready to start from his head. He looked in so much pain that I laid down my gun, went up to him and commenced to rub his leg, thinking maybe it would relieve him. While I was working with him a quail flew out of a bush near him, and as I was busy with him, I, of course, lost a shot, but the dog seemed to get better, and as he could move his leg all right I let him run. Well, sir, it wasn't a minute before that cussed dog got another cramp, only this time it was in one of his fore legs, and it was so severe that it twisted him clear around, so that his nose and tail nearly touched each other. I went up to him again, and was repeating my rubbing, when about a dozen birds jumped up all around us. As my gun was laying on the ground, I lost another shot, and when I looked again at the dog I am blamed if he wasn't all right again, and as lively as ever.

Well sir, I will bet you that that infernal dog was taken with at least forty cramps that afternoon and every time he had a cramp and I attempted to doctor him, a bird would get up somewhere close by and between watching the dog and the noise of the bird I missed my shot. I tell you Pearson, I wouldn't be troubled with a dog like that out hunting for fifty dollars a day. He spoiled a whole afternoon's sport for me. I don't see what you want of a dog that can't hunt half an hour without getting sick. He don't have exercise enough.'

"It is needless to say," continued Pearson "that I was immensely relieved in my mind and I assured Mr.———that the dog was alright, only those cramps he spoke of was a kind of a habit he had while hunting' but I had got so used to them that a paid very little attention to them, but he assured me he never wanted to take my dog out huntihg again."

Sawyer Tannery Case.

A decision in the matter of The People vs. Sawyer Tannery Company of Napa, for having in possession skins of deer from which evidence of sex had been removed, was rendered by Justice Thompson, of Napa, on Saturday last. The prosecution was ably conducted by Mr. Henry Hogan, and the Tannery Company also had the best available counsel. The decision is given in full.

People of the State of California vs. The Sawyer Tannery Co., a corporation—Defendants are charged with having in their possession a "bundle" of deer skins, from which evidence of sex had been removed. It is the privilege of this Court to examine into the facts so far as they relate to said bundle of skins—the Court being bound by the allegations of the complaint to which the evidence must conform. Mr. Callundan testified in substance, as follows: First saw the hides on a lumber wagon about sixteen miles outside of Ukiah; next saw them in the office of Wells, Fargo & Co., Ukiah; next in the office of said company in San Francisco; from thence I followed them to the Sawyer Tanning Co. I called at the office of said company, met Mr. Norton, the secretary, and Mr. Holden, and informed them of my business. They admitted the receipts of the hides, but said they had not examined them. They willingly took me to the hide room, where I found the bundle referred to, and they had not been opened. Mr. Holden cut the ropes that bound the hides. I found some mutilated skins, spotted fawn and doe skins, and some from which, in my opinion, the evidence of sex had been removed. Have not much experience in examining deer skins. I am satisfied the evidence of sex had been removed from some. Mr. Tunstead is the expert for the Commissioners; he examined them.

The expert testimony of Mr. Tunstead shows that his examination of the skins was made principally with a view of determining the sex of the skins, and the one hide he saw, from which evidence of sex had been removed, was not in, but by the side of the bundle, and he could not testify on cross-examination that it had ever been in the bundle in question, and all the information received by him concerning the hides was from a person who was not shown to be an officer, nor so much as a stockholder of said corporation, therefore could not bind the corporation by any act or declaration of his. Consequently that portion of the expert testimony is subject to the rule of hearsay evidence and was stricken out. This and an uncompromising letter written by Mr. Holden to the Commissioners, is what the prosecution rely on for a conviction. Mr. Holden for the defense testified that in his opinion there were no hides in said bundle from which evidence of sex had been removed.

Mr. Manasse testified that he had handled a million or more deer skins, that if there were skins in said bundle from which evidence of sex had been removed, he could not detect them.

While the Court has an undisputed right to consider the interest of parties giving evidence, I do not think in this case defendants would knowingly falsify the facts, and as Mr. Callundan stated, "his knowledge of deer skins was not very extensive," I am bound to give defendants the benefit of the doubt. Admitting that said bundle did contain the alleged unlawful skins, then comes the question of possession, to the extent that defendants would be liable. The law reads: "Any person in whose possession deer skins are found, from which evidence of sex has been removed, is guilty of a misdemeanor." It appears from the evidence that the skins in question were consigned to defendants by one Muir of Mendocino County; that they were put into defendant's chemical wagon by the employees of Wells, Fargo & Co. at Napa; that the driver of said wagon, who was an employee of defendants, dumped the skins at the storehouse without giving notice of the fact. From thence they were removed to the truck or scales, where they were found the next day by Mr. Callundan, *unopened*, nor had they been seen, examined or paid for by defendants. The testimony also shows that they had not been consigned to them by an agent acting for defendants and that they had not ordered them.

Notwithstanding, if the unlawful hides had been found in possession of defendant's, as the law reads, they would be guilty of misdemeanor, unless this Court is permitted to accept the construction of a similar statute by the learned judges of the English Court of Criminal Appeals, as follows: "The prisoner was indicted under the statute punishing the *having in possession* naval stores marked with the broad arrow." Two casks were traced by the police to the warehouse of the defendant, and a few minutes after the delivery the police officers entered and found the casks in the passage *unopened*. On being opened by the officers, they were found to contain a quantity of naval stores marked with the broad arrow. It was held that to convict the defendant, if was necessary to show that he knew the articles were marked with the broad arrow. In referring to the statute the learned Judge said "the statute is no doubt couched in very general terms; it does not state in so many words that he must have them in his possession knowingly, but that must be the true meaning of the statute. The word *possession imports knowledge* of that which is possessed."

This view appears to me to be one of sound sense, and in my opinion gives the only reasonable interpretation to a statute identical with our own, so far as relates to possession.

"It is universal doctrine that to constitute what the law deems a crime there must concur both an evil act and an evil intent."

As a casual remark, not necessary to or forming a part of the judgment, I desire to state that there is a question in my mind as to whether defendants are liable as a Corporation, "but as such a body is invisible, intangible, and exists only in contemplation of the law, it is the natural persons in and by whom it lives, moves and operates that the law generally holds responsible for its offenses against the public (felonies or misdemeanors), should be prosecuted as individuals, either as principals or accessories, and under our statutes an accessory stands in the same light as a principal." I find the following in Desty's American Criminal Law, Sec. 14:

"Corporations are liable for a breach of duty imposed by law, but not for felonies or public wrongs." They are liable for misfeasance as well as non-feasance. Though not liable for battery they are indictable for libel and for nuisances. As for refusing to remove a slaughter-house injurious to public health or obstructing a public highway. So the directors of a gas company are responsible for the acts of their supervisors and engineers for conveying refuse gas into great public rivers. Towns and parishes, railroad companies and turnpike companies, are indictable for neglect to repair highways and bridges, which it is their duty to repair.

A misdemeanor is punishable by imprisonment in a county jail not exceeding six months, or by a fine not exceeding five hundred dollars, or by both. A Corporation cannot be imprisoned.

It appearing to me that there is not sufficient cause to believe the defendants guilty of the offense charged, I order them to be discharged.

WM. THOMPSON,
Justice of the Peace.

Jurors Open to Conviction.

In the case of a firm in Sacramento charged with having in possession deer skins from which the evidence of sex had been removed—they were the skins of does killed in violation of the law—a member of the firm deposed that they handled 7,000 deer skins a year, but that they did not know that it was against the law to trade in the skins of does until the case of the Sawyer Tanning Company of Napa, came up a few days ago. The testimony against the firm was conclusive, and Justice Devine charged the jury that if the alleged facts were proven, it was sufficient to warrant a conviction. A majority of the jury, nevertheless, stood out for an acquittal on the flimsy ground that no criminal intent had been proven, and the jury was discharged. The District Attorney intends to press the case to a definite conclusion. Meantime he will secure the evidence of an expert to disprove the testimony of the defense. The jurors who declined to convict and in doing so disregarded the clear letter of the law and the instruction of the Court, may be considered as open to conviction themselves; but there is no law, except that of public opinion, to convict them. It is an old saying that possession is nine points of the law. As it appears, the declining jurors gave the tenth point to the defendants and wanted them to go clear. The thing now left for the jurors to do is to find a way to their own acquittal before the high court of public opinion. With jurors of their kind the game law is of no more consequence than a crooked juror's oath, and for game there will be no protection beyond the tough consciences of the lawless and wanton slaughterers.

To the Top of Mt. Whitney.

[By C. E. Sherman.]

XIII.

Every one obeys the "Bobby" when he says "move on," but there are things just as forceful as policemen. When the light is turned down almost low enough for two, the old gentleman's heavy tread, or—worse yet—his extraordinary interest in the time of night, parts Romeo and Juliet without a wherefore. When the Sprinter headed a following of cattle he waited not but went. After three restful, wonderful days—days where away from the rest of the world friends become closer and closer comrades, finally knitting together with bands firmer than steel, Time—which so relentlessly eats up pleasant hours—gave the signal; so taking a 9 A. M. start, on August 9th, the Pilgrims let go of Camp Grant, resolved to worship Pleasure at every altar offered by the opportunities of promised places yet to come.

Reaching Ramshaw Meadows only half way on the purposed journey of the day, abundant feed and fishing tempted the Pilgrims, and there they rested, making Camp Plenty, at an altitude of 9,550 feet. Aside from a few broken tempers, none of the machinery of the band had thus far suffered injury, but here, the one thermometer possessed by the party, became irredeemably smashed. So that henceforth on this trip the Pilgrims had to glow or shiver without scientific basis, according to individual judgment.

The Artist and all the artistic senses were now in a region offering continued delights. The canons of the South Fork of Kern River looking toward both Monache and Hooker Meadows were pictures never to be forgotten. As the trail drops out of the timber into the open of Hooker Meadow, the first view of grand old Mt. Whitney is given. A little further on a halt is called while the Artist adjusts his camera, that something more than memory may aid to stamp this picture in the minds of the toilers. Nestling at their feet is Ramshaw Meadow, with its velvety carpet of meadow grasses, made doubly green from the background of black granite hills surrounding, whose only vegetation is the tribulous growth of stunted tamaracks and cedars. It is beyond art; only Nature's forceful hand can make trees to grow in such forbidding places, where there is no soil, but only granite rocks and swallow sand. Beyond these hills, in the distance, Fisherman's Peak looms up to the right, while straight ahead and due north, old Mt. Whitney towers in giant majesty. Both these peaks are nearly 15,000 feet in height. Standing 9,000 feet above the sea and contemplating these huge monuments, the first appreciation of the task they had undertaken dawned upon the Pilgrims.

Before them were days of weary toil; the uncertainties of trails never before traveled by tourists; quick coming night to catch them without feed for animals; and the constant possibility of following false scents, to patiently retrace the toilsome way and so try again and again, perhaps again and again failing of onward progress. Remounting, there is quietude for a time, all wondering if, wishing and hoping that, the desire of their hearts, to stand on the top of Mt. Whitney, may yet be surely accomplished. The Captain's sharp order "unsaddle for camp," dismounted reverie, and an hour's fishing in the South Fork with a hundred trout for reward, banished everything like dismal anticipations.

Sweet smelling fir boughs offer royal rest, and when to that the captain added in kindly tone, "Sleep as late as you please, my boys, for to-morrow's journey will be short," the Pilgrims laid down in unsubdued happiness to sleep in child like innocence. A 4 A. M. bell is neither a baby's rattle nor a young fellow's first love letter, but is considerably more in the nature of a forced introduction to an honest day's work. A temporary suspension of its hostilities, therefore, caused a burst of gratitude, winding up in sleepy murmurs of "truly thankful and so forth."

Late then on August 10th was the start of the cavalcade. It was only a short mile from Camp Plenty to the famous Hockett trail, built when California was yet young, to cross from the end of all roads at Porterville over the mountains to Inyo. Over this trail have quietly plodded along the man who afterward found success and he who came to wear the sackcloth of failure; him who won honor and he who became shackled to crime; one blessed with happiness and another bound down to misery. This was once the only path, by which all bound one way or the other must go, as to their reward or doom. The trail from Ramshaw joins the Hockett on the Divide between Whitney Creek and the South Fork. Near here a tunnel diverts from the North to the South Fork, a body of water which if let follow its natural bed would become separated from the South Fork by one of the highest mountain ranges on the continent, to join at the confluence of the two forks of Kern River nearly sixty miles from this point of diversion. This tunnel, constructed by farmers in and around the town of Weldon for irrigating purposes, is about two hundred feet long, perhaps six feet high by four feet wide in the clear, and at the deepest point may be thirty feet below the surface. It diverts the waters of Whitney Creek, a natural tributary of the North Fork, into the other fork of Kern River. It runs through loose soil and broken rock, and its chief expense in construction was the cost of timbering the ground.

Camp Beautiful was made that day on Whitney Creek near the Natural Bridges, at 2 P. M. The whole current of Whitney Creek foams under these bridges of lava. It is here and for only a distance of 300 yards in length, namely, from Agua Bonita Falls to the Chute, that the only golden trout in the United States can be caught. The deeper the pool the darker the fish in color, but all as drawn from the water have a genuine golden sheen. Whoever makes the journey below these falls deserves a prize, for it is a most difficult undertaking; but while he will be fully repaid with one golden trout, a loaded basket will be his reward. In the evening a party of ladies and gentlemen from Visalia pitched camp near by on their return from Mount Whitney. Satisfying evidence was afterward found that Mr. and Mrs. Gray and one other of the party had accomplished the climb to the summit.

At this camp the worthy Doctor-Deacon fulfilled his oath and evened up with that skilled marksman, his next quarrelling friend the Chaplain. The Doctor climbed a hill—he was given to that line of practice; the Chaplain sought a hammock for the comfort of his usual snore. In some manner, a twenty pound boulder was loosened from its twenty ages resting place, and by a remarkable coincidence rolled directly for the heavily weighted hammock. It seems that it should have gone under this swinging bed with a swish and a roar that likely might trouble the Chaplain's sweet dream. But it didn't. It struck a pine cone at a critical moment, and with a gorgeous bound unshipped the hammock and disembarked the Chaplain. There was an awful grunt, and a vigorous right hand began violently to rub a brawny hip, somewhat back of the right center. A kind of vernacular not too mild, warbled around cyclonic like. The Doctor evidently contemplated the thing from a scientific standpoint and said nothing, with most professional suavity. After a bit the Chaplain limped to a resting rock, and there held a magnificent silence of about an hour's duration. Later, the combatants came to some sort of understanding, but not until both had evidenced a wonderful command of language.

Smokeless Powder.

In a recent utterance on the subject of so-called smokeless powders, Gen. Benet, Chief of Ordinance, U. S. A., said:

"We are experimenting with smokeless powder, and I believe that in a short time we shall obtain some practical and satisfactory results."

From present appearances the war of the future is destined to be an approximately smokeless one, and hence more bloody. Instead of huge clouds of smoke rolling between the two armies, and hiding the combatants from sight, instead of skillful maneuvers being made under its protecting shelter, the men will be in plain view of each other, and numbers and marksmanship will count for more in deciding battles than skill and generalship.

This is due, in a great measure, to the recent inventions of what is known as smokeless powder. Every European nation is experimenting with it, and the United States does not propose to be far behind other countries.

As yet the discovery has not been adopted by any of the great armies, for the reason that there are a number of disadvantages connected with its use, but these are being overcome gradually, and it is probable that in a short time the great armies of the world will be supplied with it.

Strange to say, the United States was the first country to which this great destructive invention was offered, and stranger still, it is almost the last among great military nations to take steps looking toward its adoption. Some twelve years ago a gentleman called at the department and obtained an interview with one of the officials. He stated that he was the inventor of a powder which would not produce smoke, and wanted to know if the officials would investigate it, and, in case it was found to do what he claimed it would, if the government would buy the invention and adopt it. He was told that it would undoubtedly buy such an invention. He left, promising to return again. He was not seen again, however.

The idea of such an invention was believed to be the delusion of a crazy man, and the matter dropped out of sight until the news came that France and Germany were experimenting with the smokeless powder. Then the strange visitor of years before was thought of and efforts made to find him, but without avail. No reason is given for his failure to return, but it is probable that the man may have been piqued at his treatment, and did not care to again have his claim so incredulously received. Thus it was that the United States missed the opportunity of securing one of the greatest inventions of modern times.

The discovery is said to have been made by a man named Maxin. Some, however, credit Vielle, a Frenchman, with it. The latter's powder has been the most extensively used, however, and the results obtained have also been the best. There are a number of other inventors. Germany, France, Austria, England, Italy, Spain and Belgium, use different powders in their experiments, and the one which the United States will use will be different from any of the others, and in all likelihood will be the invention of an American.

Each country which is experimenting with the powder believes, or rather says, it has the best; but as brag plays an important part in European military methods, their assertions have to be taken with a great deal of allowance. The composition of the powder has been kept secret as far as possible. Four or five kinds have been tried in France, and the experiments have been conducted with so much secrecy that it is not known whether a powder has been secured which can be used with good results or not.

Smokeless powder consists essentially of nitro-cotton or some other kind of nitro-cellulose, especially treated with a view to producing a slow-burning substance, or of nitro-glycerine and nitro-cotton, together with a suitable solvent, in some cases ammonia and ether.

In its manufacture a paste is first prepared by dissolving gun cotton in a solvent, which is usually a solution of ammonia and ether. From the paste thus produced a sheet is made, and equalized by being passed through two metal rollers. The sheet is first made three times the thickness it eventually is, in order to allow for the shrinkage on drying.

The sheet is next freed from the solvent by drying in the open air or in a specially prepared oven, which permits of the condensation and recovery of some of the solvent. When nearly dry the sheets are subjected to heavy pressure to reduce them to the required thickness. The pressure is assisted by softening the sheet with ether.

The sheets are then cut into strips then cut crosswise, making cubes very small in size. In color the powder—which is in reality no powder at all—is light brown, and transparent. A good smile is a sheet of sticking plaster cut into almost infinitesimal squares.

Different solvent are used, and the process of manufacture is drfferent in different countries. In Belgium it is called paper powder, and in Switzerland it is called "Walsroder."

For the use of small arms the cubes or grains are made much smaller, for the reason that the pressure exerted by the powder is tremendous.

With ordinary powder, it would be impossible to fire large guns at the maximum rate of some ten rounds per minute, on account of the hanging smoke from the discharge, which renders aiming impossible, while with the so-called smokeless powder, the same hindrance is not experienced. The smokeless powder is not, as a matter of fact, entirely smokeless, but at a distance of 1,000 yds. is not noticeable, and what little smoke is created dissipates very quickly.

Another great advantage of smokeless powder is the increased velocity it gives the bullet Vieille's powder, which is used in the French Lebel rifle, carries a bullet of 231 grs. at a speed of 1,968ft. per second. With a larger bullet the speed was increased to nearly 2,590ft.

For another thing, smokeless powder does not weigh as much as gunpowder. Therefore, for small firearms the cartridges are made much smaller. The same results can be obtained with 30grs. of smokeless powder as with 70grs. of the ordinary black powder. The difference not only in size but weight would allow a man to carry a great many more rounds of ammunition, and its adoption, when proved practicable, will permit the adoption of small-caliber magazine guns, although, with the reductions of the caliber, there would not be the corresponding reduction in the effectiveness of the shot.

Like everything else, it has its disadvantages. The German smokeless powder produces disagreeable and overpowering odors, from the noxious gases which it forms. The quality deteriorates also in time, and it is a serious question whether it may not absorb moisture. The English have had trouble with smokeless powder because it makes the barrel of the gun too dry and produces more friction on the bullet. The explosion is also too violent, and frequently destroys the bullet. To prevent this, hardened bullets have been tried, but the pressure was too great, and simply resulted in injury to the gun barrels.

The German powder is not noiseless, and in fact is said at times to give a louder report than the ordinary powder. It also shows at times a vivid flash, which when the field is not obscured by smoke, would be the means of attracting attention and make the battery's or men's whereabouts known if they were out of sight.

The smokeless powder gives increased velocity, especially in rapid-firing guns, which is an important consideration. In the large guns it is used in strips, although the French believe it accomplishes better results by cutting it up.

The actual experiments of it first began in 1884, when it was used by the French army. Since 1886 it has been developed considerably, and since that time has been used in the artillery and in the field maneuvers of the French army. It was also used in the maneuvers of the Austrian and German armies this fall.

Its general adoption would modify the conditions of battle very materially. If an army were fired on they would not know where the firing troops were, as the sound is very deceptive, and there would be no smoke by which they could be located. There would be no smoke under which deploying could be successfully accomplished. It is said the men feel protected by the smoke to some extent, but with the powder in use they would have no advantage in this respect. It would be an immense advantage to sharp-shooters, and in every way would increase the casualties of war.

English snipe have come again in considerable numbers. At Collinsville several good shoots have been had, and at Goodyears the sport has been especially attractive.

Eastern readers are again urged to send to us information about where and from whom bob-white quails and prairie chickens can be procured for stocking purposes. Requests for the birds are accumulating in the office of the Fish Commission, and the birds should be on hand by February or March. Proper acknowledgment will be made to those who may interest themselves in this behalf, and the aid rendered is in a grand cause, viz., to afford the sportsmen of this State the shooting which has enabled the East and South to move ahead so well in field trial and other interests.

A report comes from Agua Caliente, a summer resort toward the head of Sonoma Valley, that on November 21st a herd of deer came down from the mounteins and took shelter among the trees that surround the hotel. No attempt was made to kill the deer, as the law prohibits such action until December 15th. The animals seemed dazed, and were captured by being driven into a large barn on M. K. Cady's premises. They were apparently starved and frozen out by the long-continued rain in the mountains.—Daily paper.

[It is to be hoped that Mr. Cady did not destroy the poor brutes. His instincts are those of a sportsman, and we are certain that he will drive the deer back into the hills to be hunted legitimately.—Ed.]

Such canvas-back shooting as that of the ten days last passed on the Suisun brings recollections of '81 and earlier years. Mr. A. C. Tubbs, of the Cordelia, brought to boat 110 birds last week, of which 88 were "cans." Mr. Ramon E. Wilson, whose safe return from his two months' trip to Mexico is noted with especial pleasure, killed a splendid string on Nov. 24th at the Tule Belle, fourteen of them being "royal bloods." Mr. John Kittle, at the Ibis Club, has been pulling lots of ducks from the Empyrean, but few canvas backs until recently, when he sacked 37 in a morning. Mr. Harry Babcock, whose quickness with the shotgun has long been the envy of a host of friends, has returned week after week from the Suisun with top strings, but only recently with such lots of "cans" as would make a Maryland shooter think the millenium had come. Mr. John M. Adams, since he beat Mr. J. Downey Harvey at the traps, has been using a close choked pair of barrels in the field, and as a result has scored splendidly, particularly on canvas-backs and sharp-flying ducks. All through the list of club men, the returns have a sameness which argues first rate sport, enjoyed in sportsman-like manner, with tangible results most gratifying to numbers of the friends of the gentlemen who have made the Suisun synonymous with all that is best in duck shooting.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Mr. Munhall to the A. K. C.

The following letter has been addressed to the delegate of the Michigan Kennel Club to the American Kennel Club, about the action of the latter in refusing to recognize the wins of the show given by the Southern California Kennel Club in June last. The letter is in Mr. Munhall's best vein, and should induce re-consideration of the A. K. C. action. Mr. Munhall writes to Major J. M. Taylor as follows:

CLEVELAND, O., Nov. 18, 1889.

MY DEAR MAJOR:—

At the last quarterly meeting of the A. K. C. Executive Committee, September 19th, Mr. Richards moved that the Southern California Club be admitted to membership in the A. K. C., but that the wins of their recent show, held in June, be not recognized; the said motion being carried. The action of the committee as regards the wins I think to be wrong. The club advertised their show as likely to be an A. K. C. show, as they had made application for membership, and fully expected to be admitted before show was held. As I understand, their application was received *one* day after the quarterly meeting, of course it could not be acted upon until the next meeting. Many exhibitors went to the expense and trouble of making entries at the show, expecting the wins of their dogs to be A. K. C. wins, and it hardly seems right that they should suffer for an unaccountable fault of the club.

I attended the show, which was a very good one for the first attempt, and think that they should be encouraged in their efforts instead of otherwise. The Executive Committee should take into consideration that it requires much more effort to make a show a success in that part of the country than it does in this section. I have received letters from some San Francisco exhibitors at the show, gentlemen whom I met, informing me how disappointed they were at the A. K. C. action in not recognizing their wins, and appealing to me to try and have the A. K. C. reconsider its action in the matter. If you can consistently take this question up at the next meeting and get a reconsideration of the vote and favorable action, the same will be greatly appreciated by myself and many interested exhibitors at the show. I am convinced that such action is only justice to them.

Yours very truly,
C. M. MUNHALL.

A Lost Dog.

EDITOR BREEDER AND SPORTSMAN:—Several gentlemen who have the pleasure of your acquaintance have suggested to me that I call your attention to the loss of a "cocker spaniel puppy," which I imported at considerable expense from New York.

The dog is extremely well bred, in fact one of the best bred cockers in this country, and I hoped to breed some fine dogs. About ten days ago (two days after his arrival) he was stolen from my rooms at 418 Post street, and although advertised in all the papers, I cannot get him back. I have now advertised in your paper a reward of "$20 for any information that will lead to the discovery of the persons having him in their possession." The dog is only six months old, all black, long ears and a short cut tail.

If you can in any way mention the matter I will be extremely obliged. I will, at my own expense, prosecute the guilty parties if discovered, and as they are guilty of grand larceny under §421 of our Penal Code, as amended by the statute of 1887, would like to send them to the State Prison as an example.

If you would in some way call the attention of gentlemen interested in well-bred dogs to the matter, possibly it might lead to my obtaining some information.

Nov. 23, 1889. WARD MCALLISTER, JR.

[We have pleasure in urging readers to be on the alert for the cocker puppy mentioned, and if a dog answering the description is seen we shall be pleased to receive notice. The meanest of thieves is the dog thief, and sportsmen should make common cause against such vermin.—ED.]

An Inhuman Act.

EDITOR BREEDER AND SPORTSMAN:—A paragraph in a State newspaper reports the shooting of a valuable Irish setter at Ventura by an unknown miscreant. The dog he killed had struggled through the surf and raging sea, two years ago, to the wrecked vessel Gualala, from which he returned, bringing with him to the shore a line by which means were provided to save all on board from drowning. It is a pity that so noble an animal was put to death by a wretch whose life was of less account to mankind, merely to gratify his spite or satiate his cowardly purpose to kill a dog. He should have turned the weapon upon himself. As it is, he should be ferretted out, arrested and fitly punished for his malicious deed. A good dog is too valuable an animal to be killed by a brute in the form of a man with impunity. There are laws in nearly all of the States to provide against cruelty to animals, and for the punishment of those who offend in disregard of the law. Likewise should the law provide against the malicious killing of animals. A good watch dog, properly kept to prevent the animal from attacking passers, men, women and children, is a valuable property, very essential in many cases to the household and premises. The dog of the shepherd, which guards and protects the flock; the hunting dogs, which are the prized companions of sportsmen—setters, pointers and hounds; and the household favorites of the genus, ought to be protected by law from the malice or brutal violence of poisoners and slayers by severe penalties. The dog is too valuable a companion of man to be considered in the eyes of the law of no more consequence than a rat or a wolf. Dogs that bite and become dangerous, dogs that tear and kill sheep, and dogs which are as vagabond wanderers, are fit objects for killing, but good dogs should be duly protected, and their wanton slayers ought to be punished. The main public sentiment is in accord with this view. L.

SAN FRANCISCO, Nov. 25, 1889.

Mr. A. A. Wigmore's silver grey, long haired Yorkshire terrier bitch Dot strayed from 1318 Leavenworth street, city, on November 9th. She wore a blue velvet collar with a small bell. Mr. Wigmore requests readers of this paper to send to him word if any dog answering the description is seen, and he will gladly pay a liberal reward.

Pacific Coast Field Trial Club.

DERBY ENTRIES.

The eighth annual derby of the Pacific Coast Field Trial Club will begin at Bakersfield, Kern Co., on January 20, 1889. The stake is open to all setters and pointers whelped on and after January 1, 1888. Entrance $20 Purse, entrance money, of which 50 per cent. to first; 30 per cent. to second; 20 per cent. to third. Closed May 1, 1889, with twenty entries.

POINTERS.

NED B., white and lemon dog, whelped Sept. 10, 1888, by Climax—Drab D. Breeder and owner, W. S. Kittle, San Francisco, Cal.

BOB, white and lemon dog, whelped May 11, 1888, by Point—Blossom. Breeder, Geo. W. Bassford, Vallejo, Cal. Owner, S. D. Meriweather, San Francisco.

ROSE, white and lemon bitch, litter sister to preceding. Owner, Geo. W. Bassford, Vallejo, Cal.

SPROUT, white and lemon dog, litter brother to preceding. Owner, Geo. W. Bassford, Vallejo, Cal.

SANKEY, white and lemon dog, litter brother to preceding. Owner, Geo. Bassford, Vallejo, Cal.

BISMARCK, white and lemon dog, whelped April 7, 1888, by Tom Pinch—Galatea. Breeder, J. Martin Barney, Newport, R. I. Owner, Geo. W. Bassford, Vallejo, Cal.

——, sex ——, color ——, when whelped 1888, sire ——, dam ——. Breeder and owner, H. R. Brown, San Francisco, Cal.

IRISH RED SETTERS.

GOLD, red dog, whelped Oct. 15th, 1888; by Tom—Rose. Breeder and owner George Crocker, San Francisco, Cal.

RED, red dog, litter brother to preceding. Breeder and owner George Crocker, San Francisco, Cal.

CROSS BRED SETTERS.

ROCKSIE, red and white dog, whelped April, 1888; by W. R. Hearst's red setter—Nellie. Breeder S. W. Fergusson, San Francisco; owner Edward Fay, San Francisco.

BEN HARRISON, red and white dog, whelped Feb., 1889; by Sport—Fanny. Breeder Joseph Routier, Routier's Station; owner Charles Studarus, Routier's Station, Sacramento County, Cal.

Two days of last week were passed at and around Bakersfield by President Edwards of the Pacific Coast Field Trial Club, Mr. W. W. Foote, Mr. Edward Fay and the secretary of the Club.

After reaching the recently devastated city, and strolling about through once familar portions of it, now all bustle in rebuilding, the party accompanied by Messrs. C. E. Lechner and Richard Seymour drove down to section 16, where Hon. D. M. Pyle lives. That invariably hospitable and whole souled sportsman took the wayfarers in, gave them comfortable quarand the run of the ranch.

The day was one of note in the Pyly family, because the elder daughter, Miss Dena, had just reached her tenth birthday. A charming company of little friends had gathered to do honor to the sweet girl, in whom the sterling qualities and natural graces of her inestimable parents already are cropping out, among them being Misses Lena Freear, Cora May, Della Stoner ann Elva Pyle, and Masters Elmo Pyle, Charley Freear, Will May, Danny Stockton and Joe Freear. A number of rich souvenirs were tendered, and what with recitations, music, play and a dinner dressed and decorated in exquisite taste, the day was as enjoyable to the visiting sportsmen as to the immediate participants.

The afternoon was spent in hunting for quails. They were scarce. Next day a wide expanse of land was covered, also with bad luck. The ground reserved for the trials is well stocked and in fine condition as respects cover and water. Birds there are, indeed too plenty. The hotel accommodations will be ample for the trials.

A son of General Beale, is just finishing a fine hotel, and the Arlington will be ready by January 1st Bakersfield is being re-built in brick, a very wise change. The people are pushing along, keeping their own counsel, and full of courage and confidence.

All of the sportsmen of the town were seen except the chief, Mr. W. E. Houghton, and all were most hearty in desiring the presence of a large company of field trialers. A hundred or more can find places to sleep, and a fine restaurant is in operation.

Altogether prospects are favorable, D. A. Leonard has added largely to his livery facilities and will meet all demands. Just before leaving Bakersfield on the return trip, Henry Borgwardt, C. E. Sherman, D. A. Leonard and Ed. Lechner, gathered in Mr. Lechners place of business, and spent an hour chatting with Mr. Fay and the Secretary. A livelier hour we do not recall, nor one passed in better company.

Some scoundrel at Ventura, shot a fine Irish setter that belonged to F. Charlebois. The noble animal went through the surf to the wreck of the Gualala two years ago, and brought a life-line ashore, thus saving every one on the vessel.

Elsewhere will be found the list of Derby entries for the coming trials. In quality, they are equal to any, but the number is not what it should be. At least fifty dogs should have been named, and it is to be hoped that next year will see an improvement.

ROD.

A Vigilant Officer.

There is at least one officer of the State Fish Commission who is vigilant and faithful in the performance of his duty. That other appointees of the Commission are equally qualified and active, is doubtless true, as we hope, and as occasion is presented, full measure of merit will be awarded them in these columns, without distinction of persons.

F. P. Callundan, Chief of Patrol in the waters of this district for the Fish Commission, is earning earnest commendation for his good work. With Deputy Riley and Curley to his assistance, Chief Callundan is driving lawless fishermen from the bays and rivers. Last week the three captured three junks, with twelve Chinamen, in the upper part of San Pablo Bay for violation of the Fish law, and took the offenders to Martinez jail to await trial and penalty. The junks, with their nets were seized. The Chinese made desperate resistance, but the three officers compelled them to surrender. Two other junks engaged in the same lawless work, managed to escape. It is likely that they will yet be seized, together with their crews and nets, and the lawless fishing in the bay, by every class of offenders, will be stopped. Other seizures of the kind have been recently made by Chief Callundan and his deputies, through vigilance and determination in the service. The Chinese are the most pestiferous of fish robbers and prepare their nets to take every thing that swims, from the smallest to the largest, in season and out of season. The Fish Commission is in good earnest in driving all—without regard to race or nationality—from lawless fishing. Others besides Chinese require watching, and the inland streams need similar attention.

How Fish-Fry Are Transported.

A very interesting description of the methods used in carrying fry from hatcheries to places of deposit in the lakes and streams, is taken from our excellent contemporary Shooting and Fishing, which says:

Let us go with a messenger with a shipment of fish fry from the hatchery to destination, and we will go on a trip that has actually been made. The messenger starts from the hatchery at Cold Spring Harbor, in the middle of a May afternoon, with 60,000 fry of the sea salmon in 12 cans. The cans of tin, cased in wood, are new and smaller than those generally used, so small, in fact, that they are no longer used, in long shipments for so many as 5000 fry in a can. The fry taken from the troughs are strong and healthy, but like all the salmonidæ, they mass in the bottom of the can. Broken ice is put into each can to keep the temperature down, and they are shipped by wagon to the railroad station and placed in the express car. The messenger has a thermometer, a piece of rubber tubing to use as a siphon, and a tin pump. The thermometer is to note the temperature of the water, that it may not get so high as to kill the fish, the tubing is to siphon the water from one can to another, and the pump, which is simply a cylinder of tin, open at the top and closed at the bottom, except for small perforations which also extend partly up the sides of the cylinder, and of a size to easily enter the mouth of a can, is to sink into a can until it is filled with water and raised until the water runs out through the holes, aerating it.

At Long Island City an express wagon is in waiting, and the cans are soon across the river at the express depot. Here there is a wait of four hours, but the express company has provided 300 pounds of ice, in response to a telegram for special wagon and ice. The cans are iced and occasionally "worked," i. e., pumped, until the hour of departure. The messenger bears a letter from the President of the express company permitting him to ride in the express car, that he may attend to the fish, and all the officers and employees do everything in their power for his convenience and the safety of the fry in his charge. It is an all-night ride, and there will be no sleep. When the fish cans are put into the car, it is found that, owing to the bulk of express freight, the cans cannot remain together; one lot is in one end of the car, and another lot in the other. The weather is so warm that nearly 300 pounds of ice are taken for the fish; still, in spite of the warmth, there is a fire in a stove in the car. Two of the cans have to be placed too near the stove for the well-being of the fish, but the express messenger says as soon as the freight is reduced by delivery at various stations this will be remedied. In the meantime there is nothing to do but work them constantly and ice them frequently. The light of the lantern is turned into the openings in these cans more frequently than into the others, and more anxiety is felt about their contents. All night the cans are worked, and before daylight the ice is gone, except what remains in the cans.

At Albany more ice is obtained, but two cans show many dead fish. The cans are changed at Albany to another road, and here they are put into a baggage car. The day promises to be quite warm for the season, but there is no stove heat to contend with. A ride of fifty miles brings the fish to Glens Falls, where they are changed to a wagon and driven six miles to the stream in which they are to be planted. Some few fish in one can look sick, but the motion of the wagon and fresh ice revives them. When the brook is reached, the temperature of the water in brook and in the cans is taken, and found to so nearly agree that the fish can be planted without bringing that in the cans, by degrees, up or down to meet that of the brook. When the last can is turned into the stream it is the middle of the afternoon, and for twenty-four hours the messenger has been without sleep, working constantly, and at a disadvantage, to bring his fish in good order to destination. The anxiety is more wearing than the physical fatigue, and if he finds only a few of the little fish dead, he feels that the trip has been successful.

Contrary to expectation a few good messes of rock-cod were booked at different points around the bay on Sunday last.

The best catches were made at Goat Island on the Oakland side, P. C. Johnson and friends catching over thirty pounds.

A large number of fisherman visited the different wharves on Sunday in search of Salmon trout. Reports say that quite a number of this kind of fish were hooked, but they were all small.

The above stallions will make the season of 1889 at the Souther Farm, one and one-half miles northeast of San Leandro. Each horse is limited to thirty mares besides those of the Souther Farm. Terms, for either horse, Twenty-five Dollars for the season, with privilege of return in season of 1890, if mare fails to prove with foal. Good accommodation and the best of care for all mares sent to the Farm, but no responsibility for accidents.

Colts Broken and Trained. Horses Boarded in any manner desired at all times.

GILBERT TOMPKINS, Proprietor.

THE IMPROVED NOYES ROAD-CART.

PATENTED JULY 17, 1883, AND JUNE 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheels, a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17¼ and Chanter a half-mile in 1:10¼ to a Noyes Cart, says he would not take $250 for it if he could not get another; W. J. Gordon, Glenville, O.; W. B. Fasig, Cleveland, O.; Dave Muckel, Cleveland, O.; R. J. Moorehead, North East, Pa.; W. J. Chamberlain, Cleveland, O.; H. P. Malone, Bradford, Pa.; S. A. Brown & Co., Kalamazoo Stock Farm; Charles Marvin, Menlo Park, Cal.; W. H. Crawford, Lexington, Ky.; S. L. Caton, who gave Bell Boy a mark at Los Angeles, Cal., of 2:19¼, and drove Chanter a half mile in 1:06¾ and Lowland Girl a full mile in 2:12 to a Noyes Cart; Mike Bowerman, Lexington, Ky.; James Golden, Medford, Mass.; John E. Turner, Philadelphia, Pa.; T. L. Newton, Beaver Dam, Wis.; P. V. Johnston, Marshall, Mich.; W. H. McCarthy, Los Angeles, Cal.; A. W. Dennison, El Dorado, Kan.; P. O. Shank, Cleveland, O.; Charles Barnard, Boston, Mass.; Johnson Bros., Greenville, Mich.; John G. Avery, Buffalo, N. Y.; General R. L. Howard, Buffalo, N. Y.; Howard Conklin, Buffalo, N. Y.; W. D. Washington Park Club, CHICAGO.

Coney Island Jockey Club, SHEEPSHEAD BAY, L. I.

1890

THE FRIENDLY STAKES

To Close DECEMBER 2d, 1889.

A Sweepstakes for 2-year-olds, Foals of 1888,

To be Run at the Summer Meeting of the Washington Park Club, Chicago, and at the Autumn Meeting of the Coney Island Jockey Club, at Sheepshead Bay, L. I.

Of $50 Each, h. f.; $3,000 to be added by each Association.

Should the same horse win both races, $1,000 additional in plate or money will be given, half by each association. Horses entered at either place incur liability for one forfeit only and are entitled to start at either or both places; those starting for the Friendly Stakes at Washington Park are entitled to start for the FRIENDLY STAKES at the Coney Island Jockey Club without incurring liability for starting fees at the latter place.

Conditions of the Friendly Stakes, to be run at the Summer Meeting of the Washington Park Club, 1890.

Colts to carry 118 pounds, fillies and geldings 115 pounds. A winner of any two-year-old Stake race at Washington Park of the value of $2,500 to carry 5 pounds additional. Maidens never having run second for a race of the value of $3,000, allowed seven pounds. The winner to receive half of the joint subscriptions and $4,000 of the added money; the second $750 and the third $250 of the added money. Five furlongs.

Conditions of the Friendly Stakes to be run at the Autumn Meeting of the Coney Island Jockey Club, 1890.

Colts to carry 118 pounds, fillies and geldings 115 pounds. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750 and the third $250 of the added money. Winners of a race of the value of $10,000, or of two races of the value of $5,000 each, to carry ten pounds extra; or of one race of the value of $5,000, or of two of the value of $3,000 each, five pounds extra. Non winners of $1,000 allowed eight pounds.

FUTURITY COURSE, about three-quarters of a mile.

NOTE.—The Sweepstakes will be paid over on October 1, 1890. The added money by each Association immediately after each race.

The value of each of the above races to the Winner will probably be about $6,000, and the only liability is $25 for non-starters.

Nominations to be addressed to

THE

BREEDER AND SPORTSMAN'S

-: Futurity Stakes :-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

The "L. C. Smith" Guns.

As **PRIZE WINNERS** we challenge any other make of Gun to make a showing like the following.

All Previous Records Broken.

Never before were 100 live pigeons killed straightly in a similar match, under same conditions, until the L. C. SMITH GUN was made and did it. In the hands of Mr. Al Bandle, of the firm of Bandle Arms Co., Cincinnati, Ohio, this wonderful score was made. Capt. A. H. Bogardus scoring with a 12-gauge L. C. Smith in the match against Bandle, the very high score of 95. A remarkable score with a 12-guage.

——OFFICIAL SCORE——

Made in the mate h at 100 live pigeons, Hurlingham rules, barring gauge of gun, between Capt. A. H. Bogardus of Elkhart, Ill., and Al Bandle, of Cincinnatti, Ohio, on Independent Gun Club grounds, Cincinnati, Ohio, Christmas Day, December 25, 1888:

AL BANDLE, 10-gauge L. C. Smith gun.....	CAPT. A. H. BOGARDUS, 12-gauge L. C. Smith gun...

To Horse Breeders and Stockmen.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 857 acres; one mile frontage on Clear Lake; 310 acres alfalfa land; 120 acres now seeded to alfalfa, cuts six tons per acre; 70 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,000; three barns, capacity 350 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cold spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch. The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

OSSIDINE

Results obtained at the well-known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it: and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used.

Very respectfully yours,
S. A. BROWNE & CO., Prop's.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to
Mr. JEROME I. CASE, Mr. FRED. GEBHARD, Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),
And hundreds of others from whom we have very flattering testimonials.

One Style Only. $3.00 per Bottle.

BREEDER AND SPORTSMAN

Vol XV. No 22.
No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, DEC. 7, 1889.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

At the Fresno Track.

The fame of the race track at Fresno has reached from the Atlantic to the Pacific, owing in the first place to the liberality of the Directors, who offered during the past season a $20,000 purse for a two mile and repeat race, which unfortunately did not fill, and secondly to the remarkable performances of Sunol, who made a mile there in 2:13¾, and Palo Alto, although lame, made his in 2:15. The time of these two fast miles was telegraphed all over the United States and as a natural consequence the attention of Eastern horsemen was attracted toward Fresno as a good place to winter the circuit campaigners. Shortly after the annual fair Manager Baldwin had a covering of clay placed over the course, and to-day there are many who assert that it is now the fastest track in the world. As to the surroundings, we know of no grounds in the State that equal them in beauty, and the accommodations cannot be surpassed anywhere. The stalls are all large and commodious, well sheltered and admirably located. As a proof that Fresno is considered a very desirable place to winter horses, Budd Doble, the celebrated Eastern reinsman, has sent out the choice of his stable, and there are now located there the following list of highly successful and well known horses.

Probably the best known of the string is Johnston, the fastest pacer in the world, whose record of 2:06¼ has never been equalled. Heylin by Hermes, he by Harold, is a three-year-old colt which can show very fast quarters. Ed Annan is noted for being the hero of the 2:17 class, for although he has started in seven races this year and won six, he still remains in the same class, his record being 2:16¼. Lady Bullion is another campaigner, her 2:18¼ stamping her as a very useful animal, and she has not yet attained the height of her speed. She is by Pilot Medium 1597, dam Hattie Hoyer by Bullion 6030. Reina is by St. Arnaud 1519, and has lowered her record this year to 2:22½. Marie Jansen and Madeline, both in the list, seem to take kindly to their new quarters, while Jack, the grey trotter, has all the attention paid to him possible, his mark of 2:15 warranting the extra care. There are several untried mares in the stable, and it is probable that they will be bred to some of the California trotting horses before their return to the East. Geo. Starr has charge of the division, and as he is thought by many to be the equal of any in the country as a trainer and driver, it goes without saying that the best of care will be taken of the visitors.

Our old friend Mr. S. N. Straube has sent up from the Poplar Grove Breeding Farm half a score of promising ones, and they are under the charge of John Donahoo who has trained in the past for the same gentleman and always gave satisfaction. The premier stallion of the farm, Clovis, is represented by a couple of youngsters that compare favorably with anything at the track. The first is a handsome, well turned, evenly balanced colt, called Nicodemus, whose dam was Fleetwing by Winthrop, 505. His action is of the best, and we expect to hear from him before the close of next year. Elise, by the same sire, has for dam Ida Davis by Belnor, he by Strathmore. Although only a yearling, she can show fast quarters, and her owner feels confident that she will do to enter among the two-year-olds in next year's stakes. Mr. Straube also has a good Mambrino Wilkes colt called Fred Wilkes, the dam being Rose by Priam, a son of Whipple's Hambletonian. He is a grand type of the Wilkes family, and should prove an excellent outcross for the many mares now at Poplar farm. Anti-Medium is a beautiful bay yearling by Anteeo, dam Maud Medium by Milton Medium. When seen last spring he gave exceeding promise, but has improved wonderfully since, and is the admiration of all. Mr. Straube also has a yearling, a son of Election, dam Fannie by Romulus. Election is a son of Electioneer, and already has several fast ones among his get. Lida Upright is by Upright, dam Lida by Nephew, 1220. Mr. Donahoo has also at work a yearling owned by E. H. Tucker of Selma, which took the first prize for yearling roadsters at the last Fresno fair. He is by Fritz, a son of Geo. M. Patchen, Jr., and his dam is by Algona, one of Mr. Haggin's choice trotting stallions. The last of the Donahoo string is a two-year old, the property of Mr. Ganyard of Madera, who is able to go a lively clip even now. In adjacent stables we find James F. Maguire, well known to all California horsemen, with his young stallion Fresno. Jim has a capital colt, and no one knows it better than himself. It was formerly the property of F. H. Burke of Menlo Park, and is by Fallis 2:22, dam Girofle by Elmo, 891. The sire Fallis has lately been sold to parties in the East far $12,000.

Oregon Boy is a very fine stallion bred by A. C. Goodrich of Oregon. He is by Alcona 730, dam Livonia by Almont, 2nd dam Stella Chapman by Mambrino Champion 5130. Oregon Boy is an inbred Almont, and Mr. Barnard, who has him at Fresno, should have a large number of mares booked to him. It would seem that this point is going to be a central one for stallions this year, as Mr. Thomas Rochford of Visalia has sent his royally bred horse Free Trade to Fresno, where he will stand during the season of 1890. It is rarely that the services of such a grand bred horse are offered to the public, and so will give his pedigree in full: Free Trade was bred by R. S. Veech of St. Matthews, Kentucky, in 1881. Is steel grey, 16¼ hands high and weighs 1200 pounds. He was sired by Princeps (son of Woodford Mambrino and Primrose, by Alexander's Abdallah), sire of Trinket 2:14, and Princeton 2:19¾, four year old record 2:23¼, with twenty in the 2:30 list. Free Trade's first dam is Dawn by Belmont (son of Alexander's Abdallah and Bell by Mambrino Chief), sire of Nutwood 2:18¾, Wedgewood 2:19, and nineteen trotters and two pacers with record below 2:30. Second dam Midnight (dam of Jay-Eye-See 2:10, Noontide 2:20½), by Pilot Jr., sire of the dam of Maud S and eight in the 2:30 list, also the sire of seven sires that have produced fifteen in the 2:30, and the sire of thirteen dams that have produced twenty-eight in the 2:30 class. Third dam Twilight by Lexington (sire of the dam of Clingstone 2:14): Fourth dam Daylight by Imported Glencoe. Fifth dam Darkness by Wagner. Sixth dam Gray Maria by Sir Richard Tonson. Seventh dam Lucy Clark by Oscar. Eighth dam by imported Knowlsy. Ninth dam by imported Diomed.

Mr. Hahn who is the representative of the owner, has also in training Lulu R. by Altamont, the dam being the dam of Emma Temple 2:21. As Altamont has put at least five in the list this year Lulu R. should prove a jewel of the first water, especially as Emma Temple proved her qualifications to be ranked with the best in her class.

Among the good ones may be mentioned Buccaneer Jr., the property of J. A. Waterman. His dam was formerly owned by G. Valensin, of Pleasanton, but was sold some years ago, when in foal to Buccaneer. The foal was the horse which Mr. Waterman now has, and he certainly is a credit to the celebrated Flaxtail family.

There are a number of other stables located at the track, but want of space prevents a complete summary this week, and another article will have to tell about the others.

Triffit's Fireaway, who died in England a fortnight ago, at the ripe old age of thirty, was the sire of innumerable hackeys, and when the Hackney Stud book was started a few years ago no name figured as often in it as his. His get are said to have sold for, and gained in prizes in the show ring, over a million dollars. In his home, the East Riding of Yorkshire, his name is spoken of with the same respect as Ramdsdale's Performer, Bond's old phenomenon Rattler, and other old time roadsters. His get were nearly all rich dark browns, with good knee actien and splendid carriage.

Dan Dennison Tells His Story.

The members of the Symposium had been called to order, and each having answered to the roll call, Dan Dennison was asked by the chairman to give an account of the hardest race he had ever won. Dan is a queer character in his way, and the oldest horseman in the State fails to remember when the "hustler" first arrived in California. The Blood Horse Association had just posponed the tail end of their meeting for another day, and the "Hero of Sacramento" was hardly at himself as the presiding officer once more requested the member to address the willing listeners. Dan (and there is only one Dan), arose from his seat, bowing to the officers and members assembled. At first his voice was rather husky, but as he looked around the room and saw only familiar faces, the well known driver regained confidence, and told us how Alameda Maid won for him the toughest race he ever drove. The inimitable style in which the old man tells a story cannot be duplicated in print, and my readers must be content with drawing on their imagination for the quaintness with which the story was told.

"Well, it would be a hard matter to explain the hardest race I ever drove for. I have had some queer experiences in my life with trotters. There's been plenty of days that the sack was empty, and in a short time a French dinner was none too good for me. Not that I eat French dinners, but I am just trying to show how plenty the funds were. Many a hard fight I've had on the track, but the most that I ever got away with was on the 20th of April, 1877, when I was up behind Alameda Maid, and there was in the race Abe Edginton, Governor Stanford, Sweet Briar and Brushy John. There was not a man of us driving but what knew Abe had the foot of us for a couple of miles, and naturally some of the other drivers wanted to stand in and play Abe to win. Well, I thought over the matter for some time and after a while made up me mind that as everybody knew me to be an honest man I could not afford to do it, and it was because I knew me mare could go five heats in about 'twenty-eight,' and I had a sneaking idea the two first heats if ordinarily fast would beat the favorite.

Well, as sure as preaching, he went the first heats at a pretty good pace, and I never let out on the mare, just kept jogging her. The time for the two heats was 2:26¼ and 2:28½, but as the driver of Stanford had to beat me if he wanted to divide with the gang, why I simply kept him between me and the favorite. In the third heat I pressed the Maid a trifle, but Stanford won, and I began to get a little afraid of him, and yet I knew they were all in on Edginton. In the third heat Brushy John was distanced, for although he was a good horse he was hardly in condition for the sort of a race we had on hand. Well, gentlemen, would you believe it, Stanford won the fourth heat and yet I was foolish enough to send in a little more money on the Maid, for I still had a heep of confidence in her. However, I felt a bit more secure because in the fourth heat we distanced Sweet Briar and that took Charley Shear out of the race. What a fight we did have for the fifth heat. Edginton was clearly out of it, and it was a battle royal between Stanford and the Maid. The pace was not fast as in comparison with what the other heats had been trotted in, still I knew that the mare could keep up the lick she was going for any number of heats and so I was not surprised when I beat Stanford out in 2:32½. The talent as they call them nowadays, the sure things fellows that hang around the pool box, got a fearful surprise in the sixth heat for I distanced Edginton just when they thought he could win as the time was so slow. But he never did have any bottom, he was terribly soft, and there was no trouble in gaining another heat in 2:32½, and to add still further to the misery of the knowing ones, I did not have to drive any faster than 2:37¼ for the seventh heat, literally carrying away the pool box. Now if I had stood in with the fellows that wanted to put up a job, my share would have been mighty small, but as it was I made a big haul. It pays to be honest

SHORT STORIES.

HARVEY W. PECK.

If the Napa race track is thirty feet short of one mile, which proposition has caused considerable wrangling, now would be a good time to find it out. The sooner the better, and finally set at rest this hollow Eastern cry of short tracks. In past years many Eastern men were sufficiently bigoted to suppose that the time made by their horses could not be beaten, and whenever a California horse accomplished the feat, they set up a dismal yell, and above all could be heard "short track." It is somewhat strange that all good surveyors live east of the Rocky Mountains. One would suppose that occasionally one of them would stray westward, emulating the "star of empire." The Eastern writers who are ever ready to impugn every record made, are the kind of men whose idea of the "wild and wooly West" is of the most vague character. They imagine everything extremely crude and primative. They labor under the impression that the average male inhabitant of San Francisco carries the regulation "navy," with a knife in his boot, while his woolen shirt is adorned with a large sized "specimen pin." They still think San Francisco a "rapid" town, and picture to themselves the nightly revels that openly take place in the "New Eldorado," where people drink and dance, pianos tingle, and voices sing night and day. This was the state of affairs forty years ago, but now, alas—the sturdy policeman, when not asleep, grasps his club and gazes wildly about for something to "run in."

It would seem that when a party of intelligent gentlemen form an association, purchase land, hire competent surveyors, and build a track, with an eye single to having nothing but the best, that this dry rot about "short tracks" should cease—for I will concede to no Eastern gentleman the capacity to sit in his sanctum, while his searching eye turns westward, and, even though 3,000 miles away, is enabled, at a mere cursory glance, to see that a certain race track is 7 or 8 or 13 or 31 feet short. A man who will attempt this fact, is, in point of intellect, inferior to the beasts that perish.

Mr. Ambrose G. Bierce is a gentleman who has been connected with the San Francisco press for many years, I have read the majority of his writings covering a space of nine years. His chief characteristic is antagonism to everybody else. Whether he has any friends for whom he entertains a kindly feeling I am not aware—but I think not? That he thinks honesty, decency and generosity still exists, I am not prepared to believe. In Sunday's Examiner of Nov. 24th. Ambrose has the following:

"There is a ghastly deal of clotted nonsense talked about horse-racing. It is no doubt an interesting means of gambling respectably—its respectability consisting in woman's approval, attendance and participation. The dear good, creature graciously approves horse-racing because we have persuaded her that gambling is only incidental to it, the real purpose being "improvement of the breed of horses," which possibly it accomplishes; it certainly does not improve the breed of men and women. For my part I am unable to discern in a horse which can trot a mile in two minutes and ten seconds any worth or usefulness superior to that of a horse which cannot. As to the pleasure of seeing it done, that is a matter of taste. I would as lief see a man in pursuit of his hat. Horse-breeding and horse-racing are followed, sometimes for profit sometime for pleasure, commonly for both. Profit is an honorable and legitimate aim, and pleasure is reprehensible in only children, churchfolk and inhabitants of Hades; but for horse-breeders and turfmen to profess to care a tinsmith's imprecation for the the improvement of any animals but their own is topgallant hypocrisy."

Evidently nothing could improve this gentleman's "breeding."

Previous to this screed Mr. Bierce has the kindness to remark that his "ignorance of horse racing is wide, accurate and varied," which statement was unnecessary as most any one would be aware of it after reading the above. After his name should be written "*Nihil quod letigit non ornavit.*".

In the BREEDER AND SPORTSMAN of Nov. 16th there appeared on article on "thoroughbred blood" in the trotter, written by some gentleman over the *nom de plume* of Fallstown. This gentleman goes over the usual ground in proving that an infusion of thoroughbred blood is detrimental to great speed at the trot—as a general proposition—and a signal failure when it comes to "breeding on." He says: "For years there was a widespread belief that the trotter could best be produced by the indiscriminate use of thorough blood." This is news to me. I am acquainted with I think most of the advocates of thorough blood in the trotting horse, and I never heard of any of them contending that the "indiscriminate use" of thorough blood was the best way to produce trotters. Many of these men have claimed that a certain percentage of thorough blood was advantageous, at the same time stating that certain families of thoroughbreds were much more desirable than others.

Fallstown says that "John H. Wallace was the first to combat this theory with any force, and he has maintained his position with signal success." Indeed he has not. The Trotting Register and the Year Book, both of which are compiled by Mr. Wallace, show that he is wrong. I would invite the attention of Fallstown to an article I wrote in the BREEDER AND SPORTSMAN some months ago, entitled "Thoroughbred in the Trotter." I would like to have him answer the article in such manner that it will come to my notice. If he can show me that the article is a mistake I will cheerfully acknowledge it; but if the records show no more on his side than I produced on the other then he had better face Mecca and listen to the Muezzins call to prayer.

Like "Fallstown" I am of the unalterable conviction that very few horses could sire fast trotters from thoroughbred mares, but it would appear to have happened to the lot of many stallions to do so, where the thoroughbred was one remove farther away. "Fallstown" winds up with the following:

"Among the colts of St. Bel now being educated by Cope Stinson, at Prospect Hill Stock Farm, are two fillies out of thoroughbred dams—Bonnibel, out of Belle D., by Belmont, son of Lexington; and Belle Dame, out of Bertha, by Bigaroon, son of Bonnie Scotland. I watched them closely in their work, with others from gilt-edged dams, and in speed, purity of gait and trotting disposition, they appeared in no way inferior to their half sisters, indeed, the fastest of this lot of very speedy youngsters was the filly Bonnibel. Her dam, Belle D., was not only a thoroughbred in blood, but was a good race mare in fact. The chances are very strong that she will enter the 2:30 list as a two year old. Notwithstanding this, I would not consider her worth nearly as much for breeding purposes as one of her less speedy but more strongly trotting-bred half sisters."

If not, why not? No reason can be given which is based upon facts or past performances.

There seems to be an almost universal opinion prevalent that Pilot Jr., sire of the dams of Maud S. and Jay-Eye-See, as well as some thirty more trotters, was a pacer! In the Nov. 16th issue of the BREEDER AND SPORTSMAN, Dr. Hicks takes "Fallstown" to task for abusing pacing blood. The Dr. says, Mr. Broadhead—Mr. Alexander's superintendent—boasts that he was 'loyal' to Pilot pacing blood, when the great breeders held it as trash, and can now proudly point to Maud S., Jay-Eye-See, Nutwood and others, in justification of his judgment." Now, I have no antipathy to the pacer or the pacing cross, but neither Mr. Broadhead nor anybody else can convict Pilot Jr. of being a pacer.. Several years ago, Dr. Herr, of Kentucky, wrote an article for the Western Sportsman, of which the following is a verbatim et literatum copy. He says:

"I have recently noticed in some of the sporting papers that parties writing in regard to Pilot Jr., claim that he was a pacer. I think the impression is an erroneous one, and had the authors of the articles have had a personal knowledge of the horse, they would hesitate before making this assertion to the public.

I purchased Pilot Jr. from Mr. D. Heinsohn, of Louisville, Ky., and afterwards sold him to R. A. Alexander, of Spring Station, Ky. Having owned the horse and driven him at every rate of speed from a walk up to his highest rate, and having seen him from his box stall, in the paddock, and in his races, and having trained and handled the horse, I can say that I never at any time while I had him in my possession. saw the last disposition in the horse to strike a pace, but always found him to be a square and resolute trotter. I stood Pilot Jr. a fall season for mares, and made a public challenge to trot five of his get against an equal number of the get of any stallion, which was not accepted. I owned and saw many of his colts, and although he served mares from pacing families, I never saw one of his colts pace. He may have gotten an occasional pacer, but such never came under my observation, as all his colts were square and honest trotters. Knowing that the blood of Pilot courses through the veins of some of our best performers on the trotting turf, and that there are some writers who are so closely wedded to the pacing cross and opposed to the thoroughbred, they are very apt to fall into the error of writing 'pacer' after a horse's name, (especially if his name appears in some of the close up crosses in the pedigree of some distinguished performer), as the word pacer accords with the pet 'theory,' they are ready to accept and assert it as a fact, even when the information is very meagre, and comes from some one who has never had an opportunity to become personally acquainted with the facts. We all have our weaknesses, and whenever a statement accords with our 'pet hobby' we are only too ready to accept it as a fact, and never take the trouble to investigate the matter, and see whether the information comes from a reliable source, or from some one who has never been in a position to know what they are talking about. I trust no one will infer from this card that I am opposed to the pacing cross, (of which I am particularly fond) or that I would have it believed that the pacer has not contributed greatly toward the capacity of our trotters to lower the record. I simply write this, because I notice there is a disposition on the part of some writers to inform the public that such and such a horse 'was a pacer,' whereas the fallacy of such a statement is at once apparent to one who knows from experience that the horse in question never manifested the slightest disposition to pace. Those who claim that Pilot Jr. was anything but a square and honest trotter, err, either from a want of reliable information, or from an unwillingness on the writer's part to accept any statement that tends to substantiate a 'pet theory.'

Please pardon me for having infringed on your valuable space, but I thought that one who knew the facts ought to give his experience and speak out in meeting, lest the impression should be made on the public that Pilot, Jr., was himself a pacer, which I know to be a mistake, and I am sure no one who ever handled or was familiar with the horse will write after the name of "Pilot, Jr., pacer."

When Palo Alto, Stamboul, Sunol,, and others started upon their respective journeys at Napa, a very large and glowing account was contained in that progressive paper, self-styled "The Monarch of the Dailies," viz., the Examiner. The Examiner reporter was on the ground during the progress of the various trials against Father Time. He even had an amateur photographic camera on hand, by which means a series of particularly diabolical pictures were foisted upon the credulous public, representing Stamboul jogging, Palo Alto at speed, and many other trotting positions that were calculated to make a strong man cry like a child.

This Examiner man also discovered Mr. W. H. Crawford of Kentucky in the act of imparting the fact that the Napa track was short. This Mr. Crawford afterwards denied. The most singular thing, however, is the fact that this young man never discovered that Alfred G trotted a mile in 2:19¾! Is it possible that 2:19¾ is not fast enough to deserve mention? The time was when such a mile by a four-year-old would have been considered a most wonderful performance.

There is another reason assigned for not mentioning Alfred G, but I will not give it, though it comes from very high authority. I would, however, suggest to the gay and festive scribes that aspire to the front rank as horse reporters, that it is not well to boom one sire at the expense of another. The progeny of some particular horse may force themselves to the front in such manner in the near future that their capabilities can be no longer overlooked in spite of the mouthings of one or two uneducated and pig-headed men.

There are some men in the State of California that have acquired ample fortunes—not through ability, but by interposition of compassionate Providence. These gentlemen forthwith purchase horses of high type. They secured the best their judgment and money could procure. These gentlemen have now arrived at the definite conclusion that there is no other horse of very much importance outside their own, and they think that the instantaneous death of all stallions except their own would be a good thing. I propose stating to these individuals, that all equine merit does not center in any one horse—which proposition is indefensible, I think; any more than all human intelligence is contained within their brains—which proposition is unanswerable, I know!

"Amber," of the Chicago Horseman, has the following anent the great Horse Show, which has recently closed. Speaking of the exhibit of Percherons, she says:

"The exhibit of Percheron horses was something long to be remembered. When the grand fellows were led into the ring, each one held by a groom, who, in comparison to his charge, looked like a jack-straw chaperoning an ocean steamer, a thrill ran through the audience which expressed itself in ringing applause. Added to their superb strength and luxuriant growth of mane and tail, there was a gentleness of expression and dignity of carriage which marked them, with other heroes of the human kind, to be 'mild as well as daring; gentle as well as brave.' Each one of them, as with grandly erected head and flowing mane and tail they trotted by, or stood, claiming the plaudits of the gathered thousands assembled to do them honor, seemed equally fitted to be the pet of a lady or the thunder-hoofed bearer of some eager Johnstown saviour seeking to save a threatened valley from its doom. One of them, especially, a noble gray with a tail like a silver cloud and the face of a gentle philosopher united to the strength of a Hercules, seemed the very horse I should have selected to bear the dainty 'Duchess May' on her storied midnight ride, or to have ridden the battlement wall later with her frenzied lord."

All of which is beautifully expressed, for indeed the lady is one of the most elegant of writers, but when she speaks of a Percheron as "the thunder-hoofed bearer of some eager Johnstown savior," I draw the line; and her selection of one of them to bear the "Duchess May" shows me that her knowledge of the characteristics of a Percheron is vague and uncertain.

Along with 56,800 other people, I subscribed for the Weekly Examiner. With the subscription, as everybody knows, was given a numbered receipt entitling the holder to a chance in a list of prizes, embracing everything from a walking stick to a farm. I looked through the prize list and picked out the thoroughbred filly! I then considered the feasability of subscribing for a second copy, that I might draw the 10-acre tract of land in Palermo, upon which to pasture the filly. There arose, however, a lingering doubt in my mind as to whether the 10-acre tract in Palermo would furnish feed enough for a filly. This proposition was so startling that I decided to forego the second subscription. It was just as well, for I didn't get the filly, and consequently have no use for the land. From now on I confine myself to the Louisiana Lottery.

Steam Horse-Cleaner.

To the farmer boy who has never seen a horse cleaned except by the hand, with the good old curry comb and brush, it would be quite a sight to visit some of the large city barns of the car or express companies or large livery establishments and see the horse cleaned, so to speak. Should he visit the Palmer House livery Stables, Chicago, he might see any day a horse undergoing his toilet—in stable parlance, "gittin' cleaned and curried." In exactly forty seconds the animal is turned over to the keeper, as bright as a new pin—not a speck of dirt nor a turned hair to be seen on his sleek, shiny coat. In two hours, time, no less 150 horses, big and little, receive their daily clean up and are made ready to prance out into society. This revolution in the art of horse cleaning, rubbing down and currying all in one, is caused by a simple contrivance, a movable shaft, one end of which is a circular brush composed of fairly stiff bristles. The brush, which is run by steam, revolves many hundred times a minute, and is guided by a cleaner. Two cleaners operating with the brushes on one animal at the same time, can accomplish more in a minute than can four men with the old brush and curry comb in twenty minutes. As soon as the brush touches the body of the horse, the dirt and dead hair fly in all directions, and it only needs a second "going-over" to have the animal so clean that a glove would not be soiled in rubbing over the hide. At first the horse appears frightened at the noise of revolving shafts, but as soon as he feels the touch of the brush, edges up closer to the cleaner and give every indication of pleasure. The harder the pressure on the brush the harder will be the rubbing, of course, and when the sensation becomes uncomfortable the horses move away. In this way the cleaners are easily informed how hard a rubbing the animal will stand.

Another Sucker Caught.

Every few months it becomes neccessary as a matter of news to publish how some man has been downed by the gang of sharpers that are well known from Yreka to San Diego. Last Sunday morning a lad was seen riding the race horse Jack Pot into the Oakland track and shortly afterwards the irrepressible Stover was noticed to sneek into the enclosure probably looking for the sucker, as he is the "smooth Ephriham" that does the slick work for the gang and takes all the responsibility while at the same time he gets a goodly share of the plunder. In the course of a few minutes the notorious horse Lucky Dan was escorted in by a specimen of the same Kidney, and at the same time a few chosen spirits were busily engaged in putting up the stakes in the hands of a doctor who was present. The money amounted to $3,000 a side but one of the parties to the agreement was short several hundred and it had to be scraped up among friends that were conveniently at hand. Only a few minutes elapsed before the judge was in the stand and a starter on his way to the quarter pole. The race was a dash of three quarters of a mile, Hazlett putting up the money on Jack Pot with the understanding that Stover was to ride the brown gelding, while the $3,000 on Lucky Dan seemed to come from an unknown source, but it is generally supposed that Stover and his friend Smith, of Market Street liquor store fame, were the producers.

The horses were started, Lucky Dan going immediately to the front, Stover, with characteristic goodness of heart, pulling Jack Pot so as not to tire the game son of Joe Hooker too soon. It is probably needless to say that Lucky Dan won, although Stover claimed that he was fouled on the backstretch. Then to make the job look even more solid, the starter claimed that there was no start, but as the stakeholder paid over the money, first one and then another slunk away, and in a few minutes after the farce was over, the trotting park was a picture of lonliness again. The old broodmares, who had stopped eating for a few minutes, started browsing once more, and to an outsider who might have happened in to view the fast stock located at the stables, there was no indication that another sucker had been caught. As it is customery to give the pedigrees of winners, the subjoined will prove an acceptable addition to those who file tabulated genealogies:

WINNER.
- Sure Thing — imp. Holdfast — Strongarm / Jenny the Kidder
- Sure Thing — Johnny Armstrong's dam — The Puller / Instructions
- Certainty — Catch 'Em Alive — Flatcatcher / Decoy Duck
- Certainty — Miss Bunco — The Steerer / Miss Rustler

The Rose Thoroughbreds.

Much speculation has been indulged in by those interested in California thoroughbreds, as to the youngsters purchased by L. J. Rose of Los Angeles, from Senator Leland Stanford.

The following is a list of those entered in stake races:

B f Fairy by Argyle, dam imp. Fairy Rose by Kisber.

B f Peri by Flood, dam Frolic by Thunder.

Br c Conrad by Flood, dam imp Goula by Exminster.

B f Garnet by Flood, dam imp Goneaway by North Lincoln.

Ch c Rover by Wildidle, dam imp Rosetta by Struan.

B f Flight by Flood, dam imp Flirt by Hermit.

B c Sinfax by Wildidle, dam Fostress by Foster.

B f Glenloch by Flood, dam Glendew by imp Glengarry.

Br c Oscar by Wildidle, dam imp Petrolense by Plebeian.

Financial Condition of the N. T. A.

The following statement of the financial condition of the National Trotting Association has been sent out by the treasurer:—

FINANCIAL STATEMENT—ASSOCIATION ACCOUNTS NOV. 1, 1889.

L. J. Powers, Treasurer, in account with the National Trotting Association:—

Cash balance on hand May 1, 1889	$12,721.43
Receipts from May 1 to Nov. 1, 1889.	
From members' fees	$7,660 00
From rules, record books, etc	1,394 80
From percentage of entrance fees	1,247 24
From recording fees	1,350 00
From fines per record	495 00
From fines "no time" under Rule 41	800 00
From fines miscellaneous	490 00
Total receipts from May 1 to Nov. 1, 1889	$13,437 04
	$26,168 47
Disbursements from May 1 to Nov. 1, 1889.	
For printed matter, record books, etc	$ 623 25
For meetings of Board and Association	348 37
For salaries and wages	3,360 00
For expense account	1,813 01
For abatements	486 94
Total disbursements from May 1 to Nov. 1	$ 6,631 57
Balance on hand Nov. 1, 1889	$19,536 90

RECAPITULATION OF ACCOUNTS.

Association Funds.

Balance in Treasurer's hands Nov. 1, 1889	$19,526 90

GENERAL FUNDS.

Balance in Treasure's hands Nov. 1, 1889	$ 6,943 70
Total funds on hand Nov. 1, 1889	$26,470 60

The balance of the Association account—$19,526 90, cash on hand Nov. 1—includes items of about $2,500, which is subject to payment when the Board of Review has adjusted the account which this sum is held for by the Association, and the account will also be largely reduced the next six months, as the Association will receive no revenue, but will be obliged to pay all its expenses from its cash now on hand.

The balance of the general account—$6,943.70, on hand Nov. 1—is subject to payment when the Board of Review have adjusted the cases and account for which sum is held in trust.

LEWIS J. POWERS, Treasurer.

Leslie MacLeod on Sunol and the Palo Alto Farm.

The performance of Senator Leland Stanford's trotting wonder Sunol, and the sale of the filly to Robert Bonner for a price that is supposed to be over $50,000, puts the name of that precocious young performer in every horseman's mouth, but the many padded columns that have been devoted to the Palo Alto phenomenon have been written at long range. With a view to gathering some rock-ribbed facts about the mare, the writer asked Leslie E. Macleod, the junior editor of Wallace's Monthly, who spent last winter at Palo Alto, and thereby became intimately acquainted with the mare and her training, for particulars.

"I was at Palo Alto," said Mr. Macleod, "from the middle of January to the first of April, and, of course, had extraordinary opportunity for observation. Sunol is a difficult animal to describe, for the reason that she has a conformation and individuality her own. She is a beautiful bay in color, and stands fifteen hands two inches high at the withers, while measured at the quarters she is full sixteen hands high. This conformation you will see at a glance is very favorable to high speed—it is the greyhound type, and necessarily gives great length to the rear quarters and legs, and hence great stride. Maud S. is of that conformation, and so is Electioneer, the sire of Sunol, but among all the celebrities of the trotting turf none have it to the seemingly exaggerated extent observed in Sunol's outlines. She has an exquisitely handsome head, marred somewhat, however, by a rather sour expression, and the neck is of good length and very beautifully lined. The shoulder is prominent, running obliquely to a rather low and smoothly turned withers. Her depth through the heart region and the formation of the chest give the requisite lung capacity. There is just the slightest tendency to roach in her back, but the coupling is strong and the loin broad. The lower line of her barrel runs harmoniously, if I may so express it, with her back curving high at the flank, and this, though she is not very light-waisted, in connection with her great length from the hip to the hock, gives her the most greyhoundish appearance imaginable. She is not particularly handsome, as the popular idea of the equine beauty goes, but her speedy and rakish look has a charm for the critical eye. She has the sloping rump that trotting horsemen define as 'the pacing conformation,' and some critics see in these outlines a resemblance to that great campaigner, Goldsmith Maid."

"Tell me about her temper. Has she a good disposition?"

"She is one of the most nervous, high-strung and cranky animals that ever vexed the heart of a trainer. Not that she is particularly vicious, but she is amazingly irritable, and acts as though every individual hair was an exposed nerve. I have seen it stated that Mr. Bonner will drive her in Central Park. I do not think he will either drive or shoe her."

"How was she traine ?"

'Charles Marvin, Senator Stanford's trainer, is a man of great resources in his profession, an indefatigable worker, and a close student of the mental traits of the horses he trains. He is far and away the most successful trotting-horse trainer of this age, and a man of even temper and superior intelligence. My visit to Palo Alto was for the purpose of preparing for publication a work on training, written by Mr. Marvin, and necessarily I had to study the Palo Alto methods closely. The usual course was followed with Sunol. The colt at Palo Alto is weaned at about five months old, and is then taught to lead by the halter After he becomes thoroughly accustomed to this, he is given his first preparation for his turf career. This is on the miniature track, or, as I call it, the kindergarten, and, mark you, this innovation is one of the distinctive features of the system of training which Senator Stanford and Mr. Marvin have perfected. This is a covered track, about one-fifteenth of a mile in circumference, and, in fact, a counterpart in miniature of the regulation mile track. The colt is led around it until the novelty wears off, and is then turned loose, after being carefully booted with perfect fitting shin and quarter boots. Of course the colt's first impulse is to gallop around the track, but he soon settles into a trot, and is thereafter kept at it as much as possible, being controlled by the voices and the whips of the trainers, but he is never struck or treated with the slightest violence.

"The youngsters learn surprisingly fast what is wanted of them, and after a few months take the exercise with scarcely a mistake. Prominent among the good features of this training equipment, it may be mentioned that it sifts the good from the bad, and enables the trainer to pick out those that are most promising. This is no small advantage at a place of the extent of Palo Alto, where there are about 300 brood mares in the stud, and from 70 to 100 horses and colts always in training."

"How long does this training on the miniature track continue?"

"Until the colt is about fourteen months old, it is the only training. After that he is worked, both in harness and on the miniature track, until, say two years old, when he sees the last of the kindergarten. At about fourteen months of age the colt is broken to harness, and his work begins on the mile track. This work consists in short, sharp brushes to develop high speed, and this 'brush system' is also a Palo Alto innovation. This, with the miniature track, has been criticised by trainers of the old school, but their criticisms do not have much weight against the fact that horses bred and trained at Palo Alto hold the fastest trotting record for yearlings, two year-olds, three-year-olds and four-year-olds, and Sunol's three year old record is within one-half second of Jay Eye-See's five year old record.

'To show how little Mr Marvin practices the old system of drilling horses many slow miles, instead of driving short distances at high speed, I may say that Sunol was never driven around a mile track at speed until a day or two before her first race at Los Angeles, Cal., as a two year old. She was then worked a mile in 2:40½, and another in 2:38. Two days before the race she worked a little faster, and won the race in 2:32½, 2:25. Then work was resumed on the usual Palo Alto plan, and she was driven no more miles until August 19, at Petaluma, where she was worked in 2:38 and 2:33, and won a race on the 21st in 2:28½, 2:26¾. Then she was taken home, and not worked a mile until October, when she was twice given a mile and repeat well within her limit. A few days later she lowered the two year old record to 2:20½, and she was not driven at speed again a full mile until she made her marvellous two year old record of 2:18, and this year she has lowered the three year old trotting record 7½ seconds—from 2:18 to 2:10½. This performance at three year olds is a much greater one than Maud S.'s 2:08¾ at maturity."

"Is not her breeding in dispute?"

"The breeding of her grandam is. It is contended by Senator Stanford and others that Waxy, her grandam, was by Lexington, out of a daughter of Grey Eagle, but this Mr. Wallace, the editor of the Trotting Register, disputes with evidence that will not down. Mr. Wallace does not contend that Waxy was not a racing-bred mare, but concedes that she probably had running blood. He does contend, however and successfully I think, that she was not by Lexington out of Grey Eagle mare. Waxy started only once in a race and she performed so wretchedly that her owner gave her away immediately after it. But she was the dam of the good race mare Alpha, the best of the get of imported Hercules, and this is presumptive evidence that she was racing bred. Electioneer, the sire of Sunol, was bred at Stony Ford, New York, and General Benton, the sire of her dam, Waxana, was also bred in New York. Whatever her grandam was, Sunol must be conceded to be the most marvellous trotting machine that has yet appeared, and the greatest triumph of Senator Stanford, her breeder, and Marvin, her trainer. And as I have shown, New York shares the glory with California."—New York Tribune.

The Standard.

[AS REVISED AND ADOPTED BY THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS, DECEMBER 14, 1887.]

IN order to define what constitutes a trotting-bred horseand to establish a BREED of trotters on a more intelligent basis, the following rules are adopted to control admission to the records of pedigrees. When an animal meets the requirements of admission and is duly registered, it shall be accepted as a standard trotting-bred animal:—

FIRST.—Any stallion that has himself a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

SECOND.—Any mare or gelding that has a record of 2:30 or better.

THIRD.—Any horse that is the sire of two animals with a record of 2:30 or better.

FOURTH.—Any horse that is the sire of one animal with a record of 2:30 or better, provided he has either of the additional qualifications: (1) A record himself of 2:35 or better. (2) Is the sire of two other animals with a record of 2:35 or better. (3) Has a sire or dam that is already a standard animal.

FIFTH.—Any mare that has produced an animal with a record of 2:30 or better.

SIXTH.—The progeny of a standard horse when out of a standard mare

SEVENTH.—The female progeny of a standard horse when out of mare by a standard horse.

EIGHTH.—The female progeny of a standard horse when out of mare whose dam is a standard mare.

NINTH.—Any mare that has a record of 2:35 or better, and who sire or dam is a standard animal.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

In our columns this week will be found full particulars of the different sporting events that took place on Thanksgiving Day. Just now the athletes are resting preparatory to donning their togs for the season of 1890.

RUNNERS, WALKERS, JUMPERS, ETC.

Three good men made their appearance at the O. A. C. games on Thanksgiving Day, McKinnon and Cassidy of the Pacific Athletic Club and Gallagher of the University A. C. All three are liable to win a championship each on May 30.

Phil. Moody of the P. A. C. ran a splendid race in the half mile. He will probably be heard from next year.

The University men had the advantage over the other runners on account of having had a chance to train on the track previous to the games. The Berkeley track is built so that a man running on it for the first time is heavily handicapped at the turns.

Moffet will certainly beat six feet in the high jump on May 30th.

A. S. Henderson will be a very dangerous opponent in the "quarter."

Flynn thinks he will compete in the championship games next year.

The O. A. C. will need all its men to capture the flag, on account of the retirement of Schifferstein.

McArthur will probably not run until the championship meeting, as he has a great dislike to being heavily handicapped.

Captain George W. Jordan will be an aspirant for championship honors.

Horace Coffin has made up his mind to appear on the track again on Washington's Birthday.

It would not surprise us in the least to see Charles B. Hill compete in the walk on May 30th.

Walter A. Scott should train for the championship games, as his presence will be greatly needed.

THE WHEELMEN.

The next regular meeting of the Oakland Bicycle Club of '89 will be held at the residence of S. S. Small, 804 10th Street, Oakland, on Tuesday evening, December 10th.

G. H. Gibon, of the Oakland B. C., promises to develope into a first-class long distance rider before next season.

Secretary Drake works like a Trojan in the interest of his club

The regular meeting and election of officers for 1890 of the San Francisco Bicycle Club will be held on Thursday evening, Dec. 12th, at the club rooms. The following are the nominations: President, George I Hobe; Vice-President, Lou D Owens; Captains, F J H Manning and C W Brewster; 1st Lieutenant, E L Favor and W G Lowry; 2nd Lieutenant, A A Martin, T S Cobden and P L Ingham; Recording Secretary, C W Brewster and Sig. B Morse; Financial Secretary, H Allen Matthews; Bugler, B C Austin Jr. and C B Webster; Club Committee, H S Field, W F Soule, J I O'Brien, C A McDonald, J McCurragh and W G Lowry.

The run which was to have come off on Dec. 1st has been postponed to Sunday, Dec. 8th.

The annual club banquet will be held on or about January 11th, 1890.

THE WHEELMEN AT NAPA.

The joint race meet of the Bay City Wheelmen and Vineyard Valley Wheelmen took place at the race track at Napa on Thanksgiving Day. About 750 people were present to see the sport. The track, which is one mile in circumference, was in frightful condition. From the first quarter around to the third quarter one bicycle could not pass another, as there was only a narrow pathway open. The splendid condition, however, of the contestants was shown on the first and last quarter. Southworth, of Stockton lowered the Pacific Coast record in the one quarter mile dash. The following races were decided:—

1—One mile novice race—Allan Marshall, B C W, first; George P Wetmore, B C W, 2nd. Time 4:40.

2—Quarter mile dash—E E Southworth, O L W, 1st; C E Townsend, U C W, 2nd. Time 37½s.

3—One mile safety novice—George H Liebe, B C W, 1st; W M Parks, V V W, 2nd. Time 3:58.

4—Three mile safety novice—Julius Smith, scratch, G C W, 1st; C E Townsend, 50yds, W C W, 2nd. Time 11:41 3-10;

5—One mile safety scratch—Sanford Plummer, B C W, 1st; C B Lakeman, U C W, 2nd. Time 3:37.

6—One mile scratch—F E Southworth, O L W, 1st; C B Wheaton, S F B C, 2nd. Time 3:37.

7—Quarter mile dash for Vineyard Valley Wheelmen—Joe Parker 1st. Time 48½s.

8—Five mile handicap—George P. Wetmore, B. C. W., first; time, 20:14½. Julius Smith of the G. C. W, the scratchman, took a very bad header at the end of the third mile while spurting, sustaining, fortunately, only skin bruises. As all the other entries dropped out early in the race, Wetmore was left to finish alone, which he did in splendid style. He is a very young rider, and with proper practice by next year he should make it very warm for some of the crack men

9—Two mile safety handicap—Sanford Plummer, scratch, B. C. W., first; C. B. Lakeman, 50 yards, W. C. W., second. Time, 9:03 2-5.

Considering the wretched condition of the track, the time made in the different races was very good. During the progress of the quarter mile dash Doane's wheel slipped in a rut and he collided with C. B. Wheaton, throwing both riders. Both men sustained trifling, though rather conspicuous, injuries. The wounded wheelmen were attended by Dr J. Reed of Stockton, to whom great credit is due for the skillful manner in which he attended their injuries, and for the wonderful cramp remedy which he administered to the Chief Consul, *et al.*

The wheelman were very fortunate, considering the bad state of the weather, in securing such a large attendance. During the early part of the day it was feared that an assessment would have to be levied in order to defray expenses. A large ball was given at the Opera House in the evening, which was well attended by the elite of the surrounding country.

JOTTINGS FROM ALL OVER.

A special attraction at the games of the Seventh Regiment, which will be held this evening at their Armory, New York City, will be the two mile run, in which A. B. George, W. D. Day, Sidney Thomas, E. C. Carter and E. Hjerlsbery are expected to compete.

The first annual indoor games of the St. George Athletic Club will come off at the Club House, Staten Island, on December 14th.

It is rumored that Matsada Sorakichi, the well known Japanese wrestler, is a victim of quick consumption, and that he will never be able to step on the stage again.

The Owashtanonong Boat Club, of Grand Rapids, Mich., have determined to add an outdoor athletic ground to their property, and a committee of five has been appointed to make the necessary arrangements. The plan of grounds will be the same as that of the Detroit Athletic Club, with slight modifications, the dimensions being 720ft long by 500ft wide. On the one side will be a straightaway cinder path 220yds long, and there will also be a circular path, four laps to the mile, together with a baseball diamond, football field, and a half dozen lawn tennis courts. A grand stand capable of accommodating 2,500 people will be erected, the lower portion of which will be fitted up with dressing rooms for gentlemen and ladies, with bath rooms and all modern conveniences. The grounds have not yet been selected, but the committee will shortly decide which of the sites offered best suits the wants of the club.

It is proposed to hold an international single scull regatta at Seattle, W. T., during the season of 1890, the sum of $15,000 to be distributed in prizes C. C. Calkins and the syndicate who have projected the affair have communicated with the principal oarsmen of all countries, from H. E. Searle down, and if the responses from, the world's champion, Neil Matterson and Stansbury are favorable, the affair will most assuredly be carried to a head.

The Eastern athletes deeply regret the retirement from the athletic world of Victor E. Schifferstein and John Purcell, of the Olympic Club of San Francisco.

Several hundred members of the Boston Athletic Association, gathered in the gymnasium, on Nov. 25th., to witness the second in door handicap meeting of the club. The following is a summary of the different events:

Fence vault—L Rice 5in 1st, 6ft 6¼ in; L S Thayer, 3in 2nd 6ft, 6½in.

Standing high jump—G S Mandell, 2in, 1st, 4ft 5½in; J B Lund, scratch, 2nd, 4ft 6½in.

Running high jump—H R Dalton Jr., 1st, scratch, 5ft 4½ in; G S Mandell, 2in, 2nd, 5 ft 2½in.

Three standing jumps—F B Lund, 1st, 29ft 3½in; L Rice, 2nd.

Pole vault—N Ethier, 1ft, 1st, 9ft; H R Dalton Jr. scratch; 2nd, 9ft 2½in.

Rope climbing—M R Rand, 1st; H Williams, 2nd.

Putting 16 lb shot—C H Kipp, scratch, 1st 34ft 7in; D W Shea, 2ft, 2nd, 31ft 3½in.

Feather weight sparring—J C Robinson and P F Folsom Jr., fought four minutes to a draw.

AMATEUR ATHLETIC UNION.

The Board of Managers of the Amateur Athletic Union, held a meeting on Saturday evening, Nov. 23rd, at the Astor House, New York City. The following delegates were present: A G Mills, N Y A C; Walter Storm, M A C; F W Jaunsein, S I A C; Dr George Dowling, Orange A C; F. Gerow, A A C; W Kurtz, Warren A C; Wilmington Dell, P A C; J E Sullivan, P A C; Howard Perry, Columbia A C; H McMillan, A C of S N.

The Detroit Athletic Club and the Boston Athletic Association, were represented by proxy. President McMillan took the chair.

The following were appointed as a committee for the proposed international athletic meeting to be held during the World's Fair: A. G. Mills, N. Y. A. C.; F. W. Eddy, Detroit A. C; Howard Perry, Columbia A. C; G. B. Morrison, Boston A. A., and Harry McMillan, A. C. of S. N., chairman.

The board declined to sanction the proposed boxing tournament of the Deerfoot Harriers, and resolved that clubs, members of the A. A. U., are advised not to allow their athletes to enter therein. The same action was taken in the case of the Union Athletic Club, of Boston, which announces a boxing show for Dec 21.

The records made by W. D. Day for 10 miles, and Sidney Thomas for 9 miles, on Oct. 26, and also those at intermediate distances at 4 miles and under, made on Nov. 16, were accepted. George Schwegler's claim for the 240-yard 2 foot 6 inch high hurdle-race was referred back to the Record Committee for further investigation.

The following dates for athletics and boxing meetings were allowed by the Schedule Committee: Jan. 16, Varuna Boat Club; Jan. 22 and March 20, Riverside Athletic Club; Feb. 22, Star Athletic Club.

Mr. Mills proposed the following, which was passed: "That it is the sense of this board that the A. A. U, having taken jurisdiction over baseball, no member of any A. A. U. club can receive pay or compensation under any guise for taking part in any game of baseball, nor can any baseball team of any club of this Union containing any person hired to fill any position therein participate in any game of baseball played under A. A. U. rules; but nothing herein contained shall be construed to debar any club from presenting in its baseball team a player not a member of such club, but hired to play in such team, from playing baseball in any game not held under A. A. U. rules."

The action taken by the Board in reference to the general subject of baseball is as follows: "It is proposed to amend the constitution of the A. A. U. so as to permit amateur baseball players to play with or against professionals, so long as said amateurs are in no way pecuniarily benefited; it being the opinion of those advocating the amendment that so long as said amateurs do not compete with professionals for prizes or money that the real amateur standing of no one is interfered with. If this amendment is adopted, then the A. A. U.'s jurisdiction over amateur baseball will not interfere with any team of baseball players desiring to play a paid battery so long as such teams are not competing for the A. A. U. baseball championship."

The following rules were adopted: Rule 1. Affiliated, registered and approved organization. On and after January 1, 1890, any one competing at open sports held by any club or managing body which is not a member of the Amateur Athletic Union, Pacific Coast Athletic Association, Western Association of Amateur Athletes, Intercollegiate Association of Amateur Athletes, National Cross Country Association of America, or any other association or body to be hereafter approved of or registered as an approved organization, shall thereby disqualify himself from competing at any sports given by organizations approved by the Amateur Athletic Union. The Board of Managers shall have power to reinstate any one so disqualified if it shall think fit.

Any organization desiring to be registered as an "approved" club or association shall make application to the Board of Managers of the Amateur Athletic Union through the secretary, and at the discretion of such board may be admitted for registration. The fee for such registration shall be ten dollars ($10) per annum, and all applications for registration must be accompanied by a list of officers and number of members of the organization, together with the stipulated fee, at least thirty (30) days prior to the holding of any athletic meeting thereunder.

Rule 2. Unrecognized Meetings.—Athletic meetings, promoted by companies, corporated bodies, individuals or associations of individuals, as private speculations, or in conjunction with a benefit, social or picnic entertainment, are not, unless with the sanction of the Amateur Athletic Union Board of Managers, recognized by the Amateur Athletic Union, and any athlete competing at an unrecognized meeting shall thereby disqualify himself from all games held under Amateur Athletic Union rules.

Rule 3. Suspension of Individuals—No person shall be allowed to compete at any meeting held under Amateur Athletic Union rules while disqualified or under sentence of suspension passed by either the Amateur Athletic Union, Intercollegiate Associations, National Cross Country Association, Pacific Coast Athletic Association, Western Association of Amateur Athletes, National Amateur Skating Association, League of American Wheelmen, National Association of Amateur Oarsmen, National Lawn Tennis Association, and such other Associations as the Amateur Athletic Union may approve of.

Any person knowingly competing against one who is disqualified or under sentence of suspension by the Amateur Athletic Union, or any of the afore-mentioned associations, shall be himself suspended until the expiration of such sentence, or for such period as the Board of Managers of the Amateur Athletic Union may deem proper.

Rule 4. The Official Handicapper—An official handicapper shall be employed by the Union at a fixed salary not to exceed $1,500 per annum.

It shall be his duty to handicap without charge all handicap games given by Union clubs or associations, and such others as he may be directed to by the Secretary of the Union and shall hold himself in readiness at all times to do such other work as the Board of Managers of the Union may direct

He shall keep an official record of all athletes and their doings, and his books shall at all times be open to the inspection of any member of the Board of Managers.

During his term of office he shall be ineligible to compete in athletic sports.

He shall receive and handicap all entries furnished him by the proper parties up to the time, and until he returns his lists, and no entry shall be handicapped at the post.

All clubs or associations, members of the Amateur Athletic Union, and other registered and approved clubs or associations, must employ the official handicapper for their open handicap events, unless otherwise authorized by special permission of the Board of Managers of the Amateur Athletic Union, and all clubs or associations so doing shall, for this privilege, pay into the treasury of the Union a given sum, to be governed as follows: With entries not exceeding 100, $5; for 350, $10; for 600, $20, and for 1,000, $30. The total number of all handicap events added together shall determine the number of entries; each name in each event counting for itself

Rule 5. Prizes—Any athlete found guilty of pawning or using his prizes in any way for a pecuniary gain, shall be at once suspended from all competitions by the Board of Managers.

Rule 6. Championship events—Section 1. The annual championship events shall be as follows, unless changed by authority of the Board of Managers Section 2. Out-door field meeting—1, 100 yard run; 2, 200 yard run; 3, 440 yard run; 4, 880 yard run; 5, one mile run; 6, five mile run; 7, one mile walk; 8, three mile walk; 9, two mile bicycle; 10, pole vault for height; 11, running high jump; 12, running broad jump; 13, throwing 16 lb hammer; 14, throwing 56lb weight; 15, putting 16lb shot; 16, 120 yard hurdle, 10 flights, 3ft 6in high; 17, 220 yard hurdle, 10 flights, 2ft 6in high; 18, individual tug of war, unlimited weight; 19, tug or war, four men, u limited weight.

Section 3. In-door supplementary meeting—1, 75 yard run; 2, 150 yard run; 3, 300 yard run; 5, 500 yard run; 5, 1,000 yard run; 6, two mile run; 7, three-quarters of a mile walk; 8, four mile walk; 9, standing broad jump; 10, standing high jump; 11, three standing broad jumps; 12, running hop, step and jump; 13, pole vault for distance; 14, throwing 56lb weight for height; 15, putting 24lb shot; 16, 200 yard hurdle, 10 flights, 3ft 6in high; 17, 300 yard hurdle, 10 flights, 2ft 6in high.

Section 4. Individual general athletic competition, including standards and order of events—1, 100 yard run, standard 14⅖s; 2, putting 16lb shot, standard 32ft; 3, running high jump, standard 5ft; 4, half mile walk, standard 4m 30s; 5, throwing 16lb hammer standard 75ft; 6, pole vault for height, standard 3½ft; 7, 120 yard hurdle, standard 20⅖s (10 flights 3ft 6in high); 8, throwing 56lb weight, standard 18ft; 10, one mile run, standard 5m 40s.

Section 5. The swimming championship events shall be as follows: 1, 100 yard swim, straightaway; 2, one mile swim, straightaway.

Rule 7. Records—A new record at any distance in swimming, walking, running or hurdling, in order to stand, must be timed by at least three timekeepers, and a new record at jumping, pole vaulting, or in the weight competitions shall be measured by at least three measurers.

The Amateur Athletic Union will not recognize any new record, unless a report of it is made to the Secretary of the Union, properly supported by the affidavits of the referee, timekeepers, scorer, starter and measurers, as the case may be, as to the correctness of the time, measurement, weather, hour of day and place, with signatures of at least six witnesses, including officials.

Rule 8. Eligibility to Limited Events.—The eligibility to complete in events that are limited to men who have never accomplished a certain time, distance or hieght in a given event shall be determined by the competitor's record when the entries for such event closed.

Rule 9. Definition of a Novice.—A "novice" is one who has never won a prize in any athletic competition open to the members of two or more clubs, and this status shall be determined by his record when the entries for such event closed.

G. M. L. Sachs, of New York City, who is well known as a patron of athletics, was suddenly paralyzed on the train near Rochester, while on his way home from Chicago. It is reported that Dr. Metcalf, a fellow passenger pronounced his condition nearly hopeless. The above news will be much regretted in amateur athletic circles.

AT THE OARS.

The weather on Sunday last was very bad for rowing purposes.

"The wind was fierce, the waves ran high;
The Oarsmen fear'd the threat'ning sky,"

and in consequence only a few crews took their customary spin.

Messrs. Finley, Pless, Larkey, and Robjohn, of the Ariels took the club barge and rowed to the Sugar Refinery.

The O'Brien crew came out ahead in the barge race between members of the Lurline Club at North Beach on Sun last.

M. Sullivan of the Ariels took a spin in the Clubs WhiteHall boat on Sunday. He rowed to Washington Street wharf.

The main topic in rowing circles at present is the much talked about match between Jackson, of Vallejo and Charlie Long of this city. In an interview with Mr. Long by a reporter of the BREEDER AND SPORTSMAN on Monday last, he stated that he does not feel inclined to row again unless the match is for $1000 aside and should he arrange a match for that amount win or lose he will give up rowing and attend strictly to his private business.

William Growney and Leander Stevenson, took their single shells and rowed to Hunters Point on Sunday. Each man congratulated the other in being in the winning crew on Thanksgiving Day.

Quite a number of good oarsmen have recently joined the Lurline Club, and it certainly should produce some excellent crews next spring.

If all the oarsmen on the coast were as enthusiastic over rowing matters as H. O. Farrell, the secretary of the Pacific Coast Rowing Association, there would soon be an aquatic boom.

THE REGATTA AT SAUSALITO.

The residents of Sausalito, as well as a large crowd of people from San Francisco and Oakland, were afforded an opportunity to witness two of the closest and most exciting boat races ever seen in the State of California on Thanksgiving Day. Promptly at 2:30 P. M, the time announced for the regatta to begin, Referee J Ross Jackson called the single scullers to the starting potnt, and after a few remarks ordered them to get ready. Com. C. H. Harrison being in charge of the cannon fired the shot and the boats shot away like a flash.

Jackson, of Vallejo, went to the front and eclipsed all previous performances. At the stake boat the scullers turned in the following order: Long, Jackson, Sullivan and Growney. Sullivan who had been rowing a waiting race immediately shot to the front and held the lead to the finish, winning the race by a short length from Jackson.

Long finished third. Growney seeing no chance to win, being poorly boated, consoled himself in waiting for the next race, and his wisdom won the good will of the rest of the crew. Time, 10:15.

At 3:45, the time set for the last race, the little launch, the Examiner, steamed up to the starting point and signaled the crews to get ready.

The Ariels having the choice of the positions, took the inside. No time being lost in getting the crews into line the gun was fired at 3:52.

The Pioneer crew caught the water first and then began the grandest struggle for supremacy ever witnessed in Sausalito. The ladies and gentlemen who held positions along the banks cheered and cheered, until they became hoarse. The race to the stake boat was nip and tuck, both boats turning at the same time; through good management and splendid steering, the Pioneer crew gained a length. When within 100 yards of the finish, the Ariel crew put on a spurt and closed up with their opponents.

The Ariels would most unquestionably have won had not a buoy been anchored directly in their course. Time, 10:15.

The prizes were for the single scull race, $40, $20 and $10 respectively. For the four-oared shell race the prize was $80, $20 to each man.

The majority of the oarsmen dislike the idea of holding a regatta on Washington's Birthday, and efforts will be made to hold it some Sunday in February.

CLUB JOTTINGS.

For the first time since its organizations, the Golden Gate Athletic Club failed to send a representative to compete in the games at Berkeley on Thanksgiving Day. This state of affairs looks bad for the amateur branch of the club.

The members of the Pacific Athletic Club made an excellent showing in the Olympic games. The club is now out of existence, but all its good athletes will be identified with the new club, which will be organized on Thursday evening, December 12th. The Board of Directors considered that there were too many tough members in the club, and came to the conclusion that the only way to get rid of the objectionable characters would be to have the present club disband, and to re-organize on a more solid and wholesome basis.

The promises made by the Directors of the California Athletic Club in regard to Harbor View Park, have ended in smoke. The club has decided not to lease the park. Its amateur members will now be worse off than ever.

It is high time that the P. C. A. A. A. was holding a meeting. If the Association intends holding an in-door meeting in the pavilion in January, it should commence preparations at once, and issue the programme of games at the very earliest date.

The wet weather is interfering greatly with the work on the new out-door grounds of the O. A. C.

A BENEFIT EXHIBITION.

About 1,500 persons, including many ladies, assembled in the Mission Skating Rink on Tuesday evening, November 26th, to witness the benefit-exhibition of the Pacific Athletic Club. The exhibition will net the club about $150, which money will be used for re-organizing the club on a more salid foundation. The exhibition itself was very interesting, and came very near ending with a "knock out" match.

The first event on the bill was a four-cornered set-to between J. Kramer, J. McLaughlin, J. Regan and J. McAuliffe. The boxers were all amateurs, and the bouts were both clever and interesting.

Charles and Fred Bogan and Thomas Muller and H. Woods next appeared in three round contests. The boxing was lively, and a few good blows were struck.

T. Dudey and J. Sheehan gave an exhibition of wrestling Sheehan was evidently out of form, and Dudey won the match.

Professor Schwartz and T. Richter were the next pair to step inside the ropes. Both men are first class wrestlers and the audience were highly pleased at their exhibition. Each man won a fall.

Professor J. Hemme gave a fair performance on the slack wire, and he was followed by J. Mack, H. Kehoe and T. Sleves who proved to the people present that they could tumble.

The next event was a sparring match between Joe Hesketh and J. Sheehan. The boat was unusually good, both men proving themselves to be the possesors of no little amount of science. The audience were evidently disappointed because the men did not fight to a finish. It would appear that whenever Joe Hesketh enters the ring the crowd becomes crazy to have him knock his man out. Some clever feats in the horizontal bars were next performed by T. Balow and Professor Hemme. The winding up event turned out to be the most exciting one of the evening. It was a sparring, or rather slogging contest between M. Smith and Jake McAuliffe. Smith was the larger and heavier man while McAuliffe was the quicker. The men went at it hammer and tongs from the start each one trying to knock the other out. At the end of the fourth round much to the disgust of the on-lookers the referee stopped the fight as he said the club no longer sanctioned "knock outs."

OLYMPIC FIELD DAY.

A good showing was made by the athletes on Thanksgiving Day.

Judging from the large audience present at the Berkeley Campus on Thanksgiving Day to witness the annual Fall games of the Olympic Athletic Club Amateur athletic sports are beginning to creep into the favor of the people on the Pacific Coast. The seats and grand stand surrounding the track were packed with a fashionable and appreciative audience. At least 3,000 people, half of whom were ladies, were present. The track, five and a half laps to the mile, was in a wretched condition, and at least ten seconds slow in a mile.

The arrangements to keep the crowd out of the enclosure and off the track were very faulty, and the spectators were greatly incommoded on this account. When the boys flocked into the enclosure and all over the track without any apparent qualm, and the general motto appeared to be, "Each for himself" and the rest nowhere. The ladies who occupied the seats were unable to get a look at any of the competitors except occasionally when a long distance runner would pass directly in front of them. Had the Marshals, whose names appeared on the programme, attended properly to their duty early in the day, the crowd would not have attempted to cross the fence. The day was raw and cold and not at all suitable for fast time or good performances. The handicapping was unusually good, and Captain Jordan deserves credit for his work. The Varsity boys carried several of the prizes, while the Olympic Club members did not carry off as many medals as was expected. The following table will show how the medals were divided:

	First Medals.	Second Medals.
Olympic Athletic Club	6	1
University Athletic Club	3	3
Acme Athletic Club	2	
Pacific Athletic Club	1	3

The second medal won by McGee, O. A. C. and U. C, and the Hammersmith medals are not included in the above list. Had John Purcell and Victor E. Schifferstein taken part in the games the O. A. C. would certainly be credited with more first prizes.

The following is an account of the different events:

100 yards novice race—Ray Gallagher, V C 1st; Thomas Sullivan, O A C, 2nd. Time, 11 sec. Won by two yards; second, third and fourth men all in a bunch.

One mile exhibition walk—James Jervis, O A C, 1st. Time, 7:31.

Mr. Jervis was entirely out of condition, and had the club not prevailed upon him to make the effort, he would not have attempted to lower the coast record of 7:10½. His stride was short and weak and any one who saw him walk at the last championship games could easily tell that he was not trained. Taking his lack of form together with the bad state of the track into condition, his performance was very creditable indeed, and with three or four weeks hard training Jervis should get under seven minutes.

220 yards scratch race—1st heat, E Mays, U C, 1st. Time 24½ sec. Won by four yards.

Second heat—F W McNear, U C, 1st. Time, 25¼ seconds. Won easily by three yards. There was no final heat, the other competitors forfeiting the race to Mays.

Throwing 12lb hammer—J McKinnon, P A C, 10ft, 1st. Distance, 92ft 11in.

The only other competitor W T Haberly could not come within thirty feet of McKinnon's throw. Had Purcell, the scratch man appeared, he would have been beaten by twenty feet.

120 yards hurdle race—Jos Hooper. O A C, 1st; H C Moffit U C, 2nd. Time, 18 3-5 sec. Won by five yards.

Half mile run—E C Hill, U C, 1st; E P Moody, P A C, 2nd. Time 2:09 4 5.

This proved to be a very exciting race. The scratch man, E C Hill, started off at a rattling pace, and soon began to overhaul his men. On the last lap Hill and Moody were the only two left. The finish between the two men was splendid. Moody who is a new man showed lots of grit and with careful practice may take a place at the championship games in May.

120 yards run—1st heat, N L Williams, O A C, 8 yds, 1st; M L Espinoza, O A C, 10yds, 2nd. Time, 12 4 5 sec.

Second heat—E Mays, U C, scratch 1st; S V Cassidy, O A C, 1½yds, 2nd. Time, 12 4-5sec.

Third heat—Ray Gallagher, U C, 1st; Thos. Sullivan, O A C, 11yds, 2nd. Time, 12 2-5sec.

Final heat—N L Williams, O A C, 1st; Ray Gallagher, U C, second. Time, 12 3-5sec.

Won by one foot. Same distance between second and third.

Pole vault—H Germain Acme A C 7in, 1st; J Sheehan, P A C 15in, 2nd; Hight, 8ft 3in.

Sheehan sprained his ankle and so forfeited his chance of getting first place.

Putting 16lb. shot—W. T. Haberly, O. A. C., 8ft., first. Distance, 27ft 7in.

The only other competitor in this event was C. C. Johnson, a young colored athlete who could do no better than 26 feet. The record in this case was wretched. The average school-boy could beat either of the contestants.

One mile run—Frank L. Cooley, O. A. C., 10yds., first. H. C. Cassidy, Pacific A. C., 25 yds, second. Time, 4:56.

Cooley, Cassidy and Espinosa kept well together until the last lap, when Espinosa dropped behind, leaving Cooley and Cassidy to fight it out for first place. Cassidy, who is a new arrival on the Pacific Coast, surprised everybody, Cooley and Espinosa in particular, both of whom expected to shake him off on the first lap Had Cassidy been in good condition, he would have won the race hands down. He will possibly knock spots out of the record on May 30th Cooley made a game fight, and it was only his grit that won him the race. He breasted the tape about two feet in front of Cassidy, and was loudly applauded.

440 yards race (O. A. C. only). for Hammersmith medal; silver medal to second—W. A. McGee, first; A. S. Henderson, second. Time, 55 seconds.

There was considerable interest taken in this race, as it was buzzed abroad that Henderson was a dark horse. After the race his friends claimed that he was not trained properly, but that on May 30th he would be heard from again.

Running, high jump—E. S Dowelle, Acme A. C., 7in., first. H. C. Moffit, V. C., scratch, second. Height—Dowelle, 5ft 4in. Moffit, 5ft 8¾in.

Moffit's jump beats the Pacific Coast record, but on account of the ground not being level, the record was not allowed. Moffit is a very pretty jumper, and with more practice he should clear 6ft. Dowelle is also a promising jumper, and will take second prize at the championship meeting.

440 yards, Consolation, handicap—Frank O'Kane, O. A. C., first. No time taken.

Although placed at scratch, O'Kane won without any trouble.

The following were the officers of the day:

Referee—E. A. Rix, O A C.

Judges (track events)—Lieut. G. F. E. Harrison, U S A, U C; Prof. F. Soule, U C; A. C. Forsythe, O A C.

Judges (field events)—John Elliott, O A C; J. H. Gilhuly, O A C; J. A. Hamilton, O A C.

Timers—P. McIntyre, O A C; Col. Geo. C. Edwards, U C; Walter A. Scott, O A C; J. A. Hammersmith, O A C.

Clerks of the Course—Horace Coffin, O A C; J. G. Sutton, U C.

Starter—Geo. W. Jordan, O A C.

Judge of Walking—J. J. Theobald, O A C.

Official Announcer—J. F. Larkin, O A C.

Marshals—Prof. J. J. Corbett, O A C; Prof. Geo. Miehling, O A C; Prof. De Witt Van Court, O A C.

Field Captain and Official Handicapper—Geo. W. Jordan.

Lieutenants—D. W. Donnelly, S. V. Casady.

Tin Cup Records.

The growing tendency to return by safe gradations to longer distance races is touched upon by an incisive writer to the Kentucky Stock Farm, who says:

In the article recently published in the Courier Journal, after criticising the racing associations of to-day for offering purses for short distance races or dashes, it very truthfully says: "Breeders themselves have come to deplore the methods which require speed and nothing more." The statement was made with reference to running races and the thoroughbred, but is applicable in a considerable degree to the trotter and certain methods now in vogue which, if maintained or allowed to grow, will have a similar effect upon the harness horse.

One method or practice followed very persistently in the last two or three years, which will have its effects in this direction, is the "tin cup method," or making standard animals by trotting a single mile for a cup. A glance at the records of the past season will show that a great per centage of the records obtained in this manner was by an animal that could not trot a good race, and in many cases could not win a heat in slow classes to which they are usually eligible. We know horses that trotted through an entire circuit of five meetings and could never win a heat where 2:34¼ was the fastest heat required to win in their class, and at the close of the circuit started against time for a cup and were given a record of 2:29¼, by which they became standard and went down on the list with horses that won heats in contested races in the same time. But the horses that defeated them in every race and that are far their superiors in everything required to constitute a race horse, are still outside the standard line with their record of 2:34¼.

In nearly every case the stallion that becomes standard by such a performance is at once placed in the stud, and you will usually find in his advertisement for public patronage great stress placed upon his standard rank by performance. Breeding and individuality being equal, no well posted and experienced breeder would question the statement that the horse with the record of 2:24¼ would sire a class of colts for race horses far superior to the horse with the single mile cup record of 2:29¼. But he is standard, and an indiscriminating public will patronize him in preference at a much higher fee. Making standard horses out of rattle-headed animals that lack brains enough to trot in company, and horses that are not game enough to go but one mile, is one of the practices which, if continued, will give us a class of trotters with 'speed alone" and one that trotting horse breeders will come to deplore. We do not wish to be understood that many game and reliable trotters have not become standard in a performance against time; but we do say that it is a reed by which hundreds of almost worthless animals acquire standard rank, and in many cases take into the stud-book with them a number of relatives naturally of the same character.

Any method or practice that does not tend toward improvement in the gameness and racing qualities of the trotter in future generations, should not be tolerated, much less one that has its tendency in the opposite direction; and every worthless, rattle-headed, faint-hearted animal that is allowed to become standard by the cup process, will produce a generation with inherent, objectionable qualities which we should take every precaution not to perpetuate.

The trotter has not improved in gameness or ability to go a long distance in proportion to the improvement in the rate of speed, which shows that we should look to this as well as the improvement in speed. We have, of late day, trotters with more speed than Huntress, but where is the one that can carry it so great a distance? We have a great number with a higher rate of speed than Lady Suffolk, but what one has proven his campaigning qualities superior to hers? The brilliant record of Goldsmith Maid as a campaigner reflects more credit on Alexander's Abdallah as a sire than a score of the class we usually find with tin-cup records of 2:29¼ and 2:30.

Again, this class of peformances is of little or no interest to the general public. The only exhibitions against time, in which the public manifest any interest, are those to lower any of the fastest records, and in such cases the standard rank of the performer is never at stake. Do away with the tin-cup process and you will remove a method that requires "speed alone" in the trotter—a method that makes it possible for hundreds of almost worthless animals to acquire unmerited popularity, and one that trotting-horse breeders themselves will come to deplore.

No well regulated ranch or farm is complete without Darbys Prophylactic Fluid.

Rub your horses with Darbys Fluid for swelling or stiffness of the joints.

Nominations for the Breeder and Sportsman Futurity Stake close Wednesday, Jan. 1st. 1890. Entries must be made on or before that date. See Advertisement.

Grim's Gossip.

Jim Douglass, the erstwhile crack sprinter, is been driven on the road by his present owner who resides in Denver, Col.

Kensett F., an eleven-year-old mare, reduced her record to 2:22¼, and has since joined the trotting brigade in Germany.

Isaac Lewis the well known colored jock has signed to ride again for Congressman Scott who was one of his first employers.

The owner of Kitty Van is prepared to make a match for a dash of five-eighths of a mile against any horse now in California.

Trotting matches are acquiring a most unenviable reputation on the Continent in consequence of the scandalous scenes which have occurred at several of the recent races.

Chaos—the lucky Rayon d'Or colt—won three races out of ten attempts and pulled down $63,550, while El Rio Rey who won seven races all he started in—captured $47,525.

Jimmy Goldsmith heads the list of winning drivers in the East this year with 27; his nearest opponent is Charles Green, with 19 victories; Knap McCarthy has 14 and Budd Doble 12.

Henry Walsh, the veteran Palo Alto trainer, had a severe attack of rheumatic gout. He removed the horses under his care to Mayfield a few days ago, and I am pleased to hear that he is on the move again.

It has been frequently stated that the trotting mare Kate Agnew was by Ben Franklin, but Mr. Christman sends word to me that the mare is by Christman's Hambletonian, a son of Whipple's Hambletonian, the other pedigree being a mistake.

The Hough Bros. bought Burlington the winner of the Pelham Handicap at Jerome and the Criterion Stakes at Monmouth Park for $7000. Under Albert Cooper's care the two year old should develop into a speedy three year old in the spring.

It is with pleasure we draw attention to the auction sale of Cresswell Bros., who have in the past given every satisfaction to both buyers and sellers. This time they have some exceptionally fine Standard bred horses and buggy horses for sale.

N. S. Straube of Fresno has sold to R. N. Dunlap of Galesburg, Ill., the promising yearling Anti-Medium by Milton Medium, 2nd dam by Jack Hawkins. He has also sold to C. F. Fargo of this city a pair of chestnut geldings, Dawn and Copper, the price paid being $1,000.

James A. Dustin has sold his fast Elector colt J. R., and B. C. Holly will have the handling of him in the future. Mr. and Mrs. Dustin will shortly start for the East to pay "the old folks at home" a visit, but Jim expect to be back in time next season to meet the boys on the circuit.

The bad weather has caused postponement from day to day of the Blood Horse meeting, and it is hard to tell when the final races will be run off. Many of the horses have been sent away from the track, but there are still enough left to warrant good sport when the weather clears up.

One of the most prominent San Francisco bookmakers says he does not object to having the horsemen put up jobs to beat the books but he would like to see the plans carried out in an artistic manner, and not so palpable that even a Chinaman sitting on a fence can see through the steal.

J. R. Ross, owner of Kitty Van and Sir Ladd, has lately bought from the Owen Bros, of Fresno the fleet footed thoroughbred Oro, by Norfolk, dam Golden Gate by Leamington. He is a good all round horse and should prove of great value to his new owner. The price paid is not stated.

As Spokane proved such a successful winner in 1889. Mr. Armstrong has determined to send the dam Interpose on to California this winter, and she will be bred in the spring to Hyder Ali once more. The cross has been so good before that another the equal of Spokane may be looked for.

James R Keene's stock farm near Lexington is to be broken up at once, and the stock, including the stallion Spendthrift and some fifteen brood mares, the best known of which are Kapanga, the dam of Kingston, and Constantinople, the dam of Dutch Roller, were disposed of at auction yesterday.

A paper published in the Southern portion of the State, in speaking of the black horse Bryant W. says: "But it was in races for gentlemen riders that the horse is best known. Ridden by his owner, Mr. Thos. H. Williams, he was the victor in many a hard contest, winning for his owner both fame and fortune."

Frank De Poister, Dan Dennison and Phil Siebenthaler have taken their horses to Sacramento, weary with waiting for the weather to clear up. Dan says when the bell taps he will be there though, but living is too high down here and he had to pull out. There are several more horsemen here who would pull out if they could,

Mr. Samuel Bryant, of Louisville, has lost by death a yearling colt, J. M. White, own brother Come to Taw, dam Mollie Seabrook. The famous mare Naphtha by Eclipse, dam Echo by Lexington, owned by N. L. Harris, of the Hurstbourne stud, is dead. Naphtha was noted as the dam of Explosion, the dam of Dewdrop.

The cable tells us of the great enthusiasm with which Barnum and his show is received in England. The trotting and pacing matches in connection therewith are said to create the greatest curiosity. These are conducted by John Splan, who took over a stable of trotters and pacers. If John gives the English some of his old-time drives and electrical finishes, they will want to know more of the truly American product, and the farther they investigate the more will their admiration increase. The time is coming when the trotter will be appreciated at his real value in countries outside of America.

A meeting of the members of Pacific Coast Trotting Horse Breeders Association will be held at the Palace Hotel Saturday December 14. This will be the first annual meeting and an election for officers for the ensueing year will be held. All members who can possibly attend, should be present.

Roy Wilkes and Adonis are almost ready for a race and it should not be a surprise if a match is made almost any day. Californians are apt to believe Adonis invincable but they will find Mr. Davis ready to pace three fast heats with his horse, and it will take Adonis all his time to beat the Eastern respresentative.

W. M. Murry has purchased from A. Gray Todd the running horses Jessie C. by Bishop, dam Jennie C. by Norfolk and Florin by Wildidle, dam Frolic by Thunder. The price as given by Mr. Murry is $4,000. He also states that hereafter Jessie C. will run as Princess Lexington, and that Florin's name will be changed to Lord of the Harem.

The Kentucky Stock Farm says that the greatest three-year-old campaigner of the year is Allerton by Jay Bird. California cannot get a show at any kind of a game in Kentucky, but we respectfully desire to call our contemporary's mind for a moment to Mr. Salisbury's Margaret S. Look up the records and see how she stands as a campaigner.

Mr. A. B. Truman has had a streak of bad luck. His mare Lottie by Nawry, dam by Bonnie Scotland, died last week from a severe attack of colic. Mr. Trueman has a fine weanling colt out of her by Christmas, which should recoup him in time for the loss of the mare who has only been owned by him for about two years. She was in foal to Noonday.

An old English racing book entitled "The Genealogy of the English Race Horse," published in London in 1810, gives an account of a high jumping contest which puts in the shade the performances of Ontario and Rosebery. The horse was a gelding owned by Richard D'Arcy, and at the races of Loughrea, Ireland is said to have jumped a stone wall seven feet two inches.

James Corcoran, who has been training and driving horses at Pelaluma for some time, will shortly remove to the Bay District track where he will be prepared to take charge of any colt or trotters that owners may want to have prepared for tracks or road purposes. Mr. Corcoran will bring several horses with him one of which is the green pacer Cyrus that can show better that a 2:25 gait now.

Trotting is now greatly in vogue in Austria, as it has long been in Russia, and the habitue of courses in the United States would have felt quite at home during a late row on a Vienna track, and the attempted mobbing of an American driver at Moscow, concerning the old question between losers and winners as to the honesty of gait of the successful contestants.

A meeting was held at the Baldwin Hotel last Saturday by several of the horse owners to determine what should be done about two extra days' racing. When the meeting was called it was then generally understood that no extra days would be given by the Association, but since the owners held their meeting the Blood Horse Directors have advertised that they will give two extra days—if it ever clears up.

Mr. Salisbury's grand old horse Monroe Chief 2:18¼, by Jim Monroe 835, dam Madam Powell by Bay Chief son of Mambrino Chief II. etc., has of late been slightly neglected owning to the grand performances of Director's colts, but I have heard many flattering accounts of his colts from San Luis Obispo, Chico and other localities while three mares by the old horse have produced trotters that have entered the 2:30 list this year.

The stock at Highland Farm, the property of W. C. France, Lexington, Ky., is in fine condition. The stallions, brood mares colts and fillies all seem to be doing well. Red Wilkes's book is full at $300; Wilton's nearly full at $500, the other horses doing well in proportion. The farm is kept in admirable condition, and everything about it bears the marks of fine care and skillful management.

A couple of years ago C. D. Ely purchased the colt by Electioneer, dam Waxana, which was foaled in 1885. After Sunol made her record of 2:18 last year, Mr. Ely called his colt Sunolo, and the horse's services were in demand in the neighborhood where he stood last season. It is now stated that the owner of Sunolo put a price of $100 000 on his colt when the sister made 2:10½, but has now withdrawn him from market, and Sunolo is not for sale at any price.

E. C. Walker, of the Chicago Horseman, says the supremt test of a man is whether or not he will lend you his sulky ae a trotting meeting when yours has gone the way of good sulkies at a hard turn. When Mr. Walker was driving his mare Miss Alice this summer, he would have lost a race through an accident to his sulky but for the kindness of the owner of the great stallion Nelson, who, without having a cent on the mare, not only offered his sulky but helped to hitch the sporting writer's animal to it.

It is a very interesting tale that comes from the St. Louis Pool Rooms: Little Eddie, a small, thin-faced boy, was figuring on six bits. Should he have breakfast or attempt to borrow two bits and play a dollar combination. Mr. Levy, the courteous proprietor, advanced him half a dollar, and he played his combination and went out to a 25-cent breakfast. When the races were over, *mirabile dictu*, his combination, $500 to $1, had won. 'Tis not often thus. The horses were Sam Morse, Vigilant, Glendale, Suitor and Hilda.

Hiram Howe, the well-known horseman, is dangerously ill at his home near Gravesend, L. I. For several months he has been ailing and it is now stated that he may die any time. He was driving when Hiram Woodruff and his contemporaries were at their best, and has driven some famous horses, such as American Girl, George Wilkes and others But a few years ago he gave up driving races, and of late has contented himself with owning and driving two or three first-rate roadsters and keeping a hotel.

A sale of thoroughbred and half-bred horses took place at Buenos Ayres on October 9th. The animals were the property of Mr. W. Kemmis, and they obtained the biggest average ever recorded. There were 35 lots sold, of which 25 were colts and 10 fillies and they realized a total of $305,600, an average of $8 731. The highest price paid was $32,500 for a colt by Phœnix, out of Blood Royal; two other colts by Phœnix, one out of Fulka, the other out of Marie Sefton, sold for $25,000 and $12,000, while a half-bred filly by Phœnix, out of Blissful, sold for $13 500. It must be said, however, that the Argentine dollars are only worth about fifty cents.

Mr. Robert Steele, of Philadelphia, is convinced that he has one of the fastest stallions in the country, and next season he will have Antevolo especially prepared for track purposes and the California horse will be sent for a low record. Antevolo has already shown what stamina he has, and all residents of this State will be pleased to hear of him making a low mark,

As the stallion season approaches advertisements are in order, and several have already been sent in for publication in the near future. Those who have good animals know that the best way to reach the public is through the columns of the BREEDER AND SPORTSMAN, where every man who owns a good mare looks to see what horses are standing in public service. If you have a stallion write out your advertisemen, and send it in for publication. It will pay you.

The Eastern papers are talking about a match between Stamboul and Phallas, but there are no grounds for the belief that it will ever take place. If there ae any stallion owners who want to make a match, a note dropped to Major Du Bois, Palace Hotel, City, will find a gentleman ready to make a race against any stallion in the country. Superior, 2:19¼, is the horse Mr. Du Bois has, and although his record is not as low as some, just post a deposit for a match and see how quick the money will be covered.

The Missouri Horse Exchange, which has been struggling under adverse circumstances, recently made an assignment for the benefit of creditors to C. A. Windmueller. The assets consist of a leasehold on the corner of Broadway and Chouteau avenue, and about $400 worth of personality. The Exchange was organized for the purpose of having a central and reliable place where horses and mules could be disposed of at auction and otherwise, and for awhile did considerable business. The liabilities were not stated.

It is not often that I have to mention other sports outside of racing in the gossip, but Manager Harris, of the California Base Ball League, has taken a hand in horse matters, and it is worthy of mention. On January 5th there will be a match game of base ball at the Haight-Street grounds between eighteen players, whose services have been promised by Manager Hart, of the Boston B. B. Club. Mr. Harris will give the grounds rent free, and the services of the players will be gratuitous. The entire receipts will be given to the new Board of Directors of the Blood Horse Association to found a stake, which shall be called the California League Base Ball Stake. It is supposed that if the members of the association take the matter in hand and sell tickets, that at least $2,500 will be raised. This will be a large amount for one stake, and should bring to the post the very best horses in the State.

The Kansas City Times, of last Sunday, says that Mr. Robt. Stewart sold White Stockings to R. J. Holmes, of that city, on Saturday for $20,000. White Stockings was worked on the track at Lexington this season and is well and favorably known. He is a horse without a pedigree, but is said by good judges to be one of the mostly stylishly gaited horse on the track. Four years ago he was shipped to the horse and mule yard with some Kansas horses and was purchased by Stewart, who worked him and brought him down to a record of 2:22 on the Kansas City jockey club tracks two years ago. During the season of 1888 he made his record of 2:16, which he has not lowered. He is the most famous trotter without a pedigree. His purchaser will use him for a roadster. White Stocking appeared only in the grand circuit during the past season, and has been a remarkably paying investment for Stewart.

The following table shows Senator Hearst's winnings during the past season:—

	Starts.	Won	Amt.
Tournament, b c, 2 by Sir Modred—Plaything	10	2	$14,517
Ballarat, b c, 2, by Sir Modred La Favorita	11	1	8,740
Gorgo, blk f, 4, by Isonomy—Flirt	3	2	3,025
Miss Bell, b f, 2, by Prince Charlie—Linnet	15	5	2,700
Philander, ch c, 3, by Wildidle—Precious	12	1	1,130
Total (with minor winnings)			$32,652

The stable also started Gloaming, Rhono, Baggage, Anaconda, and Golden Horn, winners of from $750 to $150, and Almont, Del Mar, Everglade, Gertrude, King Thomas, Not Idle, Glen Echo and Question, who added nothing to the treasury. The latter was sold and has since won for her new owner, D. A. Honig. The eighteen horses wore their owner's colors on eighty-six occasions, crossing the wire first in twelve races, finishing second in thirteen, and third in nine.

On Tuesday of last week William Bishop arrived in Boston with Mr. P. Lorillard's English stallion Sailor Prince. The horse, in charge of the colored man Buck, who goes with Mr. Bishop on all his voyages, was at once shipped to Rancocas, where he now is. The horse reached these shores in good condition, although he has lost one hundred pounds of flesh on the voyage. It is Mr. Bishop's policy to limit the food allowances of his equine charges when at sea, a system which he claims works to advantage.

Sailor Prince is a powerfully built bay, with black legs, looking much like the stallion Glenelg. He stands fully 16¼ hands high, with a good neck, back and middle piece, while his legs are clean as a whistle end well put under him. Altogether, Sailor Prince, with his splendid breeding and many good performances on the English turf, looks like a decided acquisition to our blooded families.

He is nine years old, by Albert Victor, dam Hermita, by Hermit, etc.

The New York Sportsman pays the following deserving tribute to an old time horseman:

It is with regret and a feeling of deep sympathy for his bereaved relatives that we learn that another of the old school of horsemen has been called away. Mr. John Peasley, a native of New Hampshire, but for the past thirty-seven years a resident of Sacramento, Cal., passed away, at the ripe old age of eighty, on Nov. 16th For some years Mr. Peasley was proprietor of the Merchants' Hotel, and subsequently of the What Cheer Hotel on Front street, Sacramento, a noted caravansary in early days. He was one of the organizers of the State Board of Agriculture, and a life member. Deceased was a very prominent citizen in the early "fifties," and was among the foremost in all public enterprises and movements. He took great interest in the breeding of fine stock, and owned the ancestors of the horse Tecumseh, so well-known in that vicinity. I shall ever remember meeting this amiable old gentleman upon my first visit to the Sunny Slope, and the early history of the country he gave me, that appertaining to the breeding of horses naturally interested me most, and I venture to say that there never was one bred in that country of any note, but what he could give the correct pedigree of as far back as it was known.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Discursive.

EDITOR BREEDER AND SPORTSMAN:—The semi-occasional desire tc send you an item or two has again prompted me to address you and to say first that if anybody has a more old-fashioned four months pointer pup than mine by Mr. William Schreiber's steady old Mountain Boy and out of my old Beautiful Queen, I would like to see it.

I think she will get there, and regret that there is none other of the litter alive.

I also have a beautiful white and lemon pointer puppy by Senator Pinder's Scout Croxteth out of George W. Bassford's Blossom. He is a Joe Dandy. Senator Pinder has one of the same litter and these two are now matched to run a private race during our field trials of '91.

By the way, I think it time the Executive Committee of our Trial Club was beginning to move in the matter of selecting judges, securing reduced fares, etc. The judges should be selected immediately.

With some friends I had a fine time in Capay Valley recently. Camped out just eight days. Plenty of birds, plenty of cooks, plenty of everything, including rain on the last day, which sent us home, or we might be there yet. We ran a very nice field trial lasting two days. It was quite exciting at the wind-up.

One meal I remember I was cook and broiled thirty-two quails. They disappeared with the rapidity for which a Capay Valley quail is noted. I really think if I could have stayed one week more I should have grown fat. Henry Bassford improved some while in camp. H. Boyce fell off a little. T. H. Buckingham held his own, and Charley Reams gained fast. George Bassford was able to sit up and eat all the time there was anything cooked, but somehow he didn't sleep well. J. Hughes was a good second to George.

Well, I will be at Bakersfield on January 20th, and hope you have an entry in the aged stake, so we can come together again. I would like to run you just one more heat before the boiling oil and melted lead time comes. Urge a general attendance at the field trials and let us have a big friendly pow-wow.

J. M. BASSFORD, JR.

VACAVILLE, Dec. 3rd, 1889.

[Mr. Bassford's kindly wishes are fully reciprocated, and we are one with him in wishing an opportunity for a race, owners to handle. One of the most enjoyable field trial incidents we can recall was a race with Mr. Bassford seven or eight years ago, when our fat old red Belle and his obese old Beautiful Queen waddled about a lot of brush at Walltown Timber. Belle would not mind and Queen did not choose to. Both would disappear at intervals to return after a season with sneaky eyes, which told as plainly as could be that they had been chasing rabbits. Once in a while we would ask Mr. Bassford if he knew where our dog was, and Mr. B. would range off looking for her just as kindly. If Queen had not beaten Belle we should have won that race, but in our defeat we had one consolation which was that it was purely a race of dog against dog. Our competing handler was as fair as could be, and when his beast won the congratulations were sincere. If field trials had more races between owners there would be more fun.—ED.]

Mr. R. T. Vandevort left for South America on Tuesday last, to be gone for five or six months. He was in good health and spirits, but regretted the engagement which compels his absence from the field trials. He goes to examine some mines owned by a brother. We wish him success and a quick return.

The officers of the Field Trials Club should at once select and announce the judges. But six weeks intervene to the trials, and some of the gentlemen at first selected may be unable to serve, necessitating application to others.

Judge C. N. Post and Mr. George W. Watson owners of the California Kennel at Sacramento visited San Francisco last week and spent part of a day at Mr. De Mott's Kennels near San Rafael, where they have several of their stud of splendid English setters. They were accompanied by Mr. R. E. Auerbach of Oakland and Doctor F. A. Durant Medical Superintendent of San Quentin penitentiary. The dogs were found to be in good condition and a grander lot it would be hard to find. None but "boarders" are in hand at present, those for "breaking" being in Kern County with Mr. De Mott.

The coming field trials afford matter for unending speculation since the publication of the Derby entries last week. A finer lot of English setters never appeared than those entered, and the pointers are not far behind, if any. The Bassford string includes several Point—Blossoms, which are reported to be hustling about like winners. Mr. George Crocker's red setters are reputed exceedingly fast and tasty. Altogether, it is anybody's race, with chances in favor of somebody else. The inquiries about the trials demonstrate their popularity, and it is gratifying to note that many first-rate sportsmen who have not been present in former years, will attend at Bakersfield on January 20th. It is not improbable that Mr. Crocker will be accompanied by a liberal support from the Pacific Union Club; indeed, Mr. Austin Tubbs, Mr. John M. Adams and Mr. Ramon E. Wilson have already decided to go. The California Kennel Club will send down a number of admirers of Mr. Truman's dogs. The Stockton sportsmen, Mr. Haas, Mr. Sperry, Mr. Dunham, Mr. Lane and others, can always be relied upon to support a good thing, and as Mr. Sperry is to run a fine pointer, he will probably invite a lot of friends to see his debut as a handler. Private parties are forming in other sections for field trial week, so that it is certain that Bakersfield will entertain a large and thoroughly representative company, and that those who do go will have the rarest of sport.

The Eastern Field Trials Club's Eleventh Annual Meeting.

The Eastern Field Trials Club's Ninth Derby was started on November 18, on the Club's grounds at High Point, N. C., according to programme.

While the stake was a small one as compared with some previous stakes, it having but fourteen starters, the quality of the dogs as a whole was much higher than the average, and there were some particularly fine performers. Rowdy Rod, the winner, is a son of Roderigo, this being the third successive year that Roderigo's get have won the Derby, the two other ones being Joey B and Orlando. He is a very superior puppy in ranging and performance on birds.

Rip Rap, the pointer which won second, is the best one that has run in many a year, and it is doubtful whether his equal exists in this country, in all the requirements that go to make a field dog. He is a wide ranger, maintains a fast, uniform rate of speed, uses his nose skillfully, has very superior style, and takes cover as pluckily as a setter. He is fonder of hunting bevies than single birds, which is not a common characteristic of pointers.

Nannie B will be remembered as the winner of second in the Indiana Kennel Club's Setter Derby this year. She did some very hard running, and showed herself to be a puppy of a great deal of merit.

The judging was excellently well done thoroughout. The judges gave the dogs a very evenly balanced test, both as to pointing and finding. Nearly all judges in the past have fallen into the error of ceaseless hunting on scattered birds, whether they were found by dogs or by the spectators. Frequently bevies are flushed by the spectators and then, in the past, there was a rush, a scramble, hustling of dogs, and the fate of a dog seemed to hang on whether he got the first point or not. The fact was overlooked that the dog's abilities to point single birds could be quite accurately determined after seeing him point two or three single birds. Generally in a short heat, the number of points one dog gets over another on scattered birds is largely a matter of luck; but whether one dog excels another in his ability to point can be determined irrespective of the comparative number of points. Also in ordinary shooting there are no spectators to flush birds; and taking two dogs on a marked bevy is absolutely no test of finding qualities required in field work. It is a very simple matter to determine a dog's capabilities on scattered birds, but it is not so easy to test his finding qualities, a part that heretofore has been greatly ignored. All these important particulars were considered in judging the Derby, hence there was a more comprehensive and accurate trial and more precision in the decisions. The old-time scrambling for which could get the quickest to some bird which was marked down, was not practiced. Until a dog's abilities to find birds, his range and "bird sense" are considered by clubs, there will be no general accuracy in field trial judging.

The judges were Messrs. F. R. Hitchcock, H. B. Duryea and W. Tallman. Mr. J. R. Henricks, who was to judge throughout the stakes, was unable to act, owing to illness.

The grounds of the Club are unsatisfactory in many particulars. There is too great a proportion of cover and a great deal of it is too thick and heavy. The grounds are also very hilly and ridgy, thus making it very difficult to watch the work of the dogs and to test their finding qualities. It is very difficult on such grounds to avoid making a trial simply a test on scattered birds. Realizing this fact, the Club appointed Messrs. Breese, Duryea and Coster a committee on grounds, and probably by another year High Point will be abandoned as a field trial center. There are also a great many features of a local nature which are very disagreeable. Every landholder, for miles about, has come to look upon the visiting sportsmen as legal prey, and it is quite impossible to hunt on any lands without generous prepayment in the coin of the realm; in its absence, the order to move on is not after the mildest manner. The town itself has an air that seems to indicate proprietorship. The genial good will and welcome of years past seems to have given way to hunger for the almighty dollar.

The annual meeting of the Eastern Field Trials Club was held on the evening of November 23. It was carried that the next annual trials be held on the third Monday of November.

It was carried that a committee be appointed to select suitable grounds other than those used at High Point. Messrs. Breese, Cochran, Coster, Duryea and Lorillard were appointed. It was carried that it was the sense of the meeting that the spotting system be adopted by the Club, and that a committee of three be appointed to revise the rules in conformity with said system, and report the same to the Club. Messrs. J. Otto Donner, F. R. Hitchcock and H. B. Duryea were appointed on said committee.

It was decided that the pointer stake be abolished.

The judges placed Nannie B third and Harry C fourth.

SUMMARY.

HIGH POINT, N. C., November 18th.—Eeastern Field Trial Club's Ninth Derby.—For all setter or pointer puppies whelped on or after January 1st, 1888. Four purses: First $4 0; second $200; third $100; fourth $100. Breeders' cup, value $100, to breeder of winner of the Derby. Forfeit $10; $15 additional to fill.

I.

E. L. Mayer's liver and white pointer dog, Beppo IV., by Beppo III—Lass of Bow,	No merit	O. W. Donner's liver and white pointer bitch, Flirt, by Mainspring—Merrylegs.

THE ALL-AGE SETTER STAKE.

There were nineteen starters in this stake. The quality of the running was mixed, some of it very good, some poor. The judges were Messrs. F. R. Hitchcock, P. Lorillard and W. Tallman.

The winners are well known. There was a great deal of interest in the stake, and some small sums of money changed hands on the result. The judging did not give as good satisfaction as that in the Derby.

SUMMARY.

High Point, N. C., November 19th.—All-Age Setter Stake—Open to all setters that have ntver won a first prize in an all age open stake at any recognized field trial in America. First, $300; second, $150; third, $50; fourth, $50. Forfeit, $10; $20 additional to fill.

I.

Memphis and Avent Kennel's black, white and tan bitch, Betty S., by Roderigo—Bo-Peep,	beat	Charles T. Thompson's red Irish dog, Desmond II, by Frisco—Grouse II.
A. M. Tucker's black, white and tan dog, Dictate, by Gus Bondhu—Lady Dixie,	beat	Herbert Merriam's orange and white dog, Whitie, by Gus Bondhu—Royal Myrtle.
I. N Cochran's black, white and tan bitch, Nora, by Count Noble—Lit,	beat	Memphis and Avent Kennel's black, white and tan dog Rowdy Rod, by Roderigo—Juno A.
J. E. Dager's black, white and tan dog, Toledo Blade, by Roderigo—Lillian,	beat	E. F. Thomas' black, white and tan dog, King Leo, by Count Noble—Ruby.
J. I. Case, Jr.'s blue belton dog, King's Mark, by King Noble—Belle Belton,	beat	J. Simpkin's black and white bitch, Polly II, by Josh Whitcomb—Polly.

THE ALL-AGED POINTER STAKE.

The All-Age Pointer Stake was started on Friday, on which day two heats were run. The rest of the first series, excepting one brace, was finished on Saturday. The work is about the average, possibly a shade or two better. The attendance has fallen off, and only the judges, reporters and interested parties are in attendance. The Pointer Stake has sixteen starters:

SUMMARY.

HIGA POINT, N. C., November 22nd, 1889.—All-Age Pointer Stake.—Open to all pointers that have never won a first prize in an all age open stake at any recognized field trial in America. First prize $300; second $150; third $50; and fourth $50. Forfeit $10, and $20 additional to fill.

I.

Edward Dexter's black and white ticked dog, Rip Rap, by King of Kent—Hops,	beat	Westminster Kennel's liver and white dog, Lad of Bow, by Graphic—Climax.

V.

Count Fauster beat Consolation.

VI.

Lebanon beat Count Fauster and won second.

1st—Rip Rap.
2nd—Lebanon
3rd—Count Fauster.
4th—Woolton Game.

Pacific Kennel Club.

A called meeting of the club was held at the office of the president, Ramon E. Wilson, 419 California St., on Tuesday evening last. Present—Messrs. Wilson, Schreiber, Haight, Carroll, Kittle, Watson and Briggs.

Mr. James E. Watson tendered his resignation as secretary and Treasurer Mr. Clarence A. Haight was elected secretary and Mr. Will S. Kittle, treasurer. The club then adjourned for one month.

Coursing at Grass Valley.

EDITOR BREEDER AND SPORTSMAN:—Having formed a coursing club here for the promotion of true open air sport, and not having any laws at hand, I took the liberty to write you this letter, thinking you could give us some information in regard to the laws governing hare and greyhounds, or refer us to some one that has them. Any information will be thankfully received. I was talking with Mr. Fletcher, and he referred me to you. I am the person who wrestled with Mrs. Rodda Cornish style at the Olympic Club.

R. R. DUNSTAN.

[It is an especial pleasure to learn that the sportsmen of Grass Valley are going in for coursing. They are game at any proposition, and will undoubtedly establish supremacy in their latest love as they have at rifle, trap and field shooting. The rules are gladly sent, and we shall be very pleased to receive notes of the progress of the club—ED]

Mr. Ward McAllister, Jr., has recovered the cocker spaniel, loss of which was mentioned last week.

Any who desire to engage accommodations, lodgings, wagons or saddle horses in advance may do so by addressing the Secretary of the Pacific Coast Field Trial Club, at 313 Bush street, San Francisco. A reduced rate of fare will undoubtedly be granted by the Southern Pacific Railway Company, which always fosters such interests, and those who desire reduced rate certificates should write the Secretary.

Mr. George T. Allender goes to Bakersfield about Dec. 10th with his field trial string. He has some fine ones this year, including Mr. A. B. Truman's pointer bitch, Champion Patti Croxteth T. and the California Kennels English setter, Salina. Mr. Allender is proverbially close-mouthed but we learn from a friend that his dogs are even better this year than heretofore.

The meet of the Valley Hunt Club at Alhambra on Thanksgiving was one of the events of the season. The day was fine and every condition favorable to a most enjoyable day of sport, says entertaining Los Angeles Life. Some one hundred and fifty to two hundred ladies and gentlemen were mounted, and it was seen at the early hour of half past six o'clock that the day would be a success. Dr. Ward D. Rowland was master of the hounds, and he handled his horsemen well. At 11 o'clock the party rounded up at Alhambra, and the beautiful little town has not seen so much life for a long time. The fox chase was short but exciting. Col Otis of the Times was in at the death. Over five hundred people turned out to witness the days' doing. After the hunt the party went back to the Hotel Alhambra to partake of turkey, and many stayed long into the evening and made the pretty little hotel resound with song and conversation. The day was pronounced a complete success by all, and will be long remembered as one of the gala days of the San Gabriel Valley. Mr. F. J. Crank, proprietor of the Hotel Alhambra, did his share in contributing to the comfort and enjoyment of his guests, and received their hearty thanks.

Occidental Coursing Club Fall Meeting.

The Fall meeting of the club was run off at Ocean View on Thanksgiving Day, November 28th last, the event being an all-aged stake for sixteen greyhounds at $10 each. Prizes, winner $70 and crayon portrait, value $30; Runner-up, $40 and silver cup; winners of two courses, $20 each.

The officers of the day were: Field Stewards—S. L. Abbot, Jr., H. E. Deane and J. F. Carroll; Slip Steward—S. O. Gregory; Flag Steward—H. Boyd; Judge—J. R. Dickson; Slipper—James Wren.

The day was illy suited for the sport, being muggy and threatening to rain, but some three or four hundred people gathered at Canavan's snug hostelry at 11 o'clock, the appointed hour, and spent a half hour in social greetings.

When the dogs were ordered to slips it appeared that five of the entries were absent, all of them in the hands of a gentleman known to be as keen and enthusiastic as any man could be.

The only conclusion to be drawn was that some unavoidable accident had hindered his meeting his train, and after consultation among the owners of the other entries it was decided to run off the braces which were present and continue the card when the absent dogs should arrive. Such a proceeding was unusual, and quite in contravention of the rules, but the alternative was a grave one, either to run the card and bar the absentees, thereby failing to keep faith with the large company of spectators, or to wait for the dogs and give them a chance. The action taken cannot stand as a precedent, but was a wise one. The absent dogs arrived at about 2 o'clock and the card was regularly run off.

The dogs were very good, and the hares fairly strong, but the place reserved for spectators was badly chosen. A deep gully traversed the ground, as well as a swale, and while the running was done in either the work could not be seen. The proper place for spectators is at the foot of the slope. A high close fence should be erected along the county road and a grand stand erected about midway of the length of the park. Then all of the coursing could be seen and the tedious hill climbing avoided.

The slipping was well done, and courses followed in quick succession. No unpleasantness marred the day, and the large number of ladies present enjoyed every detail of the sport heartily.

The winner, Midnight, is a medium weight handsome dog, a sharp one from slips, and very clever, working closely.

Benelon II, the runner up, is as good as the winner, except that he goes a little wider. There was scant choice between them.

The two course dogs, Dark Rustic and Irish Boy, are rushers, and lost on every wrench. Both are uncommonly powerful and are speedy, but not so clever as the dogs placed over them. An account of the coursing by braces is out of the question, for the reason that the work could not be seen to advantage, and we must be content to present a summary. President Gregory and the officers of the day were successful in keeping everybody in good humor, and in presenting a successful day of sport.

SUMMARY.

J. F. Carroll's blk w d Dark Rustic,	beat	J. E. Watson's w b Mollie Bawn.
M. Keating's blk w d Mischief Boy,	beat	T. Cooney's blk b Black Bess.
M. Keating's w be d Benelon II,	beat	T. J. Cronin's br w d Jack Dempsey.
T. J. Cronin's blk w d Dan B,	beat	J. F. Connor's w be b Harriet S.

II.

Benelon II beat Dark Rustic.
Midnight beat Irish Boy.

III.

Midnight beat Benelon II and won.

Winner—Midnight
Runner-up—Benelon II.

Winners of two courses { Dark Rustic. Irish Boy.

Sales.

J. B. Martin, 1323 Page street, San Francisco has sold:

—— Foxterrier dog pup, whelped July 24, 1889, white with black and tan head, by Clover Turk—Beatrice, to Robert E. Culbreth, San Francisco, Cal.

—— Foxterrier dog pup, same litter, white with black and tan head, to J. E. Haxe, San Francisco, Cal.

Tobey, English pup dog, fawn with black markings, to Mrs. Sterrett, San Francisco Cal.

Golden Patch, Foxterrier bitch, whelped June 23, 1888, white with black and tan head, by Sly Mixture—Beatrice, to C. H. Kobicke, San Francisco, Cal.

C. H. Kobicke, San Francisco, Cal., has sold Bessie, Mastiff bitch pup, fawn with black markings, to J. B. Martin, San Francisco, Cal.

J. P. Gilman, San Francisco, Cal., has sold Flora, Pointer bitch, white and liver patches and ticked, whelped October 5, 1888, by Jim—Donna, to J. B. Martin, San Francisco, Cal.

Mr. A. B. Truman, Elcho Kennels, San Francisco, has sold to Mr. A. G. Briggs, Sierra City, Calif. an Irish Red Setter bitch, whelped, July 31st. by Champion Mike T.—Champion Lady Elcho T.

Also to Mr. Howard Black, San Francisco, a litter sister to preceding.

Mr. J. M. Bssford Jr. has sold to Mr. Emmet Jourdain, San Francisco, the pointer dog Lemmy B, whelped Nov. 1883, by Prince Ranger (Ranger Boy—Jessie)—Josie Bow (King Bow—Josie).

Also, to Mr. N. Batto, San Francisco, the pointer dog Don, whelped April 21st 1886, by Vaudevorts Don—Beautiful Queen.

C. A. Loud of San Diego, late of Corvallis, Oregon, has sold the following named puppies out of Rural Nellie by Romeo, whelped October 2nd, 1889 —

Sir Roderic, brown, white and tan dog, to Ned Smith, Corvallis, Oregon.

Sir Lancelot, black, white and tan dog, to F. J. De Nevin, Corvallis, Oregon.

Bonnie Llewellin, lemon and white bitch, to John Vineyard, Corvallis, Oregon.

Lady Romania, lemon and white bitch, to P. E. Ernst, Oakland, Cal.

Countess Lynette, lemon and white bitch, to Dr. John F. Foulkes, San Francisco, Cal.

Lady Godiva, lemon and white bitch, to James Dunn, Corvallis, Oregon.

Lady Elaine, black, white and tan bitch, will be kept by the owner for brood purposes.

Mr. C. A. Loud has made a valuable addition to his kennel in the purchase from C. A. Chemning of a brown, white and tan bitch, Lilly, by Cable (Champion Dick Laverack—Champion Liddesdale) out of Winnipeg Belle (Rocketer—Manitoba Belle). Lilly was whelped March 2nd, 1887, finely broken and a beautiful field performer. Mr. Loud will breed her to the best blue blood to be found on the coast. The price paid for Lilly was $150.

We are indebted to our brilliant contemporary The American Field, for the abstract of an account of the Eastern Field Trials Club Trials.

The election of Mr. C. A. Haight to the secretaryship, and Mr. W. S. Kittle to the treasurership, of the Pacific Kennel Club, we hope marks an era in the life of the club. The new officers are thoroughly en rapport with the "doggy" men of the state and are of the highest standing and connections.

Wherever known, they are most favorably regarded, both personally and as business men. They have no personal piques to gratify, and may be relied upon to labor for the advancement of the interests of the club, without being hampered by little prejudices or by narrow views. They will at once begin an active campaign in behalf of the club, and we hope will meet such spirited support that a very few weeks will suffice to remove all embarrassments and entirely rehabilitate the excellent institution. One suggestion is offered, viz: that the members of the California Kennel Club join the Pacific Kennel Club. There is no reason for two clubs. The Pacific Kennel Club has the ground covered, and as the California Kennel Club does not give shows at present, its members really have no reason for maintaining it. A large number of gentlemen who fancy dogs do not belong to the Pacific Kennel Club, and such should at once apply for membership.

An Eastern Horse Market.

We come to an open space crowded with people and horses, which our host informs us is the public horse market of Damascus. Here we see various men riding up and down on horses which have been committed to their charge to sell, shouting the last bid which has been offered to them. They seem to fetch very low prices. Several good horses we see sold for less than £10 each. One specially fine-looking animal is "knocked down" for £15. But the business is not finished. A long dispute immediately ensues between the intending purchaser and the owner, the former attempting to obtain the horse for a few piastres less than the stimulated amount. There is an innate love of bargaining in a true Oriental. He never can do without it. In this case the owner seems to feel pretty sure of obtaining a good price for his horse, even if the present man should back out. So he remains silent, with an occasional inconsequent remark, such as:

"It matters not!" "Wallah, who am I to argue with thee?" "Wallah, my horse is as dust! Take it without money!" All of which expressions are equivalent to cold negatives, and naturally exasperate the other man, who is wasting oceans of rhetoric in the attempt to induce him to come round to his own way of thinking. Finally the latter exclaims with a heart-warming show of generosity and philanthropy, "Wallah, are we not brothers? Wherefore all this noise? Is it for money? May Allah forbid. You want 1600 piastres? Here is the money. Take it," and here he presses the bag of treasure into the other one's hands and makes as if he were going to turn away. "Never mind about your horse; I care not for it. Shall we part enemies because of money?" But here the other, who now has his money secure, runs after him, falls on his neck, and, kissing him on both cheeks, assures him that his horse to him is worthless; that since his brother wishes for it he must have it—as a present. And then they repair, in company with the "dallal," or the man who has done the auctioneering part of selling the horse, to the Government office close by, where the affair is registered and legally settled. Oriental business ways appear passing strange to our minds.—Murray's Magazine.

A New Method of Treating Disease.

Hospital Remedies.

What are they? There is a new departure in the treatment of disease. It consists in the collection of the specifics used by noted specialists of Europe and America, and bringing them within the reach of all. For instance, the treatment pursued by special physicians who treat indigestion, stomach and liver troubles only, was obtained and prepared. The treatment of other physicians, celebrated for curing catarrh was procurred, and so on till these incomparable cures now include disease of the lungs, kidneys, female weakness, rheumatism and nervous debility.

This new remedy of "one remedy for one disease" must appeal to the common sense of all sufferers, many of whom have experienced the ill effects, and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which, as statistics prove, HAS RUINED MORE STOMACHS THAN ALCOHOL. A circular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole proprietors.

Gould & Miller, of Fullerton, Neb., say that the Boyce Leg and Body Wash is the best thing they have ever used for that purpose.

THE GUN.

A Lady Shooter's Misfortunes.

Oh! a lady she went shooting, O!
The men, they all said "here's a show!
How funny 'tis to see such sights
As ladies with guns, big boots and tights!"

So Frank and Ned took off their hats,
Congratulated young Miss Flats
Upon her courage, looks, and gun,
And promised her no end of fun.

They hoped the day begun so fine
Continue would, till time to dine,
And other little talk, called small,
Took place before they left the hall.

The keeper comes, they make a start,
And luncheon follows in the cart.
They beat the stubbles, roots and seed;
Miss Flats is taken bad, nor heeds.

But onward goes, a field or two,
Then, feeling faint, looks rather blue.
Says: "Gentlemen, to tell you true,
I'm very tired, and must leave you."

Said Frank to Ned, "Something sudden, I think."
"No doubt," says Ned with a knowing wink,
And to himself exclaims:—
"Can't understand these shooting dames!"

Another day, the three go out,
Wishing better sport and luck;
And hoping that another bout,
Wouldn't occur to the litle duck.

And last, up jumped a splendid hare,
Miss ought to have knocked over;
But the keeper he was heard to swear:
"Bedad! she's shot old Rover."

Then, blank despair, their spirits seize,
As Rover howls with pain;
And Miss says "Oh! my q's and p's!
I'll never shoot again.

But tempted, yet again she goes
To try her hand once more,
Down where the reedy river flows,
When she sees some wildfowl, four.

Miss fired at one, and winged, it fell,
Across a brooklet small,
And though she knew the place quite well,
She had an awkward fall.

To Frank and Ned she cried aloud:
"Do you look after Rover!"
To that they said: "We shall be proud,"
(She'd lost her dress improver).

In jumping o'er the brook it fell,
And quick flew down the stream.
"Oh, dear!" she sighed, "I do repent!"
Then uttered forth a scream,

As right-and-left both men they fired,
At what they thought an otter;
But they missed their mark, they were so tired,
And homeward they did potter.

Arrived at home, they took sloe gin,
And then they missed old Rover;
When, suddenly, he bounces in
With Miss Flat's dress improver!

Then Frank and Ned they both declared,
Ungallant it might be;
But never more if they were spared
Again such sights they'd see.

Ned says to Frank: "Before we dine
We'll quote a Latin line:
Ingenuas didicisse fideliter artes emollit
Mores nec sinit esse feros."

Which construed means: Ladies, attend to domestic duties, give up shooting, and don't be cross.

VENATOR (Nascitur non fit).

[Never before have Benedicts been envied without reserve, but since only to them can the poem unfold its fullness of meaning, we are tempted to plunge. We can picture the sparkle of the eye and the suspicion of malice, in the mobile face as Editor Clement of the London Shooting Times "passed" the "poem", but we fear for his future, when the fair contingent shall impinge upon him.—ED.]

Jurors in Game Law Cases.

The BREEDER AND SPORTSMAN has endeavored to impress upon the advocates and supporters of the game law the importance, not to say the necessity of exercising vigilance in the detection and prosecution of offenders of the law in this State. Fresh and strong reason for repeating and urging this course has been recently made conspicuously manifest by the action of the Court in the Napa case against the Sawyer Tanning Company, charged with the possession of skins of does and fawns, in clear violation of the law, and in the Sacramento case of similar character, in which the jury failed to agree.

The case against the Napa Tanning Company was tried by the justice, without a jury. The possession of the unlawful skins was clearly proved, but on a technicality which harbored a doubt, the judge gave the defendant the benefit of this shadowy doubt and ordered a discharge. In the Sacramento case against John Blair, of the firm of W. R. Knight & Co., Justice Devine presided, and a jury of twelve men was empanelled. The facts as charged in the complaint were proved beyond reasonable doubt. The charge of the Court to the jury was plain and direct, as to the law and the evidence. It was to the effect that no other than a verdict of guilty could be properly returned. Notwithstanding this, the jury disagreed and the case must again be tried. It has been ascertained that the jury stood two for conviction, ten for acquittal. Yet all the jurors went into the box under solemn oath to return a verdict in accordance with the facts, the law and the evidence.

An intimation of the real sentiments of the ten recreant jurors was revealed in the endeavor to select the jury. S. Paska, summoned as a juror, on examination avowed that he had a prejudice against the game law, as he was in Sonoma County once when a man was arrested for having in his possession the skin of a doe. Whether the man was himself or another was not elicited. Paska flatly declared that he would not vote to convict a man under the law, even if the evidence was clear against him.

James Miller, another summoned to serve as a juror, had been a member of the State Legislature. He declared that he was opposed to all such laws as the game law; therefore he would not vote to convict under any circumstances. These two were, very naturally, excused from serving on the jury. It would be interesting to learn whether some of the jurors who were empanelled had acted with similar candor as to their prejudices and sentiments whether they entertained similar prejudices and sentiments as avowed by Paska and Miller, and suppressed the admission to such effect, in order to get upon the jury in the interest of the defendant, so as to prevent conviction, if they could not secure acquittal.

The defendant failing in the effort to disprove the charge set up the plea of ignorance of the law. The Court instructed the jury that ignorance of the law was no excuse as all citizens are presumed to know the law. Against this instruction the counsel for the offence strenuously protested. The Court thereupon more emphatically reiterated the instruction. The charge against the defendant had been clearly proven—it simply remained for the jury to return the verdict of conviction. To this, as has been stated, ten of the jurors proved recreant, and after an hour or more of disagreement the jury was discharged. The District Attorney has declared his determination to press the case to a definite conclusion, for which he merits the commendation of good and law-abiding citizens.

The opportunity ought not to be neglected by the sportsman's clubs of the State in the Sacramento case, and in every other case of violation of the game law which shall occur, to use due vigilance in vindication of the laws for the just punishment of offenders and the protection of game. Care is essential, as has been evidenced in the Sacramento case, in the selection of juries. A single juror, with a prejudice like that of Poska, or with sentiments akin to Miller's, will defeat the conviction of the most guilty offender. No person of the kind should be allowed to sit as a juror in any game law case. Committed to the care of a just judge and an honest jury, the game law can be duly enforced, and its violations will be stopped, in flagrant instances at all events. This is what is needed, and it can be easily provided for by the clubs and citizens generally. It is to the interest of all to see that the law shall be obeyed, in protection of the game, in order that it may be fairly enjoyed by the generations which exist and shall be preserved to the enjoyment of the generations to succeed. Neglect of this duty is virtually to permit the destruction of the game. There is no mistaking the issue or the consequence.

Trap at Lathrop.

Thanksgiving Day at Lathrop was notable because of a trap meeting conducted by Messrs. Scarlett and Howland, resident experts. As might have been expected, the attendance was mainly from adjacent towns, to which the shooters could return for home festivities appropriate to the day. Henry T. Hopper came from Tulare. Messrs. Scarlett, Sutherland and Meyer were of the Lathrop Club; the others all came from Stockton.

The first match was at 15 single live birds, Hurlingham style. The entrance fee was $7.50 and the purse made up of nine entries amounted to $67 50. Dr. S. N. Cross and C B. Smith won the first and second moneys and divided $47.25; C. J. Haas won the third prize of $13.50; the fourth money was divided between four men who each scored 13. Following is the score:

C. J. Haas	1	2	1	1	1	0	1	1	1	1	1	1	1	1	1—14
H. T. Hopper	1	0	2	0	1	1	2	1	1	0	w				— 7
S. N. Cross	1	1	2	1	1	2	2	1	1	1	1	1	2	1	1—15
A. B. Sperry	1	0	1	0	0	1	0	2	2	1	1	2	1	2	1—11
C. B. Smith	1	1	1	1	1	1	1	1	2	1	1	2	2	1	1—15
W. C. Scarlett	1	0	2	1	1	1	1	0	1	1	2	1	2	1	2—13
F. Leffler	0	1	2	1	2	1	1	2	1	0	2	1	1	2	2—13
A. E Meyer	1	1	1	1	1	1	1	0	2	1	1	1	0	1	1—12
T. Sutherland	1	0	2	0	2	1	2	2	2	1	1	1	2	1	2—13

The second match was at 10 single birds, 21 yards' rise, use of one barrel only. The entrance fee of $5, with nine entries, made a purse of $45, which was divided between Haas, Hopper, Sutherland and Scarlett. The score:

C. J. Haas	0	1	1	1	1	1	1	1	1	1—9
H. T. Hopper	1	1	1	1	0	1	1	1	1	1—9
S. N. Cross	1	0	1	0	1	0	1	0	w	—4
C. B. Smith	1	1	1	0	0	1	1	1	1	1—8
A. B. Sperry	1	0	1	1	1	0	1	1	1	1—8
F. Leffler	1	0	1	1	0	w				—3
A. E. Meyer	1	1	1	0	1	1	1	1	0	1—8
T. L. Sutherland	1	1	1	1	0	1	1	1	1	1—9
W. C. Scarlett	0	1	1	1	1	1	1	1	1	1—9

The third match was at six single birds, 30 yards rise, Hurlingham style. The entrance fee was $2.50 and the purse amounted to $30. Cross and Scarlett won the first and second moneys of 50 and 30 per cent on a tie and divided $24. The third money, 20 per cent., amounting to $9, went to seven men, but on shooting for it Hopper and Haas tied and divided the coin. The score:

F. Hill	0	0	0	0	0	0—0
C. J. Haas	0	1	1	2	1	1—5
A. B. Sperry	0	1	1	1	2	1—5
B. L. Remington	0	1	1	1	2	1—5
S. N. Cross	1	1	2	1	1	1—6
T. H. Hopper	0	1	1	1	2	1—5
George French	1	1	0	1	1	1—5
R. T. Molton	0	0	0	2	0	1—2
T. L. Sutherland	1	1	2	1	1	0—5
C. B. Smith	2	2	1	1	0	1—5
W. C. Scarlett	1	1	2	1	2	1—6
F. Leffler	0	w				—0

The next was an extra match at six single live birds, 30 yards rise, with moneys of 50, 30 and 20 per cent. There were ten entries at $2.50 each, making a purse of $25, which was divided between Cross, Haas and Hopper. Following is the score:

S. N Cross	1	1	1	1	1	1—6
C. B. Smith	1	1	0	0	1	1—4
C. J. Haas	1	1	1	2	1	2—6
H. T. Hopper	2	2	2	2	2	1—6
J. Hutchinson	1	1	0	1	1	1—5
G. B. French	1	0	0	1	2	1—4
T L. Sutherland	1	2	1	1	0	0—4
A. E. Meyer	0	1	1	2	0	0—3
W. C. Scarlett	1	0	2	1	1	1—5
F. E. Lane	0	2	1	0	0	0—2

Another extra match was then made up at 8 single live birds, 30 yards rise. The entrance fee was $5, and the purse of $20 was won by C. J. Haas, who killed 8 birds with a single barrel. The score:

T. L. Sutherland	1	2	1	2	1	0	w		—5
H. T. Hopper	0	2	2	1	1	w			—4
C. J. Haas	1	1	1	1	1	1	1	1	1—8
F. Hill	2	1	2	1	2	0	w		—5

Then another match was arranged same as last, with three entries. The purse of $150 was won by Hopper. The score:

Haas	2	0	1	1	1	0	0	w	—4
Hopper	0	2	1	2	1	2	2	2	2—6
Sutherland	1	1	2	0	0	2	1	0	—5

The days' sport concluded with 2 practice matches at Peoria blackbirds.

Slaughter of Deer for Skins.

The Dixon Tribune is authority for this: A Solano man, spent the fall months in Del Norte County, is said to have killed 200 deer during his stay. Such indiscriminate slaughter will in a few years exterminate this noblest of game. There are many hunters in that section of the country who slaughter hundreds of deer in a year for their hides only leaving the carcasses to rot.

Champion Henry A. Bassford.

A match for the championship of Central California and the Standard Challenge Medal representing that title, was set for Thanksgiving Day at San Jose. The medal was won at San Jose in October by Mr. H. A. Bassford, who had won it once before. He was challenged for it by Major S. I. Kellogg, and Mr. Bassford won it the third time.

Immediately after the conclusion of the match, Major Kellogg again challenged for the trophy, and Mr. Bassford again won it, making four wins and the medal his personal property, together with the title Champion Shot of Central California.

Mr. Bassford's shooting was superb in both matches and stamps him the peer of any man at Blue Rock Targets. He was in hot company, warmer in the last match than before, Mr. H. Coykendall roiling up 93 breaks against 94, the winning score.

Mr. F. E. Coykendall was off in his work, getting but 85. In the first match Major Kellogg was low man, but in the other went up to 91, high enough to win usually.

Mr. Anderson's score would have won the medal under ordinary circumstances.

The visitors were royally treated by the San Jose sportsmen and had a delightful day's sport.

The medal was presented by the Selby Smelting and Lead Company under the following conditions.

1. This competition is open to any bona-fide resident of the counties north of San Luis Obispo, Kern and San Bernardino.

2. All matches for the above medal shall be shot under the trap shooting rules of the Chamberlin Cartridge Co., (excepting that five traps shall be used instead of three) and shall be at 50 singles and 25 pairs of artificial birds.

3. The cartridges used in these matches, shall be any of the Standard Shot-gun Cartridges, loaded by the Selby Smelting and Lead Company.

4. All cartridges used in these matches, shall be taken to the score in original packages, and with the seals or labels unbroken, which shall be cut by the referee or judge, or in his presence by the contestant.

5. The first match for the above medal shall be shot at Adam's Point, Oakland, on Saturday, September 8, 1888, at 10 A. M., under the auspices of the California State Sportsmen's Association.

6. The entrance fee for each competitor shall be $10. Birds extra.

7. Fifty per cent. of entrance fees in this initial match will be held by the S. S. & L. Co., and awarded to the competitor who shall first win the Standard Medal four times, which shall, however, be done inside of two years from the initial match for the same, failing which, the donors reserve the right to otherwise dispose of the medal and entrance fees received from the first match. Thirty per cent. of entrance fees in this match will constitute the second prize, and twenty per cent. the third prize. There may be other prizes added.

8. The competitor winning the first match and the medal, shall hold the same subject to challenge against all comers of Central California.

9. The expenses of matches (other than the initial one) shall be equally divided between the contestants.

10. All challenges shall be in writing, and be addressed to the S. S. & L. Co.

11. All subsequent matches shall be open to all comers (as per paragraph No. 1 of these conditions), the entrance fee to which shall be $10. The total amount of entrance fees received at each match, (other than the initial match), shall be divided as follows: 40, 30, 20 and 10 per cent. The Standard Medal shall go the winner of the match as first prize. The 40 per cent. shall be given to the holder of the medal, (who won it at the preceding match), upon its presentation to the referee, at each tournament or match. The 30 per cent. shall be awarded as second, the 20 per cent. as third, and the 10 per cent. as fourth prizes.

12. All matches shall take place under the auspices of some regularly organized gun club, located where the match is to occur.

13. Any contestant violating, or attempting to violate, any of the rules or conditions provided for three contests, and especially conditions Nos. 3 and 4, shall forfeit all claim to either the medal or any cash prize, and shall be debarred from future competitions.

14. The holder of the medal may claim the championship of Central California, at artificial birds, for 1888.

15. Full and accurate scores of all the matches shall be sent to S. S. & L. Co., with complete details of the guns used, as to make gauge, weight, etc., also the load No. of cartridges used.

15. No match will be considered binding without the presence of a representative of the S. S. & L. Co., unless otherwise agreed upon. Any points that may hereafter arise, not covered by the above conditions, will be decided by the Selby Smelting and Lead Co.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, . . . Editor.

Advertising Rates

Per Square (half inch)

One time	$1 00
Two times	1 75
Three times	2 40
Four times	3 00
Five times	3 50

And each subsequent insertion 50c. per square.

Should an Advertisement run without change three months or more 50c. per square, counting from the first insertion.

Advertisements running six months are entitled to 10 per cent. discount on rate of 50 cents per square each insertion.

Those running twelve months are entitled to 20 per cent. discount on rate of 50 cents per square each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Nov. 30, 1889.

The Futurity Trotting Stake.

There seems to be no let up in the interest displayed by the breeders throughout California in regard to the $3,000 guaranteed Futurity Stake, instituted by the BREEDER AND SPORTSMAN for trotting foals of 1890. From all sections of the State inquiries are constantly pouring in, and already a large number of nominations have been made. Breeders are beginning to realize that it is not necessary to have a mammoth stock farm before first-class animals can be raised, but that the owner of a single good mare has an opportunity to compete, and often successfully, with the trotters that are turned out in scores from the more extensive farms. As a case in point, Mr. Salisbury had a single nomination in the "Spirit" Futurity Stake, which was trotted for this year, and although the race was trotted at Cleveland, he was plucky enough to take Margaret S back East and beat the crack three year olds which were pitted against her. By so doing he not only won a large sum of money, but added fame to the Pleasanton Stock Farm and its representative stallion. It is possible that the same thing may occur in the BREEDER AND SPORTSMAN Futurity Stake. Some one with only a single entry may carry off the rich prize and enhance the value of the colt many times. The stake is the most liberal that has ever been offered to the breeders of California, and from present prospects will amount to much more than the sum guaranteed.

Nominations close on or before January 1, 1890, and are for mares covered in 1889. Subscriptions are payable as follows: $10 on January 1, 1890, when nominations close; $10 August 1, 1890, $10 January 1, 1891, $10 January 1, 1892, $10 January 1, 1893, and $50 for starters, payable July 1, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 to third horse.

Nominators whose mares prove not to be in foal will be refunded the amounts paid upon furnishing a written statement to that effect before August 1 1890.

In nominating, give name of mare and stallion to whom she is bred, and within 60 days after foaling forward description of foal.

A prominent feature which all breeders should bear in mind is the fact that where colts and fillies are sold the value is always greater when they are entered in stakes like the above, and a better market can always be had for them. The time for nominations to close is near at hand, and those who have not as yet received entry blanks should send to the BREEDER AND SPORTSMAN for them at once.

The Occident Stake.

The Occident Stake has always produced a great deal of rivalry among the breeders of California, in fact is almost a blue ribbon event, the entries being large, and the horses of the very best. The advertisement for the 1892 stake appears in another column, and should command the attention of every breeder in the State. The walk over for the Occident Stake this year will long be remembered by those who had the pleasure of witnessing Sunol, in the grand effort, she not only winning in 2:16½ but at the same time cut down the time of Occident 2:16¾, after whom the stake was named. Conditions and rules for entry will be found in the notice.

Bonner's Praise of California.

The cordial welcome of the BREEDER AND SPORTSMAN to Robert Bonner was in no sense misplaced. The hearty greetings he has received have been abundantly reciprocated in his utterances—as to the surpassing conditions of soil and climate of California; as to the superexcellence of the State in the production of horses—of trotters and runness especially. Mr. Bonner is not an enthusiast in the ordinary sense of the term. He is by no means a sentimentalist, to be moved from his convictions by means or methods other than those which develop demonstration in themselves and lead to confirmation. To convince him, the thing must be proven; he will take nothing on account. Clear and cool of head, with keen scrutiny and finely balanced judgment, as a rock in his firmness, possessed of uncommon qualities of observation and decision, Robert Bonner is of the class of his native race, best known as a "canny Scotchman," with a head for business and the discrimination to know a good thing when he sees it; with the attribute never to let go a good thing when he has it in hand. A word of praise from him—of our State and our horses—is worth more than printed volumes from the average author. The people know that he does not flatter, that he does not exaggerate, that he does not express an opinion until he is convinced, and that he is in earnest in that which he utters.

During his sojourn in California, Mr. Bonner visited the great breeding farm of Palo Alto, the fine similar farms at San Mateo, Pleasanton and Los Angeles. At each of these he saw the famous sires and noted dams, the colts and fillies that have celebrated themselves as record breakers, and all that is to be seen at each place. He expressed himself as surprised and delighted in everything—as to climate and soil and the wonderful development of the country; as to the many tokens of prosperity and improvement and abundance; and he declares that California excels the world in all that tends to the breeding of horses. The soil is better adapted to the feet of horses, the grass is superior to that of Kentucky, and the climate most favorable, to produce the very highest types of trotters and racers. These encomiums will speed throughout the country abroad. They will attract greater attention to California and create better appreciation of California horses, high as they already rank.

With horsemen and breeders, the opinion of Mr. Bonner will be as the substantial endorsement of everything that has been said in praise of the State and of California horses by others He has seen them upon their native soil, just as they are, and he has seen the California stables of trotters and runners which are sent East every year, the product of our breeding farms taken there for annual sales. He is qualified to form sound opinion on the subject—a subject to which he has devoted so many years of careful study, in which he has laid out immense sums of money. His judgment of California and of California horses will greatly redound to the State.

Mr. Bonner exhibited uncommon delight, to the measure of joyousness and enthusiasm, in looking upon his most prized of all his possessions—the superb filly Sunol. He declares her the paragon of her genus, the perfection of the trotter. His purchase of Ansel is another proof of his high appreciation of the Palo Alto trotters and of California bred horses. He believes that Sunol will go the mile below 2:10 this year, if the weather is favorable, and thinks that she will next year make it in 2:05. His visit to California has been a good thing for the State, for the better understanding throughout the land of the superior excellence of California bred horses, and of great benefit to himself, in the valuable information he has acquired. He has returned to the East; he received warm greeting; he enjoyed unbounded hospitality; he returns to his home with clearer knowledge of California; with the highest opinion of our trotters; and he has left pleasing remembrances of his visit to all he met while here.

Rancho Del Paso.

The small principality owned by J. B. Haggin, Esq., in Sacramento County, this State, is without doubt the largest breeding establishment in the world, and for two years the buyers of the East have each season vied with one another to secure possession of the choice yearlings sent from Rancho Del Paso. Having seen the two lots sent to New York in the past, it is only natural that a desire was created to inspect the division which will be sent to the auction block in July, 1890. So, in company with Dr. Montsarrat, of Lexington, Ky, a visit was paid this week to the ranch, where the finest lot of weanlings ever seen in one collection was examined. The time at command was too short to allow of a critical examination of each individual, but it can be safely said that the consignments of the last two years are far surpassed by the hundred or more youngsters which will be sent on this year. The weather was of the worst, but Superintendent Mackey turned out with his accustomed good nature and we were enabled to take a peep at nearly all of the stock. Since our return we have been asked many times, "What did you fancy most among the youngsters?" The question is a hard one to answer, for there are so many good ones that a person is liable to become confused amid such a grand array, but there are three so nearly perfection that they are worthy of special mention. Singular to say, they are all by the same sire, Sir Modred, and for good looks cannot be beat. The first is out of Rosie B, the dam of C. H. Todd and Sorrento, the second is a colt out of Carissima, the dam of Cruiser, and the third is out of Plaything, the dam of Tournament and Jou Jou. For individual choice these must be given the preference, but, as stated before, it was hard to make a critical selection owing to the hurried manner in which the colts had to be seen. The climatic influences are such that it is unnecessary to pay the same attention to foals that the Eastern breeders have to do, and they are allowed to run at will, eating the rich and succulent grasses with which Rancho Del Paso abounds. Alfalfa plays an important part in the growth of the little ones, and Mr. Mackey is a firm believer in the theory that it beats all other kinds of green food in developing bone and muscle. Dr. Montsarrat had to acknowledge that he had never seen such forward foals in the Blue Glass Region.

The large attendance that is sure to be present when the annual sale takes place, will be more than surprised, when they see the yearlings of 1890. The stallions are all looking in fine fettle, the two Australians, Sir Modred and Darebin especially so. The other thoroughbred stallions are Hidalgo, Joe Daniels, Midlothian, Ben Ali, Warwick, John Happy, Tyrant, Kyrle Daly and Hyder Ali. The brood mares are a superb lot and cannot be equalled on any other stock farm in the country. Maud Hampton and Explosion are relegated to a paddock by themselves, while the others are in bands of eight or ten in each enclosure.

The trotting division is an equally choice lot and all of them look in the very pink of condition. The choice colt of the band is the one by Antevolo, dam Marbel, full sister to Beautiful Bells. It was well said of this colt that he was no more to be compared to any ordinary horse, than that a Umatilla Reservation squaw, should be compared to Mrs. Langtry. He is a model and should bring both dollars and fame to Mr. Haggin. This colt will be reserved for stock purposes and will not be one of the consignment sent East. There are many of the youngsters that should bring large prices, however, and the day is not far distant when Rancho Del Paso will be as well known for its trotters as it now is for the thoroughbreds raised there.

Coney Island Jockey Club.

STAKES TO CLOSE JANUARY 2ND.

The stakes opened by the Coney Island Jockey Club, to close January 2nd, include all the popular features of the June and September meetings at Sheepshead Bay. The list is headed with the Suburban, which is again a guaranteed stake of $10,000, and ends with the great Eastern Handicap for two year olds to be run in September, to which the Club adds, as in years past, $5,000. The stakes to be run in June, which close January 2nd, are briefly as follows:—

FOR TWO YEAR OLDS.

	Value in 1889.
Zephyr, $1,250 added, six furlongs	$ 3,775
Spring, $1,250, six furlongs	3,525
June, $1,250, six furlongs	3 525
Double event, about $5,000, five and a half and six furlongs	10,500

FOR THREE YEAR OLDS.

Volunteer Handicap, $2,000, one and a quarter miles	3,565
Swift, $1,250, seven furlongs	3,425
Thistle, $1,250, one and three-sixteenths of a mile	2,580
Spendthrift, $1,500, one and a quarter miles	2,950

FOR THREE YEAR OLDS AND UPWARD.

Suburban Handicap, about $6, 00, one and a quarter miles	10,000
Bay Ridge, $1,750, one and a half miles	2,800
Sheepshead Bay, $1 50 , one and an eighth miles	3,040
Knickerbocker, $1,250, one and three-eighths miles	2,425
Coney Island Stakes, $1,250, one and one-eighth miles	2 545
Coney Island Cup, $1,500, one and a half miles	2,460

Of the fixtures for two year olds the Double Event has already received 93 entries for yearlings. The C. I. J. C. will add an amount sufficient to make each race worth $5,000, with an additional $1,000 in plate or money in case both races are won by the same horse, as was the case last June by Mr. W. L. Scott's Torso. With these fixtures in connection with the Foam and Surf for two year olds, the Equinoctial, Tidal, Mermaid and Realization for three year olds, that have already closed, there will be no lack of stake fixtures to interest the public in June, the meeting beginning with the Suburban on June 17th and ending on July 2nd with the Realization.

The stakes to be run at the September meeting, which close entirely on January 2nd, are the Autumn Stakes for two year olds at three-quarters of a mile, and the September Stakes for three year olds at a mile and three-quarters each, with $1,500 added. The stakes for which there is a supplementary en-

trance in August are the Flatbush, with $1,500, and Great Eastern Handicap, with $5,000 added, for two year olds: the Siren, for three year old fillies, with $1,500 added; and Bridge Handicap, with $2,500 added, and for two year olds and upward, the Flight Stakes, with $1,250 added.

THE FUTURITY OF 1892.

The Futurity has attracted the most attention of any of the Autumn stakes for the two years that it has been in existence. For the third renewal, to be run in 1890, there were 915 subscriptions for mares, with over six hundred for the Futurity of 1891. The fifth renewal, to be run in 1892, will also close on January 2nd. The conditions are nearly the same as for the stake which closed last January, with $12,500 again added, of which $2,500 will be given to the breeders of the winner and second in the proportion of $1,500 and $1,000.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

EDITOR BREEDER AND SPORTSMAN: — Can some of your readers give the pedigree of Nora Marshall, the dam of Alfred S., 2.18? It is given in the catalogue of the last Seales sale as being by Union, he by Morrill by Morrill of Maine. Second dam by American Star.

Nora Marshall, I believe, was purchased by the late Mr. Congdon for James C. Flood; cost $5000, to mate his mare Queen.

By publishing the above more may be found out about the matter. Wallace describes her as pedigree unknown.

Respectfully yours,
FRANK H. BURKE.

MENLO PARK, CAL., Nov. 30th, 1889.

C. E. C.

The horse you allude to is said to be the sire of the dam of Ashley. We do not know his pedigree.

W. P.

Can you or any of your readers give me any information about the following stallions:

Old Sport. Who bred him? How was he bred? Did he have any record himself? Did he sire anything that got a record? and if so, what? (Old Sport was owned by a Mr. Thomas).

Gen. Wagner. Who bred him? How was he bred? Did he have any record? Did he sire anything that got a record? if so, what?

Are either of these horses living? if so, where? and by whom are they owned?

Gen. Wagner, I understand, was owned at one time around Haywards, and Old Sport stood at Sunol on Mr. Chas. Hadsell's place.

Can any of our readers answer the above queries?

J. F. C.

Knowing nothing whatever of the character of the mares you have, it is impossible for us to advise you. The sire of the stallion you mention is first-class, but we know nothing of his dam, she is not registered as standard.

W. S. Enos.

Can you give me the pedigree of Oregon Nell, formerly owned by the late Charles McLaughlin? Also of Pathfinder and Oakland Maid?

Answer.—There is nothing known of the pedigree of Oregon Nell. Which Pathfinder do you mean? Oakland Maid by Speculation 928 (son of Hambletonian 10), dam the trotting mare Lady Vernon.

J. N. M.

Will you please give me as much of the pedigree of Privateer (by Buccaneer) as you can; also how many, if any colts, has he in the 2:30 list?

Answer.—Privateer, by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam Lady Narley, by Marion, son of Mambrino Chief. There are none of his get in the 2:30 list.

W. W. B.

Will you please give the breeding of Nathan Coomb's horse Lodi?

Answer.—Lodi, foaled 1860, by imp Yorkshire, dam Topaz by imp Glencoe, 2nd dam Emerald by imp Leviathan, 3rd dam imp Eliza by Rubens, 4th dam Little Folly by Highland Fling, 5th dam Harriet by Volunteer, etc.

H. M. Johnston.

Will you kindly publish the pedigree of Overland, by Bald Chief, brought to California by Mr. L. J. Rose; also his performances, if any, and if Standard under what rule? Will you also give the pedigree and performances of Nell Crockett raised by Wm. Smith of Los Angeles, afterwards owned by Jim McCord? I notice a correspondent from Santa Barbara is inclined to treat Arrow, 2:13¼ as a spontaneous production of the air of that locality; his sister, Elwood, 2:17¾ (after raising two colts), and Final, trotting time, 2:22 (after being banged all to pieces for several years over the cobbles in San Francisco), his brother, were not raised in Santa Barbara, so it seems to me that A. W. Richmond and Crichton's First, his sire and dam, had more to do with it than climate, and the breeder that mated them ought to have some credit in the matter, I should think. If such horses are accidents then why should intelligent breeders devote so much careful study to the blending of what they consider to be the best blood lines to produce speed? Santa Barbara climate is good and helped to develop Arrow no doubt, but the best explanation of his speed is that he was bred for it, otherwise how about Axtell's climate, and, coming nearer home, Sunol's? I do do not think that we can afford to risk our climate this way, do you? Let us rather attribute great speed to the combination of the very best blood judiciously mixed, and even if we have to give credit to the breeder for a little judgment in the matter, let us do so and encourage others. Will you kindly let me know where I can get a dozen pheasants, such as were used to stock the Oregon country with?

Answer.—Foaled 1868, by Stevens' Bald Chief, son of Bay Chief; dam Madam Botts, by John M. Botts, son of Spalding's Abdallah. There is no record of his performances. Of Nell Crockett nothing is known of her pedigree. She started, according to Chester, in eight races, of which she won three, making a record of 2:32½. If you will write to Z. Job, Corvallis, Oregon, that gentlemen will give you all necessary information in reference to the Pheasants.

Green Morris, the well known Eastern turfman, received a check for $4,545, signed by the Dwyer Bros., for his winnings at Elizabethtown. One of the clerks went to the Brooklyn Trust Company for the cash and disappeared with it. It is said the Dwyer's will make the loss good.

Don to Harvey W. Peck.

EDITOR BREEDER AND SPORTSMAN:—In your issue of Nov. 30th, appears an article by Harvey W. Peck, entitled "In years gone by" in which he attempts to show that no trotter of to-day is quite as good as some of the old stars, saying they can not stay hard races year after year, and for proof of his assertions points to the trotters of to-day as Sunol, Axtell, Allerton, Lillian Wilkes and Faust—*all three year olds.* Now I do not wish, and in fact no one can say anything disparaging or to belittle the credit of our old time star performers; but I should like to ask does he wish to make comparisons between three year olds and those whom he afterwards names and gives their performances for five, six and seven successive years? or does he intend to point out that the named three year olds have made marvelous records against old father time and can't carry this speed to the finish of a race, while the old named stagers made their various records in races?

I don't think it hardly fair to compare three or four year olds, with old stars, as they have been on the turf but two seasons at the most, and not year after year for several seasons,

If, however, he wishes to compare the game trotting qualities, why don't he include some three and four year-olds in this country that many regard as good if not better dead game race horses, as any he has mentioned, viz: Margaret S., Direct, Hazel Wilkes and Lord Byron. Supposing we take a glance over the race performances of these babies of the turf. I think we will find that every one mentioned has made good records as race horses in races with competitors.

Sunol, as a two-year-old, trotted against competitors in two races containing four heats, and made a record in a race of 2:25.

As a three-year-old, she trotted in three races, ten heats, with the fastest one in 2:18, trotted three walk overs in 2:15¾, 2:16½ and 2:10½, with more left yet.

Lillian Wilkes trotted this season a walk over in 2:18, and two weeks later to show that she meant it, trotted in a race with two competitors the second heat in 2:17¾, and then went on and won the race.

Faust trotted in two races distancing the field in both, best time 2:18½ in second heat.

Margaret S. trotted three races in her two year-old form, placing 2:31 to her credit; as a three-year-old she trotted eight races containing 28 heats, obtaining a record of 2:19¼ and the race which I wish to particularly point out in her case was the 2:30 class race at Sacramento, and the fact that she won the first and third heats in 2:19¼ and 2:19½ and forced out her competitor in two other heats that (Saturday) afternoon in 2:18 and 2:19½; and on Monday following trotted within three lengths of him in 2:18. The very next day she trotted in a stake race against Sunol, being close up to her, three heats in 2:20½, 2:21¾ and 2:18.

Direct, as a three-year-old, trotted in six races, getting a mark of 2:23; as a four-year-old he trotted in eight races containing 29 heats, winning 20, one in 2:18¼, one in 2:18½, one in 2:19¼, six in 2:19½, one in 2:20, one in 2:20½, one in 2:21½, and one in 2:21¾. Besides these twenty winning heats he trotted (two winning heats) two dead heats and four losing heats, eight in all, in one race in a field of aged horses.

Hazel Wilkes trotted this season as a four year-old in fields of aged horses, in eight races, containing 31 heats, and obtained a record of 2:20.

Lord Byron, as a three-year-old, trotted several races, getting a record of 2:29¼; as a four-year-old he trotted in five races containing eighteen heats, and getting a mark of 2:18.

I might go on and give the performances of Sable Wilkes and Grandee in this country and more East, but what is the use, when a three and four-year-old fight out a 2:30 class race, five heats in which the second horse trots every heat better than 2:20, and when a three-year-old that can trot three heats in 2:20 can't even get second money in a race without split heats.

I would like to ask friend Peck if he ever heard of a 2:30 class race being forced to such a pace by a three-year-old, as the one above referred to.

I don't think the performances of the California three and four-year-olds are equalled by any performances by old or young in California or in the East at the present day, and when we take age into consideration, I think they stand on a par with the performances of our old-time stars. Now don't let Mr. Peck mislead himself with the idea that these youngsters are done and have got to the notch where they will stop, for they have most of them gone into winter quarters with feet and legs as sound as before the campaign opened, and will certainly train on, and at the tap of the bell next season, will be again doing battle for the upholding of the reputation of the trotters of to-day.

I will not attempt to predict how fast they will go each coming year for the next four or five seasons, neither will I accept the proposition that they have got to their limit of speed, for there is no proof.

As to the proposition as to how a "sure enough" trotter can be bred with uniformity? my little experience teaches me that breeding it is partly experimental until one finds the proper nick for a horse. But one thing is certain; if he has a mare whose ancestors have been dead game performers, and she herself has proven that she is the same, if you breed that mare to a stallion with the same combination or requirements you are more sure of getting a "sure enough" trotter than you will be by breeding any well bred, thoroughbred, or cold bred mare to any stallion however good. Of course Mr. Peck may say that I am asking for almost an impossibility, but there are a few mares in the United States that have my required standard, and fortunate indeed are the owners of such.

In closing I say, may the problem of producing dead game trotting horses, as good as we have got now, be continued in California for years to come, and the other one of how to produce a "sure enough" trotter, will solve itself by the offsprings of our present performers.

"DON."

J. Martin Barney Returns.

EDITOR BREEDER AND SPORTSMAN:—I arrived home safe and sound, dogs and all, some three weeks since, and have been pretty busy picking up the threads of business which I dropped for my visit.

I bred Galatea to Tom Pinch on November 19th, so the progeny will be comfortably inside the line for Field Trialers. I did not intend to breed her this fall as I wanted to hunt her, but was overpersuaded by my Eastern friends, who say, "If you can raise such puppies as Lady Pinch keep right on."

Dutch Flat, Dec. 5, 1889. J. MARTIN BARNEY.

The Kansas City Referee, commenting upon our suggestion to make up a team to meet the traveling teams of the U. S. Cartridge Company, says that Kansas City will turn out a team. Good. We hope other shooting centers will do likewise.

Oroville Notes.

One can hear nothing talked about in Oroville at present but the coming citrus fair, which promises to eclipse all former efforts in that direction. All the prominent horsemen are on some one or more of the fair committees and but little attention is paid to fast work by those who own fast roadsters. However not to be behind hand in furishing a variety of amusements for the expected guest, it is now proposed to give two days racing during fair week, at P. R. Welch's track which is located about three miles from town. If the idea is carried out the most interesting contest of the meeting will be the one for the district two years old, in which among other contestants there will be an entry by Marion Biggs Jr. It will be his black colt by Hardwood which gives every promise of great speed. Mr. Meade and Judge Gale will also enter their young colts both of which are by Steinway Jr. and out of Blackbird mares. They were purchased at the Reavis sale last year and each of them are "threatened with speed." A. J. Walsh also has a handsome and fast sorrel colt by Happy Jim whose dam was thoroughbred. He is put up on the lines of Direct whom he very much resembles except in color. These four should make a good race as they are all very evenly matched.

Judge Hundly and county Treasurer DeLaucie have both good roadsters and occasionally they have a brush on the road together, but the Judge usually gets away with the glory as his animal is the faster of the two. Mr. Amos Howard, still has his old grey, and although he is fast approching twenty years of age, there is plenty of life in the old gelding yet and many a younger one he leaves on the road behind him.

Mr. Biggs has his three track horses here, Dude, St. Lucas and Ed. Biggs, the two former are turned out, but the last one is being worked over the roads each fair day. Ed. Biggs has a good turn of speed and if no accident happens, should go into the 2:30 list next season. Oroville has been sadly handicapped in not having a track close to the town; Mr. Biggs bought land for that purpose and had a track surveyed and staked out, but finding an opportunity to sell out at a largely increased price, availed himself of the chance and now we will have to fall back upon the Welch track. Come up and see us during fair week and we will entertain you in an hospitable manner.

AYE JAY.

Mr. Burdette Coutts on Horses.

Mr. Burdette Coutts, who was formerly Ashmead-Bartlett, has since his marriage to the wealthy Baroness, indulged in several stud farms and more particularly in breeding Hackneys, of which he has the best collection, probably, in England, says in the London Live-Stock Pastimes and Sports when commenting on the French horses exhibited at the Paris show.

I have two general remarks to make. First, that up to 15.2, or possibly up to 15 3 hands, our English horses, particularly now when the study and attention given to the Hackney breed has in five or six years produced such marked improvement, are immeasurably superior in every respect to anything that is bred in France. For barouche horses from 16 to 17 hands high, I reluctantly admit that the French breeder takes the brioche. The French have a race of carrossiers—that is, by constantly crossing the Hackney stallion with the big mares of Normandy, the latter probably enlarged by an earlier admixture of Cleveland or Yorkshire coach horse blood, they have created a race from which their barouche horses are produced. I am by no means satisfied with them. Their hind action is indifferent, their shapes are vas ly inferior to our best Yorkshire type, showing neither the lengthy and level quarter nor the long, elegant top l ne of the latter. But that which really shows a horse in harness, and which sells him at a high price for that purpose, viz., high action in front, is very much more marked throughout in the French barouche horse than is our own.

It is not the best of action; it is often up and down, "flopperty," and "dishing." but there is no doubt about it, they do "pop it up." A pair of Yorkshire coach horses or of Cleveland bays—of that fine quality which Mr. A. E Pease, M. P., does not appear to consider either a natural or valuable characteristic of the latter breed but which I believe, by careful attention, can easily be produced from it—if they had really high action in front, would be worth, in the eyes of anyone who knows a horse's tail from his head, double the money that any French bred pair ought to fetch. But as a rule, in our big horses of this type we have not got the action. There are one or two famous exceptions, and if these should succeed in reproducing their own action while preserving their fine shapes we shall have solved the difficulty which to my mind should be a matter of grief and consternation to English horse breeders, viz: That we can not or do not at the present time produce big carriage horses suitable for the London stage carriage.

It is a well known fact that the most of the big bay horses which we see in the Mall on a drawing-room day, whatever black blood may be in their veins, are strangers in a strange land. I do not deny that some big horses with action are produced in Great Britain, but for the most part they are "carriagey" hunters from Ireland or the produce of Hackney stallions and cart mares, and in neither case do they possess the curvilinear and sweeping form which to a practiced eye, is most beautiful for a big harness horse. I have little doubt that some of the coarseness of shape, and particularly the low set tail in the French carrossier, is due to the fact that many big so-called Hackney stallion have been imported into that country which get their size from a cross of carting blood. It remains to be seen whether in this country we can not produce an animal with the requisite action and shape by crossing the Cleveland Bay or the Yorkshire coach horse with a pure Hackney possessed of extra size and quality. Without the latter we shall do nothing in this business.

One noticeable feature in French horses is that in all sizes they are bred for speed in trotting. The composition of the ground in the Palais de l'Industrie is suited to this peculiarity, being hard and not covered with tan, as is the case with our shows. This is a point which we seem to have lost sight of in favor of show action. And yet trotting speed must be inherent in the breed that comes from the loins of Marshland Shales, who did his 17 miles in 56 minutes, carrying 13 stone, or from Wroot's Pretender, who is credited with 16 miles to the hour, carrying 17 stone, as well as in the stock of that Yorkshire coach horse, a brother to Wonderful, of whom we find the almost incredible record of 18 miles in the hour, carrying 18 stone. In our competition the pace which will make a horse raise his knee to the highest point is the only one sought after, but any one who has visited one of the real old-fashioned Yorkshire breeders and seen these horses trotted without breaking on a long rein to a galloway, the latter galloping alongside as fast as he can lay heels to the ground, or any one who remembers the large part which old Bellfounder played in the creation of the American trotting horse, will understand how easily the characteristic of speed could be resuscitated in these English breeds.

To the Top of Mt Whitney.

[By C. E. Sherman.]

XIV.

When first a little creek near the Natural Bridges was reached, Grant, who was the friendly guide of the day, stopped and remarked: 'If you want bait you had better get it here, for you will not find any in the main river." Following his advice and turning over rocks in the stream the result was astonishing Every rock had the salmon fly or May fly chrysalis upon it and many were so covered that these grubs actually stood on end. At least a peck of these little shells was gathered in fifteen minutes. To the careless observer they much resemble a shrimp, and their shells, when reaching the state of cast-off garments, float away and scatter along down the whole length of Kern River. All fishermen call this bait "anterugin."

This whole country is distinctly volcanic. At the Divide there is a small mountain whose surface is as red as ordinary brick. From this Red Mountain—as locally named—a stream of lava at some time flowed directly in the course of Whitney Creek as far as Kern River. At different points the trail passes over this irregular bed, while there are large piles of it on either side. In places the stream and the elements have washed the earth away, leaving perpendicular masses of lava, just as when it was in a molten state. Occasionally there will be a cave. Natural Bridge Creek forms from seven springs, all within a radius of 100 yards and not more than 200 yards above the bridges. At the point where the waters all join just above the bridges they form a good sized trout stream, which precipitates itself over the rocks and down its steep bed, a mass of foam until it reaches Whitney Creek. One bridge is about fifteen feet wide, the other at least thirty. From the surface to the water is on the upper side about ten and on the lower side forty feet.

In every direction from the bridges are views of grandeur and beauty. Looking east is a beautiful little meadow with springs of water flowing into it from almost every direction. To the left almost touching the trail, one spring sends a volume of water out of the side of a bare mountain, which equals the flow of the largest artesian well in the valley. To the south rises a timbered slope covered with pines, manzanitas and cedars. Northward is the stream of lava, just across Whitney Creek, and back of it a perpendicular cliff towering at least a thousand feet above the spectator. But the grandest view of all is toward the west. Whitney Creek takes a leap into space. It must be at least 2,000 feet above Kern River, which the creek rushes down to meet in less than a mile. One looks down and down to fathom the end of its headlong career, to see boiling foam with occasional lines of soft, hazy blue, between cliffs of enormous proportions. And at the end, across the canyon of Kern River, there rises a snow capped giant, 14 000 feet in height, which bars the rushing waters and baffles the vision. Beside numerous cascades, there are in this short distance three waterfalls, the largest perhaps 125 feet in height.

A graphic story of golden trout is told by the Captain of the Pilgrims. "You can only get below this fall at one point, and that by an extremely hazardous route, only possible by aid of the firmly rooted and stout bushes. Down this cliff I went with many a choky feeling, for if a bush were to give way, then good-bye all. Once at the bottom, right amid the spray from the falls, I lost all interest in scenery and bother about brush and fell to hook and line as quickly as possible. Down in the beautiful deep pool below me, in an instant I hooked a lovely ten inch golden trout, to be followed by another and another, and as many as I wanted, in rapid succession.

Following down the edge of the cliff, absorbed with the splendid sport, I happened to glance upward, and my! how I got out of that place! The stream of ages had worn into the lava mountain, until away above my head it was a huge over-hanging cliff, threatening in appearance to fall at any time and bury me mountains deep. Once out from under, I drew a long breath and reasoned. Certainly that cavern and cliff had stood just as it was for 3,000 years anyhow, it ought reasonably to last a few days longer, and beside, those dearly beloved golden trout! So back under the beetling precipice again; back to the sport which I had come so far to seek. The waters roared, the spray ascended, the mighty rocks continued their rest of ages, and the golden beauties rose with all the fervor of the tallest kind of true love to the cast of my glittering fly."

As far up the cliffs as the spray can reach, the rocks are mantled with lichens, ferns, flowers, shrubs, beautiful grasses and mosses, and in the niches fashioned by water in perfect regularity and symmetry, vegetable growth attains rare luxuriance; while above the reach of water, the rocky battlements have the barrenness of desolation. The lava is porous and light, but tough and enduring, and with its different strata or layers, presents a bewildering variety of colors. The broken debris at the mountain's feet is tenanted by a world of ground hogs, whose piercing whistles are ever sounding notes of alarm and orders for prompt disappearance.

August 11th, was "steamer day;" rents were collected in substantial, but untailor like fashion; the dues of cleanliness were paid in soap and water, and in the afternoon, the artist and assistants made the perilous climb below Agua Bonita falls, taking some of the finest, and what are surely the rarest negatives possessed by lovers of nature. That evening the Pilgrims were visited by Messrs. Dent and Pogue of Tulare County, who with a party of ladies, gentlemen and children were encamped near by. Some of this party had made the ascent of Mt. Whitney, among them Miss Eva Pogue.

As night approached and bed-time came, the Chaplain was the first to move towards the opportunities of Dreamland. Just after stepping out of the circle he exclaimed, "Hello! here comes a man on foot, up the trail." All eyes were turned down the hill. The flickering light of the camp fire cast its rays upon the form of a man with a very long beard, carrying something upon one shoulder. He moved up the hill with an assuring and steady stride and stepped fully within the line of the fire, when the astonished Pilgrims saw that they were favored with a visit from no less a personage than Old Father Time himself. He leaned his scythe against a tree, advanced to a lava boulder and seated himself without a word. The cook dropped to his knees; the captain was well behind the chaplain, who by this time had put a big tree behind his dear self and the rusty old scythe; the doctor hid behind his phial prepared to shoot pellets; the enthusiast tried to steal a base; the electrician hid under his hat; the artist crawled into his camera and the counselor ambled out into the darkness. But with kindly graciousness and a genial smile, Father Time put away the gathering fears and said:

"Now I want you fellows to do a little figuring.'

Like one who has no equal and but few superior, the Enthusiast groped for a pencil; eagerly, earnestly, but in vain. The Captain had the sole and only pencil in the gang Father Time went on.

"Now you fellows are no doubt having a delightful time here at Camp Beautiful amid this delightful scenery, catching great strings of golden trout, and all that sort of thing, but it does not seem to occur to you that there are obligations in this world. Now you left Bakersfield on the 30th of July didn't you?'

"To-day is the 11th of August isn't it?"

"You have been out just 13 days, haven't you?"

"You promised to be home in 21 days, didn't you?"

"Which would give you just 8 days in which to get there wouldn't it?"

"Now suppose you were to break up this camp to-morrow and move to Runkles. Your Artist says he wants another day about here to complete his views; you can give him a couple of helpers to-morrow and turn him loose, while the rest of you can move to Runkles and prepare for the trip up the river. It will take the best part of the day to fix your horse feet bake bread and get things together so as to be ready for a start early on the morning of the 13th."

"Now, you have an idea that you are going to the summit of Mount Whitney by way of the headwaters of Kern River in three days. It is a contract that you don't know anything about; more than that every old settler and traveler that you have met says that you can't make it at all; so it will be a pretty safe proposition to double your estimate, won't it?"

"When you get back, if ever you do, you and your horses will be pretty tired, and a needed rest or one day will make eight days, won't it?"

"Now do you catch on? If you would keep your word you have just eight days in which to make a twelve days' trip, for it will take four days at the very least to get home from Runkles."

"So my advice would be, in the vernacular, 'get a move on you,' as I have suggested. That's all.

The Captain thanked the aged autocrat for his timely advice, and added, "pardon me, but it occurs to me that as opportunity may not again offer, I would like to ask on behalf of our party, that any further visits of a—ahem—an urgent business nature which you may have occasion to extend in our direction, be postponed just as long as can be with convenience." The Captain glanced toward the pilgrims for nods of assent which he felt sure would be given, and then looking back for answer, lo! Father Time had disappeared more silently than he came, not forgetting to take with him that horrible scythe.

Mr. Austin B. Sperry writes from Stockton that he shot for three days in the tule last week, with the poorest of luck. The birds were not there.

It will be a matter of surprise to our readers, to learn the L. C. Smith Gun business has been sold out. The Hunter & Comstock Arms Co., of Fulton, N. Y., are the lucky purchasers. The sale was completed and the papers signed, November 23. An inventory is now being taken, and the machinery and tools will be moved to Fulton, N. Y. at once. Mr. L. C. Smith retains an interest in the business and states that the same system of management will be pursued by the new firm, who will continue to make the L. C. Smith gun without any changes in its present style of construction.

Mr. Smith started in the gun manufacturing business in Syracuse in 1887, in connection with W. H. Baker who originated the gun made at that time at Lisle, N. Y. Mr. Baker remained in the firm about two years. Mr. Smith has been very successful as a manufacturer, his guns having an international popularity, and the only reason for his selling the controlling interest, is to make room for additional machinery and men to produce his Premier typewriter.

A number of finished guns are not included in the transfer, and they will be sold from the Smith factory until the stock is exhausted. Mr. McMurchy will have the general agency of the typewriter, and the business sagacity and personal popularity which have stood him in such good stead in connection with the Smith Gun will undoubtedly enable him to maintain preeminence in his new line of trade.

Uncommon Sense.

Mr. Fred Mather, Superintendent of Fisheries for the State of New York, has been considering the statements made by those who are banded together to over-ride the right, destroy preserves, embarrass sportsmen who lease shooting, and generally to display a disregard for common decency. Mr. Mather's remarks are especially commended to such readers, if any, we have. They were written for our exchange Shooting and Fishing, a journal which editorially opposes the preserve system. Mr. Mather says:

This is a subject upon which a volume could be written. My experience and observations on the preserving of large or small tracts of land by individuals or clubs is, that it is in accord with human instincts, for selfishness is inherent in all, and a rule of life is said to be, "A man who has the money is the man who has the fun." Free fishing in a densely populated country means no fishing for any person; free shooting means nearly the same thing, except when migrating birds are considered. The man who has money can go hundreds of miles for sport, or he can preserve it near by; he can do many things which moneyless men cannot; he sits in his box at the opera while we sit in the gallery; he sips Burgundy at a fabulous price, and we drink a modest glass of beer costing five cents. Why should we ineffectually kick at the natural order of things? If there is a class that is conspicuous for rapacity it is the newly rich, and how I wish I was one of them! On Sunday I have to walk to church twice a day.

My neighbor, Mr. Dives, rides in his coupe and sprinkles me with dust, but, and a heavy emphasis on the but, what can I do about it? No matter how much I may grumble about it, the fact remains. My neighbor is a member of a salmon club in Canada, and bless him, he has often sent me a middle cut from a twenty-pounder, while I never killed a salmon, unless in my hatching troughs through awkwardness, and never expect to kill an adult salmon unless the Hudson River affords the chance, for my purse strings are not only short but have been weakened from disuse, for, since I put a dime in it in accordance with Iago's advice, there has been a mystery about that money. The point of this is, what I cannot afford I must do without. If I cannot ride to church, it is possible that I may find the walking very good. If a man has a taste for fishing, shooting, opera, or literature, and has not the necessary money to indulge his taste, what can be done about it? Suppose he has a gun, and no money to buy ammunition, and the ducks are whistling their wings about his ears. Iago suggests the remedy, and the remedy is more or less cruel.

Communism will not help it. Ever since the time when history was written, "the man who had the money was the man who had the fun," and neither you nor I can change the law. I am rapacious, but am sorely restricted by a limited bank account. I have on my ground many beautiful wild ducks which I have bought from men who wanted money more than ducks; wood-ducks, geese and blue-winged teal, widgeon, pin-tails and Chinese mandarin ducks, the original pair of mandarins having cost me fifty dollars to land them in New York, and will I let you come and shoot them? If you ask the privilege I will consider the matter; but if you shoot without asking I shall refer the nearest constable to you. I do not shoot these ducks, but have the right to do it. I prefer to see them nest and rear their young. They were and are wild; my few dollars bought them and saved their lives. But this will do; carry the matter out on this line and see if there are not two fair sides to the question.

Imagine George W. Bassford the genius of a ball! Yet seven years ago in Colusa, and again last week at Vallejo, he won a masquerade prize in character as a "tule hunter." Why anybody should hunt tule is the conundrum of the day.

Major S. I. Kellogg informs us that the conditions for the Central California Standard Challenge Medal, to be offered by the Selby Smelting and Lead Company for 1890 will be somewhat similar to those governing the medal just won by Henry Bassford.

Mr. Ed Fay and a friend, Mr. O'Shaughnessy, shot a friendly match at Bird's Point on Saturday last, and both made remarkable scores. Both killed their first dozens, then Mr. Fay pulled away and won at fifty birds, scoring forty-seven. Each then tried three pairs at 18 yards, ground traps, and Mr. O'Shaughnessy won.

There seems to be a marked lack of interest in making up a California team to meet the Eastern cracks who will be here in January. Perhaps the better way would be to have a committee of acknowledged experts meet and discuss the matter. The shooters might well send us their views in relation to the proposition, which will be published and may arouse interest.

Charles Barker Bradford, gives these hints which are worth remembering:

Thirst can be abated by the eating of acid fruits or plants. The chewing of twigs, barks or leaves of trees and shrubs will also afford temporary relief. Snow and ice aggravates the thirst by chilling and closing the salivary glands.

Learn to shoot without shutting your eyes when you pull the trigger. Beginners will find it hard to do this, but it must be done.

An extra pair socks are handy on a one-day outing trip. Then, with your shoes nicely dried at my lady host's fire you will be in comfort the next morning on your way home.

Avoid sleeping in close rooms. Keep the apartment well ventilated. Let in fresh air, but keep out of the draught.

When out shooting carry a small square of chomois skin saturated with pure oil. Then you are prepared to well grease your gun in case of a rain storm.

THE FARM.

Value of Milk in Kidney Disease.

Prof. German See of Paris has long been engaged in study to learn what elements in milk rendered it such an admirable agent to stimulate the kidneys, increase the flow therefrom and hence prove of such great service in dropsies. As a result of his investigation, he is convinced that the one important element is sugar of milk. Acting upon this theory, he selected twenty-five patients with heart disease, in all of which there was more or less dropsy. To each he gave 100 grammes of the sugar of milk a day, dissolved in two quarts of water. In all these cases a marked effect upon the kidneys was felt within twenty-four to forty-five hours, and the dropsies diminished rapidly, and almost all such swellings disappeared altogether after a series of treatments lasting from six to eight days. This discovery is likely to prove one of the most important which has been made in the medical world for years.

The Buffalo King.

He Starts a New Ranch for Propagating the American Bison.

Probably no man has a wider reputation in the West than "Buffalo" Jones. He has spent the last twenty years in the study of the American bison. He started with a small herd of buffalo calves which he gathered by degrees, and by care and close attention to their habits he soon had the pleasure of seeing his experiment a success. His herd grew rapidly, and he has now one hundred full blood buffaloes and a large herd of half bloods.

He has found that his range in Kansas is getting too contracted for the success of the herd, and has opened an immense ranch near Ogden, Utah, for the further perpetuation of the species. He has supplied numerous parks and private individuals with pairs, and still has a nucleus for a herd that bids fair to some day rival the immense bands that swarmed the western praires a few years ago.

He said: "My herd of full-bloods is constantly increasing, and I believe they are growing larger than those in the wild state, but they are not so hardy. The hybrids are very hardy, and produce more meat than the common cattle, but some people claim that it is tough and dry. I do not find it so. In my new ranch at Ogden I expect to increase my herd to thousands, and then I will begin to realize on them by selling calves and killing the beeves just as ordinary cattle raisers do. The profits will be much greater than from domestic cattle, for the hides will be a rarity, and will bring five or six times as much in the market as those of ordinary beeves. The hides of the half-breeds are tougher, and take the characteristics of the buffalo hides. I have the only tame herd in the world that can be called a herd. There are several shows that claim that honor, but they simply have a few scrawny specimens that I would cull from my herd. Mine are large and fine brutes, some weighing as high as 2,000 pounds, and are perfectly free from that dejected appearance that is noticed in the circus animal."—Kansas City Letter.

Ripening for Choice Meat.

In order to get tender, lean, juicy hams and pork a breed of swine must be kept which, like the Berkshire, produces them naturally. These have hams weighing 15 to 30 pounds or more each, with a rim of fat of not over one to two-thirds of an inch thick; all the rest of the meat lean—nicely marbled; that is, the lean well streaked with very fine lines of fat, which tend to make it tender and juicy. There are other breeds of swine which if properly reared and fed will produce more or less such flesh, but they cannot be depended upon for a large proportion like the Berkshire. This can only be known by experimenting with them.

The best feed to grow lean meat is to turn the pigs into a grass lot—of which clover is the best—as soon as weaned, give all the milk which can be spared for them to drink and all the wheat, bran or middlings they will eat three times per day, mixed half and half with oat meal. Rye, barley or buckwheat meal is a tolerable good substitute for oats, or even ground wheat may be used. With the above grain supply all the pure water the pigs will drink three times per day, unless there is a running stream through their pasture. If the grass becomes short in summer or autumn feed a moderate quantity of any kind of vegetables, or squash, or pumpkins, but not enough of either of these to make them loose, and especially to sour

A month or so before slaughtering, commence mixing one-fourth Indian meal with the wheat bran or middlings, and gradually increase this to full three-fourths at the end; lessen also the vegetables to a small amount; but the pigs may continue to run in the grass pasture if there are sheds with dry bottoms to shelter them in storms or as cold weather advances.—Veteran in the National Stockman.

The Shorthorn Cross.

Considering the propriety of keeping the breeders of Shorthorn cattle together, and to demonstrate that there is yet an outcome to their business, Judge T. C. Jones has called upon Ohio breeders to tell him what they think. In a recent letter to him through the Ohio Farmer, a writer says: Upon their merits as the best general purpose cattle, Shorthorns have been more generally used in this country than any other breed for improving our native stock. In many districts there has been a wonderful improvement in the quality of cattle by the use of Shorthorn sires for several generations, and this has been continued until the cattle of such districts show the Shorthorn characteristics. In such localities it has been easy for buyers to secure round lots of cattle of uniform points and quality. Within a few years past new breeds have been introduced, often more for speculation than with an idea of general improvement. The result has been that on many farms we find cattle of different breeds, and buyers complain that it is a hard matter to gather up cattle of uniform points and quality for feeding or shipping. Farmers insist upon selling all, and when buyers are forced to take the indifferent as well as the good, the farmer stands a discount on the good. It is clearly in the interest of farmers in any given district to raise, generally, cattle of one desirable breed, and thus accommodate buyers with a uniform class of cattle and render sales more easy. A single circumstance shows to what extent the Shorthorn cross has improved the cattle of Union County: My neighbors, Mr. Luther Liggett and Mr. John C. Price, buy up and feed a large number of cattle. They look out especially for good cattle of the Shorthorn cross. They sold, a short time ago, one hundred and five head, which averaged 1,627 pounds, and they have on hand yet one hundred and fifty head of better cattle, which Mr. Liggett told me to-day would average over 1,700 pounds. For those sold they got $4 50 per 100 pounds, netting per head over $73.

The Basis of Value in Cattle.

The final measure of value of farm animals is adaptation to the wants of man. The final basis of price is the actual and relative numbers of animals of different grades and adaptations. Beauty of form or color, personal attachment to individual animals, or good reputation of the ancestry may increase the estimate of value of a few animals. Prices may be controlled for a time or permanently for animals with these characteristics, but the permanent estimate of the value of almost any class of animals produced in large numbers, and the prices at which they can be disposed of, depends on its demonstrated fitness to meet the practical wants of man.

The cattle breeding and feeding interests in the United States are unusually depressed. All classes show this depression, the best and the poorest, pure-bred and grade, fat cattle and milch cows, all sell at lower prices and find a less ready demand than was the case a few years ago. It is well worth while for individual cattle breeders and the representatives of any breed to ask whether it be possible to secure a more general belief in the superior merit or wider adaptation of their cattle.

The working ox has so largely disappeared in this country that the fitness of any breed for the production of working cattle cuts no figure in the popular estimate of value. Practically, the estimate of value of almost all the good cattle of the country depends upon their supposed merit as producers of meat or dairy products, or of both of these.

The owners of perhaps one-third of the nearly fifty million cattle in the United States care little or nothing for the milk giving ability of their cows so long as they are able to supply the needs of the calves. By far the largest number of the cattle of this class are in the herds of the far Western States and Territories Any breed of cattle the cows of which are inferior as milkers or are believed to be so, will work against odds in attaining or maintaining wide-spread popularity in any district of considerable size east of the Missouri River.

The owners of perhaps one-tenth of the cattle in the country care little or nothing for the beef-making capacity of their cows, valueing them only because of ability to give a large quantity or an excellent quality of milk. Many dairy farmers think the possession of either bulls or cows of the size and form best fitting them for beef-making a serious objection. This is also true of many village or town residents.

The owners of more than half of the cattle in the country attach importance to both the beef and dairy qualities in placing an estimate on the value of a cow or breed of cattle Some attach much more importance to one than to the other but many nearly equal importance to each. The seven great corn producing States, Ohio, Indiana, Illinois, Iowa, Missouri, Kansas and Nebraska, have nearly one-third of the cattle of the country. In these States are reared and fed vast number of fine beef cattle. The special dairy interests of some of these States are important. But more than half the cattle in these States are kept in comparatively small herds by farmers who do not believe they can wisely ignore either beef making or milk giving in their cows, farmers who are not special dairymen yet are not content to keep a cow simply to suck a calf.

As affecting the bearing of these facts, it should be borne in mind that it is practically inevitable that the relative number of dairy cows will increase in the older States, except, possibly, in the South, and that in the opinion of many, the the rearing of beef cattle is to be more and more confined to what we call now the far West.

For the present, the largest demand for cattle is for those believed to be good both for beef making and milk making; the next largest, for cattle believed especially good as beef producers; the next, for cattle believed to be especially valuable as dairy cattle, with little or no reference to other qualities.

Is it possible or practicable to meet the preference of this largest number of cattle owners? If so, is it wise to attempt to do so.

It is a well-established principle in breeding, that it is difficult, often practically impossible to combine the highest degree of excellence in two or more directions in one animal or one breed. The requirement that there shall be uniformity in color, size or any distinguishing mark greatly increases the difficulty in developing or maintaining the highest degree of excellence in any breed. Adding an additional "fancy" or unimportant point to the standard of excellence for any breed usually does harm.

There is overwhelming evidence, however, that we may have a symmetrical development of the whole animal, giving fitness for every natural function. We must choose between unusual or extraordinary development of one quality and fair development of two or more. Special development in the domestic animals, as in man, attracts most attention, commands the highest price, and, in many situations, is by far the most valuable. Fair ability to do more than one kind of work in the domestic animals, as in man, is less showy, usually lower prized, but meets a larger demand.

The most widely-popular breeds of chickens are those which combine size and form with good egg-producing ability The most sought for breeds of sheep are those combining mutton and wool production in the greatest degree. The most generally popular breeds of hogs are those for which both early maturity and good size are claimed. Along side the demand, at high prices, for horses of great speed and horses of great strength, there is an increasing popular demand for horses combining speed, size, beauty of form, and active in good degree,

Milk-giving and meat-making are equally natural functions of every cow in natural conditions. Milk and flesh alike come from the food eaten, digested and assimilated. The quantity and quality of either product will be affected by individual peculiarities, acquired or inherited, by the quantity and quality of food, and by good or bad care. Full work can not be done in both directions at the same time. The maximum product in both is not to be expected from the same animal, even at different times. There are thousands of cows, however, representing a half-dozen breeds, or various crosses, which are conclusive proofs of the possibility of combining in one animal a merit above the average, both for the dairy and for beef-making, a combination making animals more valuable for a multitude of our farmers than would be those in which there was a special development in either direction with corresponding weakness in the other. It is well worth an effort to supply the best possible of these double-purpose cows.

The number of pure-bred cattle of each of the more popular breeds is large, so large that high average prices are not to be expected in the future. Very high prices may be expected for cattle which are, or are believed to be, exceptionally good, but with increasing numbers of technically pure bred animals, the average of prices for such will more nearly approach those for good cattle not eligible to record. Attempting to increase the demand by demonstrating adaptation to the wants of a large number of possible purchasers is a wiser policy than is any other attempt to restrict production, except by discouraging the use of inferior animals.

The supply of pure-bred cattle equals the present demand at any satisfactory range of prices. But the possible demand is far in excess of the supply. All the registered cattle of all the improved breeds in the United States would not, in number, replace the herds of any State or Territory in the Union, save only Rhode Island and Delaware. It is the exception, not the rule, to find herds the chief purpose of which if the production of dairy products or steers, composed of pure-bred animals. The large majority of bulls used throughout the country, as a whole, are not pure bred. Improvement of most of the herds of the country has been only indirectly, if at all, by the use of pure bred sires and dams.

The least demand for improved cattle is usually found in regions where there is most need of improvement; the best demand from regions in which are already found a goodly number of fairly good cattle. Improving the average merit ordinarily increases the desire and ability to secure cattle of the highest excellence.

Experience has shown that records of phenomenal results, either in milk-production or in beef-making, are not more effective in securing favorable regard for any breed by farmers generally than is accumulation of evidence of comparatively moderate results under conditions closely approximating those under which the better class of cattlemen must place their stock.

It would be exceedingly unwise if the breeders of any class of cattle which has deservedly won reputation as possessing superior excellence for either one of the two great purposes for which we keep cattle, to purposely or carelessly suffer any loss in this regard.

The highest prices, and perhaps the largest profits, will be secured by those who can produce animals or families which naturally or by skillful development are able to show the largest yields of milk or butter, or the most or best beef.

It would be equally unwise for the friends of any breed of cattle to fail to magnify the fact, if it be a fact, that its merits are not all in one direction. To fail to do this, is to fail to invite appreciation by very many cattle breeders, who insist that they are so situated that they most need cattle with symmetrical, rather than special, development.

The special friends of the most numerous and wisely distributed breed of imported cattle in the United States, are now officially and privately announcing their belief that the former policy of giving attention to the developement of this breed for one purpose only, was a mistaken one, and are officially encouraging the opposite policy.

It has been preferred in this paper to state principles, and leave their application to intelligent cattle breeders. Comparison of breeds is not necessary here. The breed of cattle to the interests of which this Association is devoted, stands in the front rank as regards milk production. Cows belonging to it have extraordinary records as butter producers. Clearly it should be ranked among the dairy breeds, It has characteristics which commend it to many farmers, who are not distinctively dairymen. Its large size and the rapid growth of the calves are greatly in its favor. Rarely has any breed of farm animals long maintained wide-spread popularity among farmers unless it was above medium size. An honorable record has been made in beef production in a comparatively small number of cases. Grades and crosses of this breed have given large gains for food consumed, and very large weights for age, in many trials.

Inspection of noted herds, or the animals exhibited at leading fairs, show that there is a considerable difference in the type preferred by leading breeders. Some evidently attach much more importance to the supposed typical milk form than do others. Plentiful illustrations are to be found of finely bred bulls, and cows of this breed which would show creditably in any collection of beef cattle.

Is it wise to admit that this breed, which has grown in popularity so rapidly, which has so many friends among the most intelligent of cattle breeders, is and can be adapted only to the needs of one division of the smallest of three great classes into which the cattle owners of the United States are to be divided?—Address read before the late meeting of the Holstein-Friesian Association by Prof. Morrow of the Illinois Agricultural College.

Notes.

Andrew Smith of Redwood City, the famous breeder of Dishfaced Berkshire and Improved Poland China pigs, shipped on the steamship Rio Janiro, sailing Dec. 3rd, five fine young Berkshires, one Holstein bull and two heifers, all registered stock. His orders from Japan are steadily increasing, which proves that the customers are all well pleased with their purchases. He gives every buyer good value for his money and guarantees satisfaction to every purchaser.

The exports of horses from Great Britain to British North America during the nine months ending Sept. 30th, were valued at £152,840, against £198,951 in 1888, and £157,673 in 1887. There is also a decrease in the value of horses exported to the United States, while the chief gain has been in the export to other countries, doubtless due to the large number of thoroughbreds taken to South America. The number of stallions exported to the United States was 524, against 568; and of mares 317, against 651. The number of stallions exported to British North America was 1,124, against 1,671; and of mares 993, against 780.

The London Live-Stock Journal, reviewing the 35th volume of Coates' Short-Horn Herdbook, takes occasion to pay its respects to the "men—who conceive themselves to be leaders of English opinion—who cannot even now disguise their impatience and dislike when any mention is made of and quadruped being any better for a pedigree;" and adds:

"It is a suggestive fact that the chief supporters of the whole series of registers of horses, cattle, sheep and swine, have been for the year past, the dwellers in the great American republic. It seems as if the very vastness of their country, and the inconceivable variety of admixtures of races among its present inhabitants, has made the Americans more alive than we are ourselves to the value of breeding within restricted limits. While not attempting to disguise our individual opinion that every breed—so called—of farm stock in Great Britain is comparatively of modern combination, we can never emphasize too strongly the conviction that the materials out of which the several breeds were made had existed in this island, for centuries, in a quasi restricted condition, in consequence of the narrow limits of the country and the conservative instincts of the people. These facts led to our predecessors having, when they began stud and herd books, material already so concentrated that it will take the rest of the world many generations before they can catch us up."

BASE BALL.

A Brotherhood of California Players Being Agitated—Kelly's Arrival in Town.

There is a scheme being agitated among the members of the California League Clubs which, if successfully carried out, will send chills up and down the backs of Messrs. Moore, Harris, Finn and Robinson faster than Danny Long can steal bases or "General" O'Neill wag his tongue. The players of the several clubs have long been dissatisfied with what they consider their unfair treatment by the Moguls who control the League, and for some time past have been devising means of getting hold of more of the silver dollars that are regularly poured into the box offices than have been meted out to them.

For the past two weeks little groups of ball tossers may have been seen earnestly conversing; but upon the approach of an outsider their seriousness would vanish, and a profound silence would ensue, or the light, flippant remarks of a happy, careless lot, would succeed the secret confab. All attempts to learn the subject of these conferences were futile, and though everybody, in any way connected with the game, knew that something unusual was in the wind, the truth did not leak out till one day this week, when enough of the conversation of half a dozen well known players was overheard by a member of the BREEDER AND SPORTSMAN staff to convince him that the great scheme was nothing more nor less than the establishment of a Brotherhood of California players.

After the knot of athletes had broken up the reporter approached one of the number, who, by the way, is one of the most popular men in the League, and in an off hand manner asked how the California Brotherhood scheme was progressing. The one addressed gave a quick start of surprise, and blurted out, "How the deuce did you get onto the snap?"

The reporter said it made no diffetence how he found it out; it was sufficient for the other to know that the well-guarded secret had been made known to him.

A long reflection on the part of the player ensued, and he finally admitted that such a plan had been discussed, but no definite action had been taken.

After a great deal of urging, and first obtaining a promise not to divulge any names, the gentleman consented to talk of the proposed plan. "You see," he said, "the boys have felt for a long time that they were not getting a square shake from the managers. Our salaries have been ridiculously small considering the receipts of the California League. In addition, fines have been nailed onto us in a most reckless manner. Several of the players got together about two months ago and discussed the advisability of making a kick of some kind next season. After considering some propositions, it was decided to await the outcome of the big fight in the National League before taking any action.

"The Brotherhood plan has proved such a success there that many of the boys want to try the same racket here. Players have been talked to one at a time, and with two or possibly three exceptions all are in favor of the scheme. We have every reason to believe that the California patrons of the game are favorably disposed towards us and would aid us with their patronage if we undertook such a plan. A meeting will probably be called in a week or two, when we will organize, and then we can begin the real work.

"We have in view suitable grounds for a ball park convenient to two lines of cable cars, and can readily obtain the capital necessary to fit them up. Where the outside clubs will be located I cannot definitely state, but Fresno and Sacramento will probably be in the new league. Each club will be incorporated and sufficient stock will be issued to place it on a solid financial basis. Yes; I guess we can make the magnates hustle a little."

The advent of the Boston team on the local diamond has maintained the interest in base ball even though the championship season has ended. The Boanville men are a great team and are playing the best kind of ball they know how. Their work on the diamond is a revelation to local "fans," who, judging by the showing made by the California clubs against the New Yorks, Chicagos and All Americans, thought the former could play ball with any of them; but the easy yet unerring way in which Hart's Combination handled themselves amply proves that against a first class team the home players are not in it. By the way, it was fun to see the visitors pick out one of "Sissy" Wehrles' best last Sunday whenever they needed a hit. No strike-outs there when a hit meant a run.

King Kelly, the Boston "beauty," and contract jumper, struck town last Monday and has been turning himself loose ever since. He is out here for the purpose of inducing the members of Hart's combination to also break their contracts and join the Brotherhood and claims to have secured several members of the team. Kelly has promised Mr. Hart to catch for the Boston's in Sunday's game, but no dependence can be placed on his promise. In any event the people on this coast have not forgotten the outrageous manner in which he went back on Spalding a year ago after signing a contract to play with the All Americans, and should he appear on the local diamond he would not be accorded as hearty a welcome as he receives in some of the Eastern cities.

It would be interesting to know just what the reasons are that induced the Board of Directors of the California League to award Oakland the championship, when even Robinson's lawyers admitted they had no case and that the pennant rightfully belonged to San Francisco. Director Campbell said the reason he voted as he did was because Finn admitted that he would have claimed the championship had his team won the exhibition game. This is laughable, but the public is unwilling to accept Director Campbell's admission that he is an idiot. As though Finn's claim to the pennant on those grounds would have settled the matter.

Clarke has returned East and has left nothing but the pleasantest recollection of his great pitching abilities and gentlemanly conduct. It is hoped that he will return to California in the near future.

The makeup of the California League for the season of 1890 has not yet been decided upon. All that has been settled is that the League will be composed of six Clubs, as Stockton has concluded to retain its franchise another year. This is good news for the patrons of the game.

A rumor has been going the rounds that the League grounds were to be moved to the end of Castro Street Cable-road. President Mone when asked about it said there was absolutely nothing in the report. The Haight Street grounds are owned by the Southern Pacific Company and the League Directors have an iron clad lease which will not expire for two years. They are entirely satisfied with the grounds, and will not move until they are compelled to, and then they will take new grounds that are accessable to more than one line of cars

Jim Hart will not decide whether he will take the Bostons to Honolulu, until the next steamer from there arrives. Should he conclude to make the trip, he will be gone three weeks, thus shortening the team's stay in this city that length of time.

Finn, at the meeting of the Directors last Saturday night, filed a protest against Robinson being allowed to remain in the League. As the meeting was a special one, the protest could not be acted upon.

ROD.

Fish Commission.

The monthly meeting of the Commission was held at 220 Sutter street, on Tuesday afternoon last. Present, Hon. Joseph Routier and Hon. J. Downey Harvey. The minutes of the preceding meeting were read and approved.

The report of Chief of Patrol F. P. Callundan was then read, as follows:

MONTHLY REPORT OF CHIEF OF PATROL F. P. CALLUNDAN.

THE HONORABLE BOARD OF FISH COMMISSIONERS—GENTLEMEN:—In presenting a report of the workings of your deputies for the month of November, 1889, I beg leave to speak in praise of the gentlemen commissioned by your Board as Deputies. They have invariably been prompt in carrying out suggestions, and in so far as I can judge, have been scrupulously discreet and faithful whenever perplexing or embarrassing emergencies have been presented. Their methods of working have been closely studied, and in several particulars it seems possible by slight changes to increase the efficiency of the system. Such changes will be made, and it is hoped that at the next meeting of the Board even greater results can be mentioned than those now laid before you. The Honorable Board will remember that at the date of my last report three very important cases were pending, viz: That of the people vs Sawyer Tanning Company of Napa; the People vs. W. R. Knight & Co. of Sacramento, and the People vs. two companies of Chinese fishermen at Martinez. I have to report that in the first case a decision adverse to the Board of Fish Commissioners was rendered on Nov. 23rd by Justice Thompson of Napa. In the decision he suggests one or two points in testimony which he thinks might have been strengthened. The suggestions have been noted, and in future prosecution the weaknesses will be guarded against. Justice Thompson's decision was as follows:—

[Justice Thompson's decision was published in this paper last week.—ED.]

In prosecuting the Sawyer matter the greatest alertness and energy were shown by the special counsel for the Board, Henry Hogan Esq., of Napa, and its merely his due to say that but for his assistance the matter would have gone by default.

In the case of Knight, Justice Devine, of Sacramento, stood for the prosecution upon grounds which have not been written in so far as I know, but the jury failed to agree which was excepted to by Assistant District Att'y A. J. Bruner, and which in his opinion afforded room for successful appeal to the Superior Court.

The Martinez case against Chinese fishermen has been decided in favor of the prosecution after a re-trial, and the decision will go near to stopping illegal fishing in San Pablo Bay and along the Contra Costa shore.

On November 1st, before Hon. Judge Lawler in this city, two Chinese were convicted and fined $50 each for fishing unlawfully.

On the 6th, the case at Martinez came on regularly for trial. Defendants demanded a jury trial and Deputy Reilly was sent to Martinez a day before the trial to guard the interests of this Board.

On the morning of the trial, Deputies Curley and F. H. Callundan went to Martinez, and all three of the officers testified conclusively for the prosecution. A demurrer was interposed by the defense that there was a misjoinder of parties, and the demurrer was sustained by Justice Mills who instructed the jury to acquit. The jury retired and after twenty-five minutes, returned a verdict of guilty despite the order of the judge. Judge Mills set aside the verdict and ordered a new trial for November 16th.

November 9th was passed at Napa, testifying in the Sawyer Tannery case. At the hour of adjournment the testimony was incomplete, but other engagements of the court compelled the setting over of the case until November 12th, at which time the testimony was closed and the matter taken under advisement.

Deputies Reilly, Curley and F. H. Callundan, on November 9th, arrested three Chinese hawkers for having in their possession the young of fish. Two pleaded guilty and were fined $50 each.

On the 11th Deputy Tunstead found in possession of the firm of Christy & Wise, San Francisco, deer skins from which all specific evidence of sex had been removed, and Mr. Wise was held to answer for the misdemeanor on November 13th.

On the 15th, by my direction, Deputy Tunstead filed complaint against the firm of Clayburgh and Waldeck of this city for having in possession deer hides without evidences of sex, and on the same day the firm of Cahen Bros., also of San Francisco, was also apprehended with similar skins in its possession. Both firms were ordered to appear before Judge Rix for trial.

November 16th was spent at Martinez trying the Chinese bag net case, and after a trial in which I feel bound to state that for the defense there was more perjury than I had ever before seen, the jury returned a verdict for the defendants. The same defendants were held to appear on Nov 30th for having small fish in their possession.

The case against Cahen Bros. was partially heard before Judge Rix on Nov. 21st, and then postponed until Nov. 23d, at which time it was again postponed until some day in December.

On November 21st Deputies Reilly, Curley and F. H. Callundan captured three Chinese junks in San Pablo Bay with twelve Chinese bag nets and small fish, and took them to Martinez, where they will be tried on December 5th.

November 23 I was at Napa to receive the decision of Justice Thompson, which appears elsewhere in this report.

Deputies Reilly and Curley, on November 25th, arrested thirteen Chinese at South San Francisco with boats, nets and small fish. The case has not yet been set for trial.

The decision in the Martinez case for having small fish in possession was rendered on December 2nd, and is as follows: The five men already convicted were fined one hundred dollars each. The other five whose trial had yet to come, immediately pushed for an instant trial, thinking that because Mr. F. H. Callundan was the only witness present for the prosecution they might break down the case.

Judge Mills finally consented to hear the case and it was tried on December 2nd without a jury. After a patient hearing Judge Mills found four of the men guilty as charged and fined them sixty-five dollars each. The fifth man could not be positively identified.

The actual work done is but poorly recited within the space proper to this report, but it may be said in general terms that the deputies of the Board are actively engaged every day in carrying out the directions of the Board. Since the pushing of prosecutions against hide dealers, tanneries and transportation companies the skin buyers along the railway lines to the northern partsof the State no longer ship by rail, but send their hides to the coast, where they are placed on board the coasting schooners and steam vessels and are brought to San Francisco in that way. Discovery of this fact has doubled the work of the deputies, since they are compelled to watch the whole city front. A suggestion in relation to fish has been made and it is respectfully offered for the action of the Board.

It is the habit of many men to visit the streams along the coast at this season of the year, and take therefrom by hook and line and other means, small fish weighing from one-quarter pound up to three or four pounds of the salmon or salmon trout families When remonstrated with, the plea is set up that the fish are not trout nor salmon trout, but are salmon. It is apparent that if the fish are salmon, they are the young of salmon, the catching of which is specifically prohibited by Section 636 of the Penal Code at any time. If the fish are salmon trout, they cannot legally be caught between November 1st and April 1st of the succeeding year. On either horn of the dilemma, the catchers are impaled, and in behalf of those who fish legitimately, in proper season for the fish which populate the coast streams, it is recommended that the deputies of the Board be instructed to arrest all persons found with trout, salmon trout, or the young of salmon in possession.

The labors of the Board are meeting appreciation in every quarter, except among those who violate the law.

Respectfully submitted,

F. P. CALLUNDAN, Chief of Patrol.

The resignation of Deputy Fish Commissioner Frank Anaya of Modesto, was tendered and accepted.

Letters from Chicago, Wichita Kansas, and Oklahoma offering to furnish Bob White quails were read, and prices varied from $2 65 to $4 per dozen. The Board decided to await further offers before taking action.

The matter of appointing deputies in various parts of the State, whose especial interest should be the enforcement of the game laws, was discussed. The Commission had no means at command to pay such appointees, but if the Chief of Patrol desired, as he was called from place to place, to select proper men for appointment as deputies there could be no objection, and both President Routier and Secretary Harvey were willing to lend all a sistance possible.

After the payment of outstanding bills the Commission adjourned to meet at call of the President.

A Muddled Law.

An error in the authorized edition of the Fish and Game law of New York, last published, is causing confusion in that State. The law of 1886 allowed the killing of deer until December 15th, but an amendment passed and approved in 1888 prohibited the killing of deer and the sale of venison after November 15th. This amendment was omitted from the official publication of the laws, and the authorities have therefore neglected or declined to arrest offenders. But on November 19th Eugene G. Blackford, President of the State Fishery Commission, made official publication of the determination of the Commission to prosecute offenders, as notice of the law as amended had been sent throughout the State for general information. Dr. William Kidd, State Game Protector, has issued similar notice in protection of other game, and offenders will be duly punished. A dealer in whose possession trapped, partridges were found, exposed for sale, was compelled to pay full penalty, and for shooting quail and rabbits out of season a farmer was likewise mulcted. The laws for the protection of game are enforced in the Empire State—as they should be in California and in every other State. A fine serves as an exemplary remembrance to any who require something more than mere notice of the law.

New English Racing Rules.

The revised Rules of Racing have been passed, and come into operation in 1890. Most of them have either been shortened or added too, but some are new, as, for instance, in Part XIX., Rule 141. Rapier in the Sporting & Dramatic News says: This sound suggestion was, I believe, framed by Sir George Chetwynd. It runs as follows: "An owner running two or more horses in a race, may declare to win with one of them, and such declaration must be made at scale. A jockey riding a horse with which the owner has not declared to win, must on no account stop such horse, except in favor of the stable companion on whose behalf declaration to win has been made." Under the old rules, no time was indicated for a declaration; indeed, there was no rule about it, and it was only, therefore, a custom which laid itself open to the following possible fraud:—An unscrupulous owner might run two horses in a race, one likely to be a hot favorite from its public form, and the other a dark, worthless animal. He might put a good jockey on the former, and tell him, just as he was mounting, to go to the post, that he had declared to win with his other horse, and therefore the favorite was on no account to come near. Of course the moment the numbers went up the fraudulent owner would get someone to lay against the fancied horse, and then only at the last moment would he go to the Clerk of the Scales and tell him he declared to win with the dark horse. The official would hardly have time to notify this fact on the number board before the horses would be running. I believe the original idea of declarations was to enable an owner to try and win a two-year-old race with the penalised animal of the two, and thus save the maiden allowance of his other horse which was supposed capable of winning the race easily if no declaration were made; and a very valuable thing for the owner, in the days when maiden allowances were permitted in the Middle Park Plate, besides the many valuable three-year-old sweepstakes that are still fashionable, and which contain allowances for maidens. It is singular no hard and fast rule should have been made before now. Some of our prominent California stables would have saved the public a little money if they used second colors and made a declaration.

W. T. WOODARD

Will hold a

BREEDER'S COMBINATION SALE OF

STANDARD-BRED STOCK

at

Lexington, Ky.,

FEBRUARY 17, 18, 19, 20, 21, 22, 24, 25, 1890.

Entries Close January 15, 1890.

keeps horses healthy, promotes digestion, fattens horses, loosens the hide, assists the appetite, prevents leg swelling, strengthens the kidneys, regulates the bowels and destroys worms. **$7.50 per 100 lbs.** Ask your dealer for it or send to

MANHATTAN FOOD CO., 206 Clay St., S. F.

To Horse Breeders and Stockmen.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 85 acres; one mile frontage on Clear Lake; 310 acres alfalfa land; 120 acres now seeded to alfalfa, cuts six tons per acre; 7 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,000; three barns, capacity 300 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cool spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

COLE'S OSSIDINE. An Infallible Cure FOR CURB Splint, Ring & Sidebone, Spavin ALL Bone Enlargements Sore Shins &c. Richard Cole TRADE MARK

OSSIDINE

Results obtained at the well-known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it: and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used. Very respectfully yours,

S. A. BROWNE & CO., Prop's.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to

Mr. JEROME I. CASE, Mr. FRED. GEBHARD, Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),

And hundreds of others from whom we have very flattering testimonials.

FOR STOCK.

COLIC AND GRUBS.

I have used Simmons' Liver Regulator in Colic and Grubs with my mules and horses, giving them about half a bottle at a time, and have not lost one that I gave it to. You can recommend it to every one who has stock as the best medicine known for all complaints that horseflesh is heir to.

E. T. TAYLOR, Ag't for Grangers of Ga.

FOR CHICKENS.

In using Simmons' Liver Regulator (Powder) with my chickens for Cholera, I take and mix it with the dough and feed it to them once a day. By this treatment I have never lost a single chicken in the last five years from either Chicken Cholera or Gapes.

T. G. BACON, Edgefield, S. C.

HOG CHOLERA.

A reliable gentleman who raises every year about one hundred head of hogs told me he never lost one from Cholera, although the disease had often appeared among his herd. His remedy is Simmons' Liver Regulator given in drenching—about double that given to a man. I give this information for the benefit of those whose hogs may be attacked with Cholera.—PROF. F. P. HOPGOOD, OXFORD, N. C.

SIMMONS LIVER REGULATOR

is so conveniently given. The Powder mixed with the feed will be eaten by horses, cattle hogs, and chickens readily, while the Liquid (prepared) is easily given as a drench.

—ONLY GENUINE.—

Manufactured by J. H. ZEILIN & CO., Philadelphia, Pa. Price **$1.00.**

$3,000. GUARANTEED. $3,000.

THE

BREEDER AND SPORTSMAN'S

-: Futurity Stakes :-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

$3,000. GUARANTEED $3,000.

Being the oldest established firm in the live-stock business on this Coast, and having conducted important auction sales in this line for the past fifteen years, amounting to one half a million of dollars, we feel justified in claiming unequaled facilities for disposing of live stock of every description, either at auction or private sale. Our list of correspondents embraces every breeder and dealer of prominence upon the Pacific Coast, thus enabling us to give full publicity to animals placed with us for sale. Private purchases and sales of live stock of all descriptions will be made on commission, and stock shipped with the utmost care. Purchases and sales made of land of every description. We are authorized to refer to the gentlemen whose names are appended.

THE IMPROVED NOYES ROAD - CART.

PATENTED JULY 17, 1883, AND JUNE 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheel—a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17½, and Chanter a half mile in 1 10½, to a Noyes Cart, says he would not take $250 for it if he could not get another; W. I. Gordon, Glenville, O.; W. B. Fasig, Cleveland, O.; Dave Muckel, Cleveland, O.; R. J. Moorehead, North East, Pa.; W. J. Chamberlain, Cleveland, O.; H. P. Malone, Bradford, Pa.; S. A. Brown & Co., Kalamazoo Stock Farm; Charles Marvin, Menlo Park, Cal.; W. H. Crawford, Lexington, Ky.; S. L. Caton, who gave Bell Boy a mark at Los Angeles, Cal., of 2:19¼, and drove Chanter a half mile in 1:06¾ and Lowland Girl a full mile in 2:12 to a Noyes Cart; Mike Bowerman, Lexington, Ky.; James Golden, Medford, Mass.; John E. Turner, Philadelphia, Pa.; T. L. Newton, Beaver Dam, Wis.; P. V. Johnston, Marshall, Mich.; W. H. McCarthy, Los Angeles, Cal.; A. W. Dennison, El Dorado, Kan.; P. O. Shank, Cleveland, O.; Charles Barnard, Boston, Mass.; Johnson Bros., Greenville, Mich.; John G. Avery, Buffalo, N. Y.; General R. L. Howard, Buffalo, N. Y.; Howard Conklin, Buffalo, N. Y.; W. D. Ham, Hennepin, Ill.; R. G. Henry, Waterbury, Conn; J. E. Hayer, Newburgh, O.; J. C. Hart, Jefferson, Tex.; A. W. Harbison, Rock Point, Pa.; Carl Hodges, Battle Creek, Mich.; Barney Treacy, Lexington, Ky.; George Forbes, Cleveland, O.; Gifford Dudley, Topeka, Kan.; William and J. L. Thompson Lamont, Pa.; C. F. Emery, Forest City Stock Farm, Cleveland, O.; R. F. Jones, Minneapolis, Minn.; John Forbes, Elyria O.; D. J. Downs Battle Creek, Mich; Frank Caton, Randall Station, O.; Arthur D. Sutton, Ind., Pa.; W. F. Neely, Grand Ridge, Ill.; Walter Clark, owner of Pilot Medium, Battle Creek, Mich.; H. R. Kingman, Battle Creek, Mich.; Dr. Sutton and H. C. Reed, Kalamazoo, Mich.; Budd Doble, Chicago, Ill.

SOLE MANUFACTURERS OF STONE'S PATENT SULKY CASE.

They will more than save their cost in one season, and horsemen campaigning trotters cannot afford to do without them. Would refer to Samuel A. Brown, Kalamazoo Stock Farm, S. L. Caton and W. H McCarthy. Address

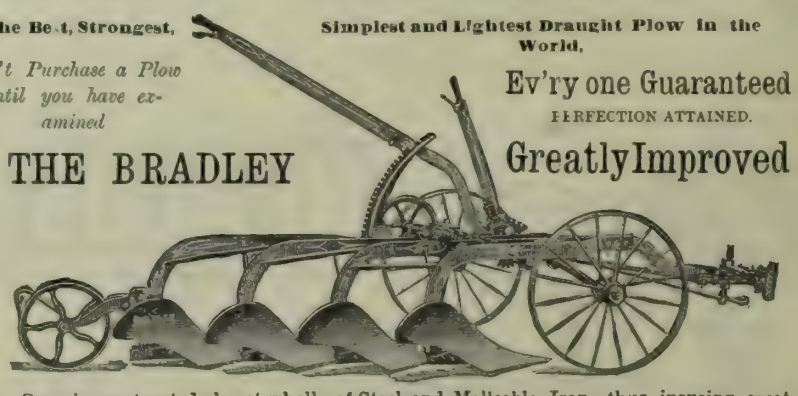
The NEW BRADLEY WALKING GANG PLOW

The Best, Strongest, Simplest and Lightest Draught Plow in the World,



Don't Purchase a Plow until you have examined

THE BRADLEY

Ev'ry one Guaranteed

PERFECTION ATTAINED.

Greatly Improved

Our Gang is constructed almost wholly of Steel and Malleable Iron, thus insuring great strength and durability, with the least weight possible.

SAN PHILIPE, CAL., November 27th, 1888.

TRUMAN, HOOKER & CO., San Francisco.

GENTLEMEN:—In trial to-day on my farm (near Hollister), the Bradley four furrow Gang Plow worked to my entire satisfaction in every respect, turning the soil perfectly, and drawing lighter than the "Perfect Gang Plows" I am using, drawing ½ horse lighter, and your Rear Wheel and "Q" Mould Boards are a great success and benefit to the Plow.

Truly,
ROBERT ORR.

Witness to trial:
J. L. LITTLE
R. F. KIRKHAM.

Simply An Episode.

HARVEY W. PECK.

We were trotting a few races "around the stove." The pace had grown slow and the going a trifle heavy. Finally one of our number pulled himself together and interrogated:

"Say, would you all mind assuming an air of interest for a few minutes, if I agree to tell you an experience of mine?"

We informed him, collectively, that our interest should never flag during the recital.

"Well," he continued, "you all know a horse that I owned several years ago. As you are aware, he had masqueraded under many different names in about as many different places, and his managers hopped him from place to place, with a vigor and determination that caused great admiration among their friends, and greater consternation among their enemies. The campaign they made with him rivaled in success the piratical career of Small Hopes many years ago, excepting that he could not go as fast as Small Hopes. Like Small Hopes. too, their scheme came to a sudden termination. They started their horse in the 2:50 class in a town in the northeastern part of this State, near the Nevada line. In this race they called the horse Joe Elliott. In this same race was a very clever local horse. The local horse sold favorite, and the betting was lively.

Elliott's owners patronized the pool box liberally, and soon stood to win a large sum of money. The other two entries were known to have no chance of winning, and interest centered in the local horse and Joe Elliott. When the race was called, the local horse had the pole and Elliott was outside. His driver laid up the heat, thinking the odds would be better, but the crowd was a trifle afraid of the stranger, though they thought their horse could certainly win.

In the second heat Elliott cut out the work, but his driver was surprised to find the local horse still at his wheel at the half mile post. He let go of Elliott a little, but the other horse stuck like a shadow. At the head of the stretch Elliott had a shade the best of it, and after a driving finish, won by a head in 2:30½, distancing the other two horses. The first heat had been trotted in 2:41

The local sports were demoralized and realized when too late that they were done for. They kicked like old time sand-lotters; they visited first the judges' stand, but the judges said they could see nothing wrong; they next visited the pool box and in a commanding tone, told the poolseller that their money should never be paid to Elliott's owners, etc., etc. The pool man gazed at them much as if reading a circus poster, but said nothing. Their third visit was made to the bar and there they were cordially received, and the bartender who waited upon them joined them in characterizing the race a "job," though in reality the bartender did not even know what horses were in the race. This attribute is not confined to bartenders alone, either, as you all know.

After the local gang had made these rounds the judges called up the horses for the next heat. At this juncture an old farmer who had raised Elliott and owned him till he was five years old, drove up to the track. When the horses were scoring he said to a friend beside him: "Pears to me I know thet brown hoss—why, course thet's the hoss I raised myself—'cept this hoss ain't got no white in his face, and mine had considerable."

After a still farther examination, the farmer was convinced that Joe Elliott was the horse he had owned in Amador Co., some years before. These suspicions reaching the aforementioned kickers they promptly brought the facts before the judges. They instituted an investigation, and when the marshal of the track tried a little kerosene on Elliott's face, the jig was up. They ruled off Elliott for a year; his owners for life; and declared the pools off. Afterward I bought him.

Now, to get down to my experience, I had owned Elliott, alias Tom, Dick, Harry and the Devil, for a couple of years, and what little driving I gave him satisfied me that he was faster than ever—I had driven him a half in 1:14—and having a slight touch of brigandage in my own disposition I longed to tackle some horse and make his owners wish for the Resurrection morn.

At last the occasion presented. I got wind of a horse in Siskiyou County that was deemed by the local talent invincible. Well, I took along Joe ——, whom you all know to be a fair hustler of a horse, and Delaney, my partner. You, every one of you, remember that hunting excursion that Delaney, Joe and myself took to Siskiyou? Of course you do. We took a good team, loaded on plenty of provisions, put my horse's harness into the wagon and tied him behind. We also had a gun apiece and lots of ammunition. We also had about $2400 in coin and greenbacks, in case we could get a race.

Journeying along by easy stages we had a splendid time, shot some game and always managed to get to a stream or some wayside stopping place where we could get hay and grain for the trotter.

At the end of ten days we were close to our destination. We held a council of war and concluded that we would get board of a farmer near town and keep the horse there, and gradually work up a race. Accordingly we carried out this plan, posed as land buyers and between times went hunting.

At the expiration of about a week the owner of "our prey"—as we termed the Siskiyou County horse amongst ourselves—was shown me by a man whose acquaintance I had formed since my arrival. I looked at the man indicated. He was gray haired, hooked-nosed, and about 50 years old I should think. He was standing alone. His hands were in his pockets, his pipe was in his mouth and his eyes were on the ground.

The next day I met him, and after a time I turned the conversation upon horses in general and trotting horses in particular. He vouchsafed the information that he had a pretty good horse himself. I inquired the animal's name and he answered "Saxon." I replied that I had a fair horse, but short of work, a trifle fat, etc., etc., for I wanted to let myself down as light as possible. To my surprise and inward satisfaction the old man assumed an air of braggadocio, and said that he was willing to "trot his horse agin eny horse in the hull country." This tickled me nearly to death, for I had been informed that the entire surrounding country would go broke if this horse was beaten a race. I carefully concealed my joyous symptoms from the old man, and replying that I wasn't looking for horse races, I left him and rejoined Delaney and Joe. When I communicated the news to them they laughed immoderately, and Joe said: "By hookey, we'll flag the old devil if he'll stay with us. Did you ever see this horse Saxon?" I answered that I never had. "Well," he continued, "I have, and he's a skinny old brute, with a nose like a parrot." I told him that the same skinny old devil had lots of speed, and although we could beat him, it wasn't a walkover by any means.

To make a long story a little shorter, we made a race inside the next two days between Saxon and Redmond (that's what I called my horse) for $250 a side, and put up the money in the hands of a director of their bank. The race was to come off in a week, and the conditions were mile heats 3 in 5, with no specifications as to drivers.

I moved my horse to the track, and Joe and I looked after him in good shape, and at night Joe slept in the stable. Saxon and a couple of men that took care of him also came out to the track. One of these men jogged the horse every day, but never drove him very fast. Two things kind of worried me; the first was that I knew neither of these men was to drive the horse, for I could see they could not drive any; and the second was that the old man or none of his friends had even asked my horse's name, or even wanted to look at him when the race was first made. These things somehow impressed me strangely, for I thought it might be possible they knew something about my horse.

I imparted my fears to Joe, who ridiculed the idea, and said we were too far from home; that the horse was clipped, and that it was absurd to talk about any one knowing him. I finally coincided with his view, and made up my mind definitely to take every dollar we could get bet.

The day of the race came; a nice day, track in good shape, and Redmond was full of trot. Along about one o'clock the people were so thick that I wondered to myself where they all came from. All the men had money, and wanted to back Saxon. Shortly before the race started, my partner and myself had our $2,400 all up, and I guess we could have bet that much more if we had only had it.

I tell you now I thought we had a picnic, and cursed to myself because we didn't have more money.

Just then the old man that owned Saxon came up and asked me to pick a judge. After a little while I found one; the old man got his, and the pair of 'em picked the third judge.

A week previous I had secured a good sulky, and thus was in apple-pie fix. About fifteen minutes before time to start, Saxon came on the track pulling a 45-pound truss-axle sulky, and driven—did I see aright—by one of the best known drivers on the coast at that time. I hadn't supposed this man in 250 miles of us, and I felt a vague feeling of alarm at his presence.

Just then Joe came out with my horse, and I called to him, and after reaching him I walked along beside the sulky.

I asked him if he'd seen the well-known driver, and he said he had seen him when he drove onto the track with 'parrott-nose," as he always persisted in calling Saxon. I said, "Well, Joe, we might as well win right off the reel; no use in laying up a heat, as we've bet all our money now that we brought."

"The devil you have," said Joe; "good, we will make the clip fast enough to melt parrott-nose."

Slightly after two o'clock the horses were called out, my horse having the pole. As I climbed into the timer's stand I looked up the stretch and saw Saxon's owner. He was standing alone, his hands were in his pockets, his pipe was in his mouth, and his eyes were on the ground.

The horses then scored up and were recalled. I noticed that Saxon was very speedy and good-gaited. At the second score the Presiding Judge rang the bell (in those days they never started by the word, you know), and they were off, amid the low murmur of the assembled throng. The horses went level to the quarter—and as I looked at my watch it marked 38½ seconds. Down the backstretch Joe urged Redmond a little, and when they passed the half in 1:16 my horse was leading a length. I knew he was a game and reliable horse, and I'll tell you now I thought I had dead medicine. From the half to the head of the stretch the positions were unchanged, but down the straight Saxon closed up a little and was only beaten by a head in 2:31. Don't you know I didn't feel just right. Somehow, I thought that Saxon could have gone faster in the stretch. These thoughts flashed through my mind as I descended from the stand with some others. The Judges rang the bell, and announced amidst almost complete silence that "Redmond wins the heat Saxon second; time, 2:31," which was what I had it. Just then my attention was attracted to my partner, who had been watching the heat from a spring wagon outside the track. He was waving his hat and yelling:

"Hurrah for Redmond, no old skin in Siskiyou can down him and don't you forget it."

Nobody hurrahed but him, but several men did come up and offer to bet him plenty of money that Saxon would win. He didn't like to confess that he had no more to bet, so said he had bet all he wanted to.

As for me, I hastened to the stall and helped Joe and a man I had hired with Redmond.

"Rather tight work, Joe, that heat," I said.

"Yes, that horse surprised me. but this horse could have gone faster."

"Well, I don't know, do you know that the time was :31?"

"Don't care if 'twas :21, this horse could have got there plumb three seconds faster than he did."

As may be imagined, this made me feel at ease with the whole world, and I felt for the time being as though it was wrong to take advantage of these people, and then I thought of the $2,400 I would win, and my mind was busy thinking what I would do with it, when the horses were called for the second heat. As I walked toward the stand, several different men tackled me to bet on the race, and I told them flatly that nothing would please me better, but that I had up already all the money I had with me and so couldn't bet. The second heat was almost the same as the first, except the half was made in 1,15, with Saxon a length back as before. By the time they got straightened out in the stretch, however, the parrot-nosed devil came up to my horse, and after lots of whipping and yelling by both drivers, Saxon won the heat by half a length in 2:28¼.

You could have knocked me down by looking at me! In spite of all I could do the blood rose to my face and I walked to the other side of the stand and looked across toward the backstretch so that nobody could see my face. I stood there and like a man in a dream, I heard the judge say, "Saxon first, Redmond second, time 2:28¼." "My horse is beaten right now" kept going through my head. After the timers and everybody had left the stand, I went down too, and straight to the stall. As I got close to Joe I muttered:

"By the eternal, Joe, that horse can beat us."

Joe looked glum, but his eyes sparkled excitedly as he answered:

"Tom, I'll tell you this much. If that damned horse can come two more heats like he did this last one, he'll beat us sure, for this horse was doing all he could. I told you he could go three seconds faster than the first heat and he nearly done it this time last, but it wasn't fast enough. There's no telling how fast that parrot-nosed brute can go," and while Joe was still talking I walked away.

You fellows grin, but if you had been in my place you would have felt as I did, and that was mighty nervous. I saw my partner leaning against the track fence. As I approached he was saying in a mechanical tone, "Blankety blank his long-haired hide. Blankety blank the long-eared, parrott-headed, slabsided brute, with a head like a giraffe and a hind leg like a pump handle. May the devil fly away with him!"

Several years afterwards, when I told a mutual friend of ours what he said on that occasion he denied it, but he said it just the same, and I'll swear to it if need be.

Saxon won the third heat in :27½ and the fourth in :27, beating my horse a little each heat, and I knew he could have trotted a mile in 2:25 if it had been necessary. Well, I was sick, and my partner, Joe and I sat down on the straw in the stall while our horse munched a mash Joe had given him. The horse had trotted a hard and tedious race, (for the last two heats Joe, had scored Saxon until he was fined twice, in the effort to wear him out, but he couldn't do it,) indeed he went a better race than he ever had since his prime, finishing every heat with the whip ringing out over him for the last quarter. So I couldn't blame the horse, you see, he did his best, but we were simply over-matched, and the only thing that was left us was experience.

Joe broke the silence. He said "I never will go two or three hundred miles from home again to take in somebody, and then get beat by a lanky-parrott nosed horse that lives on sawdust—never again." We didn't say anything; we had nothing to say, but we felt a whole lot I can tell you. The next day we hitched up, packed our traps into the wagon and headed for home feeling glad we had a home to go to. You know how anybody feels that way?

As we drove into town—for we had to go through it several acquaintances waved us farewell, while others, ironically we thought invited us to return. To this invitation Joe made such a highly flavored answer that I won't repeat it.

We had proceeded about half way through the town—and a pretty enough place it is—when we were stopped by a man named Gray, We had got well acquainted with Gray, who was a good square man. As he came up he said.

"I've something to tell you thought maybe you would like to hear it." Do you know what he told us? He told us by the beard of Mohammet that we had been duped instead of duping anybody. It turned out that the owner of Saxon and several of his friends had been angling for us for several months. No use to go into explanation—it makes me mad yet—I found out all about it afterwards.

We thanked Gray and drove on. Just as we were leaving the town I spied the old devil himself. By that I mean Saxon's owner. He was standing alone, his hands were in his pockets, his pipe was in his mouth, his eyes were on the ground. As a native of Arabia would say, "May Jackals polish his bones."

An Important Transaction.

The most important business transaction that confronts the agriculturist, is the purchase and selection of seeds and orchard stock. No matter how well posted and excellent a man's judgment may be, when it comes to buying seeds and plants, he is largely at the mercy of the dealer, who, if unscrupulous, can do him irreparable injury. Too great care cannot be exercised in selecting a dealer of established reputation for reliability. Such a concern is the well known firm of Trumbull & Beebe, 419-421 Sansome Street, whose advertisement appears on another page in this issue. They carry a large stock of the very best varieties of seeds, trees and plants. To get an idea of their goods, send for their catalogue, which is mailed free to any address.

The Allen Farm.

Mr. W. R. Allen, of Pittsburg, Mass., has been one of the principal buyers of gilt edged brood mares for the past year or two, and much curiosity has been aroused, as to what his collection really consists of. The following is a correct list of the gentleman's mares, which will no doubt be read with interest. The name, color, year foaled, sire and dam, and also the relationship existing to some well known trotter is given.

1. Alfaretta, bay, 1886, Kentucky Prince—Betty. By the sire of Guy, 2:10¾, out of a half-sister to the dam of Clingtone, 2:14 "the demon trotter."

2 Brava, bay, 1885. Baron Wilkes, record 2:18—Mary A. Whitney, record 2:28. Sister to Bon Mot, 3 years, 2:29¼.

3. Brenda, bay, 1885. Kentucky Prince—Miss Brunette, By the sire of Guy, 2:10¾, out of the dam of Black Prince, 2:25½, etc.

4. Cloister, bay, 1886. Chichester, 2:25¼—Cracovienne. By a son of Harold, sire of Maud S., 2:08¾ out of the dam of Woodford Abdallah, sire of Kenilworth, 2:18.

5. Edgewater Belle, bay, 1879. Edgewater—Easter. Dam of Edgemark, fastest four-year old stallion, 2:16; her first foal.

6. Edita, bay, 1886. Kentucky Prince—Elise. By sire of Guy 2:10¾, out of a sister to Elaine, 2:20; Prospero, 2:20; Dame Trot, 2:22; Elista, 2:22½; Mansfield. 2;26, Antonio, 2;28¼; Miranda, 2;31.

7. Elista, record 2:22½; bay, 1883. Messenger Duroc—Green Mountain Maid, dam of Electioneer, sire of Sunol, best three year old 2:10½, etc., and dam of seven with records from 2:20 to 2:28¾.

8 Esperence, bay, 1882. Harold—Englewood. By the sire of Maud S, 2:08¾, out of a sister of Wedgewood, 2:19 etc.

9. Fedora, brown, 1886. Kentucky Prince—Cassandra. By the sire of Guy 2:10¾, out of a sister of Hogarth, four years 2:26, and Harrietta, dam of Company 2:19¾.

10. Geneva, record 2:19½, bay, 1882. Princeps—Ozone. Sister in blood to Trinket 2:14.

11. Guatama, bay, 1882. Auditor—Gossip. By the sire of Epaulet 2:19, out of a sister of the dam of Sarcenette 2:25¼.

12. Guyda, black, 1883. Messenger Duroc—Leslie. By the sire of Elaine 2:29, out of a full sister to Guy 2:10¾.

13. Jessamine, bay, 1885. Princeps—Mayflower. By the sire of Geneva 2:19½, out of a daughter of George Wilkes 2:22.

14. Jet Wilkes, black, 1886. Guy Wilkes 2:15½—Sable, full sister to Sable Wilkes 2:18, best three years record when made.

15. June Rose, bay, 1882. Kentucky Prince—Atalanta. By the sire and out of a half sister of Guy 2:10¾.

16. Last Chance, record at three years 2:28¾; bay, 1885; Victor Von Bismarck, sire of Edgemark, 2:16 etc. Dam by Dictator, sire of Jay-Eye-See 2:10.

17. Lindora Wilkes, bay, 1886. Guy Wilkes 2:15½—Rosetta, by The Moor, sire of dam of Bell Boy, three years 2:19¾ (sold at auction for $51,000).

18. Lizzie Phallamont, bay, 1886. Phallamont—Daisy HcK. Granddaughter of Phallas 2:13¾ etc.

18. Louise, brown, 1881. Merchant—Pansy. By a son of Belmont, sire of Nutwood 2:18¾ etc.

20. Lucetta, bay, 1883. Gen. Knox—Lucia. Full sister to Beulah 2:19½. Granddaughter of Lucy, 2:18¾ etc.

21. Lyre, bay, 1886. Arthurton—Gabrina. By the sire of Arab 2:15, out of a blood sister of Jay Bird, sire of Allerton, three years 2:18¾.

22. Malvaeia, bay, 1884. Lord Russell—Malmaison. By the brother of Maud S. out of a sister to Primrose.

23. Mariola, bay, 1886. Chichester, 2:25¼—Mara. Out of a half sister to Dick Moore, 2:22½, etc.

24. Maudlen, bay, 1883. Harold—Nutula. By the sire of Maud S, 2:08¾, out of a full sister to Nutwood, 2:18¾, and half sister to Maud S, 2:08¾.

25. Minnie Wilkes, bay, 1884. Sultan—Kitty Wilkes. Sister to Rajah, 2:29¼. By the sire of Stamboul, 2:12¼, out of a half sister to Garnet, 2:19.

26. Mintaka, bay, 1885. Chichester, 2:25¼—Minna Wilkes. A full sister to Kentucky Wilkes, 2:21¼.

27. Mirella, chestnut, 1885. Kentucky Prince—Miranda, record 2:31. By the sire of Guy, 2:10¾, out of a daughter of Green Mountain Maid, the greatest of speed producing brood-mares.

28. Miss Majolica, bay, 1884. Startle—Jessie Kirk. Full sister to Majolica, 2:15.

29. Repose, gray, 1884. Conway, record 2:18¾—Tulip By a son of Wedgewood, 2:19, out of a producing daughter of the famous Madam Dudley.

30. Rusina, gray, 1887. Belmont—Miss Russell. Sister to Nutwood, 2:18¾; Cora Belmont, 2:24½, etc., and out of dam of Maud S, 2:08¾, etc.

31. Sun Maid, bay, 1886. Belmont—Sonnet. By the sire of Wedgewood, 2:19, out of a sister of So So, 2:17¼.

32. Sable Hayward, black, 1882. Poscora Hayward, record 2:23½—Sable. Half sister to Sable Wilkes, three years, 3:18

33. Phallamont Girl, bay, 1885,
34. Pokie Phallamont, bay, 1888,

} Full Sisters—Phallamont and Pocohontas Girl,

granddaughters of Phallas, 2:13¾, and Pocohontas Boy, sire of Buffalo Girl, 2:12½.

35. Atalanta Wilkes, black 1887. Guy Wilkes, 2:15¾—Atalanta. By sire of Lillian Wilkes, 3 years, 2:17¾, out of a sister, of Beautiful Bells 2:29½, dam of Bell Boy, 3 years, 2:19¼, &c.

36. Marianna bay, 1887, Sorrento—Mary Whiteman. By a son of Woodford Mambrino, 2:24½, out of a half sister to Robert McGregor, 2:17½, sire of Bonnie McGregor 2:12½.

37. Mica bay 1887. Chichester 2:25½—Mary Bell. By a son of Harold (sire of Maud S. 2.08¾), out of a sister to Dick Moore 2:21½.

38. Myth black 1887. Stranger—Mystery. By a son of Goldsmith Maid 2.14 out of Daisy Burns, 2:29¾.

39. Nydie bay 1887. Kentucky Prince—Camille. Sister to Stevie, 2:28¼, &c.

40. Princess Royal brown 1887. Phallas, record 2:13¾—Hermia by Swigert, sire of Moody 2:18¼ &c.

41. Rubra bay 1887. Lord Russell—Primrose. By the brother of Maud S. 2:08¾. Sister to Redwald, four years 2:28½ etc.

42. Rubia bay 1887. Guy Wilkes record 2:14½—Ruby record 2:19¾. Bay the sire of the fast two-year-old stallion Regal Wilkes 2:20¾; out of the sister of Stamboul, 2:12¼.

43. Salve dark grey 1887. Lord Russell—Noonday, By the sire of Maud S. 2:08¾; out of a half sister of Jay-Eye-See 2:10.

44. Syene brown 1887. Guy Wilkes record 2:15¼—Sable Full sister to Sable Wilkes three years old 2:18.

45. Venezuela brown 1887. Chichester record 2:25¼—Vassar, dam of Vasco, sire of Ed. Rosewater, best two year old pacer 2:20½.

46. Waterlilly, bay, 1880. Belmont—Waterlilly. Full sister to Wimbledon, 2:29½. By the sire of Nutwood, 2:18¼; out of a granddaughter of the famous Waterwitch.

47. Zorab, bay, 1887, Stranger—Brooch. By the son of Goldsmith Maid, 2:14, out of a full sister to Opal, 2:23.

48. Bravissima, bay, 1889. Robert McGregor, record 2:17½, sire of Bonnie McGregor, 2:13½; dam Brava, mentioned above as No. 2.

49. Siva, chestnut, 1889. Guy Wilkes, record 2:15¼; dam Sable Hayward, mentioned above as No. 32.

50. Ysmyn, bay, 1889. Phallas, 2:13¾-Jessamine, by Princeps, sire of Trinket, 2:14, &c. See No. 13.

51. Laura Phallamont, bay, 1887. Phallamont—Lady Eldridge. A granddaughter of Phallas, 2:13¾.

52. Experta, bay, 1888. Electioneer—Esther. Full sister to Express. record 2:21, trials in 2:18.

53. Planetra, bay, 1888. Electioneer—Marphra. By the sire of Sunol, best three year, 2:17½, Palo Alto, 2:12¼, and Manzanita, four year, 2:16, the fastest trio ever sired by any stallion. Full sister in blood to Palo Alto, record 2:12¼.

Sale of Thoroughbreds.

The sale of yearlings and three-year-olds from Mr. Pierre Lorillard's Rancocas stable, at the American Horse Exchange on the 26th of November, by Colonel Bruce, was somewhat a failure, the sixteen head of yearlings only bringing a total of $5,215. The horses sold, with buyers, were as follows:

THREE-YEAR-OLDS.

Blazon, b g, by Duke of Magenta, dam Blossom; T. Hart, $300.

Esau, ch g, by Mortemer, dam Judith; W. French, $810.

YEARLINGS.

Varina, br f, by Pizarro, dam Virginia Wallace; E. P. Keane, $460.

Tortuga, ch f, by Glenelg, dam Hayti; J. M. Kimbrough, Kentucky, $360.

Woodbina, ch f, by Glenelg, dam Floral; C. E. Railey, Kentucky, $390.

Glade, ch f, by Dalnacardoch, dam Fairwater; C. D. Sullivan, New York, $400.

Ma Belle, b f, by Charaxus, dam Elite: A. W. Weingardt, New York, $375.

Belle of Orange, b f, by Duke of Montrose, dam Jersey Girl; J. P. Dawes, Canada, $375.

Morgheda, br f, by Iroquois, dam Marchioness; D. Baldwin, Long Island, $360.

Brune, b f, by Iroquois, dam Brunette; J. M. Kimbrough, Kentucky, $210.

Faustine, ch f, by Forester, dam Faustina; T. Hart, New York, $280.

Justicia, ch f, by Dalnacardoch, dam Equity; J. M. Kimbrough, Kentucky, $320.

White Veil, b f, by Bersan; dam Jolly Nun; C. E. Railey, Kentucky, $200.

Pardon, b c, by Emperor, dam Petition; C. A. Sweeney, New Jersey, $115.

Caraccus, b c, by Glenelg, dam Petiola; Chas. Sattler, New York, $400.

Graceful, b f, by Bersan, dam Grecian Bend; J. M. Kimbrough, Kentucky, $260.

Phonograph, b c, by Glenelg, dam Acoustic; Barney Riley, New Jersey, $400.

Gossip From a Private Letter.

The following interesting gossip about California flyers, says the American Cultivator, is from a private letter to Mr. Wesley P. Balch, of Boston: "The country here is looking as green as with you in June, and our early barley feed up to eight inches. It looks now as though we would have a mild winter with green feed all the way. Our horses are all doing well (at San Mateo Ranch) with the exception of a little distemper among the weanlings. Sable Wilkes' first crop of colts are very fine, and in the corral show lots of speed and breeding. Goldsmith came home the other day with his trotters. His last race was with Regal Wilkes, a stake race and a walk-over in 2:20¾. He meant to have driven him in 2:20, but went his first quarter too slow. He could have easily beaten 2:20, and good horsemen like Quinton says he could have beaten 2.18. He is a wonder, and worth more than any colt raised on this place; as fine a looker as you ever saw, dark blood bay, form perfect and feet and legs like steel, head and ears rather large, but carried well when in motion. He has the old horse's disposition and lasting qualities, and can't help making a race horse. Lillian Wilkes, 2:17¾, we brought home in September, and are doing nothing with her, excepting to put on a light blister. Her injury is nothing serious, and most horsemen would have continued using her. Hazel Wilkes did well this year. She is a great filly to come home, but a poor one to get away. Her sister Una got a record of 2:30, and will make a good four-year-old next season. I wish you would keep track of the two-year-old colt Silver Spray, brother to Hazel Wilkes and Una, sold to a man in Boston at the Kellogg sale last spring. He should make a fast colt and laster as well. Goldsmith says that he could easily have put him into the thirty list this year. He was a colt that wanted lots of work, and could stand it. What do you think of Sunol, 2:10½; a great exhibition mare, isn't she? Palo Alto, too, and Stamboul! Crawford had rather a close call for his $5,000 bet with Rose, on 2:12 time. Should the weather clear off, and have good day and track, he may knock off that one-quarter second, but Mr. Crawford will watch the performance very sharp. Crawford was at ranch a few days since, and wanted Mr. Corbitt to put a price on Regal Wilkes, but he is not for sale. What has got into your New England breeders? Your youngsters are all going for tin-cup records, and Kentuckians as well. Such records don't count out here, where we have race horses. I see the horsemen are stirring up the Nelson-Alcryon race. Hope there was nothing crooked in it, but to us here it looks a trifle so. We are breaking our yearlings now, and some of them are showing very well. Will probably have two two-year-old fillies out of Nutwood dams to go through the circuit with next year."

I have long used Simmons Liver Regulator for my horses, cows sheep and chickens. To my horses I give a teaspoonful of the powder in a mash three times a week. I find it invaluable for Cough, Hide-bound or Pneumonia. Giving it to my game chickens for Cholera I have not lost one in the last five years. I make this statement that mankind may know Simmons Liver Regulator as a valuable remedy for the ills of man and beast.—T. G. Bacon, Edgefield, S. C.

First Principles of the Science of Breeding.

BY GARTH.

The progress of every science is from the empirical to the rational. Isolated facts are observed and utilized in the experience of individuals. The recurrence of these facts leads some one to gather them up and to follow their trend till the law under which they arrange themselves as effects is discovered. The law thus inferred stands forth for the guidance of future experimenters; and as each new investigator widens the field and discovers new laws, or fresh applications of those already known, the science—the organized body of knowledge—grows.

The science of breeding, as far as it is known, has had this history; and the great advantages which have been made in it within the past ten years are clearly due to the intelligent and patient observation of the facts of breeding as shown by performances, but still more to clear and trustworthy generalizations founded on them.

The day of empiricism in breeding is over. That of scientific and rational selection of parents for their possession of qualities which it is desired to perpetuate has come, and come to stay.

The need of the present is the constant insistence upon, and the intelligent application of, the few fundamental principles of the growing science of breeding which have been established by the successful experience of breeders in all parts of the country. I propose, in the present article, without making any claim to originality of treatment, to re-state three of these principles.

1. A horse is what he is born. That is, he is the sum of all the powers, capacities and tendencies inherited from his ancestors, near and remote, each individual ancestors, exercising upon him an influence proportional to the nearness of such ancestor, and to the ability to transmit the powers, capacities and tendencies which he or she possesses or possessed. That some individuals, both male and female, have this power to reproduce themselves in a special degree cannot be disputed. Why they have it has never as yet been satisfactorily explained. When sire and dam in themselves and in their inheritance complement each other, two and two sometimes make five; when they do not, two and two fail to make four. A horse is a complex organism. To be the highest type of his class he needs a perfect physical organization, intelligence and courage or will-power. When sire and dam contribute harmoniously to reproduce these qualities in their offspring, we frequently see them producing individuals greater than themselves. These, in turn, transmit their enhanced inheritances; and it is following the lines of this cumulative transmission of qualities that all real progress in the science of breeding has been made.

Neither the great sire theory nor the great brood-mare theory of breeding can stand alone. The one is the complement of the other, and the intelligent breeder of the present grasps the truth in both, and endeavors by patient study of the blood lines on both sides from which greatness has resulted, and by judicious selection of sire and dam as individuals, to secure the best results in fixity of type and in the production of animals who have in themselves, by right of descent, the desirable qualities which the national horse of America should possess.

Following the guidance of the principle we have laid down as the foundation of a more rational method of breeding, we will not be led aside by every passing wind of doctrine. Advocates of rule-of-thumb methods allure us in vain. We become deaf to the thoroughbred charmer and the "Morgan" enthusiast, and the sound of the grinding of the "Diomed" crank is low.

We know what we want and how we may reasonably expect to get it, and knowing this, we breed for it. Nature never makes any mistakes, however many we may; and when we learn how to interpret Nature's laws, through experience and by study, we shall come nearer and nearer success.

2. *A horse is what he eats.* Given all the other requisites, the perfection of bodily vigor and ability to perform depends largely upon food, its character and amount. Food, in turn, depends upon soil and climate. Certain localities in America have been renowned as horse-producing centers—the hills and dales of Orange County, the blue-grass regions of Kentucky, and the perennial pastures of the Sunset Slope. But the latest experience goes to show that horses may be brought to a very high, if not the highest, degree of physical perfection in any of the temperate regions of this continent where food is abundaut. The beneficial results of generous feeding are strikingly illustrated in the performances of many youngsters on both sides of the Rocky Mountains, and as far north as Maine and Canada.

3. A horse is what he is made. This is another way of saying that the colt's inherited predisposition to trot can be developed into its fullest activity only by early, patient and intelligent training. But the art of training must itself be developed through experience and careful study of the nature, the inheritance and the peculiarities of families and of individuals. Breeders are naturally attracted by the immediate rewards in the shape of fame and money, and in their anxiety to secure these rewards the training is carried to the point of straining. The true theory of training is the careful and progressive development of the colt's powers by exercising them till he has reached the perfection of physical vigor, and has at the same time acquired the mental balance necessary to putting forth his greatest powers, as well as the courage and resolution to keep him up to his best in a continued effort. When this is done, without injury, the individual becomes a progenitor fit to reproduce (when judiciously mated) not only what he himself inherited, but to add the developed capacity to perform to his inheritance, and thus make further advances possible.

Before we get the two minute trotter we must have sires and dams capable of producing him; and if we have not these already, we must breed and develope them on the lines above indicated. When the nonpareil trotter does appear, I venture to assert that he will represent a distinguished ancestry of producers and performers; and more than all he will represent brains. He may come from Kentucky, from the Great West, from California, or from Maine, but wherever he comes from his breeder and his trainer will be firm believers in breeding, feeding and speeding as indispensable elements in the production of that "roof and crown" of the animal kingdom, the American trotting-horse.—(Wallace's Monthly.)

The Goodloe Trotting Stock.

Including three of the best daughters of George Wilkes will be sold by W. R. Brasfield & Co, at their Breeders Sale, Lexington, Ky. The late Col. Goodloe was a noted breeder of running horses, and had just embarked in the trotting business, and bought some of the finest mares in the whole country. All will now go under the hammer.

Subduing Wild Horses.

"The first thing to be done in breaking a bronco is to catch him," said I. N. Shores the other day, in discussing the characteristics of the festive and bucking yet favorite riding horse of the cowboys of the far West. For fifteen years Mr. Shores has followed the business of taming and training the bronco. But the great cattle ranges are filling up with settlers and the speaker seemed to lament the new era that had decreased the demand for cowboys and broncos. "I used to make $300 a month breaking broncos, but those days are gone. I can't do it now," he added, and then spoke of how things had changed since the recent and rapid settlement of the plains country. "Many cowboys break their own horses," he said; "but it used to be the custom for the owners of herds of broncos to let them out by contract to some one to break them either to the use of saddle or harness. Let me first explain the use of the word bronco. The word means wild, and any horse, whether a mustang or a thoroughbred, no matter what the stock, is really a bronco when untamed, and not under easy control. But the term as commonly used does not include a blooded horse. The horse is not naturally a vicious animal. He becomes so through ill treatment and fear. There is nothing that creates such fear in an untamed horse as man. Mountain lions and savage beasts will not alarm a wild horse like the presence of man. In breaking a bronco this must be remembered—use gentle methods.

"It is fear that makes the animal buck and jump and try in every possible way to throw the rider. To be sure, some horses are naturally vicious, and hence dangerous, but they are the exception. The horse is one of the noblest of animals, and let him learn as soon as possible that you are not an enemy Hence in breaking a horse be kind and gentle as far as possible. Ill treatment only increases in the horse that terror he naturally has for man. I am speaking of the wild horse and those that are almost so, such as the broncho, by the freedom they have had on the plains, although owned and branded. After you have lassoed a bronco," continued Mr. Shores, "the animal is then tied to a snubbing post. This enables one to get up close to the bronco. If the animal is very wild or vicious, lasso the front feet and throw the horse to the ground. I sometimes tie the front feet so the bronco can't get up. The touch of the hand will startle and scare them. Sometimes you can hear the heart beat, so great is the fear of the horse, at even the gentlest touch. In a bad case I roll the horse over the ground after his feet are tied until he becomes tired, and thereby more gentle. A bronco will often make a desperate fight. He will bite, kick and strike at you. I have often had broncos make such a desperate fight and struggle that the only way I could put a saddle on them was to place the saddle on the ground and roll the horse into it."

"What qualifications does a man need to successfully handle the bronco?"

"Strength, nerve, action and a good judgement. It is a contest between man and beast for the supremacy, hence a man wants strength and nerve. He must show his mastery over the frightened animal. The rider must be quick and agile, not only to control the horse, but to guard against accident. I can easily leap off and on a horse sixteen hands high when he is at full gallop. It is no great feat, it is practice. See how quick and active the cowboy is. He is fearless and bold in the saddle. Above all, good judgement must be used. A man who thoroughly understands his business knows the character and mettle of the horse by the time the saddle is on."

"How do you mount a bronco when breaking him?"

"Often I am controlled by the peculiar circumstances, owning to the bucking, pawing and kicking of the horse. My favorite plan is as follows: I take told of the bridle bit with my left hand and incline the horse's head toward me. I stand on the left side toward the front. I turn the stirrup with my right hand. I then put the right rein into my right hand and hold it snugly and firmly on the horn of the saddle. The horse's head has already been inclined toward me on the left, and the head cannot, when thus held, be turned either way if you keep a good grip. Then I put the left foot into the stirrup and gently raise my right leg over the saddle. Create as little fear as possible in the horse. When in the saddle, if the horse does not start at once, don't urge him. A great many think they must start the horse as soon as they are in the saddle. That is not the way. Let the horse stand a moment if he will. When you start do not attempt to go straight ahead. The bronco is sure to pitch and buck if you do Having the horse's head turned when mounting, keep it turned. The bucking is not so violent if the horse is kept turning in his course. Some will pitch and buck any way, but in breaking a bronco kept him from doing that if possible. Many of the cowboys, as they are expert horsemen and well skilled, will teach and encourage their horses to buck."

The different kinds of pitching and bucking were then described. There is the weaving pitch, the horse swinging to one side and then the other, when only an expert rider can keep his place in the saddle. The crow hop is an interesting maneuver of the bronco. He leaps into the air and back and lights on his feet in the rear of the place from which he made the pitch. He is liable then to lose control of his legs and fall. There is the wheeling buck or pitch. The bronco leaps into the air, and when he lights he has made a semi-circle, for he is facing in an opposite direction. It is a kind of a leap where the horse goes up "heads" and comes down "tails." They rear and pitch in every way. They may fall on their side or back and roll over. Sometimes the bronco will get his hips so high he will come down on his head. The tail will crack, and the rider, if an expert, will slip his leg over the horse's neck and get out of the way. There are many terms used to express the various combinations of the curves and gyrations of the bronco when man begins with him the struggle for mastery.

"The wild horse is not often found on the plains in these days," said Mr. Shores. "There are some on the Republican river and Laramie plains. There are small herds scattered over the West, but they are not numerous. The catching of wild horses used to be quite a business, but it does not pay much now. Various schemes were resorted to to catch wild horses. Their ranges are large circles which are often many miles. Relays of horses have often been used to attempt to run them down. Another play was to follow them at a distance to accustom them to the sight and presence of men, and by continually following them, tire them so they can not make a good run. Others think the best plan is to kill the stallion. Every herd of wild horses has its leader, which is a stallion that has won the place by killing his rivals or running them off to another range. The fights between the wild stallions were some of the finest sights ever witnessed on the plains in the early days, and the herd always acknowledges the leadership of the victor. When fighting, stallions wheel and kick a great deal, for each one is guarding against that which, if secured by his antagonist, will make him the victor."

"What is that?"

"The hold on the throat. Horses at play will rear on their hind legs and keep their heads more together, but when fighting, and especially the stallions, they are careful to guard their throats from attack. They will bite each other on the back and in the side, and rapidly wheel and kick, ever on the alert to catch each other by the throat. If one stallion gets a good hold on the throat of the other it means death if he can keep his grip, for he chokes the other till he dies. The victor rules the herd so long as he can whip any other that comes among them. He controls the herd just like a shepherd dog does sheep. The wild stallion is a noble and brave animal. He guards and protects the herd, and when danger is nigh he will run them to a place of safety. If any one of the herd are slow about getting out of the way of whatever threatens, the leader will bite them and make them go. His bravery is shown by returning, when he thinks the herd is safe, to investigate. The stallion will often seek a high place, with a commanding view, to ascertain what the danger may be. The wild horse hunter would often take advantage of this and shoot the magnificent animal thus standing guard. The herd temporarily being without a leader is more easily captured, but the days for hunting wild horses are about over. The country has grown so rapidly that many of the sports of the frontier are things of the past."—Brooklyn Eagle.

The Standard.

[AS REVISED AND ADOPTED BY THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS, DECEMBER 14, 1887.]

IN order to define what constitutes a trotting-bred horseand to establish a BREED of trotters on a more intelligent basis, the following rules are adopted to control admission to the records of pedigrees. When an animal meets the requirements of admission and is duly registered, it shall be accepted as a standard trotting-bred animal:—

FIRST.—Any stallion that has himself a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

SECOND.—Any mare or gelding that has a record of 2:30 or better.

THIRD.—Any horse that is the sire of two animals with a record of 2:30 or better.

FOURTH.—Any horse that is the sire of one animal with a record of 2:30 or better, provided he has either of the additional qualifications: (1) A record himself of 2:35 or better. (2) Is the sire of two other animals with a record of 2:35 or better. (2) Has a sire or dam that is already a standard animal.

FIFTH.—Any mare that has produced an animal with a record of 2:30 or better.

SIXTH.—The progeny of a standard horse when out of a standard mare.

SEVENTH.—The female progeny of a standard horse when out of mare by a standard horse.

EIGHTH.—The female progeny of a standard horse when out of mare whose dam is a standard mare.

NINTH.—Any mare that has a record of 2:35 or better, and who sire or dam is a standard animal.

Best Trotting Records.

1 mile—2:08¾, Maud S., against time, in harness, accompanied the distance by a running horse, Glenville, O., July 30, 1885.. ..2:13½, best time in a race between horses, Maud S., Chicago, Ills., July 24, 1880.....2:12, Axtell, against time, accompanied by running horse—fastest stallion time, Terre Haute, Ind., Oct. 11, 1889.....2:13¾, Phallas, fastest heat by a stallion against other horses, Chicago, July 14, 1884.....2:13¾, Palo Alto, third heat in race at Stockton, Cal.. Sept. 26, 1889.....2:15½, Jay-Eye-See, half-mile track, Lincoln, Neb., Sept. 14, 1887.....2:15¾, Great Eastern, under saddle, third heat, Morrisania, N. Y., Sept. 22, 1877.. ...2:10¾, Jay-Eye-See, against time, best five-year-old record, Providence, R. †Made in a heat race.
*Doubtful, and made in a heat race.

TURF AND TRACK.

Bither says he still has hopes of Jay Eye See being able to to go down the line.

Garrison is seriously considering whether he shall manage a stable of his own next season.

Rogers, who has trained so successfully for Capt. Brown, is taking a look round Denver.

King of Norfolk is not enhancing the reputation of his brothers by his racing at present.

Mr. Belmont's Lady Margaret, by imported Ill-used, will be bred to imported St. Blaise next season.

Mr. Pierre Lorillard's new purchase, Sailor Prince, arrived all safe, and has held a flattering reception.

Red Boy, the sire of Abi, is at Helena, Montana. He is the property of Messrs. Huntley and Preiwtt.

Willie Stewart, who was injured in the hurdle race at Oakland, went home last week feeling much better.

C. Jewett of Buffalo has a new idea; each trainer in his employ will handle only colts of the same age.

During the Chicago show W. L. Elwood sold a two year old black Percheron (Baccarat 11,327) for $6,000.

Tom Cannon, the celebrated English jockey, will be seen in the pigskin next year for Mr. Abington Baird.

J. W. Donathan will start training the youngsters on the San Simeon Ranch—Senator Hearst's—next month.

Clifton holds its ends up well against Guttenberg and Elizabethtown; the latter is not yet a drawing card.

Susie S, 2:15½, a sister, half brother, and half sister, and the dam will be offered at auction in February at Lexington.

John F. Turner, the well known driver, has bought three thoroughbred colts and may possibly have more before long.

Florentin, the three-year-old brother to Firenzi, will be bred to three or four mares in the spring, at the Rancho del Paso.

Goldsmith will be a leviathan on the Coast next season, for in all probability Hickok, Marvin and McDowell will go East.

Starter Sheridan has concluded engagements to start at Memphis, Nashville, Latonia and Washington Park, Chicago, next season.

The editor of Wallace's Monthly has purchased 200 acres of land in Washington, Penn., and will go further into the breeding business.

W. B. McDonald, until lately trainer for the Jewett Stock, Farm, has gone to New York State to superintend the Patchen Stock Farm.

The sale of thoroughbreds held by Bruce and Kidd at Lexington, closed last week, fifty five head, 39 yearlings, 16 two-year-olds sold for $27,585.

The Portland Speed Association will give a spring and fall meeting next year. About $3,000 for the spring and $12,000 for the fall meeting will be added.

Hearst, the Australian thoroughbred sold by J. K. Newton, is said to have a tremendous burst of speed, but does not seem to be able to stay the route.

Mollies Last will be bred in the Spring, Miss Ford was covered late in the season by Verano, a 7 year old son of Grinstead and Jennie D by Glenelg.

The Helena Street Car Company say that the hardiest and most useful horses they have are the result of a mustang mated with a pure bred draught horse.

It is rumored that John Stetson and a syndicate have purchased the Readville Track in Massachusetts for $300,000, and are going to convert it into a race course.

Barnes and Tiny Williams have lately purchased Metal, a three-year-old by Blue Eyes. William Dickson will train their horses for the boys, who will ride at New Orleans.

Next year The Derby (Epsom Derby) will have a new appearance, rather more attractive too for it is guaranteed to be worth $25,000 while the Oaks will be fixed at $20,000.

Harrison Bros. of Stockton sold for $1000 a yearling colt by Wildidle, dam a mare by Shannon: The purchaser lives in Washington Territory the filly was shipped last week.

W. H. Crawford says he will match a stallion for five, ten, fifteen or $20,000 against any one horse on the Coast, the race to come off at Cleveland during their meeting in June.

One of the best teams in Pleasanton is the pair Andy McDowell drives, two yearling Directors, one out of Sweetness 2:21¼, and the other out of May Day the dam of Margaret S.

The Chesterfield Nursery in England, which had twenty-three starters, was run off last month. The books offered 10 to 1 on the field. It is not often we see such liberal bids now a days.

There is a great probability of a big stallion race at Boston next year. Mr. Balch is thinking of offering $20,000, free for all stallions, while Mr. Willis talks of giving $10,000 for 2:20 stallions.

Los Angeles will have a very nice Christmas meeting of the weather is only propitious. E. J. Baldwin will start several while Kelly and Samuels, Matt Storn, Appleby and others will go down.

The local bookmakers in New Orleans do not put up the odds on their races except on off days, and thus they force the bettors to go to the track. Why do not our bookmakers do the same thing?

Old Exile is said to be looking as fit as a fiddle. He will probably not start in the Suburban, though. It is understood that Mr. Haggin has the refusal of him when he leaves the track for the stud.

Mike Kelly who has been East all the season, left the Maltese Villa horses there and is going to the Ashe ranch near Merced to work the colts for a while and select some to take back East early in the Spring.

Ohio is to the fore with a Blood Horse Association. They purpose having a week's racing at Youngstown in June.

William Weekes, who is well known in Eastern circles as a good driver and trainer, has decided to locate in Paris, France, and try his luck there.

A well known horseman who visited Reno last week says that Rey Del Rey is not the best of the Winters' string. There is a filly or two in the stable that will be bad to beat in any company.

There were only five horses by George Kinney that faced the starter this year, and all earned winning brackets. John Happy, his full brother, will have some useful youngsters on the track next year.

Two once prominent horses in England went to the Cape. Candlemass, who was formerly in the Kingsclere Stable, won a plate of £350, and Lord Husting's cast-off Mirage won a handicap, value $200.

In Australia and England, trotting races are all handicapped. Lucretia, the gray mare who went to Australia a short time since, won the two-mile handicap, starting fifteen seconds behind scratch. Time, 5:09.

Jimmy McLaughlin has determined to attend strictly to training next year, and on the last day of this year will give up the starter's flag, which he has successfully wielded, and start in as Mr. Lorillard's trainer.

Bergen has been christened "The king of the winter tracks" and has been very successful lately. Barnes will, it is rumored, ride for The Dwyers. Mr. Baldwin has a distinct objection to his jockey owning horses.

Eastern turfmen say that trotting should be altered so that small bettors can have a chance. There is no doubt that being unable to speculate prevents many from attending here, where the pools sell too nigh for them.

The bookmakers who left Clifton on urgent business during racing, fearing they were going to have a big loss, turned up the next day and paid, an outsider having beaten the two favorites. They received quite an amount of guying.

The work on the new track at Monmouth is being done so rapidly that it is almost certain to be finished before July 4th. It is principally due to the veteran turfite D. D. Withers, whose judgement is second to no man's on turf affairs.

Col. Thornton's trainer, Swann, was in town last week, he says the big Anteeo horse, Jas. Madison, will be sent for a record if there is any kind of a chance, the horse and a 3-year old half-sister, by Nutwood Jr. are working very well.

The Matlock horses, Repetta, Lady Duffy, Oregon Rose, Jim Miller, Leon and Alta, arrived in Pendleton last week from Walla Walla, and will be taken to Tom Matlock's ranch near Heppner, where they will be quartered for the winter.

Al Farrow was reinstated on an affidavit from Frank DePoister as agent for Mr. Walters to the effect that he had sold the horse to Mr. Smith; if at any time the horse is returned to the original owner (Mr. Walters) the decision will be reconsidered.

An interesting experiment is to be tried on a Pennsylvania breeding farm. It is to attempt the formation of an ice track, so that training can be continued throughout the winter. The plan is to sprinkle the trotting track, thus keeping it coated with ice and snow.

Pittsburg Phil put about $1,500 on Clay Stockton at 4 and 5 to 1, and forestalled the owner, J. S. Campbell. There are several men I could mention who would have made him lose that $1,500. Evidently, Phil is following Walton's game He did well one season in England, and then?

The Adams' mare, who was taken East by Mr. Whitney some time after she beat Jim Douglass and made the record for 600 yards at Sacramento, has been sent back to Mr. Adams, who will breed her unless she is sold. I understand Mr. Martin of Sacramento has offered $1,000 for her.

All judge's stands should be placed much lower than they usually are. Many a horse is overlooked. Lavinia Belle would have had the race which was given to Oregon the other day if the judges had been lower down. Col. Simmons very seldom makes a mistake, but this time he was dead wrong.

W. L. Whitmore the owner of Coloma and Guido has in Walla Walla, Washington Territory a stallion Caliph who is a full brother to Margaret the dam of Regal Wilkes 2:20¾. He expects to have a tremendous season with him next year on account of the performance of his relative Regal the crack two year old.

The Directors of the Kansas City Jockey Club approved the programme presented by the committee and Secretary Corrigan. Nine stakes—one for each day—and 36 purse races are on the bill of fare. The amount added to the stakes averages over $1000. The entries to stakes close Jan. 15th. The meeting begins June 10th, and lasts nine days.

Mr. Walbaum declared to win the other day with Larchmont, but Soden on Bradford, although it is said he could easily have allowed Larchmont to win, went on and the stable ran one, two, the wrong way round. This is not the first case of the kind. Senator Hearst experienced a severe dose when Littlefield rode it out on his selection.

Germany is slowly but surely becoming infatuated with trotting, and the market is gradually getting better. The following shipment of American trotters lately left for there: Blanchard, 2:25¼, by Daniel Lambert; William C, 2:22¾, by Young Wilkes; Busby, 2:29½; Scott Newman, 2:27½; Morning Star, Dandy and Jersey Thorne, no records.

Exceptionally flattering accounts have been received from time to time about various youngsters sold at the Haggin sale, the last one favorably commented is the bay filly by Warwick or Darebin dam Altitude she was bought by Lakeland. When one considers that on her dam's side she has a double Stockwell cross and rare old Queen Mary for a fifth dam there is no wonder that she gallops.

H. P. Mohr favored us with a call this week. His Clydesdales are probably the only ones imported into California that are registered in the original Clydesdale Stud Book, and as every one knows it is better to use and own a well authenticated pedigree horse than any other kind, while for general activity and soundness they are unexcelled. Any would-be purchasers should look in our advertising columns for particulars about some of his latest arrivals.

Goodall, the jockey, is said to have captured an heiress. Probably he will quit riding and buy a race horse or two now.

The Southern Oregon State Board of Agriculture is having an internal struggle. Jackson County, who succeeded in making quite a successful fair last year, are opposed by Douglas County, who stood aloof last year, but now want to have the fair in their county at the next meeting. The old officers, Geo. W. Riddle, President; Chas. Hughes, vice-President, Robt. A. Miller, Secretary; T. P. Judson, treasurer, were re-elected. The Board will meet again the first Monday in May, at Grant's Pass, to select a location for the next annual meeting.

That the managers of winter tracks are put to their wits' ends in efforts to overcome inclemency of the weather, has time and again been shown since the days when Brighton Beach first began racing during other than actual summer weather. The latest illustration of this kind was the device resorted to at Guttenburg last week, when huge bonfires were lighted at regular intervals around the track to dry it out, so that the harrow and crushing rollers might be put to work. A tremendous downpour the same night spoilt the effects. Our organization here sits still and waits.

The only trotting record in which the time was given by fifths of a second was when Dexter trotted the mile in 2:18 to saddle in 1866. His owner, George Alley, had wagered $1,000 to $5,000 that the horse would beat 2:19 to saddle. He placed in the hands of the timers three watches, each marking the seconds by fifths, because there was a possibility of beating 2:19 by just one-fifth of a second, and this nice reckoning could not, of course, be made by a quarter second watch. If Dexter had trotted in 2:18 4-5, the quarter-second watch would have been more likely to make it 2:19.

The two Australian colts, Narellan and Kirkham, sent by the Hon. James White to England, are doing well under the veteran Matt Dawson's care. They have been backed, coupled, at £1,000 to £50 for the Derby. Their breeding is exceptional. Both are by Chester out of more than half sisters, viz, La Princess and Princess Maud. The former (La Princess) is by Cathedral, a well known son of Newminster, and the latter by Adventurer, a still better son of Newminster and Palma, an Emilius mare. The colt's grand dam is the celebrated Princess of Wales by Stockwell out of The Bloomer by Melbourne.

The National Jockey Club at Washington having decided to wind up their affairs and sell the Ivy City course, the fall meeting having been a disastrous failure A meeting was held on December 2nd, with Mr. F. W. Draney in the chair. A large sum was soon subscribed for stock in a new venture and the board of directors were authorized to go ahead with the improvements on the new track, and if possible arrange for a racing meeting next spring. The first thing to be done will be to fence the property, and proposals for this contract will shortly be invited. Already 9,000 feet of pipe for drainage have been laid, and it is the intention of the club to make the track one of the best in the country.

The Bay District Track, over which so many crack horses have been driven, including Rarus, 2:13¾; Goldsmith Maid, 2:14; St. Julien, 2:11½; Stamboul, 2:12¼; Palo Alto, 2:12½; Manzanita, 2:16; Sunol, 2:10½; Regal Wilkes, 2:20¾; Norlaine, 2:31½; Faustino, 2:35; and among pacers Arrow, 2:13½; Adonis, 2:14; Gold Leaf, 2:11½; Yolo Maid, 2:12½, and innumerable other prominent trotters have shown their mettle, will soon be a thing of the past. We can at least rest satisfied with one thing. The Bay District track retires in good company, for the world renowned Union course on Long Island, over which Hiram Woodruff showed his matchless skill behind Dexter, is also to be cut up, and there will only remain memories of George Wilkes and Ethan Allen to the vicinity.

New Orleans winter meeting should be a success. The track is now much fastet than ever before, and as it has been shortened thirteen feet it is now just six inches over a mile, measured three feet from the pole Last season the first quarter was all right, but the remaining three quarters were almost impassable after every rain. During the summer the rails have been moved so as to make the track fifty feet wide in the narrowest places and the last three quarters have been coated to a depth of from 15 to 18 inches with a light layer of sand. The drains have been put in crosswise and lengthwise, and the open drains have been cleaned out deepened and widened, so as to work freely and rapidly in connection with the tile drains. A powerful drainage machine has been fitted up to work in conjunction with the rest of the drainage system so that the whole inclosure will be relieved of water within a few hours after the end of every storm, no matter how severe it may have been. The turns have been thrown up on the outside, so as to enable the horses to make them at full speed, and the whole track has been so graded as to render it impossible for the water to lie upon it. Col. Simmons is expected to assist president H. M. Connor and Col. Williamson in judging henceforth.

The reports of the two racing associations of the gross receipts for admissions to their race tracks and grounds during the past racing season have been filed with the State Controller.

AMERICAN JOCKEY CLUB.

Days.	Receipts	Days.	Receipts.
May 30	$9,672 50	Oct. 2	$1,133 50
May 31	1,894 00	Oct. 3	991 50
June 1	2,517 00	Oct. 4	1,194 50

July 2	6,875 00	Sept. 14	4,479 00
Gross receipts			$129,086 50

The 5 per cent. tax this year amounts to $6,454 33 while last year it was $8,383 67.

Kyrle Daly's temper is not of the best, in fact it is, and was, deuced bad.

A 16 year old sister to Minnehaha, the dam of Beautiful Bells, is for sale in Ohio.

Roy Wilkes is being exercised at Pleasanton, as Mr. Davis found the Oakland track too muddy.

El Rio Rey has completely recovered, but whether his wind is allright or not cannot yet be decided.

Prince Wilkes, 2:14¾, has won three races out of nine in Buenos Ayres. He and J. Q., 2:17¼, are very lame.

Faustino, the Sidney yearling who broke the stallion yearling record, joins Doble's string at Fresno in a few days.

Tenny has thickened out and done well this fall and seem to show no signs of the severe work of last season.

Golden Gate, a black yearling by Guy Wilkes, out of Sable Hayward, is showing great promise at the Village Farm.

Eastern trotting men are harassing C. D. Ely to get their mares bred to Sunolo, but they are too late; his book is full.

Mr. Allen, has arrived safely in Pittsfield and has since sold the weanling filly by Guy Wilkes out of Sable Hayward.

Chimes is being worked in a sleigh. He will be driven for a record after next season's stud duties. As usual, his book is full.

M. Berg n is said to have signed to ride for the Dywers next season and also not to ride on any opposition track in the winter.

At the late Derby meeting in England, the fog was so dense that several of the riders lost their way and the race was declared void.

Mr. Caldwell is having a rough time as a starter at Guttenberg and Elizabethtown, what with rheumatism and refractory boys.

Bowes, an Australian jockey, is in England, to ride the Australian colts. He has created a very favorable impression in Newmarket.

Capt. Sam Brown will probably take Troubadour, Stuyvesant, Richmond and his broodmares to Alleghany, Pa., and start a breeding farm.

Since the first of January, half the Clydesdales exported from England have come to the United States, while only four went to Australia.

Dan McCarty has leased stables at the corner of Boulevard on King's Highway, Gravesend, and evidently intends staying out East for a while.

Mr. Withers is very pleased with Knap McCarthy, who has shown a good deal of thorough practical horse sense already in his methods of training.

Bobby Wyatt, who was one of the prominent Knights of the Pigskin twenty years ago in England died last month, after a slow and painful illness.

Lord Falmouth's popular Magpie Jacket will not be lost on the turf, for the new peer will race, although not on such a large scale as his predecessor.

Sam Bryant says that racing is getting pretty tough and that race horses soon won't be worth $2 a dozen; it is dollars to cents he is buying again soon.

W. H. Crawford stands a good chance of winning his $5000 that Stamboul does not beat 2:12 this year. He should thank Jupiter Pluvius for his many favors.

W. P. Ijams has been elected president of the Terra Haute Trotting Association, and in future pool selling will be the only kind of gambling allowed there.

John Shephard has a wonderful team in Arab 2:15 and Mill Boy, 2:26. If Guy had been sold at the Fasig, he would have been hitched up with Arab.

One of the features in English racing last season has the wonderful success of the progeny of Robert the Devil, Touchet, Muncaster and Arbitrator, all of whom are dead.

The fight still continues between Clifton and Elizabethtown. Last week the Dwyers admitted every one free at the latter. Clifton will counteract the effect, somehow.

Noonday, the well known son of Wedgewood (692), 2:19, and Noontide, 2:20½, by Harold, sire of Maud S., has been leased by Frank Lowell, of Sacramento, for next season.

Oregon State Fair will be held at Salem, Oregon, on September 8th. Six days will be taken for the meeting. The Portland speed programme will take place the week before.

Spendthrift, the well known stallion, was sold last week at the dispersal of the stud. After a good deal of opposition he was knocked down to Messrs. Tracy & Wilson for $14,000.

The Farmers Club House at Morris Park is nearly finished, a commitee of five trainers and one owner will manage the Club an initiation fee will be charged and probably $5 annual dues.

It sounds strange after all the talk about Palo Alto and Stamboul to hear Mr. Crawford say, "I will back a stallion for $25,000, Palo Alto and Stamboul preferred," and he means business, too.

Luke Du Bois has brought an exceptionally well bred mare by Belmont, dam by Woodford Mambrino, to breed to some of our trotting stallions; he is hesitating between Guy Wilkes, Director, Sidney and Stamboul.

Eighty-six entries have been received for the Two Thousand Guineas of 1891, which is a rather better average. H. R. H. The Prince of Wales heads the list of nominators. Col. North, the nitrate king, has six entries.

The case of Dan De Noyelles vs. the Charter Oak Driving Park Association was decided last week. Mr. Nelson was ordered to refund $750 to the Charter Oak Driving Park Association, who will pay it to Mr. De Noyelles.

Abercorn, the crack Australian, racehorse, has won £11,445 on the turf in four years. As a three-year-old, his best year, he won £4,199. From a money aspect, this does not compare well with either America or England.

The pacer about whom so much talk was made by the racing contingent who took in the Reno and Carson Fairs, has not joined Hickok's string. I understand he is not progressing well, having been blistered and fired lately.

Tim Lynch says that as there has been a good deal of blowing done by the Kitty Van confederacy, he will run Sunday five furlongs for $500 a side p. p. immediately after the conclusion of the postponed Blood Horse meeting.

Dexter B. Goff has shipped to Europe David L., 2:19½, Plush, 2:21½, Lynn W., 2:21½, Orphan Boy, 2:22½, Jane R., 2:26½. He will probably be assisted in selling them by Charlie Dickerman, who has been residing in Paris some time.

Mambrino King never suffered defeat in the show ring until the late Chicago show. His exceptional form and make were such that it was expected he would again be successful, but he was beaten by Ambassador on the extreme speed lines in their blood.

It was decided to call a special meeting of the Board of Review of the National Trotting Association to try the Nelson-Alcryon case. This meeting will be held in Buffalo one day before the Annual Trotting Congress, which meets in that city next February.

F. H. Briggs, Auburn, Maine, who bought Warren, the two year old brother to Sunol, will leave him here until spring, while Col. Strader is instructed to sell the five year old brother Wellington, which will leave Senator Stanford without a single Waxana colt.

Some of our visitors say the California climate must be affecting Mr. Davis, the owner of Roy Wilkes. He says that on going to Pleasanton the other day, with an umbrella and overcoat, he found the dust blowing, although it had been raining incessantly for 10 days.

Clifton refused to give the entries over night to the New York Pool Rooms, and in consequence last Wednesday saw the local rooms here with Elizabethtown alone on the board. The Clifton management contend that the pool rooms in New York keep the crowd in town.

It is stated on the authority of a prominent English Racing man that Chevalier Ginistrelli declined an offer of 20,000 guineas for Signorina who has shown exceptional form as a two year old this year in England. It is said she is the most racy looking filly since Achievement.

William M. Stewart generally known as Doc Stewart died in Denver after a severe illness. He was one of the celebrated old timers being one of the judges at Chicago when Dexter Hopeful and Great Eastern trotted. He drove in the first race trotted over the Cleveland track.

44 years ago the late Lord Falmouth began racing. In 1860, he left Newmarket where Goodwin had been training for him and took his horses to Malton into John Scott's stable, his first classic win was in 1862 when Hurricane trained by Scott won the one thousand guineas.

Hickok, while discussing the probabilities of his Eastern trip, says that he shall never have such a stable again as he had in 1881, when he took Overman, Santa Claus and St. Julien last, and hopes never to have the luck he then had. all three being sick and out of form when he arrived.

A. A. Bonner is having the land he recently purchased near Seabright, N. J., equipped for a breeding farm. Volmer, 2:24¼, will be the premier stallion. Among the mares will be a mare by Startle, dam Daybreak (sister to Noontide, 2:20½), and Rahway, by Lord Russell, dam Rosabella by Belmont 64.

Charles Miller, an old San Franciscan, is going into the trotting business in New York. W. H. Snyder has been engaged to train and drive, and also to manage the farm. Among the mares is Adelia by Fred. Low (son of St. Clair), dam Addie Lee, dam of Adair 2,17½; Grace Lee 2:29½, and Berlin, the well known son of Blackbird.

It has been universally stated that Senator Hearst's ranch in Texas has been re-inforced for breeding purposes by Kingmaker, two-year-old, by Warwick, dam sister to Jim Douglas; Glen Echo, four-year-old, by Glenelg, dam Echoless; Lovelace, brown colt, by Kyrle Daly, dam Trellis, and others. I supposed the Chihuahua Ranch in Mexico was their destination. Where is the Texas ranch?

It is a well known fact that in the fall a good two year old has a lot the best of it at weight for age. At the Northampton (England) meeting the first six races were carried off by two-year-olds, viz.: Devilfish, Old Coin, Far Niente (after a dead heat with Enamel, another two-year-old), Parlington, Duke of Burgundy and Rotten Row; while the only other race was won by a three-year-old, Lenwade.

Luke De Bois, who was so well known here years ago having brought many well known horses to this state, is here on a visit and is just as versatile and amusing as in days of yore; when Charlie Sampson, John Mackey and Baldy Hamilton get their feet under Ned Fay's round table there is music in the air despite the veteran's (Luke's) age 68 he leads the van with Mackey a good second.

There is a great similarity between the breeding of Dame Winnie (dam of Palo Alto) and Longfield, the Rancho del Paso stallion. Dame Winnie is by Planet, dam by Glencoe, second dam Fannie G by Margrave, while Longfield is by Monarchist (who is out of a daughter of Glencoe) out of Blue Gown by Planet out of Flora G, by Lexington out of Fannie G by Margrave. Why should not Longfield mares produce great trotters?

J. C. Blake, the well known Irish turfite, has on his smoke-room table the hoofs of Arbitrator in silver on an ebony stand, the hoofs form an ink pot, snuff box, match box and stamp box, while attached to the whole is a model of the semaphore telegraph board used to display the starters, riders, etc., when Arbitrator won the Liverpool cup, and on the reverse side is a correct card of the day's racing when he won the cup, and all his progeny.

The late Lord Falmouth's racing and breeding stock, will be sold on the 18th; twenty mares, eleven foals and seven yearlings will be offered. Among the mares are Pauline an own sister to Peter (Hermit Lady Masham); Thirlemere a sister to Muncaster (Doncaster Windermere); Syringa (dam of Blanchland) by King Lud out of Blanchefleur a daughter of Queen Bertha; Wharfdale by Hermit out of Bonnie Doon and daughters of the celebrated Lady Golightly and Spinaway.

Wire, although not barbed, is the cause of a good deal of complaint in England. Lord Willoughby de Broke, Master of the Warwickshire Hunt, has informed the Southern Farmers' Club that unless wire fences are taken down in the winter, hunting will be stopped. Since the present season began his wife had been nearly killed, his first whip had badly injured his hand, and two horses had been severely torn in consequence of this objectionable system. Lord Chesham, Master of the Bicester Hunt, in a letter to the same club, stated that for himself there will be no more hunting where wire fences were kept up in the winter.

At the Lexington sale on December 3d Elias Lawrence, b s, 12 years, by Billet, dam Sprightly, was sold to Elmer Railley, Midway, Ky., for $1,425. The Chevalier, br c, 4, by Prince Charlie, dam Miss Haverly, E. L. Israel, Lexington, $1,125; Prince Leopold, ch s, 6, by Doncaster, dam imp Princess; Talbot Bros., Paris, Ky., $2,000. Elyton, ch c, 4, by Eland, dam Lady Hampton; L. A. Stubblefield, Nashville, Tenn., $3,500. Winning Ways, b m, 4, by King Ban, dam Attractive; W. R. Letcher, Richmond, Ky., $1,250. Teuton, ch c, 3, by Ten Broeck, dam Miss Austin; R. H. Holloway, Lexington, $3,500.

A distinguished English veterinary surgeon, Woodruff Hill, is very pronounced in his disapproval of applying a hot iron to a horse's hoof. In a letter to the Live Stock Journal he says: "Possibly the presence of shoeless horses and the advertisements of particular shoes had origin in the evils attributable to the general practice adopted in English forges. It has been urged that to fit a shoe properly the level and necessary bearing can only be obtained by the heated shoe, ergo, the frizzing of the horn to encourage the lazy attributes of the shoeing smith. I have little hesitation, after years of forge experience, in asserting that more abnormal conditions of equine feet arise from hot fitting than probably any other cause. What is the structure of horn? Has it vitality, or does it exist through vital encouragement? Would human beings friz the tips of their nails? Where does the chief bearing lie? On the crust, which cannot be too firm and sound. Is its lower part, that has to meet the resistance of iron, strengthened or deadened by the application of red-hot iron? Seedy toes, rimmed hoofs, and shelly feet owe more of their condition to hot shoe fitting than is suspected. Better work a horse unshod than badly shod. Better a horse with a natural foot, however ugly, than a foot frizzled and cut to shape by an unscientific and misnamed artistic smith."

One of our most observing visitors this fall has been Col. R. S. Strader, of Lexington, Ky. After careful inspection he selected several well bred trotters, and last Wednesday intended shipping them to Kentucky, but owing to the rain had to wait. On the car will be Clay 4779 2:25, a black stalllon, ten years old by Electioneer 125, dam Maid of Clay (dam of four in the 2:30 list) by Henry Clay 8 Alban 5332 2:24, bay stallion, eight years old by General Benton 1755 (sire of fourteen in the 2:30 list) dam Lady Morgan (dam of three in the 2:30 list) by Rysdyks Hambletonian 10; Ellison 5387, a black stallion three years old by Electioneer 125, dam Lady Ellen 2:28 (dam of Ella 2:29) by Carr's Mambrino 1789; Conrad 5381, a three-year-old bay stallion by Electioneer, dam Columbine by A. W. Richmond 1687, is an own brother to Anteeo 2:16¼ and Antevolo 2:19½; Del Mar 2:30, a bay colt two years old by Electioneer, dam Sontag Dixie (dam of Commotion 2:30 and Sonnet 2:24½) by Toronto Sontag 307; Monaco, a weanling bay colt by Electioneer, dam Mano by Piedmont 904 2:17¼ (sire of seven in the 2:30 list), a weanling bay filly Nerissa by Clay, dam Nellie Walker (dam of Peruvian Bitters, pacer, 2:23½) a bay weanling filly by Clay, dam Sallie Hamlet by Hamlet 160. The Colonel also will take on his car, Wellington, five years old, brother to Sunol 2:10½; Warlock, a bay four year-old colt by Whips 2:27½, dam Nellie Walker; Mr. Margrave's yearling colt by Piedmont, dam Trustie by Messenger Duroc 106; a yearling Guy Wilkes filly and Linda Wilkes, three-year-old by Guy Wilkes out of Atalanta (sister to Beautiful Bells) for W. H. Wilson, Cynthiana; Mr. J. H. White's stallion Hernanni by Electioneer, dam Gypsey by Paul's Abdallah. Col. Strader will sell several of the colts in Kentucky including the brother to Sunol Mr. White has instructed Colonel Strader to sell Hernanni for him. Phallas returns on the same car and will again stand in Kentucky. Messrs. Bither and Crawford will not leave for a few days.

The souvenir programme for the Clifton races on Thanksgiving Day was a useful piece of work, inasmuch as it showed what had been done under the "cheap" system of racing. But few who have followed the "bang-tails" since the inaugural at Brighton Beach in 1879 had any idea of the money distributed among the "beach-combing" owners. Perhaps even less was known of what had been won under the shadows of the Preakness Hills at Clifton. The actual figures for the eleven years at Brighton Beach are as follows:

BRIGHTON BEACH.

Year	Racing days.	Number of races.	Amount added.
1879	34	130	$ 51,100
1880	41	273	51,250
1881	52	239	51,125
1882	100	471	105,950
1883	106	567	144,900
1884	125	548	184,050
1885	94	509	147,110
1886	74	431	122,450
1887	30	184	46,700
1888	30	159	63,410
1889	26	150	75,000
Totals	712	3,681	$1,042,845

For Clifton the total up to and including Friday is:

Year.	Racing days.	Number of races.	Amount added.
1886	18	90	$ 19,000
1887	83	413	85 400
1888	72	364	102,400
1889	88	472	162,200
Totals	261	1,339	$369,000

Making the total done under the Engeman interest:

	Racing days.	Number of races.	Amoun added.
Brighton Beach	712	3,681	$1,042,845
Clifton	261	1.339	369,000
Total	973	5,020	$1,411,845

The Melbourne Cup.

By the next mail from Australia we will receive a full and detailed account of the great Melbourne Cup Meeting from the pen of "The Jungle." A few days ago we received from Capt Tom Merry, of Portland, Oregon the following poem, which he states he secured while lately on a visit to the land of the Southern Cross, and in view of what will follow week after next, it comes in very appropriately.

A SOUVENIR OF TIM WHIFFLER'S YEAR.

There's a lull in the tumult on yonder hill
And the clamor has grown less loud,
Though the Babel of tongues is never still
In the presence of such a crowd.
On the flat they are crowding together,
In the stand they are crushing for room;
Like midge-flies they swarm on the heather
And gather like bees on the broom.

The bell has rung—with their riders up
At the starting post they muster,
The racers stripp'd for the Melbourne Cup,
All gloss and polish and luster.
And the course is seen in its emerald sheen
By the bright spring-tide renewed,
Like a ribbon of green stretched out between
The ranks of the multitude.

The flag is lowered. "They're off!" "They come!"
The squadron is sweeping on;
A sway in the crowd—a murmuring hum:
"They're here!" "They're past!" "They're gone!"
They came with the rush of the Southern surf
On the bar of the storm-girt bay;
Like muffled drums on the sounding turf
Their hoof-strokes echo away.

The rose and black* draw clear of the ruck,
And the murmer swells to a roar
As the brave old colors that never were struck
Are seen in the lead once more.
Though the feathery ferns and the wattles wave
O'er the sod where Lantern sleeps,
Though the grass is green on Fisherman's grave,
The stable its prestige keeps.

Six lengths in front she scores along;
She's bringing the field to trouble;
She's tailing them off, she's running strong,
She goes with her neck pulled double.
Now Minstrel falters and Exile flags,
The Barb finds the pace too hot;
The Tory now loiters, and Playboy lags,
While the bolt of Ben Bolt is shot!

That she may never be caught this day
Is the worst that the public wish her.
She won't be caught—she comes right away.
"Hurrah for Seagull and Fisher!"
See, Strop falls back, though his reins are slack,
And Sultana begins to tire,
While the top-weight tells on the Sydney crack,
And the pace on "the Gippsland flyer."

The rowels, as round the turn they sweep,
Just graze Tim Whiffler's flanks;
Like a hunted deer, that flies thro' the sheep,
He strides through the beaten ranks.
Daughter of Omen, now prove your birth—
The colt will take lots of choking;
The hot breath steams at your saddle girth
From his scarlet nostril smoking.

The shouts of the Ring for a space subside
And slackens the bookmaker's roar;
Now, Davis, rally; now, Carter, ride,
As man never rode before.
When Sparrowhawk's backers cease to cheer,
When Yattendon's friends are dumb,
When hushed is the clamor for Volunteer—
Alone in the race they come!

They're neck and neck! They're head and head!
They're stride for stride in the running;
The whalebone whistles, the steel is red,
No shirking as yet or shunning.
One effort, Seagull, the blood you boast
Should struggle when nerves are strained:
With a rush on the post, by a neck at most,
The verdict for Tim is gained.

Tim Whiffler wins! Is blood alone
The sine qua non for a flyer?
The breed of his dam is a myth unknown
And we've doubts respecting his sire.
Yet few (if any) those proud names are
On the pages of peerage or stud,
In whose 'scutcheon lurks no sinister bar,
No taint of the base black blood.

Aye, Shorthouse, laugh—laugh loud and long,
For pedigree you're a sticker;
You may be right and I be wrong,
Wiseacres both! Let's liquor?
Our common descent we may each recall
From a lady of old caught tripping,
The fair one in fig-leaves, who d——d us all
For a bite at a golden pippin.

* John Tait's colors.

ADAM LINDSAY GORDON.
(Died 1870.)

To My Friend "Don."

EDITOR BREEDER AND SPORTSMAN:—I wish to reply very briefly to "Don." Either he does not know what I was writing about or I do not know what he is writing about. I find nothing in his article to disagree with. I did not compare three-year-olds to old horses. I am willing to confess that Margaret S, Direct, Hazel Wilkes and Lord Byron are the equals, as campaigners, of Sunol, Allerton and the rest. I am as proud of California horses as anybody else. People who are acquainted with me personally will give me credit for sufficient intelligence to suppose that I know that Margaret S, Direct, Lord Byron, Hazel Wilkes, and the rest of them will lower their records, barring unusual accident.

The article I wrote simply dealt with old time trotters, and the great number of years they were upon the turf. Nobody disputes that we have now better bred and faster horses. I was speaking of campaigners simply. Does anybody know of a horse in this State or the Eastern States that is alive now that will campaign ten or eleven years and win money every year, and end up by winning a sum total of from $40,000 to $85,000? Such a horse may be alive, but the odds are against it.

As an instance of speed and endurance take Hopeful's four heats at St. Louis in 2:15¾, 2:15½, 2:15, 2:15¼.

"Don," do you know any horse in this State or anywhere else that can go four heats in that time? I don't, nor you don't either! It is my opinion that there is not a stud, mare or gelding upon earth that can trot four such heats. There are a few who can go one or two heats faster! This, however, does not prove that Hopeful is the equal of these other horses, either in point of breeding, beauty or intrinsic value. I was going to give a list of recent campaigners, the number of years on the turf, etc., etc, when I commenced this reply to "Don," but deem it unnecessary.

"Don" will find in me a staunch advocate of our wonderful youngsters and a personal friend in upholding their well earned laurels.

HARVEY W. PECK.

Miscellany from Yolo.

JOHN W. MARTIN.

It is a fact worthy of comment; many of those who write on matters pertaining to the horse are greatly given to exaggeration, radicalism, lack of candor and other kindred weaknesses.

A man may be excused for advocating theories, the practice of which will redound to his personal interests. For example one who has some pacing stock on hand may be forgiven for earnestly dilating upon the untold beauties and graces he pretends to see in their shambling gait or upon the magic power of their mongrel blood in a trotting pedigree.

The good man that has a stallion with an unfortunate running cross prominently in his pedigree where he ought to have a cross of standard trotting blood, may be excused even if he develops a somewhat virulent type of the thoroughbred mania.

Such as these are more deserving of sympathy than of censure. But there is no justification for those writers who, without any personal interest, utterly abjure reason, truth and common sense in a radical advocacy of untenable theories. For instance, there are some who proclaim the thoroughbred the source of all trotting speed. Because forsooth Maud S, Jay Eye See, Sunol, and a few other fast trotters in whom is crystalized and realized the results of long years of breeding, training, selection, rejection, prepotency, hereditary transmission, and all the other agencies of intelligence and skill, because they have remote crosses of thoroughbred blood, therefore running blood produces fast trotters. History is a lie, and the Simmonses and Witherses and all those other great breeders of trotters who devoted their money and talent to the science of breeding were misguided enthusiasts blindly following a myth and their life work a failure.

When the pacing crank bobs up with the ill flavored assumption that all fast trotters owe their speed wholly to some old wabbling cathamed pacers away back in their ancestral line, utterly ignoring the well known facts most intelligent breeders are trying to eliminate every particle of pacing blood and pacing inclination from his stock. That there is nothing so exasperating, so discouraging and so productive of profanity to the breeder and trainer of colts as, after he has entered them in trotting stakes, paid in his goodmoney and trained them till he believes he has something good, then to have them blight all his hopes and expectations by breaking into a shambling pace when called upon for a burst of speed.

Another, an able and graceful writer, and one in whom we should expect candor and sound reasoning, attempts by all the arts of special pleading and earnestness of apparent candor, to prove that undeveloped sires are to be preferred to those whose prepotency and trotting instinct have been strengthened by development.

Another iconiclastic philosopher launches upon the pages of horse literature a lengthy disquisition under the heading, "The Seat of Power in the Horse." He discourses learnedly, and at great length invokes the sciences in aid of his theory, and concludes that in the hind legs of the horse, all speed and motive power reside, and inferentially that the rest of the horse's anatomy is merely ornamental, except the front legs, which serve only as pegs to prop up that end of the machine.

Then there is that croaking imbecile away back East who signs himself "Hundolph Rantington." He, with a few wild strokes of his pen, relegates the Hambletonians and Mambrinos and all their deluded admirers to the dismal shadows of Hades, and proclaims some flea-bitten bronco from the Barbary coast the sole procreator and progenator of all trotters, and himself the true prophet who is to guide benighted horsemen from the darkness in which they are groping, into the bright light of perfect horse-sense.

Another stupendous fraud is horse portraiture. There is not one picture in ten that bears any resemblance to the horse it is supposed to represent. The curbs and spavins and splints, sharp angles, and all other unsightly protuberances, are invariably chiseled off the engraving. The head is shaped up to suit the artist's ideal; the tail lengthened if necessary, for certainly the conscientious artist would not take the pay and give his patron a horse with any of these shortcomings, when they can be so easily removed. However, it is but justice to say that California horse portraits are much more truthful than those eminating from Eastern artists. Any churn-headed buck-kneed cock-ankled brute may be transformed into a veritable equine paragon, by having his picture appear in one of those Eastern periodicals.

The article in the last number of the BREEDER AND SPORTSMAN, copied from the New York Tribune and describing Sunol, is another illustration of the subject in hand. It reads: "She stands fifteen hands two inches at the withers, while measured at the quarters she is full sixteen hands high." Another exaggeration. She is slightly taller behind than in front, with an unusual sway just behind the withers. If she were two inches higher at the quarters than at the withers she would be badly deformed. He goes on to say that "this conformation"—that deformity—"you will see at a glance is very favorable to high speed." Great Scott! What a cruel, scathing comment upon the work of Nature.

Continuing he says: "It is the greyhound type." Who ever saw such deformity in a greyhound. It would seem more the type of the kangaroo, an animal by the way noted for its length of stride and trotting speed. It is a fact that Nutwood, Maud S. and Sunol are somewhat taller behind than before, but there are thousands of horses possessing that peculiar shape that cannot trot in four minutes, while there is Axtell, Lillian Wilkes, Stamboul and hundreds of other fast trotters that have not that conformation so "favorable to high speed." I will not quote the paragraph describing her disposition, assuming that the reader has it at hand.

The idea of an animal with such a temper as is therein described trotting a mile in 2:10½ is absurdly ridiculous. What is the use of all this sensationalism and exaggeration? It is sufficient that Sunol is an unparalled trotting wonder without trying to make her out a monstrosity bristling with hideous deformities of body and temper.

Sunol is the product of California and the pride of every Californian, and when it became known that upon her devolved the proud distinction of being the champion of California against the world her career was watched with anxious solicitude, and when the wires flashed the glad tidings of her victory the heart of every Californian gave a throb of wild exultation, and now the only regret is that she should be consigned to the menagerie of Bonner.

It is a matter of satisfaction and self gratulation to every horseman on the Pacific Coast that we now have in the BREEDER AND SPORTSMAN an organ, able, honest and fearless, serving the interests of horsemen without fear or favor and without partiality to any class or caste. May your already large circulation be doubled and quadrupled in the near future. The masses of the people need to be instructed in matters pertaining to the horse and in what constitutes a good horse, so that they may know and appreciate a good horse when they see one. Exercise, intelligence in the selection of stock to breed from as well as to be able to detect fraud and misrepepentation. This can be subserved in no better way than by a wide spread circulation of the BREEDER AND SPORTSMAN.

A Texas Horse Trade.

There is a colored man in Austin, Tex., by the name of Sam Johnsing. He has some money which he made trading horses, at which he is an expert. One day Judge Peterby saw Johnsing trading with an itinerant horse dealer. Having some curiosity to know how Sam came out in the trade he asked him:

"Did you sell that fellow your horse?"

"I did, boss, for a fac'."

"How much did you get?"

"Twenty dollars."

"Only $20? Why, you are a fool. That's a valuable horse."

"Lemme tell you somethin', boss. Dat hoss is lame."

Judge Peterby happened to meet the horse trader afterward and said to him:

"So you paid $20 for that horse?"

"Yes, I paid $20 to the darkey. It's a pretty cheap horse."

"You have been swindled. That horse is lame."

"I know the horse is lame, but it don't amount to anything. He limps because he has not been properly shod. As soon as I take the shoes off of him he will not limp a particle. I wouldn't take $100 for that horse."

Half an hour afterward Judge Peterby met Sam.

"Look here, Sam, you were swindled, after all, in that horse trade. The lameness of the horse is caused by his not being properly shod."

"I knows he ain't properly shod. I had him shod dat way on purpose, so as ter make dat hoss trader believe dat he was lame from dat cause, but de troof am dat he is lame, sure enough, an' he am gwinter stay lame. He nebber will be wuff nuffin. Heah! heah! how I fooled dat hoss trader."

The same evening Judge Peterby saw the hoss trader at the railroad station. He was just about to leave on the train for Dallas.

"That horse is really lame. Sam has got away with you, after all," said Peterby.

"That depends on circumstances. I think I can cure that horse; but if I don't I'm not out anything," replied the horse dealer, grinning. "Ask Sam, after he has tried to change that twenty-dollar bill I gave him for the horse," said the horse dealer as he climbed into the car.—Texas Siftings.

I have received from C. V. Sass, secretary of the Passaic Co. Agricultural Society, familiarly known as "Clifton" a thanksgiving Souverin programme. Many thanks, it is an elegant affair and is heartily appreciated.

BASE BALL.

More About the California Brotherhood Scheme—Six Clubs Next Season.

There are no new developments in the California Brotherhood scheme, the meeting for the purpose of effecting an organization not yet having been held. The promoters of the plan are busy at work, however, and will no doubt soon have the matter planned and on a firm footing. The scheme, as published in last week's BREEDER AND SPORTSMAN, created great consternation among the Directors of the California League, who claim that it is only a job to shorten their sacks. The unjustness of this may be seen from the following facts. Players of the California League are under contract from the first of March to the first of December, a period of nine months. For the last three years the success of the League has been phenomenal, and the owners of the clubs have harvested full crops of shekels, but they have not felt inclined to pay the men who have worked hard and faithfully for their employers' interest, any more money than they did when the League was tottering on the verge of dissolution. In the Eastern minor leagues players are under contract from five to seven months, and are placed under greater disadvantages than the players on this coast. As a result, the best of the minor league players are willing and anxious to secure engagements in California at less salaries than they can obtain at home. The result was seen last season when men like Jack and Huey Smith, Ryan, Hayes, Hurley, Ebright and Knell were succeeded by a lot of Easterners, headed by "Windy" O'Neill, and forced to quit playing ball or else seek engagements in the East.

California talent now wants proper compensation for its services without having to compete with men from blizzardom, and this is the object the home players have in view in forming a brotherhood. They have not moved in the matter any too quickly either, for the Eastern sporting papers are filled with notices sent out by the Secretary of the California League calling on minor league players of ability who desire positions in this organization to send their names and addresses to him at once. As a result, the Secretary's office is daily flooded with applications for positions from men of known ability who are anxious to come to California, and unless the men who have been raised in this State and have brought baseball up to its present standard solely through their own efforts, take immediate and effective steps to check the influx, such men as Power, Sweeney, McDonald, Hardie, Levy, Long, Shea, Smalley, Perrier, Wilson, and others, will be forced to stand aside and see the positions they have so long and ably occupied filled by strangers.

Bill Smalley, the Haywards lad, has refused to sign a Chicago League contract. He prefers to remain on the coast if he can get a place in one of the teams.

Harris and Robinson went to Fresno this week to organize a League team there. They were successful in their efforts, and now that Stockton has decided to have a club another year, it is a settled fact that next season the California League will consist of six clubs, one each at San Francisco, Oakland, Sacramento, Stockton, San Jose and Fresno.

Hurley would like to stay in California, but as he has been reserved by Milwaukee he will probably play in that city next year.

Hart and his Boston Combination are thoroughly disgusted with California weather. No wonder! But then, Jim, we will probably have clear weather for awhile now, and you will have ample time to show what your tourists can do.

Arrangements have been completed for a series of seven games between the Bostons and St. Louis Browns at the Haight-street grounds, beginning the 22d inst. If the weather is good those games will draw an immense attendance, for both clubs finished a close second in their respective leagues, and there exists between them a strong rivalry.

Kelly will remain and catch for Boston in the series with the St. Louis Browns.

Nominations for the Breeder and Sportsman Futurity Stake close Wednesday, Jan. 1st. 1890. Entries must be made on or before that date. See Advertisement.

Grim's Gossip.

It is estimated that three counties in Kentucky will receive $3,000,000 for trotting stock alone this year.

Sam Gamble has been appointed the Pacific Coast agent for Brasfield & Co. the live stock Auctioneers of Lexington, Ky.

At the Woodward sale, Lexington, Ky., next February, there will be seats for between four thousand and five thousand people.

Imitating the example set by Mr. Corbitt for his stallion Guy Wilkes the full brother William L. isalso rated at a $500 fee for the season of 1890.

Altamont has been such a success in the stud in Oregon that now his owner is advertising that the services of the horse can be had at any season of the year.

C. Loates, the well known English jockey, is in a very critical state. He had an accident some time ago, and it is rumored that he will have to have his leg amputated.

Goodale, the jockey has been fortunate enough to capture an heiress and the happy couple are now honeymooning in the East. The lady is a resident of Birmingham, Ala.

At a meeting of the members of Golden Gate Agricultural District No. 1, held lately, Samuel Gamble was elected a director in place of P. A. Finigan, whose term had expired.

There are but few of the horses left at the Bay District Track, the heavy rains having caused most of the owners to remove their stables. When the weather clears up many of them will return.

Piedmont has contributed six new comers to the 2:30 list this season—the largest number ever put in by a son of Almont in one year. Altamont, another son of Almont, has contributed five.

The great fight for patronage between the winter tracks in New Jersey has finally culminated in the Dwyer Bros. throwing open the gates of their Elizabeth track to the public free of charge.

It is not generally known that the Messrs. Briggs, of Auburn, Me., made their purchase of Warren before his famous sister Sunol got her record of 2:10½. Warren will remain in California until next spring.

Have you made your entries yet for the BREEDER AND SPORSMAN Futurity Stakes? If not do so at once as the time is getting very short. This will be the largest stake ever trotted for in California.

Mr. Davis, owner of Roy Wilkes, has been at Pleasanton lately looking over the live stock in that vicinity and also endeavoring to arrange matters so that his stallion may stand at that place during the early season of 1890.

Axtell's mile in 2:12 was trotted by quarters in .33¼, .33½, .32¼, and .34. Palo Alto's 2:12¼ was .32¼, .32¾, .34, .33¾. Stamboul's 2:12¼, .33, .32½, .34½, 32½. Both Stamboul and Palo Alto beat Axtell in the first and last quarters.

At Mr. Haggin's sale of yearlings in New York last July, Alfred Lakeland bought a filly by Warwick or Darebin, out of Altitude, by Alarm, for $400, and he now values her at $10,000. She is expects to develope into a world-beater.

Kentucky Prince 2470, sire of Guy 2:10¾, and about a dozen others in the 2:30 list, has been placed among the high priced stallions for 1890, his service being placed at $500 Truly the five hundred dollar fellows are becoming plentiful.

The thirteen head of mares and fillies purchased by W. R. Allen, of Pittsfield, Mass., in California during the past eight months were all shipped back some three weeks ago, and now comes word that they have arrived at their destination in safety.

The Turf, Field and Farm says: Gold Leaf, who has a four-year-old pacing record of 2:11¼, is a strongly formed horse, and it is claimed that *he* can do *his* quarter in 30 seconds when *he* is right. *He* has been out of sorts and is enjoying a let-up.

Starter Sheridan has signed engagements to start next year at Memphis, Nashville, Latonia and Washington Park Club, Chicago. Secretary Brewster paid a visit to New York, and while here negotiations between himself and Mr. Sheridan were concluded.

George Kinney, the once celebrated race horse, had five of his get as starters this year, and every one of them were winners. That should enhance the value of the John Happy colts which Mr. Haggin will send East, Happy being a full brother to George Kinney.

John Mackey will have the two finest catalogues presented to prospective purchasers during the year 1890. One is for the thoroughbred division and the other for the trotters. The latter will probably go East in March, but the thoroughbreds will not be sent back until the middle of June.

Mr. A. J. Cassatt, who is reported to have retired from turf circles, is known to be opposed to the prevailing short distance races, and is in favor of a higher standard. He wants horses to go cup distances, and also desires to see weight for age races. There are many lovers of turf sports who would like to see just such races as Mr. Cassatt is in favor of.

Almost every newspaper published in San Francisco has had more or less to say in reference to the proposed cutting up of the Bay District Track for building purposes, and all seem to bewail the fact that there is no eligible site for a new one. Before the present track is sold off there will be a new one built, and there are quite a number of horsemen that can guess where it will be located. It may, or it may not, be controlled by a jockey club, but at any rate it will be almost as convenient as the present one.

There is nothing succeeds like success. Since Alfred G. made his 2:19¾ and Redwood got a record of 2:24½, certain buyers have been on the lookout for Anteeo stock, and as fast as a price is given the young ones are eagerly snapped up. In Oregon, the Altamonts are the present fancy and no wonder as that son of Almont has placed five in the charmed circle this season.

There is every reason to believe that a large number of trotting horses, including Sunol, will be sent East from Palo Alto to contest on the "Big Circuit." Mr. Marvin will have charge of the lot as usual, and he is, even now, making selections from the more promising ones, with an eye to determining what is worthy of a place in the string.

I has much pleasure this week in meeting George Starr Budd Doble's right bower, who is playing a flying visit to the breeding farms in this vicinity. He was accompanied by John Hennessy formerly connected with "Knap" McCarthy. Palo Alto, Pleasanton and San Mateo will receive calls from the skilled reinsmen.

The project of holding a spring racing meeting in Carson meets with general favor, says the Tribune. The idea is for Reno to hold a three days' meeting following right after Sacmento and then Carson follow with three days the next week. There is no reason why these spring meetings should not prove as successful as the fall fairs.

The regularly quarterly meeting of the California State Veterinary Association was held at the Baldwin Hotel on Wednesday last. Dr. W. H. Jones, M. R. C. V. S. was elected a member. Nominations for officers were made after which the meeting adjourned to reconvene in Los Angeles.

A good deal of discussion is often provoked by the excessive presents given to successful jockeys, but there seems to be no diminution at present. Mr. W. T. Jones, the owner of Bravo, the winner of the last Melbourne cup, presented his trainer with £2,000, the jockey £500, and the stable boys £400.

It is about time that some of the numerous associations should claim dates for next year. There were so many conflicts during the season just past that it would pay to have a meeting of delegates from each association so that there should be no such clash in future. Dates suitable for all could easily be arranged, and it would be money in the treasuries of the societies so to do.

From gentlemen who have lately visited Petaluma, we learn that the track at that place is in better order, notwithstanding the rains, than any other track in this neighborhood. The new top dressing has resisted the water wonderfully well, and in between showers the trainers are able to take their horses out for a jog. Gen. Fine, the Superintendent, is adding many improvements to the grounds, and under his able management it would not be surprising if a few records were broken there before the first of the year.

A late decision by the American Trotting Association will be of interest to racing associations. A horse, the property of Thomas Hogan, Wolf Island, near Kingston, Ont., won money at an ice meeting and was entered in a green race at the Midland Central Fair Grounds the past summer. A protest was entered against the horse that he had no right in the latter class. On appeal to the association the protest was not allowed, as according to the rules entry in a green race on the ice does not prevent the same horse contesting in a similar race on the turf.

The new Louisiana Jockey Club have made great improvements upon their course, and from all appearances the present winter season will be a very successful one. The track is now faster than ever before and is just six inches over the full mile. During the summer the rails have been removed, and the track is now fifty feet wide in the narrowest places. A large number of new drains have been put in, and to further supplement these a powerful drainage machine has been fitted up, which it is expected will be sufficient to relieve the whole enclosure of water within a few hours after every storm. The turns also have been thrown up in such a manner that the horses can make them at full speed. Col. Simmons, at present at the Elizabeth track, will assume the duties of presiding judge about the middle of the month.

J. H. White has sold his inbred Hambletonian stallion Hernanni "for a good round price," as we are informed by one of the men from the ranch, though the amount is not made public, says the Petaluma Argus. We have always had great faith in Hernanni as a stock horse, and now that he is on his way to the Blue Grass his day will soon come. Hernanni was bred by Governor Stanford at Palo Alto, and is a half brother to Sunol, 2:10½ and Palo Alto, 2:12½. His dam Gipsey, was by Paul's Abdallah, a son of Hambletonian 10. Hernanni was a great trotter as a two year old, but has been lame ever since and in no condition to trot. Mr. White has a lot of young mares by Hernanni, and when they are crossed by his young Director and Marco, trotters may be expected. The time will come when the people of this region will regret the absence of Hernanni.

Cashier Cornelius F. Banta, of the Merchants' National Bank in Wall street, says the Sporting World, has lost by death his trotting horse Ned, forty years of age. When younger the horse had quite a reputation for speed and intelligence and retained his health and faculties to a remarkable degree up to the time of his death. Although this is a long time for a horse to live, it is not an unusual age. The following instance of protracted longevity is given in a French journal: After the war with France in the early part of this century, among a number of thoroughbred English horses sent to the Hanoverian Cavalry was one which had served in the Third Regiment of Dragoons since 1793. In 1816 it was transferred to the hussars of the guard, in which regiment it remained until 1817, when it was made a prisoner, dying in 1850, aged sixty.

The Sargents Park races were to be held at Gilroy two weeks ago, and although the weather had been very changeable and several postponements took place, the programme was eventually got through. The 2:45 class was won by C. Lynde's Daisy S by Brown Jug in 2:47, 2:46, 2:45. The special was won in straight heats, 2:50, 2:47, 2:44. by H. Hecox' Harry by John Sevenoaks. The mixed race was won by a pacer called Marble, entered by Mr. Cox, who won the last three heats in 2:34, 2:32 and 2:33, after Maud H had taken the first two in 2:32 and 2:30.

The Sargent Purse for Jim Mulvenna and Brown Jug, two-year-olds, was easily won by Captain Harris' Lorena by Jim Mulvenna. Time 2:37¼ and 2:38. A special race between Wyatt's Lilly Wyatt by Jim Mulvenna and T. Reis' Special Location by Brown Jug was won by Lady Wyatt in straight heats.

Mr. Hoppin the former owner of Yolo Maid was in town yesterday and he reports that his Cubit foals are all looking well.

Says the Kentucky Stock Farm: "Senator Stanford's experiments in horse breeding will make him the best advertised, and most thoroughly discussed gentleman in America. It has not yet been stated that he intends selling his trotting-bred mares and relying entirely on the thoroughbred portion of his horses for the production of trotters. As his mares of trotting-breeding out-number his thoroughbreds about three to one, and as a large portion of his thoroughbred mares are bred to thoroughbred horses, his main reliance would seem to be on trotting dams for the production of trotters. The Senator can well afford his experiments with the thoroughbreds, and the rest of the world can equally well afford to have the experiments made. By the way, how many thoroughbred mares is Mr. Robt. Bonner breeding to trotting horses? Why does not some enterprising citizen try breeding his deeply bred trotting mares to thoroughbred horses? Even those who do not fancy this sort of breeding can afford to view the attempt at producing trotters upon this method, when it is made at the expense of some one else."

Any foul and diseased condition of the foot primarily consists in inflammation and ulceration of the villous and sensative surfaces within the clefts of the frog. It appears to arise from the continual application of various kinds of dirt and muck, which irritates the tissues, both externally and internally. Animals standing continually in foul, damp stables, or in straw yards, are liable to have this disease. Among its first symptons is a discharge of a fetid mucopurulent fluid from the cleft of the frog, which gradually extends to the neighboring parts, and if neglected may involve the whole foot. This condition produces lameness and of course constitutes unsoundness.

Carefully remove the diseased horn, and thoroughly clean out the excavation with a drachm of carbolic acid, to which must be added one ounce of water. After this the following remedy may be used: Calomal, four drachms; glycerine, two ounces.

This mixture must be put on a pledget of oakum and into the cleft of the frog. Outside this a bandage with some wood tar will do good service and keep the feet scrupulously clean.

The Board of Review of the National Trotting Association reconvened Wednesday of last week at the Fifth Avenue Hotel, Judge P. P. Johnson, of Lexington, Ky., in the chair. The other members of the board present were M. M. Morse, secretary; Geo. W. Archer of Rochester, Gov. G. M. Bulkeley of Connecticut, G. Delaine of Chillicothe, O., and John L. Mitchell of Milwaukee.

The first case which came up for review was the application of Dan Denoyelles for the half winnings of the trotter Nelson, in the $10,000 race trotted at Hartford last summer. The investigation of the case was concluded and it will be decided in executive session.

This disposed of, the board entered on the investigation into the fraud alleged to have been committed in the Balch stallion race for $10,000 trotted at Boston last fall.

In the Balch stallion case, the board decided to give no decision until the next meeting, held at Chicago in May, 1890, unless a special meeting of the Board is called for that purpose. This is considered by the friends of the accused parties as quite a point gained. Among the more important cases considered were the expulsion of William B. Wright, of Canada, from the association tracks. The application of Geo. Tafts, of Michigan, for reinstatement, was denied, as was the application of Thomas Bradley, of Goshen, N. Y., and the chestnut gelding Blizzard. The disqualification of the mare, Addie Pathfinder, was removed.

A reporter of The Horseman recently had a conversation with an old Kentucky turfman, and the wonderful performance of the trotting stallion Palo Alto, 2:12¼, by Electioneer, dam Dame Winnie, by Planet, was discussed. The gentleman said: "I am not surprised that Palo Alto can trot fast, for Planet, the sire of his dam, was the fastest trotting thoroughbred horse I ever saw, and had a smooth, faultless action. He was a high-strung, nervous horse, and when started at his work early in the spring he would invariably get away from the company and go too fast. A gag-bit was put on him and the exercise boy instructed not to let him go out of a trot. He took kindly to the new way of going, and before he was ready for fast gallops he had learned to trot very fast. He trotted a mile over the Woodburn track close to three minutes, and was timed three miles in nine minutes. In the spring of his four-year-old form he was taken to the old Woodlawn track near Louisville to be prepared for the races, and as usual took his exercise at the trotting gait. The superintendent of the track had issued strict orders that no trotting horses were to be worked over the course. One morning he saw Planet taking his exercise at a merry clip, and forthwith boiled over with anger to think that his orders had been disregarded. He hurried out on the track and ordered the boy to pull up and get off the track. When he was finally convinced that the horse was none other than the great racehorse Planet he was thunderstruck, and was never known to say anything about trotting horses afterward."

W. R. Allen of the Allen Farm, has sold to Dr. H. C. Wann, for the Claireview Stock Farm, Detroit, Mich., the chestnut filly Siva, by Guy Wilkes 2:15¼, dam Sable Hayward by Pescora Hayward, record 2;23½; second dam Sable by The Moor, sire of Sultan 2:24; third dam Gretchen by Mambrino Pilot 29. The oldest of Sable Hayward's get was foaled in 1887, and last May paced a mile in 2:24—a fast clip for a two-year-old. Her second foal sold in New York last March at auction, and was bought as a yearling by Mr. C. J. Hamlin of Buffalo, for $5,500. Both are colts and full brothers to Siva, the filly purchased by Dr. Wann. Sable, the grandam, is the dam of Sable Wilkes, three year-old record 2:18, the best record for that age, when made 1887. Gretchen, the third dam of Siva is also the dam of Romero 2 19 1 2, Del Sur 2 24 1 2, and Inca 2.27— the two last being sires of speed. Gretchen has two speed producing daughters in Sable and Neluska 2 yr. 2:30 1-4 the dam Nehushta 4 yr. 2:30. Siva is very highly bred, and the country might be searched in vain for her equal in breeding. She is a superb individual and a born trotter if there ever was one. Here is an instance of how quickly good stock sells itself. Before any one knew that the Allen Farm had anything to sell Dr. Wann, who had a keen scent for gilted edged ones, had this filly priced and shipped her to Detroit a week after her arrival from California. It will interest horsemen to know that the Allen Farm purpose to dispose each year at private sale of all of the foals annually produced on the farm—the brood mares and stallions alone being reserved—and all of the 1889 foals are now for sale, with the exception of Siva already disposed of.—From Pittsfield, Mass., Sun, Dec. 5, 1889.

THE GUN.

Almost a Serious Accident.

While out hunting some time since, Dr. Dan Cate concluded he would use Dr. Moore's "pet" gun. When at the first shot it bursted just beyond where he held it with his left hand. The gun was perfectly clean, and only a quail load in it. There was no split either way from where the plug of one inch long flew out. The gun was sent back to E. T. Allen, from whom it was bought, but he was unwilling to replace the barrels, so he sent the gun to Parker Bros., the manufacturers, and they were too poor or mean to replace their faulty work, without $15 extra charge for new barrels. I have hitherto recommended the Parker gun. I will now take it all back and say buy any other make instead. Your hunting friend, J. J. Moore.—Plumas National.

[We clip and publish the foregoing excerpt from an exchange issued at Quincy, Plumas County, and present several reasons for the republication. The first is that such an item, if unchallenged, is liable to work injury to a man whom we know very well, Mr. E. T. Allen, at 416 Market street, San Francisco, and a second reason is that the Parker Bros. of Meriden, Conn., and their methods of doing business may not be as well known to Plumas County readers as to those in more thickly settled districts, where interchange of ideas and experiences among sportsmen is more common. In a general way it may be said, and the assertion will be supported by every fair man who has ever done business with either firm, both Mr. Allen and the Parker Bros. always stand ready to make good any loss resultant upon defective workmanship in arms made and supplied by them. In selling Parker guns Mr. Allen sells merely as an agent of Parker Bros, and has nothing whatever to do with the making or proving of the guns. Neither he nor any other agent can, nor should he, give any further guarantee than the maker gives him, and even then the guarantee is not a personal one. The Parker Bros. have for years been not only willing but anxious to replace free of charge any portion of any gun made by them which failed through defective workmanship, poor materials or carelessness in inspection, and it is the highest possible recommendation that the shot guns made by them could receive that it is only rarely that they have been called upon to meet such demands.

It is true that Parker guns burst now and then, as do guns by any and every other maker, and it is also true that fools and careless men are bred, despite the laws of natural selection and the survival of the fittest.

But where a Parker gun barrel cracks or chips or bursts in the absence of any obstruction, we think we are safe in saying that ten thousand guns are spoiled because of the presence of such obstruction. There is an absolutely sure way in which to tell whether an obstruction has caused injury to barrels or not. The way is sort of a secret and should remain so, or else the evidence would be removed by every man who, like the writer of the item quoted above, is willing to permit his own contemptible little self-interest to prompt him to malicious attempts to "get even," as he probably terms it. We do not know Moore; don't wish to know him; feel flattered that we do not know him; never expect to know him, but when in his fatuity and self-complacency he attempts to set at naught the business honor and experience of two such firms as E. T. Allen and Parker Bros., we feel bound to put upon him the mark which should distinguish him as an ignoramus, an unfair man, and an undesirable customer.—Field Ed.]

A Pertinent Query.

Editor Breeder and Sportsman:—By request of the G. V. S. C., I write to you to ascertain the best steps for our club to take that they may obtain their pro rata of the game that is to be introduced into California. We have ample facilities for trials of this kind, and are exceeding anxious to undertake it. Kindly advise us in relation to the matter, and you will place our club under obligations.

M. P. Stone, Sec. G. V. S. C.

Grass Valley, Dec. 7, 1889.

[Secretary Stone's letter is but one of many of similar tenor which have come to this office since the Fish Commission announced its determination to introduce foreign game birds, and in order to save needless repetition in answering such letters privately, we reply to Mr. Stone and other interested persons through these columns. The Fish Commission, through several agents, is moving in the matter of obtaining bob-white quails, and will have a few hundred dozens on hand about February. The birds will be distributed, we are informed, only to localities where there is reasonable prospect of their being protected for a season or two, or even a longer time. Those who wish some of the birds should address the Board of Fish Commissioners at Sacramento, stating the conditions present at the places where it is proposed to turn the birds down; whether water, cover, mild weather, food in plenty, freedom from vermin and protection from poachers can be insured. Such applications are placed on file by the Fish Commissions, and if the information furnished is not exhaustive, correspondence is at once begun. The Board desires to be fully informed about twenty or thirty places where bob-whites can be planted and properly cared for. The bob-white, even more than the California quail, is exposed to the attacks of snakes, coons, foxes, and other vermin, because it is essentially a ground bird, and other things being equal, it would seem that large estates, highly improved and constantly traversed by workmen, would be the proper places to plant the birds, which would stock surrounding localities by natural increase.—Ed.]

From the State Board of Forestry.

Editor Breeder and Sportsman:—In view of the fact that the sportsmen of California have as lively an interest as any one in any measures calculated to be potent auxiliaries in the preservation of fish and game, you are requested to forward one of the accompanying memoirs to Washington, and to distribute the remainder to people whom you may think would command the attention of their Representative and consent to endorse them in substance as the sample, and send them on under their own signature. A vigorous forestry campaign will be instituted this winter in Washington, and California (so deeply concerned) should be heard from with no uncertain will.

In view of the necessarily mutual bonds identifying your interests with ours, I feel assured you will condone this trespass upon your time and leave no stone unturned to further the ends of forest preservation. Your co-operation, and that of all brother sportsmen throughout the coast, either by interview or personal correspondence with their Representative, is earnestly solicited, with the assurance that all such efforts will be highly appreciated by the Board. Very truly yours, Wm. S. Lyon, Forester.

Los Angeles, Dec. 3, 1889.

[Accompanying Mr. Lyon's letter came a package of copies of the memorial addressed by the State Board of Forestry to Congress. The memorial presents succinctly and eloquently the arguments which should influence Congress to assist actively in preserving existent timber growths and in replacing forests as they are destroyed by commercial demands. The memorial is well worth study, and we shall be very pleased to forward copies to any who care to send requests for them. —Ed.]

Christmas Dinner.

The Kern County Californian thus aggravates those who do not live in Bakersfield or some equally paradisiacal locality:

With snow and ice, doughnuts and cider, big fire-place with rousing backlogs, double windows and listed doors our Yule-tide haviness would be complete. As it is, here is a partial list, every article upon it raised right here, from which a Kern Valley resident can select to grace his Christmas board:

Meat and game—All kinds

Vegetables—New potatoes, cabbage, cauliflower, green peas, egg plants, squash, pumpkins, sweet potatoes, lettuce, radishes, celery, green corn, young spinach, string beans, tomatoes, beets, onions, cucumbers.

Fruits—Fresh figs, strawberries, apples, oranges, lemons, olives, watermelons, pomegranates, muskmelons, quinces, Japanese persimmons, raspberries, pears, pawpaws, grapes.

Preserved and Dried—Peaches, plums, cherries, blackberries, apricots, prunes, nectarine, raisins and pickled olives

Nuts—Pecans, English walnuts, Italian and American chestnut, paper shell almonds, black walnuts, peanuts.

Table may be decorated with roses, violets, chrysanthemums, marigolds, marcissus, geraniums, tuberose, evergreens, smilax, verbenas, heliotrope, mignonette, camellias and countless other beautiful flowers all grown in the open air.

It is in some respect a pity to be deprived of the rule of Jack Frost with his chilly architecture and wonderful tracery, but then there are alleviations.

A Wildfowl Hunt in British Columbia.

Editor Breeder and Sportsman:—One bright November day about noon, a wagon drew up in front of the Drug Store, which vehicle contained an assorted and variegated load. A light shell of a canoe protruded from behind, a tent was discovered folded up, three or four shell boxes, half a dozen guns and rifles, sundry large and heavy well filled baskets, help to fill the wagon box.

Seated upon one seat sits the engineer, Billy and upon the other seat is Arthur.

The Engineer whistles merrily and the Druggist soon appears armed to the teeth accompanied by a pair of eager red dogs.

"All aboard for Sumas Lake," yells the Engineer.

"Let her go" responds the pill mixer, as he deposits his load along side the other bric a brac, and jumps into the seat.

Billy's whip cracks and away they go, for a nine mile run into British Columbia, where they intend exchanging numerous loads of shot for geese and ducks.

The journey through valley and forest, along stream and slough is at last finished.

The flats and meadow surrounding the lake are spread before them, a beautiful sight, mountains on every side rear their snow capped crests heavenward.

The lake, a shining glistening sheet of pure cold water, specked in all directions by myriad waterfowl which gladdens the sight of our eager sportsmen.

Kah, kah, kah, kah, kah, a flock of Mallard whistle by over head a-honk a-honk hear the geese, a long line swinging wedge shaped toward the water.

Many such sounds fill the air with noise, flock after flock pitched down to join the thousands already there.

The Engineer and Druggist spring from their seats, put their guns together, fill pockets with shells directing the boy to keep on the trail, then make their way along a slough toward the lake, then eyes scanning the marsh closely squack, squack, away go a flock a head too far off for shot a ten minute walk and another bunch of five Mallard spring up

Bang, bang, bang.

Three shots bring down two birds, one being winged gives not a short chase before he brings it into his master.

Scaip, scaip, a pair of snipe dart away from under foot. The lake being reached, the camp is at once fixed up, tent pitched, a goodly supply of logs got ready for the evening fire horses picketed out, and the hunters are ready for business.

One of the boys takes his canoe in hand, depositing it in the lake. He silently paddles out into deep water, heading toward the island where he intends making his blind for the night.

The other two boys each select a clump of bushes for their blind for the evening's flight of geese into the lake.

The druggist takes his decoys to a celery covered pond, erects his blind and awaits with caller in hand some "victims for to shoot."

The engineer, he at once gets him to a celebrated flyway. Darkness will soon compel the shooters to get them to their camp; the wind whistles a mournful dirge through the trees near at hand; the cry of the coon wails o'er the lake and marsh.

Bang, ho! ho! a strange gun is heard far out in the lake; a streak of fire is seen, the smoke rolls away and a great swarm of geese and water fowl of all kinds fill the air with noise as they raise from the water, fly from danger and settle down again.

A strange canoe is seen guided by no seen hand or paddle, but still it moves, slowly, cautiously, it glides ahead, nearly level with the waters.

An Indian is therein lying flat in the bottom of his frail canoe. The Siwash skillfully and silently as death propels his bark along with one hand over stern, he paddles toward a flock of geese not far away,

The druggist now gets a shot, a lonely canvas back passes by; turning he swings directly over the decoys. A swift bead is taken, the gun swung many feet ahead of the swiftly, moving bird.

Bang, down he drops. His mate who came near meeting the same fate turns in time, and gets out of danger.

Boom, speaks the engineer's gun in the distance.

Bang, bang, the boys are also getting in their work.

Now the fun grows fast and furious, mallard, canvas back, widgeon and teal, whistle, whiz and whir overhead.

Many geese now being heard making their way to the lake, the guns are hushed, each man crouching closer and longing for a shot at some of the many flocks of Canada geese and brant.

Boom, the engineer has got one.

Bang, boom, bang, go the boys guns, the echoes ringing back and forth from the mountain sides.

A flock of six settle down in the water near the Druggist, but out of reach of his gun, reconnoitering the ground about. The gloomy mantle of night will favor his design. Dropping to his face he crawls along beside a ridge till he comes close enough he thinks; then raising his head, there they are about sixty yards away. Throwing his gun to his face as they take wing, two flames of fire leap out; a cloud of smoke obscures the view for a second, but before the echoes of the report die booming away in the distance, the pill slinger proudly holds aloft an Emperor goose.

Darkness now covers the scene. A few minutes more and all are back to camp. A huge fire is soon built and the hungry hunters get ready a humble but very welcome meal. Comparing notes it is discovered that the engineer has killed one Canada goose, one Brant, three Mallard, two Teal, one Canvas-back and three Widgeon. The Druggist one goose, one Canvas-back, two Mallards, one Teal, two Widgeon and one Harlequin.

The boys, for all their banging, can only display a pair of Widgeon.

Supper over, a few more logs are piled upon the fire, and five tired but satisfied hunters settle down for a comfortable chat, when a Siwash musket is heard near at hand.

"We've got neighbors. Siwash camp near by. They are firing off their guns to clean them for the morning's hunt," ejaculated the Engineer.

"Let's go over and visit them."

The Engineer and the boys go over to a clump of bushes where the Indians' fire is seen, the Druggist staying to mind the camp.

After a short absence they return with the Indians, who came to see the white man's camp.

There are three of them—market hunters. One of them a good looking, honest Siwash, the other two rather forbidding looking individuals. One involuntarily thinks of his horses and game as their black and bead like eyes rest upon one after the other.

The better appearing Indian exhibits great curiosity upon noticing decoys, which he has never seen before; in fact, decoys heretofore have been unknown articles upon any of these lakes.

"Heap funny duck. What for them!" asks the Lummi.

Upon being informed of their use the Indian dives down into one pocket after another, and evidently not being satisfied with his search, he points toward his camp.

"Me give white man one, two goose for cultus duck."

Upon being informed that they were not for sale he turns sorrowfully back to his camp, followed by his stolid looking and silent companions, who cast a last longing look upon the modern breech loaders.

Beside the roaring fire the tent is pitched, hot coals are raked over the sand where the blankets for the bed are to be spread. Raking them off, a warm, dry sand is soon covered with blankets, and five tired hunters are soon asleep.

The honking of many geese awakens them long before daylight. Their breakfast of roast potatoes and duck, coffee and sandwiches over, plans are laid for the day.

The Engineer and the Druggist take up their stand behind a ridge, which proves an excellent fly way, the boys selecting fly ways some distance apart.

Being still dark, a delay is necessary. Geese can be heard but not distinguished through the darkness, but soon dim objects can be made out swiftly passing overhead. Three Mallard with outstretched necks glide by, followed by several streaks of fire and as many heavy reports, a splash in the water, and silence again reigns. Sundry bangs from the boys' guns liven things up a little.

A nudge from the engineer caused Jay to turn around to behold a splendid flock of geese with set wings sailing in; closer they come till near enough to the choke bored guns. "What big fellows they are! what long necks!" How grand they look! 'Tis a pity to destroy such noble creatures.

When the smoke rolls away two dead and one winged bird lay close by.

No more shots being offered the game is packed to camp, where the boys soon arrive, but with very little game.

The engineer cautions them against so much indiscriminate firing as they have been indulging in. "Don't shoot till your birds are close up to you, and take careful aim at each bird; don't try any more gun straining shots or shooting at the flock. One sure shot is worth fifty wild shots, and the game is not scared to death."

The engineer now goes to one of the lakes for mallard and canvas-back. The druggist resumes his former blind, his decoys placed enticingly some thirty yards away. The boys take their canoe out to the lake, where they soon begin another fusilade, which arouses the wrath of the Indians, who paddle up, the spokesman of the party addressing them in no modest manner

"What for you bang, bang all time for, scare all birds away. You no shoot so much no more, cultus boys. Me shoot one time me get one goose; you shoot fourteen, fifteen times no get any goose, pooh!"

Shaking their fists at the boys, they paddle crossly away.

The druggist, after waiting patiently some time, at last is rewarded. A band of green winged teal flit by, return, pass over decoys, swerve back again, then settle down near by.

A single canvas-back, upon whom Jay's eyes have been fixed, sails overhead well up, turns, and swings down over water. Jay springs up, the bird is covered, bang, down it comes, and up get the teal, the other barrel winging one which Nat soon brings to his master's feet; returning he retrieves the canvas-back.

A couple of mallards fly by and escape, though followed by several loads of coarse shot.

The engineers gun is heard from time to time.

The boys since their scolding have not been heard from, but several strange guns boom in the distance. The Indian's muskets are heard from time to time.

After a pleasant morning's shooting, each party making a good bag, noon being announced from camp by Billy, all return for dinner, the druggist leaving his decoys in the water till the afternoon's shooting. Not many rods away he discovers a bear track in the sand upon lake shore, and near by another track, too large for a deer, shows where an elk had come to quench his thirst the evening before. A third track is seen which at first is mistaken for a bears', but closer scrutiny shows it to be the bare foot of the Klootchman, who travels all weather without being shod.

"Well, boys, we will get home in the morning," says the engineer. "I wish the Siwashes would punch your heads, boys, for shooting so often at random."

Bang! goes a gun near at hand.

The druggist springs to his feet. "My decoys are blown out of the water. I'll bet some blamed pot-hunter is getting in his bloody work on them," and off he dashes, dropping a red-hot potato down Arthur's collar. Soon returning, all out of breath with laughing, he bursts out: "A young Siwash fired both barrels into my cedar mallards, not thirty feet away."

"I guess your decoys will need new heads?" quoth the engineer.

"Not much; they covered them all over with mud, but never touched them."

After dinner the campers take a walk around to see how things look, many new shooters having come to the lake, at least 20 having been seen during the morning, it is proposed that two of the boys take the rifles and bring in a deer if possible, many tracks being cut into the wet sand in every direction.

The Druggist and Engineer go into the meadow and marsh, for snipe, geese and ducks, a flock of mallard is soon jumped a few killed, but the noise has put up a gang of geese which sail away but are marked down over a ridge, the engineer crawls on all fours to the right, while the druggist circles to the left, after a tedious and muddy crawl a head is cautiously thrust above the ridge, the geese are some 200 yards away yet, another careful crawl and 125 yards only intervene.

Now surely some of those geese are doomed.

Alas an Indian's dog rushes at them, and the whole gang containing many dozens take wing with lots of babbling and honking, and fly directly away from the hunters raising up one, two, yes, a dozen Siwashes rise from the ground in all directions, none of them getting a shot. Now the geese get up in several other places, and leave the field to the Indians and two pale faces, not one of those hunters knowing of the presence of any of the others till after the miserable cur appeared upon the scene.

"Jay, that settles it: it's getting too crowded here, let's get off home."

Sadly the hunters return to camp, where they find the boys who have returned from a fruitless hunt for deer and bear, reporting too many market hunters ahead of them.

Camp is broken up, outfit loaded into wagon, and the nine miles trip for home is made, a number of ducks and snipe and fifteen pheasants picked up on the way.

The boundary line is passed; two miles more and the hunters stop at a run to pick up a few salmon, which now are packed in countless numbers in every stream, hundreds of fine salmon laying rotten upon the banks from previous runs.

The mode of procedure is simple; a hand is thrust under a log or bank, a tail seized, the other hand slowly feels its way along the back, two fingers inserted under the gills, and a ten-pound wriggling, struggling salmon thrown on the bank. If it is a dog salmon it is returned to the water; if a good fish it is retained, especially if it has not been in fresh water too long. Three fish apiece are secured, and off again for home.

JAY SEE EN.

CLEARBROOK, Whatcom Co., Wash., Dec. 4, 1889.

Protect the Game.

A very encouraging "straw" to those who are especially interested in game conservation is the interest manifested in that behalf by the daily press and by influential weeklies published in outlying centers of population.

The San Francisco Examiner, has recently given editorial utterance in support of the game laws of the soundest and most effective sort. The sporting editor of the San Francisco Chronicle, Mr. Thomas Flynn, has written many pointed paragraphs for which sportsmen should be grateful. The San Francisco Call has given up columns to discussion of various phases of the game and fish interests and other metropolitan journals have recently been outspoken on the side of the Fish Commission. The Sonoma Democrat, a leading country journal in its last issue, gives space to the following article which should be read by all who care to maintain a supply of game. The writer says:

A controversy has, for some time, been carried on in the papers, on the subject of the reservation of considerable tracts of wild land, in different parts of the State, by sporting clubs, to enable their members to exercise the sole right of hunting over those tracts which heretofore had been open to the public.

My sympathies would naturally be enlisted on the side of the many who are thus deprived of a healthy recreation which they had looked upon as their birthright; but if promiscuous hunting is allowed to go on at the rate it is sure to do, is it not to be feared, that with the improvement and cheapness of fire arms, the game birds and wild animals still existing, may not soon be exterminated and share the fate that has already fallen to the lot of the buffalo and antelope?

Satisfactory hunting can only be carried out under two conditions: either when a country is sparsely settled and the ferae naturae have as yet been but little disturbed; or when, after the land has come into cultivation, the owners reserve the right of hunting over their grounds for themselves and their friends.

Any places that are open to promiscuous hunting, must of necessity be soon depopulated of game where the human population is considerable. Man is a destructive animal, and will restrain the instinct, and keep it within bounds only when he has a direct interest in doing so, which is not the case with the promiscuous hunter, whose only interest is to fill his bag while there is a chance of doing so.

In many European countries you may travel, for days without coming across any other representatives of the feathered tribes than a few crows and magpies, though only a few years ago good wild sport was to be obtained.

Some birds, such as the quail, have a wonderful instinct of self preservation and the latter has not as yet diminished to the amount that might have been expected from the constant onslaughts made upon it, but the cause that will most surely bring about the early extinction of the quail is the proceeding of certain lawless hunters who prowl over the farmer's lands bent apparently on inflicting as much mischief as lies in their power. These ruthless hunters break down the fences draw out the pickets and leave great gaps for the cattle to stray through even in places where facilities have been provided to enable them to get over the fences without inconvenience.

What wonder then if the farmers instead of encouraging the breeding of quail on their grounds, should place every difficulty in the way, in which case with the rapid clearance of wood and brush that is daily taking place, the quail deprived of any secure breeding place will rapidly become a thing of the past.

The wild duck may probably have a longer tenure, owing to its migratory habits, but their numbers are said to be already much less than they were a few years back, and constant harassing will soon drive the remaining ones to more peaceful regions.

As to the professional hunter, *i. e.*, the man who trusts to the gun for a precarious livelihood—he has no locus standi in a settled, industrious agricultural community. He is an idle loafer who destroys for his sole benefit the game which would provide numbers of industrious men with occasional recreation. He should be systematically discouraged and relegated to the wilds where his distructive propensities might still find profitable employment.

A Baltimore man, Mr. Geo. F. French, is credited by the Sun of that city, with having run a deer down, grabbed it by the antlers, pulled it onto his horse, and carried it home. The paper does not give collateral evidence enough to justify unreserved acceptance of the yarn.

Last Sunday morning, between 10 and 11 o'clock, a sad accident occurred in Casserly district near Watsonville, that caused the death of Everrett W., son of Mr. and Mrs. C. H. Cornell, of Pajaro. Mr. Cornell has always refused to permit his boys to hunt on Sundays, but that morning a boy named Joe Perez came along with a gun, and the boys finally agreed to go with him to watch him shoot rabbits. In attempting to cross a fence on John Donahoe's farm Perez accidentally discharged his shot gun and the load struck young Cornell in the head, killing him instantly. The remains of the boy were taken to the home of his parents, and the funeral took place the following day. The deceased was a promising boy, and his death is a severe blow to his family. Perez was blameless in the matter, and keenly feels the result of his hunting trip.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

The Eastern Field Trials Club's Eleventh Annual Meeting—The All-Age Pointer Stake.

The All-Age Pointer Stake began on Friday, November 22nd. There were sixteen starters. There was a departure in the manner of judging, the quality of the dogs' work being considered as well as the quantity.

The quantity of work in a short heat is often a matter of one dog having a greater number of opportunities, and the best judges now realize that quantity is not necessarily decisive in deciding the winner. Also the finding qualities of the dogs are receiving a more thorough test, and if the new departure is generally adopted, there will be much fewer erroneous decisions heard of. The "luck" of a dog, luck which has no existence except under the restrictions of the present rules, will have ceased to exist with the false system which fostered the constant element of luck.

The judges were Messrs. H. B. Duryea, A. Merriman and Wm. Tallman.

There was very little rushing, the handlers soon realizing that when the quality of the work was receiving quite as much consideration as the quantity, a new departure was necessary; in short, they adopted the manner used in ordinary hunting. The stake was very skillfully judged. Rip Rap, the winner, has already been mentioned in connection with the Derby, in which stake he won second.

Lebanon and Count Fauster have run in previous trials and are well known.

Woolton Game, Mr. F. R. Hitchcock's importation, ran very creditably and showed a high degree of quality, much more than Count Fauster, and was deserving of third place.

On the whole the trials of the Eastern Field Trials Club for this year were the best judged and the best managed of any trials which have preceded them in America. With changed grounds and improved rules, both of which are earnestly contemplated by the club, great improvement will be made in the near future.

SUMMARY.

High Point, Nov 22, 1889.—All-Age Pointer Stake Open to all pointers that have never won a first prize in an all-age open stake at any recognized field trial in America. First prize, $300; second, $150; third, $50, and fourth $50. Forfeit $10; and $20 additional to fill.

I.

Edw. Dexter's black and white dog, Rip Rap, by King of Kent—Hops,	beat	Westminster Kennel Club's liver and white dog, Lad of Bow, by Graphic Climax.
C. H. Odell's orange and white dog, Consolation, by Bang Bang—Grace III,	beat	J. B. Wallace's liver and white bitch Fan-Fan, by Graphic—Lady Belle.
Dr. J. G. F. Holston's liver and white dog Count Fauster, by Mainspring—Dolly Fauster,	beat	B. Thayer's liver and white dog, Fred, by Robert de Diable—Tuck.
Lebanon Kennel's lemon and white dog, Lebanon, by Tim—Peg,	beat	N. S. Simpkin's liver and white bitch, Seldom, by Booth—Tuck.
F. R. Hitchcock's liver and white dog, Duke of Hessen, by Luck of Hessen—Blarney	beat	Edw. Dexter's liver and white dog, Pontiac, by Milton's Bang II—Climax.
Miss H. Wooster's liver and white dog, Tammany's Boy, by Tammany—Juno,	beat	C. H. Odell's orange and white dog, Roger Williams, by Bang Bang—Lalla Rookh.
F. R. Hitchcock's liver and white bitch, Woolton Game, by Gough—Larkspur,	beat	J. T. Richards' liver and white bitch, Miranda, by Mainspring—Beauty.
G. W. Amory's liver and white dog, Bounce, by Bob—Sal,	beat	C. H. Odell's orange and white bitch, Dalgaroki, by Bang Bang—Lalla Rookh.

II.

Rip Rap beat Consolation.	Lebanon beat Tammany's Boy.
Count Fauster beat Duke of Hessen.	Woolton Game beat Bounce.

III.

Rip Rap beat Count Fauster. | Lebanon beat Woolton Game.

IV.

Rip Rap beat Lebanon and won first.

V.

Count Fauster beat Consolation.

VI

Lebanon beat Count Fauster and won second.

1st—Rip Rap.
2nd—Lebanon.
3rd—Count Fauster.
4th—Woolton Game.

	Consolation, by Bang Bang—Grace III	*4
	Lebanon, by Tim—Peg	*4

*Divided.

THE CHAMPION STAKE.

There was but one entry, Chance. Messrs. Duryea, Hitchcock and Coster were appointed judges. The dog was started on Wednesday, and had a walkover.

SUMMARY.

High Point, N. C., Nov. 27, 1889.—The Champion Stake—Open only to winners of All-Age Open Stakes at recognized field trials in America. Entries close October 1, 1889, excepting those dogs that win after closing stakes which are eligible to enter on night previous to running. Forfeit $10 and $15 additional to fill. The club adds $100 to entrance money and the American Field adds a Cup, value $100.

I.

Memphis and Avent Kennel's black, white and tan dog, Chance, by Roderigo—Bo Peep, a walkover.

PREVIOUS WINNERS.

High Point, N. C., 1887.—Gloster, by Dashing Rover—Trinket (setter).
High Point, N. C., 1888.—Jean Valjean, by Mingo—Twin Maud (setter).

Mr. Geo. W. Bassford writes from Vallejo: Lemmy B is by Prince Ranger (Ranger Boy—Jessie) out of Gracie Bow (Champion King Bow—Grace) not Gracie Bow as stated in last BREEDER AND SPORTSMAN.

The "tule hunter" and the tule duck hunter, are two different hunters. And we got there just as hard with tule mask four feet high, gum boots, gun, ducks, caller and "dog."

Our old friend Donald Patton, formerly forester at Golden Gate Park, and a member of the Pacific Kennel Club, writes from Fresno that his Collie, Fair Maid, of Perth, has presented to him nine puppies, five dogs, sired by a local Collie of rare beauty and excellence.

Mr. Perham W. Nahl offers through the advertising columns a rare bargain in a fine, gentle mastiff bitch of good pedigree, thirty-one inches high at the shoulders, fawn color typical in marks. Such a chance is seldom offered, and we urge our readers who fancy big dogs to examine Mr. Nahl's offering.

Mr. J. C. Nattrass of Clearbrook, Whatcom County, Wash., appears in the advertising columns, offering some splendidly bred Irish Red Setters. Mr. Nattrass and Mr. Truman of this city, are steadily pushing along building up the red setter interest, and it is safe to say that no better dogs of the breed can be had in the world than are offered by the gentlemen mentioned.

Anyone who has for sale a fair looking greyhound bitch, two years old, can find a purchaser by communicating with this office.

Near Bourland Meadows, Tuolumne County on Friday last Mr. Henry Gairy killed a white spike buck.

Mr. William Dooley had the misfortune to lose a pair of Gordon setters from 415 Broadway Street on Tuesday last. One of the dogs, a bitch, is very old, the other dog is aged two years. Both are heavy-set, good-looking black and tans and if sportsmen chance to see such animals they will do a kindness by addressing the owner.

Some half dozen or more letters have come to this office from gentlemen interested in the coming field trials, asking why judges are not chosen and announced, and one or two of the writers, notably those who have no dog to run, verge upon heat in remarks about what they term the "negligence" of the club. It is a sufficient answer to say that there exists no rule requiring the announcing of names of judges at any time. The complaisance of field trial clubs has led them in the past to publish their judges as soon as secured, and we are informed that the names of those selected by the Pacific Coast Field Trials Club will be handed to us in time to be sent out next week.

Those who have not had experience in field trials and in selecting judges can know nothing of the perplexities which assail Executive Committees when they set about securing judges.

The post is an onerous one, is without reward, and invariably draws down upon the incumbent the adverse criticism of some of those who do not win. Comparatively few men are willing to forego the pleasure in store for one who merely rides about enjoying the work of the dogs without responsibility, for the sake of judging, and of those who are willing to judge only a fraction possess the habit of mind, experience and freedom from personal bias which should characterize the judge. The Executive Committee may be relied upon to procure the very best available men, and it is a certainty that the coming trials will be judged in perfect disinterestedness.

The secretary of the Field Trial Club is sending out announcements to all members, and invites immediate responses. Some members are a little in arrears and it is hoped that they will bring their dues and fees up to date. The club is well worth sustaining and should have four times as many members as it now has. No club in America is so favorably situated as respects ground and accommodations, and in no State can dog training and field shooting be so continuously and comfortably practiced as in favored California.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent. discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Dec. 14, 1889.

Emasculated Game Laws.

The best efforts of the most thoroughly informed sportsmen as embodied in the present statutes relative to fish and game seem likely to be set at naught by the peculiar interpretations given to the enactments by police and other justices. Whether or not lawyers look for ordinary intelligence and average knowledge of the rules of evidence in justices courts we do not know, but the layman whose liberty and reputation must rest primarily upon the honesty and professional fitness of the courts in which preliminary examinations are made, certainly has cause for alarm when it can be demonstrated that many such courts are either ignorant of the law or unwilling to be guided by its tenets. We are not unaware that knowledge of the importance of fish and game conservation is not so widely diffused as it should be, but we know that a very large element in every community fully supports the State in appointing Fish and Game Commissioners and upholds those officers in vigorously enforcing the laws for the operation of which they are specifically responsible. But neither Fish Commissioners or outraged public feeling seem to be effective in arousing certain justices to wisdom and honesty.

The most judiciously made arrests, in which conclusive evidence is secured and properly presented, leaving no legitimate loop-hole through which a demagogish, vote-desiring justice can crawl, fail because the justices trust to the forgetfulness of the public to cover abominable truckling to those whom they fancy will repay utter debasement by future political preference. To what verge justices of the sort mentioned may go, we dare not venture to surmise. It has been the lot of those interested in prosecuting offenders against the game laws, to see the most flagrant perjury and most unblushing corruption of officers of Courts succeed in freeing men as to whom there could not be in any honest mind a doubt of guilt.

In some so-called "Courts of justice," which might more properly be styled "Courts of connivance to enrich the creature who chances o be presiding," the justices absolutely ignore law, evidence, argument, right and decency, and when stigmatized, attempt to shield themselves behind pleas, the trumped up and wholly inadequate character of which would do discredit to a wholly depraved six months old "artful dodger."

It is not consonant with our purpose at this time to discuss particular cases of dereliction on the part of justices, but when a little time has passed and calm consideration becomes possible, we feel assured no canon of propriety will be violated in taking up man by man those who use the power given them for good ends, to prostitute the law and look for reward either in cash or substantial recognition of another sort.

The Stanford Stakes.

As will be seen by reference to the advertisement, payments are due in the Stanford Stakes on the second of next month, and instead of forwarding money, as in the past, the Secretary of the P. C. T. H. B. A. is the one to whom all remittances must be sent in future. When the Breeders' Association was started the Directors of the Stanford Stakes turned over all their affairs to the new society, and hereafter this well known event will be managed by the Association.

The Los Angeles Winter Meeting.

A telegram from the Secretary of the Southern California Racing Association notifies us that the entry list for the winter meeting is a very large one, and that the class of horses entered warrant the assumption that the contests will be of the best. Los Angeles has always been a favorite place for the horsemen to visit, and we can readily believe that the number which will visit the Southern metropolis during Christmas and New Years will in no wise regret the trip. Many of the horses now at the Bay District Track will shortly be shipped for Los Angeles, and when they meet the Southern contingent "the fur will fly."

The New York Jockey Club.

The new aggregation of race-loving gentlemen who comprise the New York Jockey Club, are determined that California shall know what they propose doing next year, and this week have a full page advertisement setting forth the events that close on January 2d. There are races for two-year-olds, three-year-olds and for all ages, and the distances are as varied as possible, giving all owners a chance to enter in some one or more of the fixed events. A rather novel race is the Toboggan Slide Handicap, the weights for which will be announced February 1st, and declarations are due on the 20th of the same month. Penalties will accrue for winning horses after April 1st, so that some of the owners who contemplate making entries will have to be careful about winning at the spring meeting of the Blood Horse Association.

The stake, however, that should command the most attention is the "Matron," to which is added the enormous sum of $15,000.

It is in reality a futurity stake, and if patronized as it deserves to be should prove one of the largest stakes run for in 1892. There are the usual penalties and allowances and certain conditions that should be carefully read by every breeder in the State. The Association has come to stay, the Directors have the proper conception of turf matters, and it will not take long for the New York jockey Club to occupy the premier position among the various jockey clubs of America.

The Ten Broeck Case.

After long delays and tedious waiting, the case of Richard Ten Broeck has been decided, the jury declaring that the old gentleman was in his sound mind and fit to look after his own affairs.

The testimony was of a most peculiar nature, Mrs. Ten Broeck and her friends testifying to the strange actions of the defendent, while many friends and acquaintances of Mr. Ten Broeck went on the stand and swore they considered him of perfectly sound mind. He was asked to testify in his own behalf, and gave a detailed history of his life up to the time he came to California two years ago. He was born in New York about 80 years ago. In 1829 he was sent to the military academy at West Point, but did not remain long enough to graduate. Among his fellow students were Lee and Magruder of Virginia and General Emory of Maryland. While he was living at the Coon House his weapons, which he kept as curiosities, were secretly taken from his room. His wife was in San Francisco, and sent a man down to nurse him. The first thing this man did was to forcibly search him, and he was convinced took $10 from his pockets. Prior to this time lawyer Highton came down on two different occasions, bringing Drs. Buckly and Wilkins. The former he introduced to as a Louisiana planter and the latter an English gentleman. The nurse followed him to Menlo Park the next day and attempted to take him from his wagon.

Ten Broeck struck him with the whip and knocked him in mud. He believed the person to be intent on kidnapping him He afterwards learned that the two physicians were connected with mad houses, and was firmly convinced that there was a conspiracy on foot to put him out of the way. The nurse continued to remain around the house until forced to leave by a deputy sheriff from Mayfield. He told about Dr. Goodspeed bringing another nurse to his house at San Mateo, whom he ordered from the place. Did not want a man to take care of him, but desired a woman. Never said his wife wanted to poison him. On cross examination he denied agreeing to have a guardian appointed. Was born a free man and like Patrick Henry, wanted "Liberty or Death." His testimony was a complete and emphatic denial of that introduced by the other side. He showed a remarkable memory.

The result of the trial was a source of much gratification to the friends of Mr. Ten Broeck, and he has received congratulations from all quarters.

Robert Bonner and His Horses.

The New York Sportsman of Saturday, October 26th, contained an account of an interview between the well known turf journalist "Albemarle" and Robert Bonner. In the course of the interview there appears the following:

"What do you think of the chances for Axtell to train on?" I asked.

"That is a hard question to answer," was the reply. "I have been reading your articles 'Colts That Trained On,' and I have thought an interesting subject for the next series would be 'Colts That Did Not Train On.'"

"Of course, there is a great difference in horses," continued Mr Bonner. "When Rarus was a youngster he gave but little promise of trotting in 2:13½. He came to his speed year by year. My experience with precocious youngsters is that they seldom improve in speed later on. As an example, I bought Lady Stout with a record of 2:29 at three years of age. It was a wonderful performance then, she being the first of that age to beat 2:30. In after years, although carefully trained, the fastest mile she could show was 2:26. Coming down to the present, we have Sable Wilkes, with a record of 2:18 at three years, and in his four-year-old form he was not able to beat it, while this year he has apparently done nothing."

While picking out two horses to cite as instances of those who did not train on, Mr. Bonner recalls one of his own, and then quotes a California horse as one that did not train on. We were confident that Mr. Bonner did not know the circumstances attending the withdrawal of Sable Wilkes from track work this year, but like many others have done before him, jumped at conclusions. In trying to uphold the reputation of a California horse the following appeared on the Gossip page of the BREEDER AND SPORTSMAN of November 2nd:

Robert Bonner, the well known horseman, is reported to have asked "Pilot Jr.," who has written many papers on "colts that trained on," to write something about colts that have not trained on, and he instances the case of Sable Wilkes, who as a three year old obtained a record of 2:18, but says Mr. Bonner: "In his four year old form he was not able to beat it, while this year he has apparently done nothing." There are some things in this world that Mr. Bonner does not know, and the doings of Sable Wilkes seems to be one of them. As a four year old there was nothing to force him to his best, and yet it is a well known fact that he has been sent faster than his record shows. This year Mr. Corbitt offered to trot Sable Wilkes against Favonia 2:15 and Stamboul 2:14¾, but the owner of the latter objected to an open race, and consequently Sable was thrown out of training and relegated to the stud, having no chance to race this year. By the way, Pilot Jr., did you ever hear of anything training on after Bonner got hold of it? Suppose you commence at his stock farm.

EDITOR BREEDER AND SPORTSMAN:—I see in a late issue of the New York Sportsman an interview with Mr. Robert Bonner, in which that gentleman cites Sable Wilkes 2:18 as an instance of colts that have not trained on. The following are the facts: Sable Wilkes was placed in my hands in the fall of 1886 and was then two years old. I worked him not to exceed two months, and drove him a mile in 2:28. He was then taken to the farm, and returned to me in May, 1887. During that season (87) he won all his stake engagements, obtaining a record of 2:18. In the spring of 1888 he was placed in the stud. After a long season, with a little preparation, he showed a mile in his work in 2:17, last half in 1:06½. A few days later he started against Brown's four year old record, 2:18¾, and although the day and track were not favorable for fast time, trotted a mile in 2:18.

This spring he was nominated in free for all at the Breeders' Meeting, but the race did not fill; his owner then decided to keep him in the stud and not to have him worked. Should Sable Wilkes remain as sound in 1890 as he is at present (providing his owner can spare him from the stud) I will convince the most skeptical that he is one of the colts that trained on. By kindly giving this note space in your valuable paper you will greatly oblige. Yours truly,

JOHN A. GOLDSMITH.

SAN MATEO, CAL., Oct. 31st, 1889.

It is more than passing strange that Mr. Bonner should have taken exception to the item of news and completely overlooked Mr. Goldsmith's letter. It is just possible that it did not suit Mr. Bonner to take Mr. Goldsmith's word as to what Sable Wilkes had done? It looks so on the face of his letter sent to the New York World, for if he had taken any cognizance of the letter, his proper course would have been to send a note to "Albemarle" apologizing for singling out Corbitt's horse, and stating that he had made a mistake about Sable Wilkes not training on. Instead of adopting that course, he hurried into print, not to show that Sable Wilkes had not trained on, but that his horses had. The language he used in the opening of his article is as follows:

"I have just read in the California BREEDER AND SPORTSMAN a not over-courteous article, in which the editor says: "Who has ever heard of a horse training on after Mr. Bonner purchased him?" and then suggests that a beginning be made at my farm for information in that line."

Now Mr. Bonner, to have been perfectly fair with the public, should have inserted in his article the interview with Albemarle, and also the item of gossip and Mr. Goldsmith's letter, then each reader of the Bonner letter would have readily understood the matter at issue. As it is he flys behind the sentence "I have just read in the

California BREEDER AND SPORTSMAN a not over courteous article." Mr. Bonner has not a keen sense of what is courteous or what is otherwise, or he would never have made the remark about Sable Wilkes; he showed a lack of courtesy to Mr. Corbitt, and likewise to Mr. Goldsmith in ignoring his letter. Now the fact of the matter is that Bonner wants his word taken, while at the same time he is not willing to take the word of others. In the long letter sent to the World he gives the following "records" (made with his own watch).

Rarus, 2:11½; Edwin Forrest, 2:11¾; Music, 2:18¾; Keene Jim, 2:14¼; May Bird, 2.18¾; Molsey, 2:18¼; John Taylor, 2:19¾; Wellesley Boy, 2:19¼; Pocahontas, 2:16¾; Startle, 2:19; Maud Macey, 2:16¾; Manette, 2:16¼; Lucy Cuyler, 2.15½ (to wagon); Peerless, 2:23¼ (to wagon).

Now Mr. Bonner satisfies himself that because he says that the times given above are correct (according to his watch), that the horse-loving world will take his word as to the correctness of the time given. But the public will do nothing of the sort; they take the authorities, Chester, Wallace, etc., and on hunting up the books, it is found that the correct time for each of his horses mentioned is as follows: Rarus, 2:13¼; Edwin Forrest, 2:18; Music, 2:21½; May Bird, 2:21; Keene Jim, 2·19¼; Molsey, 2:21¾; John Taylor, 2:25; Wellesley Boy, 2:26½; Pocahontas, 2:26¾; Startle, 2:37; Maud Macey, 2:27¾; Manette, no record whatever; Lucy Cuyler, no record; Peerless, no record.

We have purposely omitted the name of Maud S. from the list given above, as the queen of the turf is the only one he has that the public know has trained on, and we are willing to confess that she lowered her record one second and a half after he purchased her; and this is one, out of probably half a hundred, that has lowered a record from the time that they were bought by the present proprietor. Mr. Bonner's horses have not trained on according to the accepted idea of what that term means, and if Albemarle is going to commence a series of articles on horses of that sort, we again assert, he had better begin at Bonner's stable.

The Prices that Trotters have Brought.

In maximum values as tested by the markets past and present, there is no equality between the trotter and the thoroughbred race horse, says Wallace's Monthly. A consignment of well bred trotting colts will, under the hammer, outsell a lot of well bred thoroughbred colts every day of the year in this country. You may bring the best bred and untried thoroughbred colt in America to the auction block, and we can pick out several untried trotting bred colts of equal age that will outsell him. You may bring that champion among race horses, The Bard, into the ring, and Axtell, Stamboul or Bell Boy will bring more gold under the hammer than the son of Longfellow. You take the peerless race horse Frienzi, almost unbeatable at her best, and you cannot sell her to a breeder for the price that Sunol would bring. In short, the trotter is a more valuable horse than the thoroughbred; and this in spite of the fact that because of the unprogressiveness of the authorities ruling the trotting turf, a first-class running horse can earn more money in racing in one year than a first-class trotter can in three. If the men in whose hands thoroughbred racing has grown to its present flourishing condition since the war had stuck as persistently in the old ruts and been as defiant of decent public sentiment as the law makers of the trotting turf have been, there would be few men breeding running horses. The trotter has reached his "high estate" through the efforts of the breeding element, and has kept his hold upon the public despite the stand-still methods of the turf, because the American people love and admire him for himself, and regard him as more than simply a racing machine.

The highest price we can recall as having been paid for a thoroughbred horse was the $70,000 given for Doncaster. That is $35,000 behind the trotting record—the $105,000 given for Axtell. Mr. Robert Bonner has paid more high prices for trotters than any other man in America, and in many instances they were wholly advertising prices. The $35,000 paid for Pocahontas by Ethan Allen; the $36,000 paid for the gelding Rarus; the $35,000 paid for the gelding Dexter; the $20,000 paid for Startle, and the $20,000 paid for Edward Everett, had no relation to the real values of the animals. No gelding in the world is worth half what Mr. Bonner gave for Rarus. Startle and Edward Everett together were not worth what was paid for one of them, and a mare the equal of Pocahontas would not sell for $5,000 to-day. So that in tracing the growing value of the trotter, the panicky prices paid by Mr. Bonner cannot be given much weight. They were picturesque, it is true, but rarely had sound judgment for their basis.

The price paid for Axtell, 2:12, for instance, was not a fancy figure given by a rich man for a toy, but the price which the horse was, in the judgment of shrewd business men and horsemen, considered to be worth. The only risk is that he may die. If he lives, he will be pretty sure to turn out a paying investment. In the same category we can class the purchase of Bell Boy, 2:19½, for $51,000; Stamboul, 2:12¼, for $50,000; Nutwood, 2:18¾, for $22,000; Jerome Eddy, 2:16½, for $25,000; Antevolo, 2:19½, for $18,000; Patron, 2:14¼, for $25,000; the yearling Electric Bell for $12,500; his sister, the filly Palo Alto Belle, 2:22½, for $8,000 as an untried yearling, etc. There is no room for fear that the monetary value of the trotter rests on a flimsy basis. Throwing aside the wild prices paid by rich men to gratify either personal vanities or fancies, there are enough evidences of the solid worth of the best furnished by the prices that have been paid by shrewd breeders for horses that have been, are, and will be enormously profitable both to the buyer and the seller. If you can succeed in producing the blood the fashion demands, coupled with ability to perform, you can always take your horse to market and bring back gold.

The winter tracks are running great opposition to each other and now it is threatened that the New Jersey Legislature will try and pass a similar law to that in vogue in New York.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

W.

Will you please decide the following bet in the columns of your valuable paper:

A bets B that True Blue never ran a race in California. B bets that he did. A, finding after the bet was made that he was wrong, made a claim for the money, that the horse True Blue did not run a race because he broke down before the finish. Now the question to decide is, Did True Blue run a race?

Answer.—True Blue did run a race in California.

G. H. B., Fresno.

Will you please answer the following: What is the sire and dam of the bay filly Dot, that won the yearling trot at Fresno and also the yearling trot at Visalia this Fall? Who was her breeder, and where was she bred?

Answer.—B f by Apex, dam Ella. We are under the impression that Mr. Straube, of your city, bred the filly, but you can readily ascertain by asking that gentleman. She was entered at both places in his name.

Reader.

Please give me in your next issue the pedigree of the dam of Graves?

Answer.—Her pedigree is not known.

W. P.

In answer to your questions in the last issue of the BREEDER AND SPORTSMAN, a reader says, that Wm. Alexander, of Stockton, would probably be able to give you the information in regard to Old Sportsman. Address letter to Mr. Alexander, Race Track, Stockton.

E. J. Hughes.

Please let me known through your paper if my mare is standard, and if I can register her? Her breeding is as follows: Sire, Mambrino Wilkes 6083; dam by General Dana 1757; grandam, Black Hawk.

Answer.—She can be registered under Rule 7.

W. B. C.

Is the stallion Milton Medium, by Happy Medium, alive or dead? If alive, who owns him, and where is he? Can you give full pedigree? Do you know of any stallion by Happy Medium in California?

Answer.—Milton Medium is at present in Oregon, we think in the neighborhood of Spokane Falls. He is by Happy Medium, dam (dam of Hattie, 2:29¾) by Hambletonian 1727, (a son of Hambletonian 10). Brigadier is by Happy Medium, and is owned by J. B. McDonald, of Marysville.

Jacob Yates:

Please answer the following questions: (1) What is the pedigree of Foxhunter and his record. (2) What was the name of the horse that was poisoned at Stockton some years ago, his breeding and his record. (3) The pedigree of St. Clair that was owned by either Senator Stanford or Mr. Miller. (4) The address of J. A. Goldsmith.

Answer—(1) There is no pedigree known, and he has no record. (2) The most diligent inquiries fail to discover any horse that was poisoned at Stockton "some years ago." (3) His pedigree is not known. (4) San Mateo Stock Farm, San Mateo, Cal.

G. G. Haywards.

Would you kindly publish the pedigree of Erwin Davis and the names of his get who are in the 2:30 list, also the pedigree of imp Hercules.

Answer.—Erwin Davis by Skenandoah 926, dam lost Diamond. said to be by Harris's Hambletonian 2. His progeny in the list are Carrie F. 2:27¾ and Ed 2:26¾. Hercules by Kingstone he by Venison. First dam Daughter of Toscar by Bay Middleton; 2nd Malvina by Oscar; 3rd dam Spotless by Walton; 4th dam by Trumpator; 5th dam by Highflyer; 6th dam Otheothea by Otho.

C. D. Sunol.

Can Fanny the dam of Antelope 2:23½ be registered?

Answer—Yes, under rule 5.

Livermore.

Can you give me the pedigree of Antelope, 2:23½.

Answer—Antelope, foaled 1880, by Nutwood, dam Fanny by Jerseyman he by Geo. M. Patchen Jr., 2nd dam Clara, whose sire was an Australian horse owned by the late D. Murphy of Santa Clara County.

Woodard's February Sale.

EDITOR BREEDER AND SPORTSMAN:—The prospects for my coming sale are unusually encouraging, and I have received three sons and four daughters of George Wilkes, a full brother and sister to Edwood 2:29½ by Egbert, the great Susie S, two-year-old record 3:30, three-year-old record 2:20, four-year-old record 2:18, five-year-old record 2:15½, and has trotted three heats in 2:16¼, 2:15½, 2:16, started in sixteen races, won fourteen and was never unplaced, which is a remarkable showing for a five-year-old. I also have received the dam of Susie S., two brothers and sisters.

I would advise every one contemplating selling in this sale, to write at once for blanks, send in their entries, and thereby receive the full benefit of all advertising. This will be about my last opportunity of advising California breeders of my sale, as entries close January 1, 1890. For particulars address,

W. T. WOODARD,
120 East Main St.,
Lexington, Ky.

LEXINGTON, Ky., Dec. 7, '89.

The Dispersal of the Oak Grove Stud.

EDITOR BREEDER AND SPORTSMAN:—Dr. F. C. Fowler having removed to New York City, has authorized us to sell at our Breeders sale, Lexington, Ky., Feb. 10th, 1890, the whole of the famous Oak Grove Trotting Stud, at the head of which stands Hinder Wilkes record 2:20¼, one of the best young sons of Red Wilkes. He is but six years old and can easily beat his record. In this consignment will be found mares by Electioneer, Guy Wilkes, Onward, Bourbon Wilkes, Lord Russell, Robert McGregor, A. W. Richmond, Belmont, Aberdeen Harold and other great sires. Dr. Fowler has spared no pains or expense in securing this collection, but his business forces him to sell them, and they are in our hands to sell if a bid is made. It is seldom that such a lot of horses goes under the hammer, and breeders who want the best will do well to be at our sale on Feb. 10th. Our entries close December 28, and our catalogue will be issued early in January.

Respectfully,
W. R. BRASFIELD & Co.

FOR SALE.

The Standard-Bred Mare

MAY HUBBARD.

BY GEO. M. PATCHEN, out of Mary Kelly, she by General McClellan. May Hubbard is a handsome bay, 8 years old; never been trained; can trot well in the forties; perfectly sound and in good condition; docile and intelligent. Also a

Standard Yearling Filly

registered; out of May Hubbard, by Anteros. Also the

Patchen Mare "Belle,"

dam by Rifleman; of good disposition, great speed and a first-class broodmare. For terms and particulars, call or address

D. E. FORTIN,
521 Delger St., Oakland, Cal.,

where the horses can be seen.

Stallion for Sale

AT A BARGAIN.

Full Brother to Fairmont.

By Piedmont, dam Queen by Garibaldi—see State Fair Edition of BREEDER AND SPORTSMAN, September 14, 1889, for description of Fairmont—three years old, solid bay. Can trot a 2:10 gait or better. Sound in every particular. Can be seen at Oakland Trotting Park, Oakland.

P. J. WILLIAMS.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

The rain greatly interfered with out-door sports during the week and the athletes were compelled to seek the shelter of the gymnasium.

The wheelmen are making good use of the home trainer.

The rowing machines at the different clubs are well patronized by the oarsmen.

RUNNERS, WALKERS, JUMPERS, ETC.

The Olympic Athletes who took part in the games at Berkeley on Thanksgiving Day will be banqueted this evening.

There is an increased interest in out-door athletics just now. Both the public and the athletes are anxiously awaiting the opening of the Olympic grounds. Men that have not had a shoe on for years will shortly commence training for the inaugural games. The track will hardly be in the condition for record breaking but still fast time may be looked forward to in the different running events. Moffit of the U. C. will stand a good chance of lowering the running high jump record. McKinnon will make a great effort to break the hammer throwing record. Purelle will attempt to improve the shot putting record (his own) E. C. Hill will train to knock Spots out of the "half" record and H. C. Cassidy will b yond all doubt leave the mile record of 4:46 in the lurch.

Espinosa is rapidly coming to the front as a long distance runner. Considering that up to a week previous to the Thanksgiving Day games he devoted all his attention to boxing he made a splendid showing against Cooley and Cassidy, two old and experienced runners.

The following circular was mailed to several prominent amateur athletes at the beginning of the week.

AMATEUR ATHLETICS.

MR.———DEAR SIR:—Believing that there is room for a first-class Amateur Athletic Club in San Francisco, a Committee, composed of prominent amateur athletes, has decided to call a meeting for the purpose of organizing such a Club. Knowing you to be a good athlete and a desirable member, we take the liberty of addressing this circular to you, and we hope you will aid us in the undertaking. Please be present at Parlor, Alcazar Building, on Thursday evening, December 12, 1889. Meeting will be called to order at 8 o'clock sharp. This Circular must be presented at the door.

THE CLUB.

The chief aim of the Committee will be to have the proposed Club composed entirely of Amateurs—no professionals under any circumstances, will be admitted to membership.

INDUCEMENTS OFFERED TO MEMBERS.

The regular monthly dues will be limited to one dollar. Charter members will be admitted without the payment of an initiation fee. Members will have the sole privilege of using the Harbor View Training and Athletic Grounds, including a fine track, eight laps to the mile, also Salt water baths and showers. Handicap games will be held at Harbor View one Sunday in each month, when only members of the Club will be allowed to compete. Handsome medals will be presented to the winners. About twice a year open field-days will be held when all amateur athletes will be invited to participate.

It is proposed to lease the second floor of a new building about to be erected on Tenth Street, near Market, for a Gymnasium and Club rooms. The main hall to be 70 x 110 feet. About once a month an indoor athletic exhibition will be given at the Club rooms, to be followed by a dance.

THE OBJECTS OF THE CLUB.

The objects of the Club will be to foster out-door athletic sports, and to purify all kinds of indoor sports Boxing in particular.

MEMBERSHIP.

The desire of the Committee is to have the Club composed entirely of young men of good social and moral standing.

FINAL.

We have no hesitancy in asserting that the proposed Club will carry off the championship flag in 1890 at the annual championship games of the Pacific Coast Amateur Athletic Association next May. Men will be engaged to rub and assist the members who desire to compete in open games.

The principal object of each and every member should be to uphold the social as well the athletic standing of the Club. Let the motto be "*Labor omnia vincit.*

Yours Respectfully, THE COMMITTEE.

As we had already gone to press before the meeting was held, we are unable to furnish the result in the present issue, but next week full particulars will be printed.

The resignation of Professor Corbett as boxing instructor to the Olympic Club is a blow to that organization. He resigned just at the time when his services were most needed. The juvenile class was progressing very nicely under the able tuition, but now the youngsters will be obliged to begin all over again in order to get acquainted with the tactics of Mr. Corbett's successor. Coming as it did almost immediately after the resignation of President W. Greer Harrison, Mr. Corbett's withdrawal as boxing teacher would certainly imply that there was some bad feeling in connection with the club.

JOTTINGS FROM ALL OVER.

Tom Roe, the bicyclist, arrived at Chicago, Ill., Dec. 2nd, having made the journey from San Francisco by wheel, starting Sept. 23rd. He undertook the trip under the auspices of the Chicago Herald, and although having beaten by more than twenty-four hours any previous journey between the same points, failed to accomplish the task he had set himself. This was largely due to horrible roads, coupled with an injured leg. He was well received upon his arrival in the windy city.

Michael Cregan, the well known Canadian lacrosse player, recently met with a painful and serious accident, which has closed his career on the field. While returning to Montreal from a short trip to Boston, Mass., he attempted to jump from one car to another at Lowell, Mass., when he missed his footing and fell to the ground with his right arm across the rail. The car passed over the member before assistance reached him, and he was immediately conveyed to the hospital where it was found necessary to amputate his arm below the elbow at once, which was successfully done. Cregan is a very prominent member of the famous Shamrock Club.

The annual meeting of the National Amateur Skating Association was held at the Grand Union Hotel, New York City, on Tuesday evening, Nov. 26th, and was fairly well attended. The election resulted in the choice of the following gentlemen: President, William B. Curtis; vice-president, C L Waring; secretary, S J Montgomery; treasurer, J P Story; captain, George A Avery; first lieutenant, C C Hughes; second, J C Devereaux. Mr. Avery was appointed chairman of the racing committee, with power to select officials, and the following gentlemen were appointed as the figure skating committee: C B Cook, T H Rodgers and E W Burr. The association voted not to join the Amateur Athletic Union. The resignation of A A Jordan was accepted, and the Donoghue brothers, Joe, Tim, Jim and Charley, were elected to membership in the association. The championship meeting will be held at Newburg, N. Y., about Jan. 18th, the exact date, of course, depending on the state of the weather.

The Boston Athletic Association is at present in a very flourishing condition. Before long it is expected that this young organization will lead all the other athletic clubs in the United States.

Sidney Thomas, of the Manhattan Athletic Club of New York City, made a successful attempt to create a new record for fifteen miles, at the grounds of that organization on Saturday morning, Nov. 30th, and not only that but he broke all previous American records from 10½ miles to the finish. The trial took place shortly after a brief snow storm, and upon a track that was somewhat muddy, while a cold, strong wind blew across the grounds, interfering with the runner. Thomas was assisted by the following pacemakers: T P Conneff, S J Cornell, Kenneth Grieve, E Piper and W C Edwards, and his time at various distances was as follows: 10½m, 59m 3-5s; 11 miles, 1h 1m 53 3-5s; 12 miles, 1h 7m 50 2-5s; 13 miles, 1h 13m 56 3-5s; 14 miles, 1h 20m 26 3-5s; 15 miles, 1h 27m 11 3-5s. Thomas also broke the hour record, making 10 miles 1,132½ yards, in that time. The officials were: Referee—S J Cornell. Judges—J M Cowie, T P Conneff and C O Perry. Timekeepers—G A Avery, Robert Stoll, S D See and C C Hughes.

Henry Searle the world's champion oarsman died in Australia Dec. 9th. He was 23 years old at the time of his death.

UNIVERSITY JOTTINGS.

An assessment will be levied next spring for the purpose of improving the cinder track.

The old Posen football team has been reorganized, including Hittell and Nourse.

The students are constantly complaining about the absence of hot water in the gymnasium. The athletes say that after they get up a good sweat they are obliged to bathe in ice cold water.

The report that several of the U C athletes were dissatisfied with the handicaps allowed them by Captain Jordan on Thanksgiving Day appears to have no foundation. That one athlete was treated as fairly as another may be surmised from the fact that the 'Varsity boys came out ahead in all of the events in which they competed.

We would suggest that on field-days the fence around the tennis court should be taken down. Standing as it does in the very centre of the grounds, it naturally obstructs the view of the audience.

The one hundred yards stretch of the cinder path is at present completely covered with water, and is more suitable for rowing than for running.

The U. C. Athletes are more confident than ever that the old war cry of "Ha! ha! ha! California; U. C.-U. C. zig! boom! bah!" will be heard at the close of the games on May 30th.

THE WHEELMEN.

Owing to the wretched condition of the roads, the wheelmen have been compelled to put by their wheels for the present and to take exercise on the home trainer.

A meeting of the Bay City Wheelmen was held at the club rooms, 17 Franklin Street, on Tuesday evening last. The following gentlemen were nominated for officers, to serve for the ensuing term of one year: President, George R. Butler; vice-President, Thomas H. Doane; Secretary, Calvin N. Langton; Treasurer, F. E Browning and F. W. Ray; Captain, Sanford Plummer and F. E. Richardson; 1st Lieutenant, W. C. Hammer and L. G. Hodgkins; 2d Lieutenant, J. Holroyd, C. A. Elliott and A. Marshall; Standard Bearer, George P. Wetmore; Buglers, C. C. Moore and E. C. Trie. Election will take place next Monday evening, December 16th.

AT THE OARS.

At the next meeting of the Pacific Coast Rowing Association, it is proposed to open the charter and invite all the clubs in the State to join. The annual dues will also be reduced to $6. Through these inducements a complete reformation will be brought about. The members of the different clubs will also be afforded better protection, as a complete list of members of each club, as well as a list of suspended or expelled members will be kept by the secretary of the association, which list will at all times be open for inspection by the members of the associate clubs. The regular quarterly meeting of the association will be held at 818 Howard Street, room 3, on Wednesday evening, January 8, 1890.

The annual election of Directors and officers of the Ariel Rowing Club will be held on Thursday evening, January 2, 1890. The following are the nominations: President, H. O. Farrel and W. H. Growney; Vice-President, C E. Pless and Ed. Finley; Secretary, E. Flanders and S. Growney; Treasurer, John J. Larkey; Captain, J. Cochrane and L. Stevenson; Lieutenant Captain, W. Adams and H. Ladehoff. Directors—J. Muirhead, H. O. Farrel, H. Frank, W. Julian, Wm. Dungan, J. Hardy, L. F. Nunan, W. Blake, W. Growney, H. Witkopt. Delegates to Rowing Association—Two to be elected—A. Branch, George Branch, H. O. Farrel, Jas. Cochrane, Walter Blake, Eugene Flanders. There are two tickets in the field and the elections will be hotly contested.

CLUB JOTTING.

R. P. Hammond Jr., has been elected President of the Olympic club by the Board of Directors in place of W. Greer Harrison, resigned. E. A. Rix succeeds Mr. Hammond as vice-President. The vacancy in the Board has not been filled.

The cross country run of the Olympic club will hardly take place to-morrow on account of the wet condition of the ground.

We understand that the proposed in-door tournament under the auspices of the Pacific Coast Amateur Athletic Association will not be held. Some of the officers of the association think that a meeting in January would be too soon after the November games. Winter is the proper time to hold an in-door meeting, and according to the calculation if the meeting is not held before Washington's Birthday, there is no chance of it being held until the middle of summer.

P. C. S.—Kindly tell who holds the forty-eight hour championship go-as-you-please.

Answer—The Clipper Annual for 1889, an authoritative publication, gives as the greatest distance travelled, go-as-you-please, in forty-eight hours, 296 miles 1,056 yards, by G Littlewood, London, Eng., Nov. 24-26, 1884.

BILLIARDS.

Hearing that Jake Schaffer, of Chicago, declared he could discount McCleery at billiards. I paid a visit to the genial manager of the Baldwin and asked Mc about it.

Yes, he said, a Mr. Hart of this city assured me that Schaffer said so. "What do you think of it?" was my next question. Well, as a rule, I always "put up" before I talk, but as I am not the boaster in this case, I will say that if Mr. Schaffer will give me the odds of a discount at billiards for a reasonable sum, say $2 500 a side, I will give him and his would-be-high-roller-of-a-backer a chance to win expenses on outside, by playing Schaffer a match at Pin Pool for $2,500 a side. But talking at long range is not my forte.

Will Saylor and you have another match? Now you must excuse me, as I won the last game, but I would be willing to play Ben for a stake, and would like for some of the clubs to put up a trophy outside, and so far as I am concerned, they could make the terms on which we would play.

A fine lithograph of the champion lady billiard player of the world is on exhibition at the Baldwin.

Jim Orndorff, of the Cafe Royal, thinks there will be some of the great players out here this winter, and predicts a big success for any manager who will put up a large purse and invite the best players in the world to contest for it making a handicap, so all would have a show adding that the style of game should be balk line. When asked his opinion as to Schaffer discounting McCleery, he laughed and said: "I'll bet Mc will play him and that Jake will know he has had a game."

Speaking of a handicap among the big professional reminds me of what a gentleman who is a great admirer of the game said to me one day last week: "Why on earth don't they arrange for a tournament of the coast players;" the material is here, and if good, substantial prizes were offered, it would furnish a week of first class sport, say McCleery, Saylor, De Forrest, Orndorff, Chesley, Forsyth, Williams, Smith, Isaacs, Jilleon, Ingersoll, Harding and a dozen others that could be named."

"The McCleery Method of Billiard Playing" is the title of a very interesting and truly valuable little book on the game, received by us and acknowledged in a brief note at the time.

When anything is so perfect and plain, the method simplified so much, it almost disarms criticism, for although a first edition, outside of a typographical error or two it seems to be perfection.

The author, Prof. McCleery, has placed his method of teaching in six clear and concise lessons; then follow one hundred splendid diagrams, by which any amateur can entertain his friends by giving fancy shots, as any and all shots illustrated can certainly be made with a perfect straight stroke.

Using the words of an expert who has carefully read the book, "Mc deserves great credit, as there are many things explained that I have done for years without knowing why; for example, the correct measure of the draw shot alone is worth to anyone the price of the book. The follow, also, as shown by him, is a perfect revelation, making all shots of that description so easy.

Too much cannot be said in praise of the "Angle Lesson," as it positively reduces any and all of the "round the table" strokes down to a simple carrom, explaining the use of the angle marks on the cushions.

Many times have we been asked for the best record of different games or of any special player in the past, and could not give the information. Now we have a perfect encyclopedia of billiard records in this book, and as such records have been compiled for the first time (and the work covered by copyright) it is invaluable for reference.

We understand that the first edition (3000) is all but sold, and the intention of the author is to put out a larger edition, possibly from New York. Payot, Upham & Co. are the publishers, where the book retails at $1.

Maurice Daly has a historic billiard relic in the basement of his room, New York. In the old Trinity building. It is the table Dudley Kavanaugh won when he was champion at the old fourball game.

Players would avoid ripping billiard cloths by a freer use of chalk.

All the billiard rooms are doing a land office business. The Cafe Royal is crowded every evening and at the Baldwin it frequently happens that would be players have to await their turns to get a table.

J. L. Malone the champion pool player will arrive in California within a few days.

Billiards has attained its proper level in New York as is shown by the clergy taking the interest in it that they do. The Rev. Father Samuels, of St. Joseph's church, obtained the services of Sexton, Slosson, Daily and Heiser (who responded willingly) to give exhibitions at a fair for the benefit of the church, and was attended by not only the friends of the congregation, and who took a lively interest in the games, and applauded their fine playing very liberally, besides commenting on its beauties and the healthful exercise it afforded.

Eugene Carter, in a letter from Paris, says: "I want Vignaux and everybody else to know that I mean business when I challenged him at cushion carroms. I may or may not beat him, but whatever I do he can make up his mind that I am not afraid of him, and to prove it I have deposited 2,500 francs for him to play me 1,200 points, 400 each for three nights. I am not satisfied with the result of my season's play at Vignaux's academy. Between a bad table, a bad atmosphere and an ignorance of the language, I have been at series disadvantage. Before I go home I propose to show these Frenchmen some playing that is worthy of me. One thing has also annoyed me here in Paris, and that is a report that I have spoken unkindly of my old friend, Jake Schaefer. I have never done anything of the kind, nor would I do so under any circumstances."

Jacob Schaefer, the billiardist, has issued a challenge to any player living to meet him at any style of game ordinarily played in America for from $2 500 to $5,000 a side.

Patsey Duffy has left the classic shades of the West Side Park, Chicago, and is now shaking hands (between drinks) with his old friends at New Orleans. It is expected that he will get an occasional mount during the winter meeting at that city.

THE FARM.

Pacific Coast Shorthorn Breeders' Association Meeting, December 14th.

President, Judge E. A. Bridgford; Secretary, Ed Younger. The Pacific Coast Shorthorn Breeders' Association will meet at the Golden Eagle Hotel, Sacramento, at 7 P. M. to-day. All persons interested in raising pure-bred cattle should attend, and if not already members of this organization should have themselves enrolled at once, for it is of great importance that all the breeders of thoroughbred cattle should organize and ventilate their opinion of the various localities suitable for cattle raising at a profit, as a variety of valuable information can be gained from such discussions.

Duties on Cattle.

Cows on entering Paris pay a duty of 7f or nearly a dollar and a half a head. Calves pay the same, pigs 15f. and sheep 52f. Why the enormous charge of $10 should be levied on sheep is very singular, and may be explained by the fact that much of the mutton supply comes from Germany. The French protectionist reason on the fallacious principle that the seller pays the duty, whereas the result of the ten-dollar duty on sheep is that the Parisians have to pay more for their mutton. Over 20,000 sheep are killed at Cologne every year and sent to Paris by train. Not satisfied with the heavy octroi duty on the sheep the protectionist deputies in the chamber have been trying to impose a heavy tariff on sheep at the frontier. They had made arrangements in their high tariff for live sheep, but inadvertently left a loophole through which dead sheep entered free until they arrived at Paris. As it is Germany sends over 800,000 pounds of mutton to Paris every year. The animal consumption of beef, veal and mutton in Paris is 300,000,000 pounds. Pork figures for 44,000,000 pounds. The population eats 480,000,000 pounds weight of fruit and vegetables and 414,431 980 eggs. Poultry and game weighs 48,000,000 pounds, and the fish supply about the same. They are consuming more oysters every year, and now require 20,000,000 pounds of them, but this weight includes the shells. The wine which entered Paris during the year amounted to 4,409,779 hectoliters and paid a duty of over 46,000,000f.; the beef supply amounted to 270,000 hectoliters.

A Cattle Convention.

That there is something radically wrong with the cattle market is now one of the clearest truths ever uttered. In order that something may be done it has been determined to hold a cattlemen's convention in Fort Worth, to which delegates will be sent from all sections of the cattle-raising country. At first it was intended to call the convention to meet in Fort Worth on January 7, 1890, but the committee to whose judgment the matter was left, have concluded to defer the meeting until the assembling of the Northwest Cattlemen's Association, which will be held in Fort Worth early in March, it being given as a reason for this that a larger attendance of Texas cattlemen could be secured at that time This meeting will be interstate in its character, as prominent cattlemen from all the cattle-growing States, and prominent men who take an interest in the matter, will be here. No convention of cattlemen ever called attracted as much attention from the leading men of the country as this one has already done, and it may be expected if the agitation of the matter is kept up the gathering will be a notable one.

The great interest has been created by the absolute demoralization of the cattle market. Producers cannot see why cattle should be so low to-day, when consumption is greater than at a time when beef cattle were selling for 60 per cent. more than they are now. The consumers cannot understand why the price of beef products should cost them as much to-day as they did when beef on foot was selling for 60 per cent. more than it is to-day. That these conditions are the results of combinations formed in the Eastern markets rather than natural causes is the firm belief of nearly all cattle-raisers in the country, and in order that such steps may be taken to defeat the schemes of those in the combinations this convention is to be held. If the deliberations of the body when it meets are characterized by harmony and a desire to do good, good will be done.—The St. Louis Republic.

Suggestions to Fair Managers.

It is with considerable diffidence that I answer your call for suggestions in the matter of fair management—in the first place because I am from the wild West and only have an experience in America at Western fairs, and secondly because I have never been an exhibitor. But as an attendant at fairs with the desire to learn I have met with considerable difficulty in obtaining facts which, in my humble opinion, should be open to all. I refer to the exhibits. It is left, apparently, to the discretion of the exhibitors whether they choose to hang up their ribbons designating their awards or not, though of course pride generally comes to the rescue and they do hang them up; sometimes, however, along with ribbons gained at other fairs, and in some place inaccessible to the outsider. Again, you want to know the name or the breeding of such an animal and are at the mercy of the attendants. They may condescend to tell you the truth, but I regret to say such is not always the case.

Now I would suggest the following, and any of your readers who have visited England will bear me out in saying that the system is invariably in vogue there, and so must be successful. Let the superintendent of each department be provided with printed cards, about four by six inches, in plain, legible type, and colored blue, red and white, according to the awards, setting forth the breed, award, name of society, and name of breeder. For instance: Awarded by Minnesota State Fair; first premium for Clydesdale stallion three years old; awarded to Messrs. ———. And let this be nailed up over the animal to which it is awarded so that all can read, mark, learn and inwardly digest it. Secondly, why not print a catalogue, let each entry have its number, and in the catalogue against that number have printed the name of the animal, its breeding, and the owner, and if the owner wishes, put for sale, price, etc, and have these catalogues for sale on the ground? They would be a great boon to all visitors, and would also by their sale be a welcome addition to the funds of the society. I know this can done, and that as a rule at fairs in England visitors would as soon think of going round the stalls without a catalogue as they would of going down into the cellar without a lamp, and if it can be done there why not here? I make this suggestion for what it is worth, but I have been a fair secretary myself in the old country, and I know what I am talking about.—Murray Sheppard in the Gazette.

Annual Meeting of the American Short-Horn Breeders' Association.

HELD AT THE GRAND PACIFIC HOTEL, CHICAGO, ILL., NOV. 20, 1889 AT 8 P. M.

The members were called to order by President Cobb, who addressed the meeting as follows:

Gentlemen, stockholders of the American Shorthorn Breeders Association: Again we meet in accordance with the law under which we are organized, to consider such matters as may be of interest to us as breeders of Shorthorns and as stockholders of this association, and to transact such business as will properly come before us. Inclusive in such business will be the annual report of the officers of the association, which will set forth in detail all of the business transactions during the past year, and also several recommendations for your consideration which we deem of importance and upon which we hope favorable action may be taken. Another item of business will be the election of three directors for the term of three years to succeed Messrs. Harris Hope and Clark, whose term of office expires at this time. In this connection I would hardly feel that I had done my duty, did I not say to you that so far as I know, the above-named gentlemen have served you ably and faithfully during their term of office Before formally perfecting the preliminary business of the evening by calling for the Secretary's minutes of the last meeting, I ask you to indulge me in a few general remarks hastily penned, which I hope may be of use in the way of bringing before you some matters which I hope will open up a discussion in which you will all feel at liberty to take a part and thereby make our meeting interesting and instructive. The Shorthorn interest, together with all cattle interests, as you all well know, are at present much depressed, the principal cause being over-production together with the great numbers that have been thrown on the market during the past two years and more, especially during the past three or four months. In the natural course of events this state of things cannot long continue, as it is well known that the causes which have contributed to the marketing of the great number, amounting to as many as 17,000 in a single day in the Chicago market alone, will not occur again in many years, if indeed ever, in this country. Among the causes which have contributed to this end, we may mention first that very many of our large cattle companies have been in such condition financially, that they have had to ship and realize in order to keep peace with their conditions. We know this to be the case from sources which cannot be questioned, and we would also readily come to such a conclusion when we know that a goodly proportion of shipments have been females, thereby stopping production. Another cause of excessive shipments has arisen from the extensive drouths that have prevailed throughout Wyoming and Montana the past year, rendering the grazing during the summer and fall months very meager, leaving nothing for winter grazing; consequently no alternative for holders but that of marketing. A case came under my observation during my visit to Montana in September last where a party had to send forward his breeding cows to market, and upon which he only realized, after all charges had been paid, the paltry sum of $6.60 per head. The ranchmen of the plains and mountainous districts, our former competitors, have reluctantly come to the conclusion that the time has come when it will not be profitable for them to produce any more cattle than they can provide for and maintain the year around by caring for and feeding the same as we do in this part of the country; and when they have to do that, it will materially decrease the number of cattle raised in said districts, thereby reducing the competition that we have heretofore had to contend with, and naturally advance prices.

Another matter of special interest to us as Short-horn breeders now taking place in Montana is the fact that the old ranchmen who prior, say 1885, had used Short-horn bulls and were induced to change to the Hereford or Polled are returning to their first love and calling for the "red white and roan" again. A friend of mine who has a herd of Short-horns in Montana sold all of his bull calves this spring for $75 each, and can contract at the same price for his bull calves this year. Let us therefore not be discouraged, but rather resolve to breed better cattle and to enlarge the usefulness of our favorite by pushing them to the front in fields heretofore claimed by other breeds as specialties, that is to say, as milk producers and as a general-purpose breed. Let me suggest one way that we can do this very effectually, and that is by entering your best milkers for competition in the dairy classes at your annual agricultural fairs. As probably most of you know, this society offered premiums the past year in most of the great agricultural States for the furtherance of this special interest, and we are very sorry to say that but few entries were made, and those that were, were not in every case any special credit to the breed. Let us look to this matter the coming year and make a better record, and do our utmost in every way to make the Short-horn the most desirable breed for the small farmer. This will require a little exertion and perhaps a little missionary work, but let us do it for the love we bear to our favorites. As a beef producer we ask for no favors, as the result at the Fat-Stock Show in this city has just revealed. I cannot but think that there is a bright future in store for Short-horns that are well bred and of individual merit.

The secretary proceeded to call the roll of members, but on motion the call was dispensed with. The secretary proceeded to read the minutes o the last meeting. As the same had been published and sent to all stockholders a motion was made and carried to dispense with further reading.

The report of the President and Secretary was then submitted to the meeting, showing a total of receipts $40,467.96, including $19,612.45 balance from last year. The expenditures were $18,166.82, leaving a balance of $22,301.14 in the Treasurer's and Secretary's hands.

ASSETS, OCT. 31, 1889.

Amount in hands of Secretary, Treasurer and special deposit	$27,301.14
Books on hand, from Vol. XXV to XXXIV, inclusive, (at cost price)	16,626.50
Furniture and office fixtures, estimated	565.00
Stationery and blanks	30.00
Due us on open accounts	580 64
Total	$45,103.28

LIABILITIES.

Capital stock	$20,000.00
Due on open accounts	2,858 00
Back volumes (for which we have received the money)	39.00
Printing checked pedigrees for Vol. XXXV (estimated)	3,000.00
Due Fat-Stock Show fund	227 02
Balance	18,979.26
Total	$45,103.28

NOMINAL ASSETS.

3,104 volumes American Herd Book, I to XXIV, inclusive.
2,792 volumes Short-horn Record, I to X, inclusive.
475 volumes Ohio Short-horn Record, I to III, inclusive,
365 volumes English reprint of bulls.
345 volumes "Warfield's History."

After the usual business was over the president said:

We feel like congratulating Short-horn breeders on the success of the "red white and roan" at the present show. The special prizes offered by this association that have been awarded so far amount to $945. By the conditions of the offer heretofore made the most of the prizes are continued for one more year, and we have no doubt but what the Board of Directors will make ample provisions for encouraging the herd prizes for next year. We consider this money well spent.

It may be worthy of note and interest to state that the total number of cattle exported for three months during the last year amounted to 1,000 head per day—90,000 in all. Of this great number of live animals exported it is estimated that at least 75 per cent were high-bred Short-horns. During the same period the dressed beef exported amounted to about 75,000 head. We have no means of knowing what per cent of Short-horns were included in this last number. From these fact we think that we should feel encouraged for the future of Short-horns.

The new Board was then elected, and passed among other resolutions the following:

Resolved, That beginning with Vol. XXXVI, rule 1, of the rules of entry shall be amended by striking out the last paragraph and inserting the following:

1st. The animal must trace on side of sire and dam to pedigrees not false or spurious already of record, or to recorded English Shorthorns whose ancestors in all their crosses trace to animals recorded in the first twenty volumes of the English Herd Book.

2d. Amended rule 10 by adding to the portion contained in parenthesis the following: "And trace in all their crosses to the animals recorded in the first twenty volumes of that book."

Resolved, That Short-horns contesting for dairy prizes shall be pure bred cows actually giving milk and subject to test. All other classes shall be dropped.

Resolved, That the Secretary be authorized to arrange with the State agricultural societies or fairs of such States as have considerable dairy interests, to pay from the funds of the association $225 as premiums for Short-born class for the production of milk and butter upon the following conditions:—

1. That Short-horns be permitted by such societies to contest for sweepstake premiums with other dairy breeds.

2. That no arrangement for these premiums will be made with any society except on condition that actual tests of dairy cattle shall be made on the fair grounds under the personal supervision of proper officers or committees.

3. That these resolutions and requirements shall be printed in the premium lists of the society accepting the offer.

For cows three years old or over, first prize $100; second $50.

For heifers under three years old, first prize $50; second $25.

Col. Harris also moved the adoption of the following resolution, which was carried:—

Resolved, That prize classes be continued for three years as at present, 20 per cent. to be added after 1890. To herd bred by exhibitor, consisting of calf, yearling and two-year-old:—

First prize (gold medal)	$60
Second prize (gold medal)	40
Third prize (gold medal)	20

Judge Nourse moved the adoption of the following resolution, which was carried:—

Resolved, That the Illinois State Board of Agriculture be requested to rescind the rule requiring the slaughter of premium yearling cattle.

The Crimson Game.

Among the rare varieties of the Game fowl is the Crimson Game, and one which deserves to be better known and more largely bred than it is. In shape the crimson is similar to the old-fashioned English Game—that is, it is but moderately elevated upon its legs, has a plump body and is covered with a full plumage. In the male the hackle is well developed and flows down upon the shoulders, and the tail is full, carried moderately erect, and furnished with long sickles and abundant hangers. In the female the tail is well fanned out, and rather large and long. The shanks of both sexes are blue, blue-black, or with an occassional tendency towards yellow, though blue is the prevailing color. The fowls are not large but only of medium size.

But when the plumage is spoken of, then the strong point of the Crimson Game is brought into prominence. The male is, in general, of a rich, deep, lustrous dark red, with a chestnut shade. The hackle shows a tendency towards black stripings, though perfect freedom from this is desirable. The tail is black, and the sickles and larger coverts are sometimes edged with red. The female is of a similar color, but generally not quite so dark in shade, the feathers having a rich lustre. The hackle is striped with black, and the whole body is irregularly but handsomely penciled. Richer colored birds are not to be found among domesticated fowls.

The hens lay a large white egg—large, that is for their size, and are fairly good layers. They sit faithfully, and are excellent mothers. They appear to be quite hardy as fowls, though somewhat delicate as chickens.

The Crimson Game, so far as I have been able to ascertain, was produced by careful selection of the old-fashioned Game fowl, with the purpose of producing the richest colored males possible. The result has been that the males are produced with greater uniformity than the females, for among the latter there is occasionally a faded out drab-colored pullet, not to be compared with its sisters for beauty. These pullets, however, produce very brilliantly colored cockerels when bred from.

Whether the Crimson Game will ever become very popular with poultry fanciers depends, we think, upon the question whether it will ever be bred to the shape and style which is suggestive of the pit, so long probably will it be handicapped in the race for public favor. It is true that there is a tendency, quite marked abroad and less marked at home, to return to the old style of Games, but I think it doubtful if this tendency ever accomplishes more than to perhaps modify somewhat the exhibition type. A less "reachy" type may result—one that indicates greater strength than the present—but nothing more than this will be likely to result. If the Crimson Game is made to take on the style and station of the modern Exhibition Game, its exceeding beauty of plumage in both sexes will probably place it among the most popular as it certainly will be among the most beautiful of Game fowls. To a thoroughgoing fancier this possibility has great charms, and may lead to the attempt to remodel the Crimson Game If in so doing a little greater size can be obtained, it will be all the better, for additional size will improve the fowl for practical purposes. The attempt was certainly worth making, and I hope it will be made.—Country Gentleman,

NEW YORK JOCKEY CLUB.

Race Course, Westchester, New York.

STAKES TO CLOSE JANUARY 2, 1890.

SPRING MEETING, 1890.

From May 30th (Decoration Day) to June 14th, Inclusive.

FOR TWO YEARS OLD.

GALLIARD STAKES—FOR TWO YEARS OLD.

A Sweepstakes of $50 each, half forfeit, or only $10 if declared by April 1st, with $1,500 added, of which $300 to second and $200 to third. **Half a mile.**

LARCHMONT STAKES—FOR TWO YEARS OLD.

A Sweepstakes of $50 each, half forfeit, or only $10 if declared by April 1st, with $1,500 added, of which $300 to second and $200 to third. Winner of a race of the value of $2,000 to carry 5 lbs extra; or of two such races, or one of $5,000, 7 lbs. extra. Beaten maidens allowed 5 lbs. **Six furlongs.**

ANTICIPATION STAKES—FOR TWO YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or only $20 if declared by April 1st, with $2,000 added, of which $500 to second and $200 to third. Winner of a race of the value of $2,500 to carry 5 lbs. extra; of two such races, 7 lbs; of three such races, 10 lbs. Beaten maidens allowed 5 lbs. **Six furlongs.**

VAN NEST STAKES—FOR TWO YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. The winner to be sold at auction for $5,000. If entered by 4 P. M. on the day before the day appointed for the race, to be sold for $3,000, allowed 8 lbs.; then 1 lb. allowed for each $100 down to $2,000 Beaten horses not liable to be claimed. **Five furlongs.**

DEBUTANTE STAKES—FOR FILLIES TWO YEARS OLD.

A Sweepstakes of $500 each, half forfeit, or only $10 if declared by April 1st, with $1,250 added, of which $250 to second and $100 to third. Winners excluded from starting and not to pay forfeit. **Five furlongs.**

CASANOVA STAKES—FOR FILLIES TWO YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or only $20 if declared by April 1st, with $2,000 added, of which $500 to second and $200 to third. Winners of a race of $3,000, or of two of $2,000, to carry 5 lbs. extra Beaten maidens allowed 5 lbs. **Six furlongs.**

FOR THREE YEARS OLD.

TRIAL STAKES FOR THREE YEARS OLD.—

A Sweepstakes of $100 each, half forfeit, or only $20 if declared by April 1st, with $3,000 added, of which $500 to second and $300 to third. Winners in 1890 of a race of $4,000, or of two of $2,000, to carry 5 pounds extra. **One mile and a quarter.**

BOWLING BROOK HANDICAP FOR THREE YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or only $20 if declared, with $2,000 added, of which $500 to second and $200 to third. Weights to be published February 1st, and declarations to be made February 20. **One mile and a furlong**

BAYCHESTER STAKES FOR THREE YEARS OLD.

which have not won a race of $1,000 in 1889. A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. Beaten maidens allowed 5 pounds. **One mile.**

THROGG'S NECK STAKES,—FOR THREE YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. The winner to be sold at auction for $5,000. If entered by 4 P. M. on the day before the day appointed for the race, to be sold for $3,000, allowed 8 pounds; then 1 pound allowed for each $100 down to $2,000. Beaten horses not liable to be claimed. **Seven furlongs.**

FOR ALL AGES.

TOBOGGAN SLIDE HANDICAP—FOR ALL AGES.

A Sweepstakes of $100 each, h. f., or only $20 if declared, the Club to guarantee the gross value of the stake to be $10,000, of which $2,000 to second, and $1,000 to third. Weights to be announced February 1st, and declarations to be made by February 20th. Winners after April 1st of two races of any value or one of $1,500 to carry 4 lbs. extra; of one of $3,000 or two of $2,000, 7 lbs. extra; of two of $3,000 or one of $5,000, 10 lbs. extra. **Six furlongs.**

NEW YORK JOCKEY CLUB HANDICAP—FOR ALL AGES.

A Sweepstakes of $150 each, h. f., or only $25 if declared by 4 P. M. on the day before the day appointed for the race, with $5,000 added, of which $1,000 to second and $500 to third. Weights to be published on the second day before the race. **One mile and a quarter.**

WESTCHESTER CUP—FOR ALL AGES.

A Sweepstakes, of $100 each h. f., or only $20 if declared by April 1st, with $3,000 added, of which $500 to second, and $400 to third. Winner of a race in 1890 of $5,000, when carrying weight for age or more, to carry 5 lbs. extra. **One mile and a half.**

ALL BREEZE STAKES—FOR ALL AGES.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. Winners in 1890 of $3,000 to carry 5 lbs. extra; horses which have never won $5,000 allowed 7 lbs: $2,500, 10 lbs; $1,000, 14 lbs. **Seven furlongs.**

FORT SCHUYLER STAKES—FOR ALL AGES.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. The winner to be sold at auction for $5,000. If entered by 4 P. M. on the day before the day appointed for the race to be sold for $3,000, allowed 5 lbs.; then 1 lb. allowed for each $100 down to $2,000. **One mile.**

FALL MEETING, 1890.

STAKES TO CLOSE JANUARY 2, 1890.

FOR TWO YEARS OLD.

WHITE PLAINS HANDICAP—FOR TWO YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or $25 is declared by 4 P. M. on the day before the day appointed for the race, or only $10 if declared by August 1st, 1890. The Club to guarantee the gross value of the stake to be $10,000, of which $2,000 to second and $1,000 to third. Weights to be published on the second day before the race. **Six furlongs.**

DUNMOW STAKES FOR TWO YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or only $20 if declared by August 1st, with $5,000 added, of which $1,000 to second and $500 to third. Winners after August 1st of $3,000, when carrying weight for age or more, to carry three pounds extra; of two such races or one of $5,000, 7 pounds extra. Those not having won in 1890 $3,000, when carrying weight for age or more, allowed five pounds. Beaten maidens allowed ten pounds. **Six furlongs.**

FASHION STAKES—FOR FILLIES TWO YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. Winners of any race of $2,500 to carry 3 pounds, or of two such races or one of $5,000 to carry 7 pounds extra. Non-winners of $1,500 allowed 5 pounds; of $1,000 7 pounds, Beaten maidens allowed 12 pounds. **Six furlongs.**

FAREWELL STAKES—FOR TWO YEARS OLD.

A Sweepstakes of $50 each, 15 forfeit, with $1,000 added, of which $200 to second and $100 to third. The winner to be sold at auction for $5,000; if entered at 4 P. M. on the day before the day appointed for the race, to be sold for $2,500, allowed 7 pounds, or if for $1,000, 14 pounds. Beaten horses not liable to be claimed. **Six furlongs.**

FOR THREE YEARS OLD.

PELHAM BAY HANDICAP—FOR THREE YEARS OLD.

A Sweepstakes of $100 each, half forfeit, or $25 if declared by 4 P. M. on the day before the day appointed for the race, or only $10 if declared by August 1st. The club to guarantee the gross value of the stake to be $5,000, of which $1,000 to second and $500 to third, Weights to be published on the second day before the race. **One mile and five furlongs.**

PROTECTORY STAKES—FOR THREE YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. Winners in 1890 of $2,000 to carry 5 lbs. extra; twice, 7 lbs.; thrice, 10 lbs. Non-winners in 1890 of $2,000 allowed 5 lbs.; or of $1,000, 10 lbs. Beaten maidens allowed 15 lbs. **One mile.**

ECHO STAKES—FOR THREE YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,000 added, of which $200 to second and $100 to third. The winner to be sold at auction for $5,000; if entered by 4 P. M. on the day before the day appointed for the race to be sold for $4,000, allowed 3 lbs.; if for $3,000, 7 lbs.; if for $2,000, 12 lbs; if for $1,000, 20 lbs. Beaten horses not liable to be claimed. **One mile and a sixteenth.**

PEYTONA STAKES—FOR FILLIES THREE YEARS OLD.

A Sweepstakes of $50 each, $15 forfeit, with $1,250 added, of which $250 to second and $100 to third. The Thoroughbred Stallion

INTRUDER

Will make the Season of 1890 at Agricultural Park, SACRAMENTO.

Bay Horse, foaled 1871, bred by Sir L. Newman, England. Imported by D. D. Withers, Esq., New York

By Crater, Son of Orlando and Vesuvienne by Gladiator.

1st dam Lady Bountiful by Rataplan (Rataplan is own brother to Stockwell, and winner of 42 races, including the Doncaster Cup and 19 Queen's Plates, and proved himself the most distinguished race horse of his day in England).
2d dam Plentiful by Don John (the winner of St. Leger and Doncaster Cup).
3d dam Plenty by Bay Middleton (winner of the Derby and Two Thousand Guinea Stakes).
4th dam Plenary, own sister of Plenipotentiary, by Emilius. (Both Emilius and Plenipotentiary were Derby winners.
5th dam Harriet, dam of the renowned Plenipotentiary by Pericles.
6th dam by Selim, winner of the One Thousand Guinea Stakes.
7th dam by Pypilina, by Sir Peter.
8th dam Rally, by Trumpeter.
9th dam Fancy, by Florizel. Fancy was full sister to Diomed, the first Derby winner in England, and after his importation into this country, sired the illustrious Sir Archy, etc. See English Stud Book.

Imported INTRUDER is a beautiful bay, standing fully 16 hands high, of great length and substance, and descends through close and strong currents from the most illustrious winners and winning lines of blood of which the English Stud Book bears record.

A careful review of the first six crosses of the pedigree of INTRUDER will show nine Derby winners; five St. Leger winners; two winners of The Oaks; two winners of the Two Thousand Guineas: two winners of the One Thousand Guineas; one Goodwood Cup winner; one Cæsarwich Cup winner; one Cambridgeshire Stakes winner, and four Doncaster Cups, in addition to a great number of Steeplechases and other races of less import.

INTRUDER, at the great fair held at St. Louis, Mo., in 1876, was awarded the highest stallion honors—the blue ribbon and the $500 purse—in the sweepstakes ring for stallion of any age or blood. The list of competitors embraced the large number of thirty-three animals, and they represented England, Canada, Kentucky, Tennessee, and other states. He also took first premium in his class and in sweepstakes for the best stallion of any age or breed at the State Fair at Peoria, Ill., 1882. He is the sire of Tidal Wave, George Hakes, Bernice and April Fool.

INTRUDER is the sire of Interpose, who is the dam of Spokane, winner of the Kentucky Derby, in which he beat the great horse Proctor Knott and broke the record.

TERMS: $50 for the season. Mares not proving with foal can be returned the next season free of charge. Good pasturage at $4 per month. Mares cared for in any manner owners may desire, and fed on hay and grain, either or both, at reasonable rates. While every precaution will be taken, no responsibility will be assumed for escapes or accidents. Mares sent from a distance in care of the undersigned, will be met and taken to the park. SAN MATEO STOCK FARM

HOME OF GUY WILKES,

Record, 2:15 1-4.

Guy Wilkes' Book is full for 1890, and positively no more mares will be received. Book now open for 1891, at $500 the Season.

Sable Wilkes, three-year-old record 2:18, will be allowed to serve 25 mares in addition to those already engaged at $250 the season of 1890. SABLE Wilkes, 15½ hands, black horse, by Guy Wilkes, first dam Sable by The Moor; second dam Gretchen by Mambrino Pilot; third dam Kitty Kirkman by Canada Chief; fourth dam by Fanning's Tobe; fifth dam by imp. Leviathan.

Leo Wilkes, brown horse, four years, 16 hands, full brother to Sable Wilkes, will be allowed to serve 30 mares at $100 the season

Mares not proving with foal may be returned the following season free of service fee. Parties engaging the services of any of the above horses must send a deposit of 10 per cent. of service money with engagement. Pasturage $6 per month, and when the condition of the animal requires it, hay or grain, or both, are fed, the charge will be $12 50 per month. Good care will be taken of all mares sent to the Farm, but no liability will be assumed for accidents or escapes.

All bills are due at time of service, but must be paid by August 1st of each year. No stock will be allowed to leave the place until all bills are paid.

$3,000. GUARANTEED. $3,000.

THE

BREEDER AND SPORTSMAN'S

-: Futurity Stakes :-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

$3,000. GUARANTEED $3,000.

Being the oldest established firm in the live-stock business on this Coast, and having conducted the important auction sales in this line for the past fifteen years, amounting to one half a million of dollars, we feel jutified in claiming unequaled facilities for disposing of live stock of every description, either at auction or private sale. Our list of correspondents embraces every breeder and dealer of prominence upon the Pacific Coast, thus enabling us to give full publicity to animals placed with us for sale. Private purchases and sales of live stock of all descriptions will be made on commission, and stock shipped with the utmost care. Purchases and sales made of land of every description. We are authorized to refer to the gentlemen whose names are appended.

THE IMPROVED NOYES ROAD - CART.

PATENTED JULY 17, 1883, *AND JUNE* 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheel—a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17½ and Chanter a half-mile in 1 10½ to a Noyes Cart, says he would not take $250 for it if he could not get another; W. OSSIDINE

Results obtained at the well-known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it: and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used. Very respectfully yours,

S. A. BROWNE & CO., Prop's.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to

Mr. JEROME I. CASE, Mr. FRED. GEBHARD, Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),

And hundreds of others from whom we have very flattering testimonials.

To Horse Breeders and Stockmen.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 857 acres; one mile frontage on Clear Lake; 340 acres now seeded to alfalfa, cuts six tons per acre; 70 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,000; three barns, capacity 350 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cold spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch. The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

JOHN T. PETERS,
Agent for Sonoma Lake and Mendocino County Land.
29 New Montgomery St., in Grand Hotel.

MANHATTAN FOOD.

keeps horses healthy, promotes digestion, fattens horses, loosens the hide, assists the appetite, prevents leg swelling, strengthens the kidneys, regulates the bowels and destroys worms. **$7.50 per 100 lbs.** Ask your dealer for it or send to

MANHATTAN FOOD CO., 206 Clay St., S. F.

BOYCE TABLETS.

Leg and Body Wash.

THE BOYCE TABLETS are packed in a nicely decorated metal box with hinged lid—one hundred tablets in each box; directions for use plainly engraved upon the box; therefore, the convenience of the package—no liability to leakage and breakage—economy and ready solubility, together with the absolute certainty of their action, will at once commend the use of BOYCE'S TABLETS to the intelligent horsemen of the country. TABLETS sufficient to make one hundred pints of leg and body wash are conveniently carried in an inside coat pocket or in the hip-pocket of the trousers.

The BOYCE WASH can be applied ALL OVER THE BODY WITHOUT FEAR OF BLISTERING OR AFFECTING THE KIDNEYS.

The BOYCE WASH will cure CRACKED HEELS, PUFFS, STOCKINGS, SCRATCHES, INFLAMED TENDONS and FEVERED LEGS.

Price per Box of One Hundred Tablets, $2, sent postpaid to any part of the United States; **six boxes for $10.** A sample of BOYCE'S TABLETS will be mailed to any address on application. These TABLETS are warranted to keep in any climate. Address

BREEDER AND SPORTSMAN

Vol. XV. No. 24.
No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, DEC. 21, 1889.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

SUPERIOR, 2:19 1-4.

Owned by DuBOIS BROS. of Denver, Colo.

SUPERIOR, 2:19 1-4.

The Du Bois Bros. Stock Farm.

"Notable horses of California" have graced the front page of the BREEDER AND SPORTSMAN for many years, and it is rarely that one who was not to the Manor born has been presented to our readers, but here we have a horse, the owners of which recognize the beneficial effects of the California climate, and a dozen or so are now quartered at the Oakland Trotting Park belonging to them. The gentlemen who own the stock are the Du Bois Bros. of Denver, Colorado, who some years ago purchased 800 acres of land within three or four miles of Denver, feeling assured that there would always be a ready market for royally-bred trotting horses. Money has been spent with a lavish hand, and to-day one of the best appointed breeding establishments in the country lies snugly ensconsed at the foot of the Rocky Mountains, and within sound of the business hum of the mountain metropolis. The utmost care has been taken in the selection of both sires and broodmares, the two stallions ranking with the best.

Superior, whose picture is here given, is not only bred in the very highest of blood lines, both top and bottom, but in appearance is generelly acknowledged to be one of the most handsome horses in the United States. In color he can only be described as a golden chestnut, and to attempt to describe him minutely is time thrown away, for the story can be summed up in the statement that he is a perfect type of the Hambletonian. When he is seen for the first time, the beholder is apt to exclaim, "What a beautiful little horse," yet he stands 16 hands barefooted; but he is put up so perfectly that his height is very deceptive. The intelligence of Superior is wonderful, and his disposition of the best. A long arched neck, grand shoulders, roomy barrel, well-set middle piece, magnificent legs, and better than all excellent feet, tend to make Superior a gem of the first water.

Superior 4012 was foaled 1881, sired by Egbert 1136, dam Mary (dam of Benefactor, 2:28), by Woodford Mambrino 345; second dam Belle by Alexander's Norman 25; third dam Vic (dam of Dainty, 2:26¾, and Mattie Graham, 2:21) by Mambrino Chief 11; fourth dam Fly by Barclay's Columbus; fifth dam Paradise by Duke of Bedford II (thoroughbred). His tabulated pedigree is as follows:

SUPERIOR 4012.

Egbert 1136 — Hambletonian 10 — Messenger Duroc 106 — Mambrino, son of imp. Messenger; Amazonia (thoroughbred
Hambletonian 10 — Charles Kent Mare — imp. Bellfounder; One Eye, by Bishop's Hambleto'n
Camptown — Messenger Duroc 106 — Hambletonian 10; Satinet, by Roes' Abdallah Chief
Camptown — Miss McCloud — Holbert Colt, son Hambletonian 10; May Fly, by Utter Horse

Mary (dam of Benefactor, 2:28) — Woodford Mamb. 345 — Mambrino Chief 11 — Mambrino Paymaster, by Mambrino untraced
Woodford Mamb. 345 — Woodbine, Dam of Wedgewood, 2:19. — Woodford (thoroughbred untraced
Belle — Alexander's Norman 25 — Morse Horse 6, son of European; Slocum Mare, by Magnum Bonum
Belle — Vic, Dam of Dainty, 2:26¾ and Mattie Graham, 2:21. — Mambrino Chief 11, son of Mambrino Paymaster; Fly, by Barclay's Columbus

Egbert, sire of Superior, is an inbred Hambletonian. He is a son of the old horse, out of a daughter of another son, Messenger Duroc; second dam by the Holbert colt, also a son of Hambletonian; third dam May Fly by Utter Horse; fourth dam by Abdallah Chief, son of Abdallah 1. He traces three times to the old hero of Chester, and four times to his sire, Abdallah 1.

Egbert has put at least fifteen into the 2:30 list this season, a feat never accomplished before by any horse in any one year. He has transmitted his speed to Superior and those who know the horse claim that he is strongly endowed with courage and stamina. During the year 1888, he was sick and all out of condition, and failed to do himself great credit, but was universally admired on account of his superb make-up and purity of gait. As the season neared its close he began to recover form, and his game struggle to win the memorable 2:25 stallion stake at the Lexington, Ky., fall meeting brought him into well-deserved prominence, and earned for him the admiration of critical and observing horsemen. In this race he was driven by the noted reinsman Budd Doble, who recently expressed in our hearing the belief that he was a race horse in every sense of the word. In this race he met such excellent horses as Baron Wilkes, Granby and Hinder Wilkes.

The first heat was won by Hinder Wilkes in 2:20¼, and he was driven out by Superior, who was a close second. The second heat was a battle royal between Hinder Wilkes and Superior, the latter winning it by a neck in 2:20½. The third heat was won by Hinder Wilkes with Superior fourth. The fourth heat was won by Granby, with Superior a close third. The fifth sixth and seventh heats were won by Baron Wilkes with Superior third in the fifth and a good second in the sixth and seventh heats. It was a grand performance, and stamped Superior as a first-class turf performer.

From Lexington, Superior was taken to Denver when he was matched against Elmwood Chief. The race took place on November 3rd and the excitemement was intense as both horses had many friends.

In the first heat, owing to Superior stepping in a hole in the track, which threw him off his stride, Elmwood Chief proved the victor, time, 2:18¾, and yet when the mishap occurred he was going at a 2:15 gait. Superior won the next three heats, however, in an easy manner as the following summary will show:

Nov. 3, 1888—Match race, $500 a side.

Superior, ch h by Egbert—by Woodford Mambrino	2	1	1	1
Elmwood Chief, br g by Black Ranger	1	2	2	2

Time, 2:18¾, 2:19¼, 2:19¾, 2:22.

The Du Bois Bros. are satisfied that they have one of the best horses in the world, and are willing to enter him in a sweepstakes, the result to determine which is the best trotting stallion in America.

Since his arrival in California, the weather has prevented his receiving the amount of work necessary, but between the showers he was given a full mile at the track which he readily compassed in 2:22. The last half was made in 1:09, the last quarter in 33 seconds and the last eighth in 16 seconds, a 2:08 gait. Before the end of next season our readers may expect to hear of Superior making a very low record.

The Du Bois Bros. also own Magnet who made a record of 2:28¾ at Overland Park, Denver, November 3, 1888. His three heats on that day in 2:28¾, 2:30, 2:29½, are no measure of his speed, he having repeatedly shown the capacity to trot in 2:20 or better. He is a bay horse foaled 1875 by Magnolia 68, son of Seely's American Star 14 dam Mischief by Alexander's Abdallah: second dam by a Bolivar horse. Magnolia, the sire of Magnet was one of the best bred sons of Seely's American Star. his dam was Jenny Lind by Bay Richmond, son of Toby and Lady Pluck by Mambrino, son of imp Messenger; second dam a thoroughbred daughter of Post Boy he by Duroc son of imp Diomed. An examination of the pedigree of Magnet shows ten direct crosses to imp Messenger six on the side of his sire Magnolia and four through his dam, daughter of Alexander's Abdallah.

MAGNET 1326.

Magnolia 68 — Seely's American Star — Stockholm's American Star.; Sally Slouch, by Henry (thoroughbred)
Magnolia 68 — Jenny Lind — Bay Richmond,; Lady Pluck, by Mambrino.
Mischief — Alexander's Abdallah 15 — Hambletonian 10.; Katy Darling.
Mischief — A Bolivar mare.

The brood mares at the Du Bois Farm are worthy of the stallions with which they are to be mated. Most of them are standard bred, and all are distinguished either by pedigree or performance on the track or in the stud. Space will only permit a brief mention. The following sires are represented: Hambletonian 10, Volunteer, American Clay, Larry W., Vargrave, Knox Boy, Daniel Lambert, Weisbaden (full brother to Wedgewood), Fisk's Mambrino Chief, Hirsch's Belmont, Exile, Kentucky Clay, Monitor, Peck's Idol, Abe Lincoln, Burger, Republic, Romulus, Iowa Chief, Ben Patchen, Pocahontas Boy, Legal Tender, Jr., Alexander H Sherman, Red Buck (Arnold & Hale's), Blue Bull, Woodford Mambrino, Superior, Strawn's Monarch and Magnet.

During the past year many very choice mares have been added to the collection, and it would give us pleasure to give a list in detail of them all, but a lack of space forbids. Perhaps the most noticeable mare on the farm judged by pedigree is the bay mare Alexander Queen, by Alexander H. Sherman, son of Idol, by Hambletonian 10, out of Mattie, by Hambletonian 10. The dam of Alexander Queen was Hambletonian Queen, by Hambletonian 10; second dam Lady Russell, by Seely's American Star.

Viola, b m, five years old, by Volunteer Star 1614; 1st dam Mets, pacing trial, 2:21½. She by Thorndale, 2:22½; 2nd dam by Alexander's Abdallah, sire of Goldsmith Maid, 2:14.

A bay filly next attracts attention. She is as yet unnamed, by Blackwood 74 (sire of Proteine, 2:18); dam of this filly is Sadie by Hambletonian 10; 2nd dam Lady Wynne by William Welch (son of Hambletonian 10). This is a fine filly and should prove a grand brood mare.

A most beautiful filly is Diadem by King Rene 1278 (sire of Fugue, 2:19¼). 1st dam Carita by Dictator 113, 2nd dam Miss Butler by Duvall's Mambrino, 3rd dam by Downing's Bay Messenger. Diadem is a perfect model, and a magnificent individual.

Bertha is one of the old mares, but is a fine specimen of the trotter. She is by Hotspur 172; 1st dam Lady Crawford by Seely's American Star; 2nd dam by Hector. Bertha has a fine weanling by Tyrant (full brother to Phallas, 2:13¾) which is full of trot.

Nora is sister to Bertha, and has a colt by Brown, 2:18¾. Nora is a grand representative of the Hambletonian Star family—fine size, and as highly formed as a thoroughbred. She was selected as a broodmare for her individual excellence.

Puritan is the dam of Kansas Wilkes 3549 that sold as a yearling for $5,000. She is by Almont 33, dam Madam Finch by Drennon; second dam by Gen. Taylor. Puritan is a full sister to Emma G., winner of the Lexington Stakes in 1879, and was quite speedy. Mr. W. C. France timed her over the Maysville (Ky.) track in 2:32. She is large, rangy, and very handsome.

Emerald is standard and registered, by Red Wilkes, 1749, dam by Administrator 357. Emerald has not been trained for speed, but could show quarters, when ten months old, in 52 seconds. She is a strong made filly, and her elegant line of breeding will make her a very desirable broodmare.

Donna is a bay filly foaled 1886, by Pilot Medium 1957, dam by Night Hawk 514. Donna is a very handsome bay mare, 15½ hands high, with one white foot behind. She was handled about three weeks this last fall, and trotted a mile in 2:40.

Sally Hamilton is a chestnut mare foaled 1883, by Hailstorm 813 (son of Mambrino Patchen 58) dam Lady Rumler by Independence 638. This is a fine, big mare, with excellent action, and is very speedy.

Ina is by Dictator 113, dam by Bob Didlake 794; second dam by Grey Eagle. She is a good-looking and well-bred mare, and has a weanling colt by Red Chief 4603.

Dazzle is a fine looking filly, and fully warrants more than passing mention. She is a beautiful bay, with small star, foaled 1887, and is by Slander 3031; first dam Daphne by Jay Gould 197, he by Hambletonian 10; second dam Martense by Gen. Knox 140; third dam Martense Maid by Jackson's Flying Cloud 134 (son of Vermont Black Hawk); fourth dam Jenny Lind by Abdallah 1 (sire of Hambletonian 10); fifth dam The Laird Mare by imp. Trustee. If this breeding does not produce a trotter of the highest quality, it will cause surprise.

Little Sissie is four years old, by Hambletonian Mambrino 540, dam Rosa May by William Welch 341; second dam Lilly Gray by Idol 177. Little Sissie is a nice blocky mare, powerfully built, and can beat three minutes all to pieces.

Emily is by Egbert 1136, dam Hortense by Messenger Duroc, and is a splendid specimen of the light harness horse, and can show a very fast mile.

Ayesha is a chestnut filly foaled 1887, by King Rene 1278, dam Romana by Harold 413; second dam by Ansel; third dam by Hunt's Commodore; fourth dam by Blackburn's Whip. Ayesha is full sister to Annie Rene, record 2:38 at three years old, Pythias, record 2:38½ at two years old. She is a large, handsome filly of nice style and good action, and can show as much speed for her handling as any youngster.

Elsiewood is a daughter of Nutwood 600, the first dam being Elies by George Wilkes; second dam Ellen Briggs by Blackwood 74. She is a filly of good size, and shows remarkable trotting action.

Daphne is a chestnut mare foaled 1880, by Commodore Belmont 4340, dam Fanny Hooker by Joe Hooker 185. She is very fast herself, and is a producer of speed.

Alice Marshall, b m foaled 1883, by Pocahontas Boy 1790, dam by Middlesex, son of Hambletonian 10. This is a grand broodmare, and will make a name for herself. Alice Marshall has a mare by Duration which give promise of great speed.

Cynthia S. is by Exile 1143, dam Milliard by Albion, son of Peter's Halcorn; second dam Ned by Berkley's Edwin Forrest. This is a mare of fine appearance, and should add greatly to the renown of the Du Bois Stock Farm.

Lady Temple has two crosses of Pilot, Jr., being by Monitor 1327, dam Nellie Blythe, by Mambrino Temple 586, 2nd dam Lady Pilot, by Pilot Jr. 12, etc. Lady Temple is a grand individual and is greatly admired by all who visit the farm.

Vixen is another of the matrons that claims attention from her good looks, and she is bred somewhat on the lines of Lady Temple, being by Monitor 1326, dam Vixen by Mambrino Temple 586, 2nd dam by Geo. W. Patchen 30. She impresses the sightseer as being of the highest type, and to the embraces of Superior should produce a fast foal. In all there are about one hundred brood mares at the farm, of which seventy-five are standard bred and most of them registered. The du Bois Bros. have used exceeding good judgment and it will not be long before the fame of the Du Bois Stock Farm will be known from the Atlantic to the Pacific.

The colts and fillies by Magnet are all promising trotters, all marked by characteristics that show the prepotency of their sire, and such as have been trained have made excellent performances. Belle Magnet, two years old, took second money in the stakes at the Territorial Fair, Cheyenne, W. T., and also at the Overland Park, Denver, Col. Magdalene took third money in the three-year-old stake at Denver, Col., competing against the phenomenal filly Wanita, record 2:21 in the last heat of that race. Stelle Magnet, four years old (the oldest Magnet foal in Colorado), showed such gait and speed as would undoubtedly have placed her in the 2:30 list had she been trained, and several others now being handled promise to equal or eclipse the record of their sire at an early age. All of the Magnet youngsters are level-headed, pure-gaited, well-dispositioned, and almost without exception have their sire's way of going.

Of Superior's get there are seven foals of 1888 at the farm, all of fine size and finish; in fact, exceptionally good in every particular.

The Du Bois breeding stud is yet in its infancy, but is producing trotters. There is nothing hazarded in the prediction that in a very few years it will become famous by the turf performances of the colts and fillies bred within its borders.

Prof. Fred Smith of the Army Veterinary School at Aldershot, says that the compression to which the navicular bones of the fore limbs are exposed is something enormous. A horse weighing 1,000 lbs, throws 187½ lbs. more weight on his fore lges than on his hind, and the total amount on both is 600 lbs., or 300 on each leg. In addition to this carrying more weight on the fore legs than on the hind ones, they are quicker used for the start and the first pulling along. If he slips with these there is no progress in the walk or trot. With the gallop it is different, for the hind legs are the chief propelling force. Strong, sound fore legs, therefore, are absolute essentials, and the greatest attention should be paid to them, especially when horses are to be used on hard country roads or town pavements. For such work those with high knee action are not specially desirable, for on account of their striking the ground with extra force they soon give way and render the horse useless for any work except that on farms free from stony soil.

TURF AND TRACK.

Volante will be used in the stud at Santa Anita.

Dan McCarty is on his way here with a car load of mares.

W. Hunter, Wightonshire, Scotland, sold a pure Clydesdale colt foal for £625.

Sam Gamble will in all probability manage Mr. Hobarts breeding and trotting farm.

The race track at Sacramento has been in fair working order all through the rainy season.

Starter Caldwell will not be seen on this coast this season, having decided to winter near Guttenberg.

Sir Modred has improved in appearance, let down and furnished more than any stallion at Ranc o Del Paso.

The Portland Association are improving the track at City View Park, and arranging for a spring meeting.

Joe Daniels is a different horse to what he was a year ago. He evidently appreciates the change to Rancho Del Paso.

Emperor of Norfolk is doing slow work. If he stands well he will soon be given faster work to see whether he can be raced again.

James Temple, the former owner of Harry Wilkes and J. Q., will make a trip to Buenos Ayres to see how trotting progresses there.

Miss Woodford is not in foal this season. The old Queen of the track is in splendid trim, fat and strong, with a neck like a stud horse.

The brother to Tournament is furnished like a four year old now and should prove an early two year old—which means a big money winner.

Reveille, the well known sire of Tycoon, will stand a season at Vallejo, B. C. Holly having made arrangements with B. P. Hill to that effect.

There will be quite an exodus of racing men from San Francisco to Los Angeles, for the Christmas racing. Mr. Baldwin has several entries.

The Santa Anita Stable will skip St. Louis, Latonia and Louisville next season. Probably part of the stable will stop off at Denver coming and going.

One of our prominent bookmakers says there is not much profit in buying yearling trotters, experientia docet, he has just given away an expensive one.

Henry Walsh will train several youngsters for Tom Williams next season, including a brother to Garland. Probably they will go East with the Rose' string.

Mr. Lorillard has agreed to allow McLaughlin to retain his position as starter at Clifton until the first of February. Garrison in consequence refuses to ride there.

Jerome Park is no more. The stakes which closed will be run off at Westchester. They are the Withers, Hunter, Jerome, Ladies' Moshula, Juvenile Nursery and Titan stakes.

Starter Caldwell had 12 horses at the post for over half an hour at Guttenberg last week and eventually suspended eleven boys for ten days, and Fitzpatrick for the rest of the year.

Aurelia, Yum Yum, Bessie June, Sonoma and several other crack mares are at present at the Arcade, and will be bred in the spring to one or other of the crack stallions at Rancho Del Paso.

Swann will take Col. Thornton's Anteeo stallion to the ranch, and after a short season start him out for a record. Everyone who has seen him says he will easily trot in 2:24 or better.

The sister to Dewdrop is not as big as some of the colts, particularly the Darebins, but is racy looking all over, and has tremendous forearms and thighs and is of particularly highly finished quality all over.

Mr. Salisbury is so pleased with Roy Wilkes, 2:12¾, that he will probably breed Gold Leaf 2:11½, to him next season. The produce should have speed enough for anything, and with Roy's gameness there ought to be a campaigner.

Jubilee Juggins (Benzon) must be coming to the front again, for it is said he won a billiard match a fortnight ago and netted $15,000 on his proficiency. Evidently Roberts gave him good value for his money when he initiated him.

L. J. Rose telegraphed on Wednesday to Corbitt to pay W. H. Crawford the $10,000 which he held as stake holder on on the notorious bet as to whether or not Stamboul would trot in 2:12 Stamboul will be put in the stud in the spring.

Ed Bither left for Lexington on Tuesday and many a horseman regrets his departure, and misses his pleasant smile and easy, entertaining conversation as he twirled his J. I C. medallion and said that he should never see the pony's equal.

A. J. Cassatt, who has figured so prominently on the American turf for years, as the owner of The Bard and other celebrites, was thought to have retired from the track, but it is said he is attempting to get a small stable together to race in England.

Mr. Davis tried hard to induce Hickok to back Adonis against Roy Wilkes, the match to come off before February, but Hickok wanted longer time, which of course, Mr. Davis could not afford to give as he wished to make a season with him in the stud.

I understand that the Buenos Ayres tracks are very sandy and deep, clay being practically unprocurable, which accounts for the slow times made by trotters—10 seconds slow in nearly every instance—while they have no really good drivers and trainers there.

Mr. Withers one of the oldest and most erudite as well as practical racing men in America is attempting to form a National Jockey Club modeled from the English Jockey Club, it should be a success and fill a long needed gap between Eastern and Western Associations.

It is rumored that Snapper Garrison and his father-in-law, McMahon, have severed their business relations and split up the stable.

Among the colts at Mr. Haggins, all of which are at the Bottoms, it would be difficult to choose the best; there are six Sir Modred's all together in a paddock beautiful shaped even looking colts, while John Happy, Joe Daniels and the rest of the stallions have left their marks.

H. D. Miller will leave to-morrow for Fresno and Los Angeles. Daisy D and Captain Al will be left at Fresno for the winter while Ida Glenn will go to Los Angeles for the Christmas racing and will be bred in the spring; Daisy and the two-year-old will be trained next season.

A good many people had an idea that nothing was known of Gladstone's pedigree. Mr. Hill who raised him says his dam Margaret was by Hambledon (by a trotting horse out of a Glencoe mare) dam by Volscian. He sold several sisters and brothers of the sprinter to his brother, J. D. Hill.

Capt. Franklin will stand Bishop, the sire of Racine at the Kennesaw Stud Gallatin, Tenn., next season. When one considers his breeding, he ought to prove a great success, he is by Shannon (brother to Mollie McCarthy) dam Bettie Bishop by imp Buckden, a son of Lord Clifden, and Consequence by Bay Middleton.

The Spendthrift fiasco has caused quite an excitement in racing circles. It is insinuated that Treacy and Wilson were commissioned to run the stallion up to $15.000. Sales at auction will be ruined if this kind of thing continues. The auctioneers Bruce & Kidd seem to be the only people interested who are not deserving of censure.

England has a wonderful market for thoroughbreds. South America has been a good customer lately, while America, Australia, Germany, France, Hungary and Italy, have all purchased largely. South Africa of late has bought a good many and the market keeps improving. Tattersall says it never was better.

E. J. Baldwin's suit against Chas. Green and the St. Louis Fair Association is being pushed again, it will be remembered that in 1886, Volante was matched against Tyrant for $5,000 aside. the association to add $5,000. Mr. Baldwin said that the match drew a tremendous crowd and Tyrant paid forfeit, whereupon the added money was withdrawn.

Maud Hampton's colt by St. Blaise should prove a slasher. He is a good chestnut with white legs, a true Newminster head and neck with fine sloping shoulders, withers running well back, a strong short back with powerful quarters, a long, strong, muscular thigh, with a clean hock and short cannon bones of good size with strong tendons, while his forelegs are almost perfection.

While we are organizing new races such as the Friendly Stakes, etc, England keeps increasing the added money and making races of greater value. Leicester is out with a race for 1891 called the Leicestershire Royal Handicap; guaranteed value, £10 000, to be run at the second autumn meeting. The conditions and payments are admirably framed.

Reagan, who died of the injuries received when She fell with him at Clifton, was a very promising straightforward rider, and has supported his mother for some time. J. H. McCormick at once started a subscription list for her which was headed by August Belmont's $100 cheque. McCormick gave $100, and most of the prominent race horse owners have contributed largely to the fund.

W. A. Duer, secretary of the Travers' estate, which owns about 2500 shares of the Villa Site Stock, is blamed for the loss of money on the Jerome Park Meeting. Mr. Morris offered 5 per cent. on the stock for them to close up last season, but Mr. Dwer who married a Miss Travers, would hold the meeting which resulted so disastrously. John Hunter received $10,000 a year to manage the track.

Garrison is said to have earned $20,000 last year, Barnes $12,000, M. Bergen $9 000, Murphy, McLaughlin, and the veteran, Bill Hayward, from $7,000 to $10,000 each. When one considers the trials and deprivations they have undergone to keep their weight down, and then considers the risks they run, for broken legs, etc, are plentiful, they are not any better paid than one would at first glance think.

B. P. Hill has sold all his racing stock except the stallion Reveille, 45 head including brood mares, foals, etc. Among them are the well known race horses Sid, Mikado, Tycoon, and the two-year-old Steve Stroud, for a big figure to Marcus Forster, of Los Angeles Co., and his brother J. D. Hill. The broodmares and colts will be removed to the Hill ranch in Ventura Co. Appleby will continue to train for the firm.

An England Sporting Daily says: "Mr. Linard has taken Mr. John Splan the American trotter owner and trainer, to Alexandra Park to inspect the trotting ground there. Splan declared himself to be both surprised and delighted. Having seen all the most noted running and trotting tracks on the "other side," he says he had never visited finer grounds for the purpose than they possess at Muswell Hill." John must be laying the British Public.

The Blood Horse Directors held a meeting on Tuesday night, and after consulting with the bookmakers, decided to run on Saturday if the track suited, and if not declare the meeting off. The horsemen are very much disappointed for they have been kept here by promises of extra days' racing, but of course, if the bookmakers were averse to holding any extra days, it is under present conditions impossible to race.

The list of winning owners of over £5,000 in England last season is:—

	Won.	Races	Value.
Duke of Portland	33	£	73,853 10
Mr. H. Milner	36		21,545 6
Chev. Ginistrelli	10		11,867 11
Mr. W. De La Rue	7		9,978 17
Mr. Abington	43		9,410 13
M. L. De Rothschild	20		8,960 00
Mr. B. Maple	28		8,959 12
Mr. R. C. Vyner	18		7,376 8
Mr. J. Lowther	14		7,282 13
Prince Soltykoff	16		7,163 5
Mr. D Baird	8		6,922 9
Mr. C. D. Rose	10		6,568 17
Lord Zetland	15		6,318 10
Baron De Rothschild	9		6,194 7

The Duke of Portland's winnings for 1888 and 1889 are £100,665. Mr. Milner is the young husband of the celebrated Duchess of Montrose and widow of the late Sterling Crawford. The Chev. Ginistrelli's two year old Signorina accounted for nearly all his winnings.

The winning sires in England last season were Galopin, £43,516; Hampton, £35,091; St. Simon, £24,280, and Isonomy over £20,000. Hermit, who has been the most wonderful sire in the world, in his twenty-fifth year is seventh on the list, with £12,256, which has been won in twenty-nine races, while Galopin's was won in twenty-one. Hermit's son Peter is credited with over £9,000 and thirty-five races, but St. Simon, who is third, is a son of Galopin, the leading sire.

The late Dan Mace, it will be remembered, claimed that he once drove Lady Thorn a mile so fast that he would not give the figure, an exchange says. It was learned after his death that the time was 2:10. If this is true, it may be noted in this connection that Lady Thorn's dam was a daughter of Gano, thoroughbred. She was a pacing mare, and her grandam was also a pacer and could pace as fast as she could run.

It is now many years ago, but will be remembered by some of the old timers, how R. S. Veech of Kentucky, bred, thirty two mares to Rysdyk's Hambletonian in one season at a fee of $500 each. Many thought at the time that it was the act of an insane man, but royally has he enjoyed the fruits of that expenditure. This year he has booked seventeen of his choicest mares to Axtell at $1,000 each. There is no doubt but that it will be a paying investment.

Secretary Brewster has decided that the new handicap confided to his discretion by the Washington Park Jockey Club some months ago shall be run over a mile and a quarter course. The added money will be $4,000, of which $750 will go to the second horse, and $250 to the third. It will probably be $100 entrance, $25 forfeit, or only $10 if declared at a date not to be announced until about July 5, and the race will take place during the last week of the meeting.

L. J. Rose telegraphed to Hickok on Tuesday that he would like Stamboul to go to San Diego at once and attempt to lower his record to 2:12 or better before the first. Since his brilliant effort at Napa he (owing to the incessant rains) has only worked three miles better than thirty, the best being in 2:21, and having done little or no work lately, it was decided not to go to San Diego. Mr. Crawford offered to extend the time for a couple of months provided that Hickok (of whom he justly has a wonderful opinion) did not handle him, and provided that Mr. Rose would make an additional bet of $5,000 to $10,000. Mr. Hobart, however, was unwilling to allow any one else to handle him. Mr. Rose's bet can therefore be considered lost.

Garrison has been the recipient of so much fulsome praise that his brains (?) are evidently affected. Should he ever attempt to ride in England he will find that it is very different to riding round our tracks, and there is a strong chance of his going the wrong course if he makes the running and thinks he is making the pace at Newmarket or Epsom; while judging from his performances, he is not a good enough judge of pace, and most decidedly, if he climbs up on his horse's neck, etc., etc., to relieve him of his weight, as his adorers say he does, he will be laughed at, if not worse. There is just as much difference between an English rider coming here as an American rider going there, and they have the advantage, for they are apprenticed to their business.

After a critical examination of most of the crack trotting stallions in the State, Luke du Bois decided to breed his mare to Sidney, 2:19¾. The mare is Moskova (three year old record 2:28½), foaled in 1883 at the celebrated Woodburn Farm by Belmont 64, sire of 19 trotters and two pacers in the 30 list, including Nutwood 2:18¾, Wedgwood 2:19, and grandsire of 61 trotters and two pacers in the 2:30 list. First dam Mosa by Woodford Mambrino 345 (sire of eleven in the 2:30 list and of Princeps 536). Grandsire of 36 in the 2:30 list. Second dam Hermosa (dam of Hermes 2:27½, sire of three in the 2:30 list), by Edwin Forrest 49 (sire of two in the 2:30 list and grandsire of 14). Third dam Black Rose (dam of Darkness 2:27¾, granddam of Princeps 536, and many others). It is not astonishing that Mr. du Bois has been asked to name a price by almost every breeder in the State, for beside being of super-excellent breeding she is related to all the best speed producers, and very closely to Princeps, sire of so many fast trotters.

Letter from Lexington.

LEXINGTON, Ky., December 11, 1889.

EDITOR BREEDER AND SPORTSMAN—I arrived here safely Monday night, and was too tired yesterday to visit any of the stock farms, so contented myself with sitting around the lobby of the hotel. In the afternoon, however, I called upon my old friend W. T. Woodard. You know Bill Woodard—everybody knows him, as his fame as a combination sale manager is almost universal. I found friend William at his office, and after exchanging the usual courtesies we chatted on the general topics of the day. The conversation finally drifted to his coming February sale, and he is as chuck full of confidence as a clock is of wheels, to use his own expression, "it will be the greatest sale ever held on earth." He will sell at Tracy & Wilson's stable, two doors east of the Phœnix Hotel, taking out the stalls on the right hand side and placing tiers of seats instead for the accommodation of 4,000 people; a capital idea, inasmuch as he contemplates lighting it thoroughly with electric lights which will make it the most advantageous sale track in the country, as it is covered entirely, closed at both ends and can be made as comfortable as if in one's own parlor, the track is over 300 feet in length which is ample room to show the utmost speed. He has engaged three auctioneers which he thinks are the piers of any in the business and he has tried nearly all of them, but I am digressing.

When I got to his office I found him dictating letters by the score to one of his clerks and the others were directing and mailing circulars to all parts of this country and to Europe. You know Billy's hobby is advertising, which reminds me that about three weeks ago when in a little village in Iowa, a town so small that it could not boast of a hotel, the substitute therefore being a one-horse boarding house (and a very bad one too) I strolled over to the livery stable being naturally fond of horses, (I afterwards learned that was the general loafing place of the town) it was a small frame affair and you can imagine my surprise when the first thing that met my gaze was Woodard's picture sent out in the form of a poster advertising this very sale. After I had introduced myself to the group gathered there I told them of my surprise at seeing my friend's picture, when the proprietor informed me that he got about four every year and remarked "that man Woodard must be a great advertiser" and wanted to know all about him and his manner of conducting business. Every one of them expressed the desire of attending his sale this winter. Bill's a hustler and no mistake. I will write you something of my trip next week.

Respectfully, BURLINGTON,

The American Trotting Association.

OFFICIAL REPORT.

CHICAGO, ILL., Dec. 3rd, 1889.

The Board of Appeals of the American Trotting Association met at the Sherman House, pursuant to call, with the following members present: Mr. Charles Green, St. Louis, Mo., chairman; Mr. W. P. Ijams, Terre Haute, Ind., member; Mr. C. L. Benjamin, Saginaw, Mich., member; Mr. C. B. McFall, Oskaloosa, Iowa, member; Mr. John Farley, Toledo, Ohio, member; Mr. E. C. Lewis, Ottawa, Ill., member; Mr. J. A. Steiner, Detroit, Mich., Secretary.

The Secretary submitted the following cases, which were disposed of as noted:—

No. 185. The American Trotting Association vs. Clarence J. Richards and Charles R. Fickett, Los Angeles, Cal., and the gr g Monte Christo, alias D. K. W. For fraudulently entering and performing out of class and under an assumed name at Spokane Falls, Washington Territory, in 1888.

The case was continued from the Board of Appeals in May, 1889, in order to give the defendants further time to present evidence, since which time no evidence has been filed by defendants, and it was clearly shown that the horse had been fraudulently entered and performed in slow classes to which he was not eligible, and under an assumed name.

Ordered, That Clarence J. Richards, Charles R. Fickett and the gr g Monte Christo, alias D. K. W., be and are hereby expelled from the tracks of all members of the American Trotting Association.

193. Application by J. P. Hutchinson, Denver, Col., for reinstatement of the b g Marlowe (pacer), expelled by order of the member at Dallas, Texas, in 1888.

The circumstances in connection with the race wherein said horse was expelled does not appear to have warranted the penalty inflicted. Upon evidence submitted and recommendation of the member, it is Ordered, That the b g Marlowe (pacer) be and is hereby reinstated from said order and expulsion.

272. Application by Lew Trotter, Wichita, Kansas, for reinstatement from expulsion with the b g Marlowe (pacer), by order of the member at Dallas, Texas, in 1888.

From a showing in May, 1889, said trotter was temporarily re-instated by order of the President.

The facts in this case being the same as in 193, it is ordered, that Lew Trot be, and is hereby re-instated on the tracks of all members of the American Trotting Association.

213. The American Trotting Association vs. O. C. Taylor, West Union, Iowa, and the b m Lena Miller.

The official judges' book shows that the b m Lena Miller obtained a record of 2:34¼ over the grounds of the member at Peoria, Ill.; and was afterwards entered over the grounds of the member at Hannibal, Mo., in the 2:37 class, wherein she was protested by the Secretary of the American Trotting Association, and her winnings, $35, were retained.

The defendant alleged and submitted evidence tending to show that the time recorded against said mare at Peoria, was a mistake; but as no steps had been taken to correct the record as required by the Rules of the American Trotting Association, it is ordered, that the protest be sustained and the winnings of said mare, Lena Miller, be re-distributed under the rules.

214. M. O. Riley, Kearney, Neb., vs. Pueblo State Fair Association, Pueblo, Colo., protested collection.

M. O. Riley and the b m Louetta and the b g C. P. C., were suspended by order of the member at Pueblo for non-payment of entrance in 1888. The horses were sold to James Leonard of Denver, Colo., as free from all encumbrance. The b m Louetta was afterwards started by said Leonard, who was obliged to pay the amount of her suspension. The payment of the claim was made by said Leonard in order to relieve the mare.

An application was made to the Board of Appeals, that M. O. Riley be suspended until the amount of said claim was returned to said Leonard.

The application was granted, and M. O. Riley remained suspended for the full amount of entrance on both horses. The claim was collected from M. O. Riley under protest on the grounds that the entries at Pueblo were not properly made, and were conditional entries.

Ordered, that the protest of M. O. Riley be, and is, hereby overruled: that the amount paid by James Leonard, re-instating the b m Louetta, be refunded to said Leonard, and the balance paid over to the member at Pueblo, Colo.

215. J. W. Daily, Frankfort, Ken., vs. Louisville Driving Association, Louisville, Ky., protested collection.

J. W. Daily and the bl g Refugee were suspended by order of the member at Louisville, Ky., for non-payment of entrance in 1888.

The claim was collected under protest on the grounds that the race in which said horse was entered, did not fill in accordance with the published conditions, but was re-opened to close at a later date, and that said horse was not re-entered.

It was conclusively shown that that race did fill, and was not re-opened, and it is ordered, that the protest be over-ruled and the money paid over to the member.

216. The Buffalo Agricultural Society, Kearney, Neb., vs. b g Blazewood alias King, protested second money and demand for identification.

The b g King was entered in the 2:50 class July 6, 1889, by Thomas Johnson, Omaha, Neb., over the grounds of the member at Kearney, Neb., and was protested on account of record and change of name.

It was shown that the horse was the b g Blazewood, with a record of 2:39¼. The name of Thomas Johnson is believed to be a fictitious name, and the owners and controllers of the horse at said meeting have not been discovered.

Ordered: That the second money be re-distributed under the rules, and that a fine of one hundred dollars ($100) be, and is, hereby imposed upon said b g Blazewood and alias King; that a recording fee of fifty dollars ($50) for change of name be required, and the horse suspended until the fine and fee are paid.

217. J. M. King, Three Rivers, Michigan, vs. Detroit Driving Club, Detroit, Michigan, protest against collection.

J. M. King and the b g St. Elmo were suspended by order of the Detroit Driving Club for non-payment of entrance in 1888. Claim was paid under protest on the grounds that the horse had not been legally entered.

It was shown that the entry was made in accordance with the Rules of the American Trotting Association, and it is ordered: that the protest be overruled and the money paid to the Detroit Driving Club.

218. W. O. Selkregg vs. the Erie Driving Park Association, Erie, Pennsylvania, protested collection.

W. O. Selkregg, North East, Pa., and the b h Oak Hill were suspended for non-payment of entrance by order of the member at Erie, Pa., in 1889. Claim was paid under protest on the grounds that it had been settled with the member.

The evidence submitted by the parties was in direct conflict, and in the absence of a receipt for the money claimed to have been paid, it was ordered: that the protest be over-ruled and the money be paid to the member.

220. Hughes Bros., Keokuk, Iowa, vs. Spring River Valley Fair Association, Carthage, Missouri. Application for an order for payment of first money, $125, in 2:40 pacing class, July 4th, 1889.

The b m Lady Rowena was entered in the 2:40 and 3:00 classes prior to the date of closing of entries, and obtained a record in the 3:00 class barring her from the 2:40 class prior to the date of the closing of the entries for said class. It was held by the Board that all horses must be eligible to the classes in which they are entered at the date of closing of said entries, and that the b m Lady Rowena was not eligible to the 2:40 class under the published conditions. Ordered, That the application be refused.

221. D. A. Hancock, Blackburn, Missouri, vs. Hutchinson Fair Association, Hutchinson, Kansas. Application for an order for return of collection.

D. A. Hancock and the br g Turk Franklin (pacer) were suspended by order of the member at Hutchinson, Kansas, in 1888, for non-payment of entrance, and the claim collected under protest.

The Secretary, to whom the claim was paid, notified said Hancock that it was not necessary to file an affidavit setting forth the grounds for a period of six weeks. The money was placed in the Trust Fund of the American Trotting Association, and the required affidavit setting forth the grounds of protest not being filed within the required time, one week of payment, the money was paid over to the claimant. It was conclusively shown that the gr g Turk Franklin had not been entered by said Hancock, his agent, trainer, driver or employe, but had been entered by telegram by some person or persons unauthorized by said Hancock or his agent.

Ordered, That the application be and is hereby granted, and that the member at Hutchinson, Kansas, be required to return the money to the Secretary of the American Trotting Association.

222. The American Trotting Association vs. Charles L. Carter, Lagrange, Indiana, and b m Bonnie Belle. Protested winnings at Quincy and Mendon, Mich., 1889, in the 2:40 pace.

The br m Bonnie Belle was protested by the Secretary of the American Trotting Association on account of an alleged record of 2:?9 at Coldwater, Michigan, in 1888.

It was conclusively shown that the record at Coldwater was 2:39¼, and the defendant having complied with the requirements of the Rules of the American Trotting Association for a change of record, it is ordered: that the protest be overruled and the money paid over in accordance with the decision of the Judges of the race.

223. O. O. Samples et. al. vs. R. A. Hildreth, Saybrook, Illinois, and br h Bright Rattler, protested 3rd money in the 3:00 Class at Farmers City, Illinois, 1889.

Bright Rattler was protested as having obtained a faster record at Fairbury, Illinois, in 1888.

No evidence was filed in support of the protest, and it was conclusively shown that said horse made no record as alleged, and it was ordered: that the protest be overruled and the money paid over in accordance with the decision of the Judges of the race.

224. W. T. Campbell' North Manchester, Ind., and W. W. Finley & Son, Huntington, Mo., vs. Dr. J. H. Howard, Fulton, Mo., and ch h Dick Smith. Appeal from the decision of the Judges in 2:50 Class at Mexico, Mo., 1889.

Appeal was made on the grounds that said horse was distanced and the Judges erred in permitting the horse to start in a subsequent heat.

Held: that the Judges of a race are Judges of all matters of facts pertaining thereto, and the proper parties to place the horses at the conclusion of each heat.

Ordered: that the protest be over-ruled and the money paid over in accordance with the decision of the Judges of the race.

225. W. J. Fleming, Jefferson City, Mo., vs. Webb City A. & M. Society, Webb City, Mo., protest against collection.

W. J. Fleming and the b h Harry Lee were suspended by order of the member at Webb City, Mo., for non-payment of entrance in 1889. Claim was paid under protest on the grounds that the entry was made without authority.

It was duly shown that the horse was entered by his driver, who had him in charge and in his possession at the time of the entry.

Held: That the entry was legally made, and ordered: that the protest be over-ruled and the money paid to the claimant.

227. L. A. Davies, Chicago, Ill., vs. Detroit Driving Club., Detroit, Mich., protested fourth money, 2:34 class, 1889.

Protest was made against the awarding of the Judges in giving the b g Slick Fast fourth money, on the grounds that the Judges had first awarded tenth position to the b m Katie B., which entitled her to fourth money, and that said mare was afterwards declared distanced.

The official record of the race shows that the mare was distanced in the concluding heat of the race, and the evidence shows that the mare was not awarded tenth position as claimed.

Ordered: That the protest be over-ruled and the money paid over in accordance with the decision of the Judges.

229. The American Trotting Association vs. Wm. G. Cody, Watertown, Wis., and the b g Silverton alias Farmer Boy, fraudulent entry and performance at Marinette, Wis., in 1889.

Continued to the meeting of the Board of Appeals in May, 1890.

230. B. S. Rice and L. C. Vincent, Katlettsburg, Ky., and J. L. Fisher, Ironton, O., vs. Mason Co. A. and M. Society, Pt., Pleasant, W. Va., appeal from the decision of the Judges of the 2:40 class at Pt. Pleasant, W. Va., in 1889.

The rn g Altonian finished first in the second heat, but the driver accidentally lost his weights, and the Judges permitted the horse to continue in the race which he won in the two next heats, distancing the b m Waunita and b g Billy Wilkes in the concluding heat.

Held: that the Judges erred in permitting the horse to continue in the race, and distancing Waunita and Billy Wilkes after protest has been filed.

Ordered: That the appeal be sustained and the money re-distributed under the rules.

231. H. W. Ansley, Pt. Dover, Ont., Silvanus Dixon, Hagersville, Ont., and Selva, protest against first money in Green Trot at Simcoe, Ont., in 1889.

Protest was filed on the grounds that said Dixon was not a resident of the district in which the horses were required to be owned by the published condition of the race.

The evidence submitted shows that Dixon was a resident of the district and it was ordered, that the protest be over-ruled and the money paid over in accordance with the decision of the Judges of the race.

232. F. Groves, East Saginaw, Mich., et al, vs. James Moore, Ithica, Mich., b g Log Roller, alias Camera, and ch m Hiatoga Girl. Protested first and third moneys in 2:50 class at Owasso, Mich., in 1889.

Protest was made on the grounds that the horses were trotting out of their proper classes and under assumed names.

It was clearly shown that the b g entered as Camera had previously performed in public races under the name of Log Roller and obtained a record faster than 2:50, but it was not shown that James Moore had knowledge of such performances.

No proof was presented showing that Hiatoga Girl had ever performed in a public race or under any other name obtaining a record barring her from the class.

Ordered, That the protest against James Moore, Ithica, Mich., and the b g Log Roller, alias Camera, be sustained, and that they be and are hereby fined one hundred dollars ($100) and required to pay a recording fee of fifty dollars ($50) for change of name and suspended until the fine and recording fee are paid; that the protest against the ch m Hiatoga Girl be over-ruled and the money paid over in accordance with the decision of the judges.

J. E. Riley, Kansas City, Missouri, vs. Grand Rapids Horseman's Association, Grand Rapids, Mich, Protested collection.

J. E. Riley and b g Charley Chipton and b g Harry McGregor were suspended by order of the member at Grand Rapids, Mich., for non-payment of entrance in 1888. The claim was collected under protest on the grounds that the member had offered to settle for less than the full amount of the claim.

It was shown that the member had offered to settle for less than the full amount, but as the offer was not accepted and acted upon, and the money was collected through a member of this Association, it was held that the offer was based upon immediate settlement, and did not apply to a claim which it was necessary to collect through the regular channels of this Association.

Ordered, That the protest be over-ruled and the money paid to the claimant.

234. H. C. Norton, Kearney, Nebraska, vs. J. M. Marsh. Grand Island, Nebraska, and b g Captain Scully, alias J. M., alias Rattler, etc. Protested 1st money in the 2:35 Pace at Kearney, Nebraska, 1889.

It was shown that the horse J. M. had previously obtained a record of 2:30¼ under the name of Capt. Scully, and that the nominator had no knowledge of the true name and record of the horse.

Ordered: That the horse be suspended until a recording fee of $50 is paid for change of name, and teat the first money be re-distributed under the Rules.

235. L. S. Simmons, Columbus, Ohio, vs. G. W. Eldridge, Richmond, Ill., and b m Maggie R. (formerly Lizzie M.). Protested 3rd money in the 2:45 Pace at Aurora, Ill., 1889.

The b m Maggie R. (formerly Lizzie M.) was entered over the grounds of the member at Aurora, Ill., in the 2:45 Class, without having complied with the Rules for change of name.

Held: That the mare was not eligible to perform on the tracks of the American Trotting Association under the name of Maggie R.

Ordered: That the protest be sustained and the money re-distributed under the Rules.

(Note—Recording fee for change of name has since been paid and the name of Maggie R legalized.)

236. The American Trotting Association vs. I. L. Curley and Geo. T. Kidwell, Beatric, Neb., and b g Banner Boy alias Beatric Ike, for fraudulent entry and performance out of class and under an assumed name at Grand Island and Kearney, Neb., 1889.

The b g Banner Boy was entered and performed under the name of Beatric Ike over the grounds of the members at Grand Island and Kearney, Neb., in slow classes.

It was proven and admitted by defendants that the true name of the horse was Banner Boy, and that he was purchased for the purpose of ringing.

Ordered: That I. L. Curley and Geo. T. Kidwell, Beatric, Neb., and the b g Banner Boy alias Beatric Ike, be and are hereby expelled from the tracks of all members of the American Trotting Association.

237. C. C. Watts, Charleston, W. Va., vs. L. C. Vinson, Cattletsburg, Ky., and b g Politics, protested first money in the 3:00 class at Pt. Pleasant, W. Va., 1889.

Protest was made on the grounds that the b g Politics obtained a record of 2:47 at Athens, Ohio, Oct. 6, 1886. A copy of what appears to be an official record of the race is on file in the office of the National Trotting Association at Hartford, Conn. The defendant claims that two horses finished in front of the b g Politics in said race and were set back for running, and the heat awarded to the said b g Politics, and that no record should attach to the horse for said heat.

Held: That as the record has been published since 1886, and has not been changed by either the National or American Trotting Associations in accordance with the rule made and provided for such cases, that the horse was ineligible to start in a 3:00 class.

Ordered: That the protest be sustained and the money re-distributed under the rules.

238. John Grier and C. L. Clayson, Milwaukee, Wis., vs. the Eau Claire Driving Association, Eau Claire, Wis., protested collection, 1889.

John Grier and C. L. Clayson, and the br g John C., were suspended by order of the member at Eau Claire, Wis., for non-payment of entrance in 1888. The grounds of protest are that the entry at Eau Claire was a conditional entry.

Held: That under the rules of the American Trotting Association, conditional entries are held for the entrance fee.

Ordered: That the protest be over-ruled and the money placed to the credit of the claimant.

239. John Atkinson, Chicago, Ill., vs. the American Trotting Association, protested against fine for performing under suppressed time at Kendallville, Ind., 1889.

It was shown that the ch h Altc, driven by John Atkinson, trotted at Kendallville, Ind., in 2:37½, and that the time was announced as 2:39½; that said Atkinson, discovering that time had been suppressed, went the Secretary of the Association the next day and demanded that the time be corrected to 2:37½. The affidavit of the Secretary shows that the time was so corrected and reported to all the turf papers.

Ordered: That the disqualification against John Atkinson and the ch h Alto be removed, and the fine collected, returned.

241. R. C. Risk, Williamstown, Mo., vs. The American Trotting Association. Protest against payment of recording fee for change of name, 1889.

It was shown that the ch h Missouri Abdallah had performed in public races prior to 1887. That in order to have the horse registered as standard his name was changed to Forsee, and that the horse subsequently performed for two years under said changed name.

Held: That as the name of the horse was required to be changed before he could be registered, that the change of name was forced upon said Risk, it was

Ordered: That the recording fee of $60.00 be returned.

242. American Trotting Association vs. L. W. Short, West Liberty, O., and ch m Katie D, alias Lady Phad. Protested third money in 3:30 Class at Mechanicsburg, Ohio

It was shown that the ch m entered as Lady Phad was the ch m Katie D, and was not eligible to the 3:30 class.

Ordered: That the protest be sustained and the money distributed under the rules.

243. F. H. Sammis, Minneapolis, Minn., vs. St. Paul Driving Club' St. Paul, Minn. Protested collection, 1889.

F. H. Sammis and b g Brick and b m Cricket were suspended by order of the member at St. Paul, Minn., for non-payment of entrance. No legal grounds of protest being submitted, it was

Ordered: That the protest be overruled and the money paid to claimant.

244 V. Simpson, Winona, Minn., vs. St. Paul Driving Club, St. Paul, Minn. Protested collection, 1889.

Protest was withdrawn by Mr. Simpson, and it was

Ordered: That the money be paid over to claimant.

246. W. J. McGuire, Antwerp, Ohio, vs. Marshall Driving Park, Marshall, Mich. Protested collection, 1889.

W. J. McGuire and the gr g Fred Moran were suspended by order of the member at Marshall, Mich., through the National Trotting Association, Sept. 13, 1886, and the suspension put in force by the American Trotting Association in 1887, in accordance with the By-laws, Rules and Regulations of said American Trotting Association. Protest was made on the grounds that an entry had never been made over the grounds of a member of the American Trotting Association. Protest overruled, and it was

Ordered: That the money be paid to the claimant.

247. Geo. W. Spear, Minneapolis, Minn., vs. St. Paul Driving Club, St. Paul, Minn. Appeal from decision of the Judges in the 2:34 Class 1889.

Appeal was made from the decision of the Judges on the grounds that the gr g Blue Stone, not having won a heat in five heats, was erroneously required to start in the sixth heat, and was subsequently distanced, thereby depriving him of 4th money.

Held: That as ten horses started in the race, the decision of the Judges was correct.

Ordered: That the appeal be overruled and the money paid over in accordance with the decision of the Judges of the race.

248. The American Trotting Association vs. Ed. Wentworth, Bismark, Dakota, and the b g John F., alias Charley. Demand for identification. 1889.

The defendant entered the b g Charley in the 3:00 and 2:50 classes at Grand Forks, Dakota, in 1889, and a demand was made by the Secretary of the American Trotting Association for the identification of the horse. The identification was not made as required, and it was

Ordered, That Ed. Wentworth, Bismark, Dakota, and the b g John F, alias Charley, be and are hereby expelled from the tracks of all members of the American Trotting Association.

249. The American Trotting Association vs. W. B. Holland, Arkansas City, Kansas. For performing while under suspension and making false affidavit, 1889.

W. B. Holland was suspended by order of the member at Hutchinson, Kansas, in 1888, for non-payment of entrance, and in 1889 made entries over the grounds of the member at Winfield, Kansas. The claim of the member at Hutchinson was sent on for collection, and said Holland maid affidavit that he was not the person suspended. It was clearly shown that the affidavit of said Holland was false, and it is

Ordered, That he be and is hereby expelled from the tracks of all members of the American Trotting Association.

250. The American Trotting Association vs. Henry Simons and the b h Earl. Protested second money in the 2:27 class at Terre Haute, Indiana, 1884.

The Secretary of the American Trotting Association protested the b h Earl starting in the 2:27 class on account of an alleged record of 2:24¾ made at Louisville, Ky., in a matched race Nov. 2nd, 1888.

It was conclusively shown that there was no matched race trotted; that the performance was not made at a regular meeting; was not for any consideration whatever; no admission fee was charged, and the performance was simply a private trial made by the horse alone in the presence of several persons and timed by the owner and his friends.

Held, that the performance did not constitute a record or bar under the rules of the American Trotting Association, and it was

Ordered, That the protest be over-ruled and the money paid in accordance with the decision of the judges of the race.

251. The American Trotting Association vs. John Payer and W. T. Shepherd, Ardock, Dakota, and ch m Gypsy, Alias Dakota Girl, Protested winnings in 2:50 and 3:00 classes at Winnipeg, Manitobia, 1889.

The ch m Dakota Girl was protested as being the ch m Gypsy, record 2:32. The necessary affidavit in answer to protest was filed and the mare permitted to start in the races. It was shown that the mare called Dakota Girl was the ch m Gypsy, record 2:32, and it is

Ordered, That John Payer and W. T. Shepherd of Ardock, Dakota, and the ch m Gypsy, alias Dakota Girl, be and are hereby expelled from the tracks of all members of the American Trotting Association; that the winnings of said mare in said races be re-distributed under under said rules.

252. John F. Irvine, Bayousara, La., vs. La. State Fair and Shreveport Exposition, appeal from decision of Judges in Novelty Trotting Race, 1889.

"Purse $100 for horse making one mile nearest to 3:00."

The Judges of the race awarded the purse to the horse making the mile nearest to three minutes. Appeal was made on the grounds that the entire purse should not be paid to said horse, but should be divided in accordance with the published conditions for other races of the meeting.

Held: That the published conditions clearly show the entire purse was to be paid to the horse trotting nearest to three minutes.

Ordered: That the appeal be over-ruled and the money paid over in accordance with the decision of the Judges of the race.

254. P. W. Brown, Brownville, Ohio, vs Washington Co. A. and M. Association, Marietta, O., protested collection, 1889.

P. W. Brown and the b g Contest (runner) were suspended by order of the member at Marietta, O., for non-payment of entrance in two races for 1889. The claim was collected under protest on the grounds that one of the races did not fill in accordance with the published conditions and was afterwards re-opened, and the horse could not be legally suspended for non-payment of entrance in said re-opened race. It was shown that the race did fill as required by the published conditions, and was not re-opened.

Ordered: That the protest be over-ruled and the money paid to the claimant.

255. D. W. Aldrich, Galesburg, Ill., vs. Creston District Agricultural Fair, Creston, Ia. Appeal from decision of Judges in 3:00 trot at Creston, Iowa, 1889.

Appeal was made on the grounds that the Judges erred in placing the br h Frank McMahon fourth and the br g Delmont third in the second heat, claiming said horses were set back for running, and should have been placed behind Belle Langtry in said heat, thereby giving her fourth position in the race. It was shown that the horses were not set back for repeatedly breaking and running, but were set back double the distance gained by breaking.

Held: That the Judges of a race are the proper persons to place the horses at the conclusion of the heat, and it is

Ordered: That the appeal be over-ruled and the money paid in accordance with the decision of the Judges of the race.

256. The American Trotting Association vs. F. E. Andrews, Williamston, Mich., and the b g George Spencer, for entering and performing out of class at Fowlerville, Mich., 1889.

The b g George Spencer was entered in the 3:15 class and 2:50 class over the grounds of the member at Fowlerville, Mich., and won second money in both classes. It was shown that the horse obtained a record of 2:43 at Angola, Ind., in 1883, and it is

Ordered: That the $25 retained in the 2:50 class be re-distributed under the rules; that the b g George Spencer be required to refund the $25 won in the 3:15 class and be fined $50 and he, and is, hereby suspended until said fine is paid and unlawful winnings returned to this association.

257. A. C. Beckwith and J. Bryan, Evanston, Wyoming, vs. Overland Park Club Association, and ch m Gypsy Queen, protested first money in 2:35 class at Denver, Col., 1889, and appeal from decision of Judges of the race.

Appeal was made from the decision of the Judges in permitting the ch m Gypsy Queen to start in the second heat on the grounds that she should have been distanced in the first heat.

Held: That the Judges of a race are Judges of all matters of fact pertaining thereto, and are the proper persons to place the horses at the conclusion of the heat.

Ordered: That the appeal be over-ruled and the money paid over in accordance with the decision of the Judges of the race.

258. A. C. Beckwith, Evanston, Wyo., vs. Overland Park Club, Denver Colorado. Appeal from order of expulsion, 1889.

A. C. Beckwith of Evanston, Wyoming, was expelled by the Judges of the 2:35 Class at Denver, Colorado, 1889, for breach of decorum, and

an appeal was filed from the decision of the Judges on the ground that the said Beckwith was expelled without notice or authority.

Held: That the Judges of a race have full power to inflict fines and penalties as prescribed by the By-laws, Rules and Regulations of the American Trotting Association, and were not required to give notice of their action to said Beckwith.

Ordered: That the appeal be over-ruled and the decision of the Judges sustained.

(Note—After the adjournment of the Board and before the promulgation of their decision, Mr. Beckwith made a written apology to the Judges of the race and to the Overland Park Association, and an application to the President of the American Association for temporary reinstatement. Temporary reinstatement was granted pending the decision of the Board of Appeals at its meeting in May, 1890).

259. The American Trotting Association vs. B. W. Roscoe and G. C. Potter, Syracuse, New York. For fraudulent entry and performance at Erie, Pa., 1889.

It was shown that B. W. Roscoe and G. C. Potter entered and performed over the grounds of the member at Erie, Pa., in slow classes with the b g Walkill Boy under the name of Brakeman, having full knowledge of the true name and record of said horse, and it is

Ordered: That B. W. Roscoe and G. C. Potter of Syracuse, N. Y., be and are hereby expelled from the tracks of all members of the American Trotting Association.

(Note—The b g Walkill Boy, alias Brakeman has since the performance been destroyed by fire at Syacuse, N. Y.)

260. The American Trotting Association vs. P. O. Orton, Pard Orton, Syracuse, N. Y., and b g John Love, alias P. C. For fraudulently entering and performing over the grounds of the member at Erie, Penn., in 1889.

The facts in this case are similar to those set forth in case 259, and it is

Ordered, That P. C. Orton, Pard Orton, Syracuse, New York, and the b g John Love, alias P. C., be and are hereby expelled from the tracks of all members of the American Trotting Association.

261. The American Trotting Association vs. Ed. Hull, Ellsworth, Ohio, and gr g Judd Boy. For entering and performing out of class over the grounds of the member at Canton, Ohio, 1889.

It was shown that the gr g Judd Boy was entered in a class to which he was not eligible, but that said Hull did not have knowledge of his true record.

Ordered, That Ed. Hull, Ellsworth, Ohio, and the gr g Judd Boy be and are hereby suspended until the remaining $25 of his unlawful winnings is returned to the American Trotting Association for re-distribution under the rules.

262. The American Trotting Association vs. George McCrea, New Holland, Ohio. For fraudulent entrance and performance at Dayton, Ohio, 1889, with br g John C. (formerly John Crowder), under the name of Proclamation.

The horse having been sold to innocent purchasers without knowledge of violation of the rules, and $50 having been paid to legalize the name of Proclamation, it is

Ordered, That George McCrea, New Holland, Ohio, be and is hereby suspended until a fine of $100 is paid for said illegal entrance and performance.

The American Trotting Association vs. Wm. Sharp, Muskegon, Mich. and ch c Marshall T. For entering and performing out of class at Coopersville, Mich., 1899.

The ch h Marshall T. obtained a record of 2 39 in 1888, and was entered in the 2:30 class at Coopersville, Mich., and won $30.

Ordered, That Wm. Sharp, Muskegon, Mich., and the ch c Marshall T. be and are hereby suspended until the $30 is returned, and a fine of $62.50 is paid to the American Trotting Association.

264. Thomas Settle, Woodville, Ky., vs. Paducah Jockey Club Fair Association, Paducah, Ky. Appeal from decision of judges of the race. 1889.

The decision of the judges of the race was appealed from on the grounds that they erred in permitting the b h Bartholomew Star to continue in the race on account of his driver failing to weigh at the conclusion of the first heat.

It was shown that the driver of the b h Bartholomew Star carried the required weight in the race, but unintentionally failed to weigh out, for which negligence the judges of the race imposed and collected a fine.

Ordered, That the appeal be over-ruled and the money paid in accordance with the decision of the judges of the race.

265. J. H. Steiner, Ex-party application. For disposition of collection.

The member at Terre Haute, Indiana, suspended the b g Rush (pacer) for non-payment of ent ance in 1886.

The Secretary of the American Trotting Association forwarded the claim for collection to the member at Defiance, Ohio, in 1889, where a b g under the name of Rush was entered.

The money was paid under protest, and it was shown that the horse which was entered at Defiance, Ohio, was not the b g Rush suspended by the member at Terre Haute, Indiana. It was also shown that the correct name of the b g Rush entered at Defiance, Ohio, was Ab Rush, and that his owner, H. E. Hickok, of Findlay, Ohio, did not have knowledge of the correct name. And as he had always entered him in his proper class and had not attempted to change the name of the horse for the purpose of deception or otherwise, it was

Held: That the horse should not be requirid to pay a recording fee for change of name, and

Ordered, That the protest be sustained and the money collected returned to said Hickok.

266. C. H. Palmer, Ft. Scott, Kan., vs. B. F. Heppler, Ft. Scott, Kan., and br m Emigrants Daughter. Protest on eligibility in the Gentlemen's Driving Class, Ft. Scott, Kan., 1889.

The published conditions of the race provided that horses were eligible which had been "used only for driving purposes."

It was shown that the br m Emigrant's Daughter had always been used as a track horse and never as a driving horse.

No evidence being submitted to the contrary, it was

Ordered: That the protest be sustained and 2nd money awarded to Emigrant's Daughter re-distributed under the Rules.

267. The American Trotting Association vs. W. R. Clack, Frank Clemons, Clear Lake, Iowa, and b h Golddust Prince, for entering out of class at Hannibal, Mo., 1889, and application for order of disposition of recovered winnings.

The b h Golddust Prince was entered over the grounds of the member at Hannibal, Mo., in a class to which he was not eligible, and was paid $87.50.

The money was recovered by the Secretary of the American Trotting Association and placed in the Trust Fund, pending the decision of the Board of Appeals.

The evidence as to who was responsible for the entry was so conflicting, that the Board was unable to decide that point, and it was

Ordered: That the case against the defendants be dismissed, and the recovered money re-distributed under the rules.

268. R. W. Sherman, Crete, Neb., vs. H. W. Brown, Freemont, Neb., for fraudulent protest for the purpose of embarrassing a race.

Continued to the May meeting of the Board of Appeals, 1890.

269. M. Banker, Caro, Mich., and the American Trotting Association, vs. W. A. Calbeck, Caro, Mich., the b h Amber Jr., protested second money in 2:45 class, at Vassar, Mich., 1889, and for fraudulent entrance and performance.

The evidence submitted by protestant showed that the b h Amber Jr. as the property of said Calbeck, had previously trotted at Marlette, Mich., in 2:43.

The evidence submitted by defendant shows that time was suppressed in said place.

Ordered: That protest be sustained and money re-distributed under the rules, and that W. A. Calbeck, Caro, Mich., and the b h Amber Jr. be, and are hereby suspended until a fine of $100 is paid.

270. Dick Tildon, Fairbury, Nebraska, vs. Geo. E. Birge, Clay Centre, Nebraska, and the b g Billy. Protested first money in Free for all class, Superior, Nebraska, 1888.

Protest against the b h Billy was made on the grounds that he had performed under suppressed time at Fall City Nebraska, in 1888.

It was shown that time was not suppressed at Fall City, Nebraska, as alleged, but was taken, announced and recorded, and it was

Ordered, That the protest be over-ruled and the money paid in accordance with the decision of the judges of the race.

271. C. C. Bates, Decorah, Iowa. Application for reinstatement from order of expulsion by the member at St. Louis, Mo., 1889, for breach of decorum.

The applicant having made a satisfactory apology for his misconduct to the judges of the race, and accompanying his application for reinstatement with their recommendation that he be reinstated, it was

Ordered, That C. C. Bates, Decorah, Iowa, be reinstated on all the tracks of the American Trotting Association.

272. The American Trotting Association vs. John McPhee, Alpena, Michigan, and blk g Black Prince, alias Tommy Short, fraudulent entry and performance at East Tawas, Mich., in 2:45 Class, 1889.

It was shown that the blk g Black Prince, record, 2:25½, was entered and performed in the 2:35 class at East Tawas, Mich., and that the defendant McPhee had full knowledge of the true name and record of said horse. No evidence was filed in defense, and it was

Ordered: That John McPhee, Alpena, Michigan, and the Black Prince alias Tommy Short, be and are hereby expelled from the tracks of all members of the American Trotting Association.

273. A. C. Dietz, Oakland, Cal., vs. Sonoma and Marin District Agricultural Society, Petaluma, Cal., protested collection.

A. C. Dietz and b h Ringwood were suspended by order of the member at Petaluma, Cal., for non payment of entrance. The claim was collected under protest on the ground that the race did not take place at the time advertised, nor at the time of its first changed date, and that the date of the race was changed a second time. The evidence submitted shows that the society, in its published conditions, reserved the right to change the date or hour of any race, and it was

Ordered: That the protest be over-ruled and the money paid over to the member.

274. The American Trotting Association vs. Jas. Heron and Jos. Booth, Brantford, Ont., Jas. W. Cleaver, Caro, Mich., and b h Brown Billy alias Billy Wilkes, for fraudulent entry and performance at Vassar, Mich., in the 2:45 class 1889.

It was shown that the horse entered at Vassar, Mich., under the name of Billy Wilkes as the b h Brown Billy, and that the defendants had full knowledge of his true name and record.

Ordered: That Jas. Heron and Jos. Booth, of Brantford, Ontario, and Jas. W. Cleaver, of Caro, Mich., and the br h Brown Billy alias Billy Wilkes, be and are hereby expelled from the tracks of all members of the American Trotting Association.

275. The American Trotting Association vs. F. B. McDonald, Springfield, Mo., and the ch h Kentuckian, alias Captain Mack. For fraudulent entry and performance in the 2:40 Class at Pierce City, Mo., 1889.

It was shown that the horse which was entered and started at Pierce City, Missouri, under the name of Capt. Mack, was the ch h Kentuckian, record 2 27¾, and that the said McDonald had full knowledge of the true name and record of the horse.

Ordered: That F. B. McDonald, Springfield, Mo., and the ch h Kentuckian, alias Capt. Mack, be and are hereby expelled from the tracks of all members of the American Trotting Association.

276. The American Trotting Association vs. Richard Roche, Sanforth, Ontario, and the blk s Byron Colo, alias Black Bird. Protested winnings in the 2:40 Class, Port Huron, Mich., 1889.

Continued to meeting of the Board of Appeals in May, 1890.

277. The American Trotting Association vs. Lloyd N. Lease, Tiffin, Ohio, and the ch g Snake Hunter, alias Locuet, alias Four Points. Fraudulent entry and performance under an assumed name and out of Class at Sandusky, O., in 1886, Norwalk, Ohio, in 1889, and at Millersburg, O., in 1889.

It was shown that the ch s Snake Hunter had been entered at Sandusky and Norwalk, Ohio, under the name of Locust, and subsequently at Millersburg, Ohio, under the name of Four Points. That said Lease had full knowledge of the true name and record of said horse, and it is

Ordered: That Lloyd N. Lease, Tiffin, Ohio, and the ch g Snake Hunter, alias Locust, alias Four Points, be and are hereby expelled from the tracks of all members of the American Trotting Association.

278. The American Trotting Association vs. Chas. E. Ball, Mason, Michigan, and b h Jubilee. For entering out of class at Fanton, Mich., 1889.

Said Ball entered the b h Jubilee in the 2:30 class, October 10, 1889, the horse having obtained a tar of of 2:29 at Stockbridge, Mich., October 4, 1887, while the property of said Ball. The Secretary of the American Trotting Association protested the horse starting in the 2:30 class, and after appearing on the track and being awarded a position for the start, the protest was presented, and said Ball refusing to make the required affidavit in answer thereto, the horse was not permitted to start.

Ordered: That Chas. E. Ball, Mason, Mich., and the b h Jubilee be and are hereby suspended from the tracks of all members of the American Trotting Association until a fine of $100 be paid to said American Trotting Association.

279. F. M. Cory, Shelbyville, Indiana, vs. the American Trotting Association. Protest against fine imposed by the Indiana State Fair in 1888.

F. M. Cory and the b m Irma C. were ruled out in the 2:50 class at Indianapolis, Indiana, and fined $100. The claim was paid under protest on the ground that the judges were mistaken as to the facts.

Held, That the judges of a race are the judges of all matters of fact pertaining thereto and

Ordered, That the protest be over-ruled.

280. A. J. Arnold, Cound, Nebraska, vs. Lincoln County Agricultural Society, North Platte, Nebraska. Application for an order for alleged unpaid premiums.

The application was made for an order against the member on the grounds that the premiums were not paid in full in accordance with the published conditions, but were scaled to a smaller amount. It was shown that the races did not fill in accordance with the published conditions, and were declared off, and in their stead special races were given and the premiums paid in accordance with the conditions of the special races.

Ordered, That the application be refused.

281. Sire Bros., New York, vs. St. Louis Jockey Club, St. Louis, Mo. Application for an order for return of entrance paid in 2:30 class in 1888.

Continued to meeting of Board of Appeals in May, 1890.

282. W. R. Clasby, Milton, Ont. Application for removal of bar of b m Nellie Baker, obtained at Hamilton, Ont., 1889.

The b m Nellie Baker was entered and performed at Hamilton, Ontario, and obtained a bar of 1:58 over a short track, said to be about two-thirds of a mile.

Ordered, That the application for removal of bar be and is hereby refused.

283. R. W. Cunningham, Kansas City, Mo., application for an order for removal of expulsion for the b g John Hazard (pacer).

The b g John Hazard and the -- Harry H. and J. T. Hopper, their owner, were expelled by order of the member at Newton, Kansas, for performing in the same race, September 5, 1889. The case was continued and not decided by the member until October 25, 1889. It was shown that the horse was purchased by the applicant October 5, 1889, before the order of expulsion had been made, and without the knowledge of the applicant that there was any claim against the horse.

Held: That the horse is not indebted to the American Trotting Association nor to any of its members, and had passed into the hands of an innocent purchaser before the expulsion, and it is

Ordered: That the b g John Hazard be re-instated, and that the horse Harry H. and said John T. Hopper remain expelled.

284. The American Trotting Association vs. D. R. Newman and Grover G. Newman alias Grover George, and the b h Royalty alias Roundsman, for fraudulent entry and performance at Helena, Ark., in the 2:40, 2:45, 2:28 classes, 1889.

It was shown that D. R. Newman and Grover G. Newman, driver, fraudulently entered the b h Royalty out of his proper class and under the name of Roundsman over the grounds of the member at Helena, Ark., and that D. R. Newman had full knowledge of the entry and performance, and that Grover G. Newman drove in the races under the name of Grover George.

Ordered: That D. R. Newman and Grover G. Newman alias Grover George, of Bloomington, Wis., and the b h Royalty alias Roundsman, be and are hereby expelled from the tracks of the members of the American Trotting Association.

285. Wm. Van Putten, Holland, Mich., vs. Western Michigan A. and I. Society, Grand Rapids, Mich. Appeal from the decision of the member sustaining the protest in the 2:40 class, 1889.

The ch g Montague Boy was entered in the 2:40 class over the grovnds of the member at Grand Rapids, Mich., and protested starting in said race on account of having a faster record. An appeal was taken from the decision of the member. It was clearly shown that the ch g Montague Boy was not eligible to the 2:40 class, and the appeal was over-ruled, and the money ordered re-distributed in accordance with the rules of the American Trotting Association.

286. The American Trotting Association vs. L. W. Pocock and John W. Adams, Coshocton, Ohio, and b h Mambrino Rescue, alias Billy Watson. For fraudulent entrance and performance at Millersburg and Newark, Ohio, 1889, and failure to comply with the demand for return of unlawful winnings and identification of the horse.

Identity of Billy Watson as the b h Mambrino Rescue was established and as the defendants failed to comply with the order to return unlawful winnings and identify the horse, it is

Ordered, That L. W. Pocock and John W. Adams, of Coshocton, Ohio, and the b m Mambrino Rescue, alias Billy Watson, be and are hereby expelled from the tracks of all members of the American Trotting Association.

288. Jackson Cochran, San Luis Obispo, Cal., vs. Sonoma and Marin District Agricultural Society, Petaluma, Cal. Protested collection, 1889.

Jackson Cochran and the ch m Allorita were suspended by order of the member at Petaluma, Cal., for non-payment of entrance. The facts in this case are identical with the facts in case No. 273, and it is

Ordered, That the protest be over-ruled and the money paid to member.

289. Arthur J. Canton, Chicago, Ill. Application for return of fine imposed by the Illinois Association of Trotting Horse Breeders for failure to send required notice that entries would not start.

Arthur J. Canton, b m Olga Cossack, b m Dora Cossack and b m Diplomacy were fined $150 by the member for failure to lodge written notice that the horses would not start. Application for return of the money was made on the grounds that it was not customary to inforce the rule, and there was no precedent for so doing.

Held, That the requirements of the rule should always be complied with, but as it has not been a common practice to do so, that the fine in this case was excessive.

Ordered, That one-half of the fine imposed and collected be returned to said Arthur J. Canton.

J. H. Steiner,
Secretary.

Flying Morgan and Black Hawk.

The following interesting reminiscences of Flying Morgan is furnished by a Vermont correspondent to the Mirror and Farmer: "Your correspondent was agreeably entertained recently by a visit from a friend of Ticonderoga, N. Y., who, among other capital stories, told this anecdote of old Flying Morgan: 'It was in the fall of 1851,' said Mr. P——, 'that father asked me to go with him to Burlington to the State Fair. I remember what a beautiful trip on the lake it was and all about old Black Hawk and Flying Morgan, who were rival stallions exhibited with their stock. Old Black Hawk was the first shown and made a grand appearance at the head of the cavalcade of his descendants, driven by his owner David Hill. The band played a march and it was a fine sight. Immediately after they left the track, Flying Morgan was shown, and then were seen the style, attitudes and symmetry that only the Morgan horses possess. He was driven slowly around the track when the band again played, this time the most insignificant air that you can imagine. It was a direct insult and cut Adams, who leaped from his wagon onto the stand and challenged any Black Hawk in the world to defeat Flying Morgan one heat or twenty for any sum up to $500. Talk about excitement! Blood was at fever heat. The crowd was about evenly divided, for the little Morgan had friends then as well as to-day. A race was soon arranged, the Black Hawk men matching a fast mare against the little stallion. The track was not in the best condition and slightly uphill at the finish, and here was where Flying Morgan did fly, beating the mare out easily. It was a damp day for Black Hawk men, but good feeling prevailed among the Adams crowd, and rightly, for here was shown merit and this is always appreciated. I never saw but once after such style and beautiful way of trotting; it was at Ticonderoga when a two-year-old stallion beat everything on the ice in the same manner that so pleased me at Burlington. The name of that two-year-old colt was Ethan Allen.

A Card From P. C. Kidd and H. E. Edmonson.

Editor Breeder and Sportsman:—Our recent combination sale at Chicago, Ill., proved to be so eminently successful, and being solicited by a number of prominent breeders to hold a spring sale there, we have consented to do so, and have claimed the third and fourth weeks in February, 1890, for a breeders' combination sale. In order to be able to concentrate all our time and energy in one direction, we have thought it advisable not to hold a sale in Kentucky the coming spring. We therefore not only feel it our duty, but a pleasure, to return thanks to the friends and patrons who offered us consignments for the proposed February sale at Lexington, Ky. We have engaged with W. R. Brasfield & Co. to conduct their Breeders' Combination Sale at Lexington next February at the Kentucky Horse Exchange. To those of our patrons and friends who enter stock in this sale, we wish to say that their every interest will be served to the best of our ability.

P. C. Kidd,
R. E. Edmonson.

The Standard.

[AS REVISED AND ADOPTED BY THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS, DECEMBER 14, 1887.]

In order to define what constitutes a trotting-bred horse and to establish a breed of trotters on a more intelligent basis, the following rules are adopted to control admission to the records of pedigrees. When an animal meets the requirements of admission and is duly registered, it shall be accepted as a standard trotting-bred animal:—

First.—Any stallion that has himself a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

Second.—Any mare or gelding that has a record of 2:30 or better.

Third.—Any horse that is the sire of two animals with a record of 2:30 or better.

Fourth.—Any horse that is the sire of one animal with a record of 2:30 or better, provided he has either of the additional qualifications: (1) A record himself of 2:35 or better. (2) Is the sire of two other animals with a record of 2:35 or better. (2) Has a sire or dam that is already a standard animal.

Fifth.—Any mare that has produced an animal with a record of 2:30 or better.

Sixth.—The progeny of a standard horse when out of a standard mare.

Seventh.—The female progeny of a standard horse when out of a mare by a standard horse.

Eighth.—The female progeny of a standard horse when out of a mare whose dam is a standard mare.

Ninth.—Any mare that has a record of 2:35 or better, and whose sire or dam is a standard animal.

†Made in a heat race.
*Doubtful, and made in a heat race.

Horsemen who have used the Boyce Leg and Body Wash say that it leaves the hair soft and smooth, the skin clean and healthy, and imparts to the limbs a cooling and lasting effect.

Grim's Gossip.

The thoroughbreds will all leave the Bay District Track for Los Angeles this afternoon.

Sultan, who is now standing in Kentucky, will have a fee of $400 charged for his services next season.

Andy McDowell, the Pleasanton driver, is confined to his room with fever, contracted by exposure to the weather.

Mr. W. R. Allen has sent a granite shaft to Stony Ford, and it has been raised over the grave of Green Mountain Maid.

By actual count there have been 231 queries asked this weeek in the BREEDER AND SPORTSMAN office "when will the races take place?"

C. H. Hoppin the breeder of Yolo Maid, and George Woodland, the owner of Alexander Button, were both in town since our last issue.

The Mirror and Farmer, one of our most esteemed exchanges, says "the track at Napa has gained world-wide favor for the brilliancy of its records."

Wilfred Page, still has strong hopes that the stallion Mortimer will lower his record, and the same idea is concured in by many of the prominent horsemen.

John Mackey, Superintendent of the Rancho Del Paso, has been very ill for a week or more with rheumatic gout. Mr. Mackey is at the Western Hotel, Sacramento.

The old grey gelding Sensation, sold a few months ago by Keating and Lee to Frank Work of New York, has become lame and has been turned over to the "Vet."

J. H. White, president of the P. C. T. H. B. A. hurried back from Arizona to attend the annual meeting of the association, but found no quorum when he arrived here.

I am sorry to announce that owing to an accident, the Coombs Bros.' well known broodmare, Dolly McMann, dropped a dead foal by Guy Wilkes early in the week.

Peter V. Johnston, driver and trainer for the Kalamazoo Stock Farm, is at present visiting friends on Puget Sound, and may be expected in San Francisco almost any day.

Jockey Morton, may go back East shortly as there is not work enough for him here. He is a capable and conscientious rider, and will prove an acceptable addition to any stable.

Currency is given to the rumor that Monaghan has signed to ride for L. J. Rose next season; Narvaze has signed with the Undine stable, and Hitchcock has signed to ride for L. U. Shippee.

There is still hope of a National Jockey Club. Mr. Withers has written to England for the rules governing the turf there and when he receives them the Eastern and Western Clubs may unite in a set of rules that will be of benefit to racing.

Sacramento is particularly favored with its track for while there have been many horses in this neighborhood that could not be worked, owning to the rain, the trainers at the capital city have been able to exercise their horses almost continously.

The gentleman who bought Niagara has at last been discovered in Illinois. He purchased the colt in 1856 midway between Paris and Lexington, Ky., but he has forgotten the pedigree of the dam. An inquiry has been started to get the pedigree in full.

The Friendly Stakes that were instituted as a double event by the Washington Park Club of Chicago and the Coney Island Jockey Club, have received in all 257 entries. It is estimated that the winner of each race will receive over $6,000. or if one horse is fortunate enough to win both events, it will be worth about $13,000 to the owner.

When a horse is recovering from any bronchial diseases, he must get plenty of judicious exercise before he gets any work; plenty of slow work before he gets any fast work. He can never get fit for fast work by standing in a loose box. The breathing powers require to be gradually strengthened by exercise, even more than the muscles and sinews.

Among the advertisements this week, will be found one, from a prominent and well known Eastern driver asking for a situation as trainer. His credentials are of the best and he has piloted many a trotter to victory. This is a splendid opportunity for some of our breeders to secure the services of a first class man. He has never been on this coast.

Horsemen are frequently politicians and aspire for high office at the hands of the people. Among those prominently spoken of for Governor are L. U Shippee, of Stockton; Mayor Gregory, of Sacramento; Frank L Coombs, of Napa; Senator Frank C. DeLong, of Marin; John Boggs, of Colusa; L. J Rose, of Los Angeles; and Senator B. F. Langford, of San Joaquin.

C. H. Corey of San Jose writes to say that Almont Patchen announce more himself and that the great pacer is fit to go against anything in his class, and that is the free for all. When the match is arranged between Adonis and Roy Wilkes it should be made for so much a corner and allow others to enter, then Mr. Corey could have a chance to show what Almont Patchen can do.

The breeding-on quality of the Almont blood in both the male and female lines is remarkable. Almont mares appear to inherit the prepotency of their great sire in about the same proportion as Almont horses. It is wonderful blood in both the male and female lines. Forty-nine sons and twenty-two daughters make a great showing for a twenty-five year old horse.

L. A. Davies authorizes me to say that he will match Roy Wilkes for any amount from $1,000 up to $2,500 against any trotter or pacer owned west of the Missouri River, the race to take place prior to February 15th; the race to take place over the Bay District track. The reason for naming such an early date is because the horse will make a stud season at Pleasanton after the time mentioned.

J. D. Hill and W. A. Foster of Ventura have purchased all the race animals lately owned by B. P. Hill of El Cajon. Not wishing to engage in the racing business, the gentlemen offer for sale the two thoroughbreds Tycoon and Mikado, now in training at the Bay District track. The horses are well known to the public and should be disposed of easily, as they are capable of beating more than the average field of horses.

C. H. Cory, of San Jose, the owner of Almont Patchen, seems to be anxious to match his horse against Roy Wilkes for $5,000 a side, the race to take place over the San Jose track. He is in communication now with Mr. Davies in relation to the matter.

The BREEDER AND SPORTSMAN Futurity Stake will close January 1st with the largest list of entries ever named in a stake in California. At the present writing it is fair to assume that several hundred entries will be made and the winners will reap a rich return for the small amount necessary to enter. Those who have not received blanks should send for them at once.

Casey Winchell may never ride again, at least it is reported that he has gained so much in averdupois that he will not be able to train down again. The report comes from the East that he now weighs 145 pounds. His brother who has been riding during the season in Nevada is a boy full of pluck with good seat and hands, and it is just possible that he may take Casey's place in the Winter's Stable.

In many of the Eastern papers an item has appeared stating that Sunol is the only trotter that has ever gone a quarter of a mile in 30 seconds. This is an error. Palo Alto has gone a quarter in the same time, and during the early part of last summer Homestake, owned by M. Salisbury, trotted a quarter in the presence of half a dozen gentlemen at the Pleasanton track, and the time was caught by all alike, 30 seconds flat.

Encourage the man who has the "sand" to invest liberally in a good stallion and bring him into your neighborhood by patronizing his horse. A good stallion in any section of the country that will appreciate him means thousand of dollars added to the value of the horse stock of that section, and every man in it will be benefited thereby. The direct and greatest benefits will be enjoyed by those who take hold first.

D. D. Withers is more than pleased with his new trainer, Knapsack McCarthy. The Faverdale colt, one of the crackerjack two year olds, but a failure as a three year old, last season, and who was thought to have been broken down, has been carefully examined by McCarthy, and the trouble has been located in the foot. His legs are all right. The unnamed son of Sensation and Faverdale will be seen on the turf again next season.

There has been entirely too much "pegging" of prices on trotting stock lately, and it got so that according to newspaper reports, a stallion of good breeding, be he two years old or twenty, is never sold for less than $10,000. If people who are parties for the sale of a horse are not willing that the real price at which he changes hands shall be made public the best way is to say nothing about that feature of the matter.—Breeder's Gazette.

The large heart and lungs of the sanguine temperament must be present in every successful racer, but every race horse must also be highly nervous and highly fibrous. The different proportions of these two temperaments in different race horses, often quite imperceptible to the eye, is what principally decides the distance at which they are best. If only duly nervous the horse will be a long stayer; if excessively nervous he will exhaust his best powers in the first half mile.

C. X. Larabie, Portland, Oregon, has purchased from Sherwood Farm, Sheldon, Iowa the following well bred trotting stock: weanling bay colt L L. D., by Woodford Wilkes, dam China Wilkes by Adrian Wilkes 6560, her dam Mambrino Queen by Mambrino Patchen 58; the weanling bay colt Legend by Woodford Wilkes, dam Diana by Swigert, her dam Volunteer Queen by Volunteer; the bay weanling filly Lyre by Woodford Wilkes, dam Kate Griffith by Alden Goldsmith; bay filly Jewess Wilkes, 2 yrs. old, by Woodford Wilkes, dam Rosillia by Swigert, her dam by Goldsmith's Abdallah 164, record 2:30; yearling black filly Kissie by Woodford Wilkes, dam Belle Lucas by Swigert, her dam by Richard's Bellfounder; the bay yearling colt Kittrell by Woodford Wilkes, dam by Alexander 2:28¾; and the bay filly Kanona by Baymont, dam Minnie Wilkes (sister to Lillian pacing record 2:15), by Adrian Wilkes 6560, her dam Abadallah Lightfoot by Mambrino Abdallah 1369.

I have received from "Aurelius," the well-known breeder and correspondent, a catalogue of his brood mares and foals for 1889. They are all registered and of the highest type of American trotters, and fit to grace any harem in the land. Aurelius says in his announcement: "There is no one amongst them that would not be a good animal to own and keep, if the judgment of the owner is not at fault. Those that are small are producers of large stock, and those that are large are fit for any purpose. I have endeavored to breed them to such horses as would cross with them, not only in blood, but also in disposition and shape. Any one of these mares would make an excellent road mare, and the two that have records have all their speed now, and are kind and sound. I cannot keep all, and most will be sold. The buyer will make his own selection, and will not fail, in buying any, to have a good one."

The student of breeding is continuously on the lookout for anything that tends to improve the blood lines and add to the value of the foals. There is no one that pays more attention to the theories, and practically demonstrates them, than Mr. Gilbert Tompkins of San Leandro. During the week he has purchased from Palo Alto Stock Farm, El Benton, foaled 1888, by Electioneer, dam Nellie Benton, by Gen Benton, 2nd dam Norma, by Alexander's Norman, 3rd dam by Todhunters Sir Wallace. Mr. Tomkins has also purchased from the same place, the bay colt, Glen Fortune, foaled 1886, by Electioneer, dam Glenne by Messenger Duroc, 2nd dam Glenella by Woodward star, 3rd dam Shanghai Mary (dam of Green Mountain Maid). These are two finely bred colts and will contribute in no small measure to the success of Southern Farm.

At a recent public meeting at Leicester, England, the popular Episcopalian Bishop of Peterborough delivered himself of the following sensible views with regard to betting and racing: "There is no sin in racing or betting any more than there is sin in drinking; excessive betting is sin just as excessive drinking is sin." Without denying that gambling may be injurious, the Bishop of Peterborough proceeded to give a definitoan of betting, which it would be difficult to improve upon. "What," asked his lordship, "is betting? It is simply the buying of chances. A man either pays or promises to pay a certain sum of money upon the chance of a certain event happening—whether it is a horse running a race, a card of a certain color turning up, or the rising or falling of stocks, does not matter. If a man says, 'I will bet you five shillings that it will not rain to-morrow,' I think it would take a long time to prove from the Bible that that man was guilty of a sin."

Nominations for the Breeder and Sportsman Futurity Stake close Wednesday, Jan. 1st. 1890. Entries must be made on or before that date. See Advertisement.

Nothing is more detrimental to the reputation of a good stallion than inferior offspring, says the National Stockman. When it is remembered that the stallion is generally judged by his colts, and that the character of the mares is rarely considered in making up this judgement, it will be seen that stallion owners are often too careless or obliging for their own good in allowing their horses to serve anything that will pay the fee. This thing of choice in breeding should not be all on one side, and the owner of the horse should have and exercise the privilege of selection to an extent that will insure a result of which he may be justly proud. Such a course on the part of stallion owners would no doubt cost them some fees and give offense to some people, but it will be found the most profitable in the end.

A syndicate of Salinasites, composed of J. D. Carr, J. B. Iverson, M. Lynn and others, has purchased from Senator Stanford for $5 000 the fine two year old stallion designated in the Palo Alto catalogue as Eugene, says the Salinas Index. The colt was brought down from Palo Alto yesterday, and is now in charge of Jas. Dwain at the Salinas race track. He is of fine form and action, of a beautiful bright bay color, with off hind ankle white, is fifteen hands three inches, weighs about 1,050 pounds and was foaled at Palo Alto, Feb. 7, 1887.

Eugene's sire is the world famous Electioneer, and his dam is Lady Ellen 2:28, by Carr's Mambrino, son of Mambrino Patchen, sire of the dams of Guy Wilkes 2;15¼, Astral 2:18, Rosa Wilkes 2:18¼. Lady Ellen's first dam was by Owen Dale sire of dam of Susie 2:26¼; 2nd dam Ida May, by Belmont, sire of dam of Bell Echo; 3id dam by Red Buck, son of Bertrand, from which it will be seen that Eugene's dam is a true representative of the Mambrino Patchens, one of the greatest brood mare lines yet produced.

Charles Marvin considers Eugene the choicest of the two year old colts at Palo Alto, and we think his purchasers have secured a splendid bargain.

The directors of the Montana Agricultural Mineral & Mechanical association met last week at Helena, Mon ana, to discuss their plans and make preparations for the season of 1890.

The new buildings will be pushed so as to have them in readiness for the next Fair. The board decided to give a four days race meeting July, 2, 3 4, and 5, at which liberal purses will be hung up for both runners and trotters.

At the Fair in August the meeting will be extended to a ten days race meeting to accommodate the increasing attendance and to satisfy the demands of the horsemen for more racing. By holding a ten days meeting the directors hope to give Fair week more attention and prominence. The meeting will commence Aug. 20 and close Aug. 30. Messrs. Hundly, Hard Chessman and Pope were appointed a committee to prepare the racing programme. The premium list will be submitted to a different committee and be revised latter. The treasurer reported that about $11,000 in permanent improvements had been expended during the present season, and that about $30,000 would be required for the improvements, for which plans are being prepared.

The sale of the Spendthrift stud, announced to come off at Lexington, Ky., on December 6. proved a grand fiasco, and was the cause of some sensation among those present says the Horseman. Shortly after the sale opened, and just as the stallion Spendthrift was knocked down to Treacy & Wilson for $14,000, C. W. Bathgate, the agent for Samuel Boocock, of New York, owner of the stud, called Captain Kidd's attention to a telegram from that gentleman ordering the sale stopped. This was so unexpected that the large crowd of horsemen present were dumfounded for a few minutes, and then they began to kick. W. H. Cheppu bet John Madden $100 that the telegram was received before the sale commenced, and upon investigation it was found the message was received at 11 o'clock the night before, but was not delivered until about 9 o'clock that morning. This action on the part of Mr. Boocock created quite a sensation, and caused much unfavorable comment. No blame was attached to Bruce & Kidd, who conducted the sale, as they were not aware of the sale being declared off until the horse Spendthrift was sold. Mr. Bathgate afterward offered Spendthrift to Milton Young for $13,500, but he declined to take him, although he bid $13,605 for him when he was under the hammer. Six horses, the property of different owners, were sold for a total of $4,620, an average of about $770, The two highest priced ones were the seven-year-old bay stallion Favor, by Pat Malloy, out of Favorite, purchased by Milton Young, of Lexington, for $3,105, and the seven-year-old bay mare Brita, by Virgil, out of Laxity, bought by J. B. Prather, of Maryville, Me., for $660.

Following the lead of Secretaries Lawrence and Brewster, in formulating The Friendly Stake, a new stake has been arranged to be run at three Kentucky racing points at Lexington, Louisville and Latonia, as has heretofore been announced. After a good deal of corresponding the full details have been arranged, and that it will be an unique fixure, the conditions show:

The Kentucky Jack-pot Stakes—To be run annually over the courses of the Kentucky Association at Lexington, the Louisville Jockey Club at Louisville and the Latonia Jockey Club at Covington. Entries for the spring meeting 1890 to close on Jan. 15, 1890; for three year olds and upward; entrance $100, half forfeit, or only $20 if declared on or before April 15, 1890 (money to accompany declarations); $1,000 added by the association to the stake run over its own track; the first race to be at 1½ miles and to be run over the course of the Kentucky Association; the second race to be 1¼ miles, and to be run over the course of the Louisville Jockey Club; the third race to be run over the course of the Latonia Jockey Club; the horse winning any one of these stakes to receive two-thirds of the money added by such association, together with two thirds of the entrance money and forfeits in the hands of such association due on said race; the second horse to receive $200, and the third $100; the remainder will be held by the association, and when any horse shall win three of said races, said horse shall receive all of the added money and forfeits due on said races except the money going to second and third horses; a horse may be entered in any of the above races and be liable only for the race or races entered in, but to be eligible for all must be entered in all, and if so entered will be liable for forfeits to each association; three year olds to carry 118 pounds; four year olds 122 pounds; five year olds and upwards 126 pounds.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

The Alpine Amateur Athletic Club was organized in Albion Hall, Alcazar Building, on Thursday evening, December 12th. From present indications it would appear that this newly formed club is bound to make itself known in a very short space of time. In our columns will be found full particulars of the meeting.

The wet weather is still with us and until such time as the rain ceases, the athletes will be unable to take outdoor exercise. However, it is probable that when the weather clears up we may expect a dry spell of several months, during which time the out-door athletes will have ample time to get into trim for future events.

Judging from the great interest taken in the newly organized athletic club, athletics will boom during the next couple of months.

RUNNERS, WALKERS, JUMPERS, ETC.

The members of the Alpine Club are determined to carry off the championship pennant in 1890.

The sporting editor of a leading daily paper in his columns last Monday, remarked that if the Alpine Club is able to carry off third place in the games on May 30th it may consider itself lucky. We were allowed to look over the charter roll and we are of the opinion that this young organization has in its ranks a sufficient number of first class athletes to make a good fight for first and not third place. The charter roll has been signed by some of the leading athletes on the Pacific Coast. Quite a number of young men have left the ranks of the Olympic, California, Occidental and Golden Gate Athletic Clubs, in order to seek fame and victory under the banner of the Alpine Club.

H. C. Cassidy, the young English athlete who made such a fine showing in the mile race on Thanksgiving Day, has decided to remain in San Francisco. He has joined the Alpine A. A. C.

McKinnon, the hammer thrower; Sheehan, the pole vaulter and general athlete; Vultee, the high jumper; Larkey, Tank, Moody, Gerhow and Kenealey, the well-known runners, and Gafney, Zehfuss and Elridge, the old-time walkers, have also joined the club.

The postponed cross-country run under the auspices of the Olympic Athletic Club, will take place at Milbrae to-morrow, weather permitting.

The gymnasium of the Olympic Club presents an animated appearance on class nights From the very large number of athletes that exercise at the present time, it is very evident that indoor sports are becoming very popular with the athletes of the club.

It is to be hoped that the organization of the Alpine Athletic Club will be productive of arousing the Executive members of the Pacific Coast Amateur Athletic Association from their present lethargy. These gentlemen do not appear to be overburdened with too much ambition or push, and the sooner they make up their minds to begin in earnest, the better for the good of athletics.

It is said that the medals to be presented to the winners of the different events at the late out-door meeting of the Olympic Athletic Club, will be the handsomest ones ever given for out-door sports by the club.

We regret that Dave Egan, the popular and speedy sprinter, has decided to retire permanently from the cinder path. He gave every promise of developing into a first-class man.

Prof. Walter Watson will probably succeed Prof. Corbett as boxing instructor to the Olympic Club.

The wrestling matches will commence at the California Club in January with a Græco-Roman contest between Ungerman and Mertes.

C. A. Parker of Newman and W. A. Ross of Modesto wrestled catch as-catch-can at the Modesto Athletic Club on Thursday evening, Dec. 12. Ross won the first fall on the preceeding Saturday evening, and Parker won the two concluding bouts on the evening of the 12th. The match was for a $500 purse and 60 per cent of the gate receipts.

A mixed wrestling match between James Faulkner, the champion light weight wrestler of the world, and Peter Schumacher, middle weight champion of the Pacific Coast, took place at the Mechanics' Pavilion, Portland, Oregon, on Saturday evening last. Schumacher was more than a match for Faulkner, and easily won the contest and purse of $500.

The 20th street branch of the Young Men's Christian Association gave a prize athletic contest for its members on Thursday evening, Dec. 12th, in their hall 2319 Mission street. There was a very large attendance of members and friends of the contestants. The entertainment consisted of Indian club swinging, exercises on the horizontal bar, exercises on the parallel bars, horse vaulting, pyramids and tug-of-war. Handsome medals were given to the victors in each of the contests. H. G. Corwin won the all round medal. The exercises were under the direction of Louis Pattenghi, the gymnasium instructor.

The games of the Seventh Regiment Athletic Association of New York City, were held on Saturday evening, Dec. 7th. The special event was a two-mile run, being an invitation race for which half a dozen of the crack amateur runners started, the favorite, Willie Day winning easily.

Ninety-three yards run—Final heat—Stuart Duncan, Company H, 8ft start, first, in 10s; J Davidson, Company H, 6ft second; G R Martin, Company H 6ft, third.

One thousand yards run—P H Irwin, Company H 6ft, third, scratch, first, in 2m 34s; W M Moore, Company I, 12 yds. start, second; F A Ware, Company B. scratch, third.

Half mile walk—W E F Smith Company E, 30s. start, first, in 4m 1 2-5s; C E Miller, Company D, 23s, second; W A Darling, Company D, 30s, third.

One mile bicycle race, novices—H Canfield, Company H, first, in 3m 28s; H C Senior, Company H, second.

Two mile bicycle race—W Gray Jr., Company I, 125yds, first, in 7m 12s; G J Ames, Company F. 100yds, second; C F Burhans, Company B, scratch, third.

Quarter mile run—Stewart Duncan, Company H 8yds, 1st, in 57s; P R Irving, Company K, 11yds, second; W M Moore, Company I, 15yds, third.

Two hundred and twenty yards run, novice—Final heat won by G H Moore, Company F, in 28 1-5s; H L Bloomfield, Company K, second; F C McMaster, Company B, third.

Two hundred and twenty yards, hurdle race—C F Bostwick, Company B, 1½yds, first, in 3 1 3 5s; C O Woodhouse Jr, Company F, 10yds, second; C S Busse, Company F, 16 yds, third.

Three legged race, one lap—L E Lahens and F R Gwynn, Company K, 3yds, first, in 26s.; C S Busse and C O Woodhouse Jr., Company F. scratch, second; A H Walton Jr. and L E Vannier, Company A, third.

Half mile roller skating race—H J Dietz, Company B, scratch, first, in 1m 57 3 5s; C F Durhans, Company B, 25 yds, second; F A Ware, Company B., 40yds, third.

Half mile run, novice—J N Ryan, Company D. first, in 2m 24s; E W Kiernan, Company E, second; L F Eggers, Company C, third.

Wheelbarrow race two laps—C S Busse, Company F, scratch, first, in 55s; J S Woodhouse, Company F, scratch, second; J P Thornton, Company C, 3yds, third

Putting 16lb shot—J P Warren, Company A, 8ft, first, 30ft 3in; E A Wolf, Company G, 8ft 6in second, 29ft 3in; C A J Queckberner, Company A, scratch, third, 36ft 7in.

Sack race, scratch, 50yds—I C Westlake, Company E, first, in 8 1-5s.; C S Busse, Company F, second; C L Jacquelin, Company G, third.

Potato race, 10 potatoes, 2yds apart—H C Senior, Company H, first, in 53 3-5s; F A Ware, Company B, second; G R Martin, Company H, third.

Running high jump—I McLelland, Company E. 6in; first, 4ft 10in; W M Moore, Company I, 5in, second; E A Wolff, Company G, 4in, third.

Inter-company tug of war—limit 650lb—Company A defeated Company C by 2in; Company F defeated Company H 2ft 9in. Final pull won by Company A by 2in.

THE WHEELMEN.

It is rumored that the Bay City Wheelmen will hold a one nights tournament at the Mechanics Pavilion within a couple of months.

An article appeared in the sporting columns of one of the daily papers on last Monday refering to the actions of Messrs. R. M Thompson chief consul of Cal. and Thos. H. Doane, chairman of the State racing board in the cases of the two wheelmen who were suspended for competing in the professional—amateur races held a few months ago at the Mechanics Pavilion. The writer for the article (which was copied from a Portland Oreg. paper) was evidently interested in the bicycle swindle and like a coward he now seeks revenge through the press. That the editor of the Portland paper ever allowed such an article to reach the printers hands we are surprised. There is no necessity to attempt to prove how false the statements are; for Messrs Doane and Thompson's characters and ability are too well known by all parties interested in bicycling

A regular meeting of the Bay City Wheelmen was held at the club-rooms on Monday evening last. The following officers were elected to serve for the ensuing term of one year: President, George R. Butler; vice-President, Thomas H. Doane; Secretary, Calvin N. Langton; Treasurer, Frank E. Browning; Captain, F E. Richardson; 1st Lieutenant, L. G Hodgkins; 2d Lieutenant, F. W. Pierson; Color-bearer, George P. Welmore; Buglers, C. C. Moore, E. C. Toni; Librarian, Charles A. Elliott. The election for captain was remarkably close, the successful man being elected by only one vote over Mr. Plummer.

The San Francisco Bicycle Club elected the following officers on Thursday evening, December 12th: President, Geo. J. Hobe; vice-President, Len D. Owens; Captain, F. J. H. Manning; 1st Lieutenant, W. G Lowry; 2d Lieutenant, R. L. Ingham; Recording Secretary, Sig B. Morse; Financial Secretary, H. A. Matthews; Bugler, C. B. Wheaton; Club Committee, H. S. Field, C. A. McDonald The president, vice-president, captain and two secretaries are ex-officio members of the committee. The annual banquet of the club will be held on January 11th.

We would like to see the wheelmen help each other out in a more solid manner than they do at pre sent. We notice that when one club has a tournament the other clubs seldom attend.

AT THE OARS.

The Dolphin Boat Club has elected the following officers: President, J. H. Medan; Treasurer, A. L. Schuppert; Recording Secretary, Fred Staib; Financial Secretary, B. Jamison; Captain, P. Von Hadeln; Lieutenant-captain, A. P. Rothkopf; Sergeant-at-Arms, G. W. Van Gnelpen. Delegates to the Pacific Rowing Association: G. W. Van Gnelpen, T. Russell, A. R. Rothkopf; Executive Committee, Fred Wissing, James O'Dwyer and E. Chenowith. Messrs. Wissing, O'Dwyer, Staib, Jamison and Schuppert were appointed a committee to arrange for a picnic to be given next year.

Dave Dillon, the once famous oarsman and former Australian champion sculler, while out in a small boat in New York harbor, was swept out to sea, and there is great anxiety concerning his fate.

William O'Connor has challenged the world to row against him for the sculling championship. On account of Searles' death, he claims the championship, and is ready to row any person or persons that may dispute his title. Charles H. Thayer, of Boston, offers a purse of $5 000 for a championship race, open to every oarsman who thinks he has a right to the championship; the race to be rowed on American waters.

The Pioneer Club has lately taken the most active interest in rowing. Its members predict a brilliant season for 1890.

Charley Long rowed to Hunters' Point in his shell on Sunday.

John Sullivan, the victor of the single scull race on Thanksgiving Day, went over the five mile course and coached Lon White on the way home.

Two barge crews were over to the North End Club house from the Pioneers.

The Ariels sent out a crew in their barge Ariel. The crew took a row along the city front as far as Washington street float.

Walter Blake of the Ariels took the club's Whitehall boat and rowed to the Union Iron works.

There is a rumor floating round the Ariel Club (not on the water) that one of its popular and successful members will join the Benedict ranks on next Monday. "Here's success."

Before long there is a probability that a match can be arranged for a two mile barge race between two crews connected with the San Francisco post office. C. W. V. O'Brien of the main office will challenge any crew of men connected with the Postal Department for a banquet.

Here is a chance for the Station B crew to accept and try conclusions.

A boat club will be established in connection with the Alpine Amateur Athletic Club at Harbor View.

CLUB JOTTING.

The Alpine Club will be a very valuable addition to the P. C. A. A A.

Now that the leading amateurs of the Golden Gate Athletic Club have joined the newly organized club the G. G. A. C. will probably lose all interest in its amateur branch.

In all probability inside of six months the amateur annex of the California Athletic Club will be out of existence. A prize fighting club no matter how popular it may be can never expect to be recognized as an amateur club. The young athletes connected with the fighting institutions are beginning to realize the fact, hence when the Alpine club was organized several amatuers deserted their old club and joined the ranks o what is going to be the leading genuine amateur athletic club of the Pacific Coast.

The championship games on May 30 will most undoubtedly be the best of the kind ever held on the coast and should attract at least 10,000 people.

At a meeting of the Board of Directors of the Golden Gate Athletic Club, held on December 3d, the dues for the month of December were fixed at $1.50, and the initiation for new members (including the first month's dues) at $7 50.

The postponed contest between Mike Lucie and Jimmy Carrol has been set for Wednesday evening, January 22d, 1890.

Class evenings—Monday, Wednesday and Friday, 8 to 10.

Class afternoons —Tuesday, Thursday and Saturday, 3.30 to 5.30.

Instructor of boxing. Jimmy Carroll of Brooklyn. J. A. Steinbach, President. J. J. Jamison, Secretary.

VIVE L'ALPINE.

On Thursday evening, December 12th, a number of amateur athletes met in Albion Hall, Alcazar Building O'Farrell street, to organize a gentlemen's amateur athletic club. About 100 young men were present. At 9 o'clock P. M. Gafney proposed that the meeting be called to order. M. C. Giry was unanimously elected temporary Chairman and P. N. Gafney temporary Secretary. The first question brought before the house was, "What name shall we call the club?"

E. Phil. Moody made the first suggestion, "Alpine Amateur Athletic Club." C. Vultee proposed "Pacific—Eureka." Several other names were suggested and the question was put to a vote. "The Alpine" was selected unanimously. The Chairman, in a lengthy speech, stated the objects of the meeting. In conclusion, he said: "This club will be a members' club. It will be run in the interest of the members and by the members, and not in the interest and under the government of a corporation. We propose to run the Alpine Club on a basis similar to that of the Olympic Club. We will have boxing but no 'knock out' matches. We will do all in our power to purify athletic sports and to down hippodr ming. It should be the desire of each and every member to try and make the club a select one—a ladies' club, for without the aid of the ladies (God bless them!) we could never expect to reach the same social level that the Olympic Club now stands on.

Each month we will hold at our Athletic grounds at Harbor View, a members handicap meeting, prizes will be given by the club. Each month at our City Club rooms we will give an athletic exhibition to which ladies can be invited. After the exhibition dancing will follow. A couple of times a year we will hold open games and all legitimate amateur athletes will be allowed to compete. We will employ men to train and rub our athletes. We will send teams of our best men all over the State to compete in the games given by outside clubs. Occasionally we will give orchestral concerts at our club rooms. In fact all the inducements in the world will be offered to our members. I am in this undertaking heart and soul and I only wish that each and every member would feel as I do. Gentlemen, inside of one year, we will have a membership of from 500 to 1000. The name "Alpine" will float all over the United States. This is a club that should have been started years ago, but still we are starting it at a good time. The numerous so called athletic clubs are beginning to lose their interest for Amateur members and all the athletes outside of the Olympic Club will soon register their names on our roll.

In conclusion, let me impress upon you all the necessity of caution in accepting members, we want only gentlemen. It makes no matter what a man works at as long as he is a gentleman.

My interpretation of what a gentleman should be is this: He should be of a good moral and social standing. He should not be tough nor in any way inclined to be tough. He should be fit to mix in the company of ladies, for I feel that the ladies will be our friends. Let every man work in the interest of his club. You will be rewarded in the end. The knowledge of what you have done in the past in the interest of your club will be your pay in the future. Stick to our motto "*Labor omnia vincit*" Labor conquers everything."

The following committee were then appointed.

On training grounds:—Messrs. M. C. Giry, T. J. Cunningham, I. I. McKinnon, E. Sullivan and T. N. Gafney.

On Constitution and By Laws:—Messrs. E. Sullivan, W. Kramer, T. J. Cunningham, Chas. Nultee and P. G. Gafney.

On gymnasium and Apparatus:—Messrs. I. I. McKinnon, E. Phil Moody, George Armbrush, M. C. Giry, I. McKenna and E. Sullivan.

The out-door grounds of the club will be at Harbor View, where the members will have the use of the best salt water baths on the Coast. The running path, eight (8) laps to the mile will be placed in tip top condition, and a large and comfortable dressing room with showers attached will be erected. The gymnasium and club rooms will possibly be situated on 10th St. near Market W. Since the organization of the Club applications for membership have been coming in at the rate of twenty a day. Officers were elected last evening and other important business transacted particulars of which will appear next week.

AN EXCELLENT SUGGESTION.

Assistant leader of the Olympic Club, Mr. Ed. A. Kolb, called at this office one day last week to talk over what he deems a feasible and meritorious scheme in connection with the club. Mr. Kolb beside being a superior gymnast and general athlete, is also fond of rowing and swimming, and his idea is that a little encouragement from the Olympic Club will put into the field one or two crews equal to any on the coast. Mr. Kolb at present occasionally uses a boat house in Alameda Estuary, where there is plenty of room, good water and every facitity for rowing.

He is sure the O. C. can procure a convenient site for a boat house, erect the necessary building, procure a barge and a racing boat for from $1000 to $1500. There are in the club many fine oarsmen, Ed. Winslow, Frank Pratt, Henry Smith, George Miehling, H. Denhard, Joe Marshall, F. C. Grimm, Bob McCord, Haberly, Walter Scott, George Harrold and S. V. Casady. Mr. Kolb and a dozen others might be named, all of whom would go in for the scheme with enthusiasm. The club has an ample reserve, and if the prevalent impression that the building scheme will be indefinitely postponed be well founded, the club will soon have some forty or fifty thousands of dollars to spare, part of which we think might profitably be put into the rowing venture outlined. We hope Mr. Kolb's suggestion may meet the favorable consideration of the Board of Directors.

THE GUN.

Game Law Prosecution.

A prosecution under the State law for the protection of game has been victorious in the county court of Eppingham County, Ill, and the defendant has appealed the case to the Supreme Court of the State. It is a case brought against the American Express Company for transporting game in violation of the law. The lower court decided against the company, and the Company has appealed. The highest court in the State will now pass upon the case, and its decision will be awaited with interest throughout the country. Supreme Courts are not always infallible, as our own State Supreme Court has demonstrated in important cases by reversing its own decisions with a change of its members, and again, in other cases, reversing the decisions pronounced by identically the same judges sitting in judgment. The Supreme Court of the United States has similarly reversed its decisions on very grave questions and in cases of less importance. Still the action of the Supreme Court of Illinois in this game law case will serve as authority in that State at least, and will be likely to create and mould opinion in other States as to the effect and force of laws to protect game.

The parties to the prosecution in Eppingham merit commendation. It is reported to be the first case of the kind in the land. If express companies can transport game or skins unlawfully obtained, as common carriers, all others can equally violate the law with impugnity, and it is well to have clear determination of the matter. A decision adverse to the Express Company by a State Supreme Court will have wholesome tendency toward stopping infractions of the game laws, which is very much required in every State. The active members of sportsman's clubs all over the country, and every advocate of game laws will rejoice that the case in Illinois has been pushed to the Supreme Court, and in the event of an affirmation of the judgment of the lower court more effective steps can be taken to enforce the law. In cases of reversal of the lower court by the Supreme Court laws can be framed to meet the exigency and to punish offenders. The wishes and sympathies of sports men and hunters of game in California are with their fellow-citizens in Illinois, who are prosecuting the case in point.

Mr. Allen to Dr. Moore.

FIELD EDITOR BREEDER AND SPORTSMAN:—My attention has been called to an article in your paper of December 14th., entitled "Almost a serious accident" and I thank you on behalf of Messrs. Parker Bros., as well as my self, for your comments on Dr. J. J. Moore's article in the Plumas National.

Your remarks are all the more appreciated because they were wholly unsolicted and because you had no knowledge of the transaction with Dr. Moore until you saw the article:

The facts of the case are, that this gun was purchased by Dr. Moore through our customer Mr. B. Schneider at Quincy Cal., *three years ago and has been in use ever since.* When Mr. Schneider advised me that one of the barrels of this gun had burst (remarked that it had been in use three years), he asked me what I could do about it? To this I replied that Parker gun barrels do not burst without some obstruction in the barrel or on account of improper loading, asking him a number of questions as to the circumstances under which it happened, remarking that three years was a long time to warrant a gun and offering to send the gun to Parker Bros. with his letter, for their inspection and an expression of their views in the matter. Upon receipt of the gun, Parker Bros. wrote me that they could not determine what was the cause as they saw no indication of a flaw and as the gnn had been in use three years, they thought they ought not to stand the loss or any part of it, but to be liberal and just they were to put on a new pair of barrels at *half price*, namely $15,00 which they thought ought to be satisfactory.

We sent Parker Bros. letter through our customer to Dr. Moore, who ordered the new pair of barrels at the price named, adding to his order a promise to ventilate the matter in the local paper.

This the first instance of a Parker gun barrel bursting *without a cause* and I believe Mr. Editor if you or I had been present at the time we could have easily found a reason for it.

E. T. ALLEN

SAN FRANCISCO, Dec. 17th, 1889.

[Mr. Allen's assurance that in his dealings with Dr. Moore every effort was made to do exact justice was not needed. We are acquainted with Mr. Allen, and know that he is as good as any other man, while not claiming to be better. Dr. Moore had no right to ask a new pair of barrels, and the fact that he did so and insisted upon it suggests the idea that Moore is the sort of man who expects more than is vouchsafed to ordinary customers, and as justification for the extraordinary demand sets up some special plea, such as that he has been an especial advocate of the gun, (or that he has been at great pains to sell guns of the make to friends, or some other plea of the kind, which is at times effective, but which stamps the maker as open to undue influence. That Dr. Moore should threaten to "ventilate the matter in the local paper" shows another and not unexpected phase of his character. Just what stuff the editor of the Plumas National is made of we do not know, but if he is like most editors he will be the last of men to permit anything like the use of his columns for the wreaking of personal spite. For aught we know Dr. Moore may own the National. If he does not, then we can only account for the appearance of the item reprinted last week on the hypothesis that the editor failed to see it in proof. Dr. Moore in some relations may be the fairest and squarest of men. but he has laid himself open to criticism in the matter of his Parker gun transaction.—FIELD ED.]

Miss Lillian F. Smith, the California girl whose mastery of the gun and rifle has earned her applause in most of the [illegible] of the world, is at Dixon, in Solano County, rest-

Game Protection Club at Callahan's.

A meeting of the citizens of Callahan's was held last week, to organize a club for the purpose of enforcing the law for the preservation of game and fish. A constitution was formulated, and the club got in preliminary working order, by the election of C. F. Boye, President, George H. Mitchell, Sec., and A. H. Bar, Treas., with a total membership of 19. This is a move which should have been made long ago. The mountains near Callahan's, on the head waters of Scott River, and the various tributaries of the Trinity, used to be considered one of the finest hunting grounds on the coast, but ruthless and unprincipled skin-hunters have made it almost a desert in regard to game. Hundreds of carcasses of deer could be seen a month ago at the licks on Coffee Creek, from which scarcely a shred of flesh had been used for food, and the slaughter there was begun way last winter. It is time to call and enforce a halt. We hope to hear of other sections taking a hand in the matter, so the deer may not become like the buffalo and mountain sheep, things of the past.

To the Top of Mt. Whitney.

[By C. E. Sherman.]

XV.

August 12th came seasonably, and as the Pilgrims sat at breakfast in the reassuring rays of the morning sun, all seemed to be well, until the Captain remarked in a tentative way. "well, let us take the advice of our venerable and distinguished visitor of last night and move camp to Runkles to-day." There was a monentary stir like the suggestion of a chill and then the Enthusiast took the bits. "Visitor! what in blank's sake are you talking about? Visitor! I want you to know!" That started the ball. One after another the Pilgrims caught it and threw it, with in-curve, pitching high, throwing low, each mother's son of them whistling like the most valiant boy in the dreariest graveyard, until a chance toss stuck the chef de cuisine somewhat in thia manner: "Joe, you didn't see any visitor last night did you?" Being fairly hit, and looking pretty white thereat, the chef remarked, "me, I go look see horses," and took a base by moving from under a little shade into the broad light of a genial sun. The others talked the louder and by the aid of the engrossments of daylight snuffled themselves into the belief that the vivid reality of the night just passed was—only a dream. It may be so; but in the vastness of these mighty mountains where gnomes might revel and elfs disport, there is room and place for even mightier genii than Father Time,

However, Runkle's was moved upon. Up and over a little divide and then down and down with back and foward zigzag almost 2000 feet in five miles till Runkles', named Camp Headquarters was reached. This was to be the base of supplies for the final attack upon the summit of Mt. Whitney and here the Pilgrims girded themselves. The Artist, Captain and Enthusiast loitered engrossed with the camera, righteously desirous of taking pictures of Nature's wonders which should hereafter serve as mementos to them and to all and at one point while busily engaged, saw others of the band unloading and making camp 2000 feet below.

This camp is upon Kern River a mile or so above the Lake, so called. The story is that twenty or more years ago there came in this region a steady rain which lasted for days and days. Loosened by the moisture, a mountain slide slid into the bed of Kern River, carrying with it acres of boulders and debris with mighty trees, many of which still stand in the bed of the stream leafles and lifeless. A resident many miles below describes the steady downpouring and how the river waters raged and raised day by day, until when a mighty torrent was expected, the waters commenced to lower. What could have happened no one knew. The windows of heaven were open, yet the fountains of the deep subsided, until the third day, when with a mighty roar and devouring force such a torrent poured down the channel of Kern River as never before or since has been heard of. At one gorge below Kernville the water raised 70 feet above the natural river bed, and to this day, even to where the river debouches upon the plains, huge tree trunks lie stranded on the mountain sides apparently up and above all possible river reach.

The river bed must have been filled 300 high by this mountain slide and in the now comparatively sluggish water course called the lake, lined with gnarled tree trunks, five pounds—and perhaps greater—in the trout line, are as plentiful and as vicious as the gamiest fisherman could possibly desire. Frequenters have made dug-outs—the easiest of fall-outs—so that one part of the lake can be commanded by the enthusiastic angler.

It is an unfortunate fact, perhaps within the purview of the Fish Commissioners, the suckers are capturing Kern River. They gather at the mouths of its little tributaries and suck up the spawn of both trout and whitefish. It seems almost impossible in this river to destroy trout—and rarely whitefish—by the use of giant powder. The moment a cartridge is thrown into a pool, the trout are off and away, but in cases, hundreds of suckers are killed. When the air bladder is ruptured—which is at least half the time—the fish sink to the bottom. Invariably the ribs are torn from the back-bone. There are always internal proofs when a fish has been killed by dynamite.

At 6 A. M. August 13th with two pack animals, one loaded with three days rations, the other with the photographic outfit, seven of the band started up the final climb summitward. The Chaplain made no effort to go, being well content to rest at the lake. There were several parties camped near by, among them a choice young lady and a desirous young man.

Singularly, when it was announced that the Chaplain intended to stay, the young man said "I guess I'll go," and he went. Yet the Chaplain asserts that he hunted nothing but small game throughout the trip.

Lunch time came at a delightful meadow where the best fishing grounds of the whole trip were found. The river bed for twenty-five miles courses due north and south, cutting right through the very heart of the Sierras. Lofty mountains arise on either hand, and the trail which of necessity hugs closely to the river bed, passes from one to another charming little flat densely timbered with living and almost as heavily encumbered with fallen giants. The first ten miles of the trail lies upon the west bank of the stream, then comes a crossing, after which the east side is followed until the last grand climb for the top of the peak. At 6,800 feet elevation after a fourteen miles trip, Camp Doubtful was made for the nights' rest. There was no effort for speedy travel, as constant temptation offered by the varying views of beauty and grandeur kept the Pilgrims and the camera constantly occupied. There were numerous goodly sized streams pouring into the river, most of them after a precipitous fall of 2000 feet or more down from the plateaux which border the feet of the highest summits. And at night overtowering cliffs so shrouded the heavens as to give the constant impression that the party was in a region of clouds.

Mr. E. T. Allen at 416 Market Street, City, calls attention in the advertising column to a peculiarly excellent boot for shooting wear, styled "Cruising Boots". They are moccasin footed, with firm soles, and lace tops, are made on well shaped lasts, are comfortable, enduring and neat in appearance.

Petite Miss Annie Oakley has shot her way into recognition as the Queen of Arms, her latest honor being an election to membership in the Cercle des Patineurs of Paris, an honor never before accorded to an American. At Lyons, France, she shot with the members of the gun club of that city, and was decorated with a rich medal as a souvenir of the occasion.

Messrs. John M. Adams and Ramon E Wilson shot on the Tule Belle preserve last week. But sixteen ducks were bagged, about all that were seen.

At Lathrop last Saturday C. J. Huas of Stockton killed fifty-nine out of sixty-two live birds in a match, using his second barrel only fifteen times.

On Saturday afternoon after a hard tussel. two boys Fred Heim and Robt. Streith captured a large point deer on the farm of the latter's father, five miles north of Sonoma. The boys grasped the deer by the horns after it had shown fight, throwing it and binding it with ropes. They now have have it prisoner.

In New Zealand, where rabbits are a great pest, they are poisoned by malt planted in furrows, as turnip seed would be sown; they feed at dusk and early in the morning. In a fortnight 10,000 rabbits were destroyed with only eight bushels of poisoned malt, on the Glen Erin estate, near Kyneton.

Port Warden C. B. Smith spent part of a day last week at McGill's on the Sonoma Marsh. in company with Dr. Knowles, Mr. C. M. Osborn, Major Kellogg, Mr. F. B. Norton and Mr. Mills. No ducks were flying, and the party returned by the eight o'clock A. M. train without having fired a shot. The ducks have been scattered by the rains and no sport is to be had anywhere. A cold snap is to be wished if shooting is to be had.

BASE BALL.

The Boston-St. Louis Series—Securing Players for Next Season.

The long spell of wet weather has made its influence felt in baseball circles, and matters pertaining to the game are exceedingly dull just at present. Sunday, if the grounds are in condition, "Der Boss Manager's" far-famed Brown Stockings will play the first of a series of seven games with Boston at Haight street, and a good class of exhibition ball may be looked for. So far, the trip of the latter has not been as successful as was expected, but still the attendance at the games that have been played has been so large that genial Jim Hart and his bean eating aggregation will not be out of pocket even if they do not play another game in California.

The work of securing talent for next season's clubs has not yet been actively begun, and players in the California League are on the anxious seat. So far. Finn has only signed two players, Levy and Hanley, but Stockwell, Shea and Whitehead can attach their names to contracts whenever they desire. It is not certain whether Charlie Sweeney will be seen in a 'Frisco uniform next season or not. "Pop" Swett has got the Eastern fever and will join the Brotherhood—a bad move, for even if the scheme should succeed, which is highly improbable, the youngster will soon find himself out of a job. There is no use in longer concealing the fact that Swett is not a ball player and never will be one. He can play very nicely in a one sided contest, but when it comes to coolness, quick judgment and accuracy in a tight place he is not there, and that is just what goes to make a ball player. Swett is in very speedy company in the California League and should never aspire to higher championship.

Harris has not yet signed a player for his San Jose team, but it is generally understood that Tom Power will again act as his Lieutenant. Of course, no better man could be found to captain a team, and the Garden City is to be envied in having the "Anson of the coast" at the head of its players. Harry Howard can go with Power if he cares to, and will probably do so, as will also Ebright and Buckley.

The Sacramento Management has signed Zeigler, Goodenough and Newburt, and holds Roberts in reserve. The former leaves for the East in a few days to secure several good men, and he promises to bring out none but pennant winners. Extensive alterations are being made in the Sacramento grounds, and it looks as though baseball would receive a boom next season in the Capitol City.

The only man who has as yet signed an Oakland contract is O'Neill, who will captain the team and play right field. Stallings, Long and Dooley will probably follow his example in a few days, while McDonald is undecided what to do. Wehrle will go East, as will in all likelihood Coughlan and Hardin, although Harris would like to secure the latter two.

Stockton, although promising to have a club in the field when the season opens, has not made any move towards securing players. However, Shelly says he is going to wait until the other clubs are made up and then he can get plenty of good men at reasonable salaries—a good idea. The Slough City does not care to begin another season with a team of high-salaried stars, each of whom wants to run the club

Fresno will be organized in a few days and will have plenty of money to engage a first-class team, which will be done. Altogether, if the National League does not step in and gather up all the good material, the "fans" on the coast may look for some good sport next year.

This is Jim Hart's last year in baseball. On his return East he will act as A. G. Spalding's private Secretary until next winter, when he will return to San Francisco and either start a branch of Spalding's sporting goods house or go into business for himself.

It is a pleasure to note that Kelly failed to induce Clarkson, Ganzell and Smith to go into the Brotherhood scheme. These men will be drawing fat salaries when "Kell" and his deluded companions are barred from playing in any league in the country. There are hard times in store for the followers of the Brotherhood fake.

It is about time the Directors of the Haight-street Grounds supplied decent accommodations for the members of the press. The so-called box used at present by the press gang is a wretched little affair that will not begin to hold all who are entitled to seats in it. Give the boys a good place to report the games. They have built up baseball in this city and are entitled to the best that can be had.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

The Elcho Kennel.

Mr. A. B. Truman, owner of the Elcho Kennel, at 1415 Steiner street, city, dropped into this office one day last week with a half hour to spare, and the time was improved in learning the methods which have made him so successful in rearing setters and pointers. He has always had favorable sites for his kennel buildings, with exercising yard and all conveniences, but even with such advantages some breeders lose many pups.

Mr. Truman uses clean oat straw in abundance for bedding, changing it weekly, and at each change he sprinkles the bedding, floors and the walls to a height of three feet with a solution of phenyle, a tablespoonful of phenyle to a gallon of water. The phenyle keeps the dogs free from fleas and also acts as a disinfectant.

Chloride of lime is scattered in all cracks and about the buildings weekly.

The dogs are fed at five o'clock each afternoon on corn bread, cooked meat and scraps, and in eight years not a dog has been lost by distemper. He now has on hand his Irish setter champions Lady Elcho T and Mike T; two red setter pups by the brace mentioned; Pat Elcho, a twenty-three months old dog of the same breeding, and two pointers by Rush T—Champion Patti Croxteth T, Cricket, Croxteth and Queen Croxteth.

The Elcho Kennel, at 1415 Steiner street, can be visited any day from 7 to 10 A. M. and from 3 to 7 P. M., and Mr. Truman is always pleased to show his dogs whether visitors desire to purchase or not.

The gem of the kennel in a pointer way, Champion Patti Croxteth T., by Champion Croxteth—Champion Patti M., was not at home, being in the hands of Mr. George T. Allenden to be prepared for the field trials.

The Central Field Trial Club's Inaugural Trials.

The Central Field Trial Club's inaugural trial began with the Derby on December 2nd, at Lexington, N. C.

The judges were Messrs. John Davidson, William Tallman and N. Wallace. The system under which the dogs were run and judged was a combined modification of both the heat and spotting systems. The great advantages of the spotting system were apparent to the experts who were present; but, unfortunately, the judges did not comprehend the system or did not apply it as it should be. Their judgment, as shown in their selection of dogs to compete in the second series was weakly erroneous.

The Setter Derby had eight starters. Out of the eight six were considered good enough to remain in the competition after the first series, whereas there were but three or four that were worthy of consideration.

Rowdy Rod, the winner of the Eastern Field Trials Club's Derby, justly won first, he being easily the best dog in the stake. Royal C and Sam C could have been left out very properly.

It is a rank injustice to take palpably poor dogs into the competition after they have shown no merit in competing for a place. It forces good dogs to do extra work, keeps handlers and dogs in constant attendance unnecessarily, and last but not least a poor dog may possibly come to the front by giving him opportunities to run when he is not entitled to them.

The quality of the work done in the Setter Derby was very ordinary; in fact, a great deal of it was poor.

The Pointer Derby, as a whole, contained as pure a lot of duffers as ever ran in a public trial. Out of sixteen dogs started there were but three which were entitled to any consideration. The rest gave an elaborately wearisome exhibition of inefficiency in the first series and a large repetition of it in the second. Such rare pottering and blundering have rarely been seen; this, considering the stake as a whole. Requiring that each heat shall be of an hour's duration is incorrect, and in the running it developed some absurdities. The merits of the dogs having little merit could sometimes be determined in a few minutes, yet the judges were obliged to run them a full hour, and the absurdity of running dogs simply to kill time could be observed in several heats. It took the greater part of five days to determine which were the best in a total lot of twenty-four. It could have been accurately determined in half the time.

After running through the first series of the Pointer Stake, the judges selected eight dogs. It was said that the management requested the judges to be as lenient as possible in retiring dogs from the competition. Whether this was so or not (it was an improper request) the judges certainly were lenient; but to be consistent they should have taken every dog in the competition again, there being very little to choose between them, if three be excepted. The subsequent running proved this conclusively; yet it proved no more that was clear to any competent judge at the finish of the first series. Miss Meally, F. F. V., Convex; Lady Hessen and Met should have been retired with the others. It is a great injury to the developement of the pointer to have such dogs run up in a competition as if they had competitive merit when indeed they have none, and thus the first trial of the spotting system in a modified form may be said to be a failure, so far as it relates to this stake; for it neither economized in time nor added to the accuracy of the judging; nevertheless it was not from any inherent fault of the system, but from want of firmness or judgmont in its application.

Some faultiness in the rules was also developed. Two dogs owned by the same party came together in the final, and the judges under the rules were required to run them one hour. Under such circumstances the judges should be able to place one of the brace without further running if they wish to do so, there being but one ownership interest involved. By the time the dogs run for first, the judges know quite thoroughly which dog is the better and should not be required to go through the farce of pretending they do not know.

Rip Rap really had no competitor worthy of the name. He so far outclassed all the others that first place was palpably his from the start.

Joy Jr, winner of the second, is a large orange and white puppy. He ran a very good race, showing accuracy in his work combined with good sense. His range is defective, it being irregular as is also his speed.

Miss Meally was not entitled to any consideration. She ran in a very soft hearted manner when she did run. In weeds or heavy grass she refused to range, not that she ranged well at any time; and she had little bird sense withal. Taking Flirt's performance throughout the stake it was incomparably superior. There was no doubt of the mistake in placing third dog; it was glaringly erroneous, and stands as one of the few inexcusable mistakes of field trials.

The grounds were magnificent for the purpose of trying the dogs. There were large open field of stubble, sedge, and ragweeds, sloping hills and flat upland afforded excellent opportunities to test the range, speed and bird sense of the dogs, and there was sufficient cover here and there to test them on the scattered birds. The club has excellent grounds beyond question. Birds were not found in great numbers, yet they were sufficiently plentiful to try the dogs thoroughly. If birds are too plentiful they balk a thorough test of a dog's hunting qualities quite as much as if they are too scarce.

The town is excellently located for the purpose of a trial, the grounds beginning at the very outskirts of the town. The hotel accommodation are excellent, no small matter in affairs of this kind.

SUMMARY.

Lexington, N. C., Dec. 2nd, 1889. Central Field Trial Club's inaugural setter Derby. For setters whelped in 1888. First $400; second $200; third $100. Forfeit $10; $20 additional to fill.

I.

Memphis & Avent Kennel's black, white and tan dog, Royal C, by Roderigo—Countess House,	with	A. M. Hildebrandt's black, white and tan bitch, Rod's Lady, by Roderigo—Gay Gladstone.
Memphis & Avent Kennel's black and white dog, Rowdy Rod, by Roderigo—Juno A,	with	J. I. Case Jr.'s lemon belton bitch, Nannie B, King Noble—Queen Vashti.
J. I. Case, Jr.'s lemon and white dog, Sam C., by King Noble—Cricket,	with	Memphis & Avent Kennel's black, white and tan bitch, Letty Lynn, by Roderigo—Countess House.
Memphis & Avent Kennel's black, white and tan dog, Harry C, by Roderigo—Countess House,	with	George W. Ewing's black and white dog, Marquis N, by King Noble—M'liss C.

I.

Royal C beat Nannie B.
Rowdy Rod beat Sam C. | Harry C beat Letty Lynn.

III.

Rowdy Rod beat Royal C. | Harry C a bye.

IV.

Rowdy Rod beat Harry C and won first money.

V.

Sam C beat Royal C.

VI.

Harry C beat Sam C.

1st—Rowdy Rod.
2nd—Harry C.
3rd—Sam C.

THE POINTER DERBY.

This stake was started immediately after lunch on Tuesday. The running was very inferior, Joy Jr. being the only dog that showed sufficient merit to have a chance of remaining for the next series. The stake had sixteen starters.

SUMMARY.

Lexington, N. C., December 2, 1889. Central Field Trial Club's Inaugural Pointer Derby.—For pointers whelped in 1888. First, $400; second, $200; third, $100. Forfeit, $10, $20 additional to all.

A New Cocker.

EDITOR BREEDER AND SPORTSMAN:—I have made another purchase of a nice Cocker Spaniel brood bitch, from the Llewellin Kennels, Chicago, Ill. It is Woodstock Ada (black). She by Champion Obo 2nd, A. K. R. 432, ex Woodstock Dinah. Woodstock Dinah by imp Toronto Jet, A. K. R. 860 ex imp Tippo. Champion Obo 2nd by Farrows Champion Obo 1st, etc.

We are having some very nice duck shooting now, principally mallards. I have had two nice little shoots on the King of Ducks (mallard) and our market is full of them. Hope it will continue. The cocker is the dog to bring them in.

A. C. DAVENPORT.

Sales.

Mr. A. B. Truman has sold to Mr. Jos. King, the pointer dog King Croxteth by Rush T—Champion Patti Croxteth.

Mr. Jas. King has sold to Mr. A. B. Truman the pointer dog Rab T. by winner of third and special, San Francisco, 1889, Rush T—Champion Patti Croxteth T.

Mr. A. B. Truman has sold to Mr. Orestes Pierce, Oakland, the pointer dog Rab T. by Rush T—Champion Patti Croxteth T.

Deaths.

Dr. James Stanton has lost by death from distemper, Sunol, Irish red setter bitch by Champion Mike T—Champion Lady Elcho T., whelped July 31, 1889.

Also, Donna, English bitch by Kittle's Luke—Wort's Beezy.

Also, Barney, native English setter by Hayes' Barney—Scrivener's bitch.

Mr. Sam D. Meriwether, marshall at the last field trial, writes to Mr. William Schreiber from the the Morton House New York City as follows: "I will not be at our annual field trial in January which I regret very much. I am here bookmaking on the winter races. Give my regards to all the boys when you meet at Bakersfield and tell them I am very sorry that I cannot again have the esteemed honor of serving them as Marshall."

The Executive Committee of the Pacific Coast Field Trial Club, met on Monday last at the office of President Edwards, and elected Messrs. W. C. Nelson, of this city, Ike N. Aldrich, of Marysville, and Hon. D. M. Pyle, of Bakersfield, to judge at the coming trials. Mr. Nelson is an old time trainer from Trenton, Tenn., a good handler, a cool, experienced judge and a fair man. Both Mr. Pyle and Mr. Aldrich have judged at former trials and are well known to those who have entries. The judges are good, the grounds are good, Bakersfield is the beau ideal of a trial center, and the company will be of the choicest. What more could be asked?

Not since the days when Doctor Rowe reported field trials in person, have the reports to the American Field been so clear and critical as this year, as will be believed by all who have read the excerpts re-published in this paper. This week we present Mr. Waters' general views of the Central Trials as sent to the Field.

Mr. Henry L. Borgwardt, of Bakersfield, was in the city during the week, and gave most reassuring reports of the progress of the new hotels in that town. There will be plenty of accommodation for all who care to attend.

Judge C. N. Post, of Sacramento, Mr. J. S. Dunham, of Stockton, and Mr. J. M. Bassford Jr, of Vacaville, Directors of the Field Trials Club, remained in San Francisco for several days after the executive meeting, calling upon friends and "running field trials" at numerous luncheons and dinners.

Mr. Geo. T. Allender leaves for Bakersfield with ten dogs on December 26th. He will run four or five, and it is probable will, as usual, have a cracker or two.

Mr. H. R. Brown, of this city, may claim to have bred the largest pointer ever whelped, one of the pups by Scout Croxteth, out of his Donna Sensation, having grown into a hundred-pound dog in field form. He is quick and able, however, and a good field performer.

The daintiest, prettiest sight looked upon in many a day, was seen at Professor J. F. B. McCleery's residence, 410 Ellis Street, city, a few days ago. There were eight choicely bred and very handsome pug puppies in a little inclosure, running about, tugging at one another and at the skirt of the lady of the house, who proudly exhibited the little pugs. Prof. McCleery informs us that he is willing to part with some of the dogs, and the opportunity is a most favorable one for those who fancy the breed.

ROD.

Dynamiting Suckers.

In the exceedingly interesting description of a climb to the top of that rarely ascended elevation, Mount Whitney, our valued contributor, Mr. C. E. Sherman, makes a suggestion which impresses us as worth consideration by the Board of Fish Commissioners and anglers. It is that in streams where trout abound and where suckers and vile fish exist in numbers and injure the better fish, the suckers be destroyed by the use of explosives. That it is possible to drive every trout from a pool without disturbing suckers, hard-mouths, and other bottom fish, no one of experience will doubt. In fact, to use dynamite or giant powder successfully to destroy trout, requires the utmost skill and experience.

The suckers and other coarse fish common to the trout streams of the State are of no value, and when it is considered that they destroy countless trout, they may be considered public nuisances, to abate which any means is justifiable which threatens no harm to property or better fish.

The Board of Fish Commissioners might have experiments made at some point where the use of explosives is not illegal, and if it appears that the coarse fish can be exterminated in trout streams, the State law can easily be modified so as to permit the restricted use of the means best adapted to that end.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent. discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Dec. 21, 1889.

NOTICE.

To The Owners Of Anteeo Colts.

We offer a premium of One Hundred Dollars for every Anteeo colt that gets a record of 2:30 or better during the year 1890.

S. A. BROWN & Co., Kalamazoo Farm, Kalamazoo, Mich.

The P. C. T. H. B. Association.

It is a hard matter to determine why the breeders of the Pacific Coast pay such little attention to their very best interests. There seems to be no unity of action in anything they try to do, and this was more than noticeable in the attendance that was present at the first annual meeting of the members of the P. C. T. H. B. A., which was called for last Saturday evening, there not being enough on hand to form a quorum. In all, so the Secretary informs us, there are ninty-eight members, and at least nine-tenths of these are bona fide breeders, breeding the best of stock to get the best of prices. How they can expect to keep up the public interest and find purchasers for their gilt-edged foals is more than any one can tell; that is, if they will be so dirilect to their own duties as to stay away from the first annual meeting of the Society. Many of the daily newspapers called the trotting meeting a failure, whereas, taken from every standpoint, it was undoubtedly the most successful first attempt ever made by any association in America. Although the official report has not been given to the members as yet, we learn that the financial standing of the Association is as follows: Receipts from all sources $13,360.40, while the expenditures amounted to $12,002.90, leaving a surplus in the Treasurer's hands of $1,357.50. Here we find a clear gain during the first eight or nine months of the life of the Association, and in addition to that, the public have become aware that the trials of speed were, all of them, free from jobs, there being but one attempt to deceive the public (and judges), and that was promptly corrected. Wherever the next trotting meeting is held there will be a large attendance, but to insure a success the members must work together and elect the very best men for Directors. The present President and Secretary have given of their time freely toward the cause, and while occasionally it may have worked a hardship to both, they have been the right men in the right place, and their work is appreciated by the members, as well as the public at large. Another meeting of the members will be called for, presumedly, about the second week in January, when it is hoped that every one whose name is now on the books will be able to answer the roll-call.

The list of winning jockeys in England is led by Tom Loates with 167 wins; G. Barrett follows with 128; Fred Barrett third, with 80, and J. Watts fourth, 78 wins. Last year Fred Barrett headed the list with 108 wins, J. Watts, 105, a close second; G. Barrett third, with 95, while Loates only had 58 wins.

The Crack Two Year Olds.

During a conversation at one of the horsemen's resorts last Monday evening, the question came up, "What is the best two year old that ever ran?" Among a large number it is only natural that there should have been many opinions. One, a gentleman well known on the English turf, was persistant in his advocacy of the claims of Donovan, the Duke of Portland's crack, but there were too many Americans present, and he had to content himself with his own ideas, as the relative merits of George Kinney, Hanover, Grenada, Tremont, Emporer of Norfolk, Barnes' El Rio Rey and many other good ones were discussed. The subject of debate caused an inquiry, upon which it was discovered that there are only four colts mentioned in the various guides which have campaigned and remain unbeaten. The pride of place can, with all due respect, be given to the California bred colt El Rio Rey, as, although he has only won seven races, still the weights he had to carry stamp him as the best of the four, by long odds. From the time he started in his first race until the let up at Westchester his races and winnings have been as follows:—

EL RIO REY.

St. Louis, June 11, 1889, Brewers' Stallion Stake, ¾ mile, 118 pounds; time 1:22	$1,380
Chicago, June 26, purse race, 5½ furlongs, 123 pounds; time 1:08	560
Chicago, June 29, Kenwood Stake, 5-8 mile 120 pounds; time 1:01	2,920
Chicago, July 11, Hyde Park Stake, ¾ mile, 118 pounds; time 1:14¾	3,540
Westchester, N. Y., August 24, Eclipse Stake, ¾ mile, 118 pounds time 1:14	23,750
Westchester, N. Y., August 31, White Plains Handicap, ¾ mile, 126 pounds; time 1:11	9,620
Westchester, N. Y., Oct. 2, 'Dunmow Stake, ¾ mile, 112 pounds; time 1:12½	5,225
Total amount won	$46,8 5

The next best at the weights we find to be French Park, who started off so well last year, but had to be let up on account of "a leg," and although Mr. Gideon, who bought him at the sale of the Morrissey Stable, has tried all in his power to fit him for an appearance at the post, the efforts have been unsuccessful. The following are the winnings of

FRENCH PARK.

Lexington, May 7, 1888, Dixiana Stake, 5-8 mile, 115 pounds; time 1:03½	$1,830
Lexington, May 9, Breeders' Stake, ¾ mile, 115 pounds; time, 1:17	1,650
Brooklyn, May 19, Bedford Stake, 115 pounds; time, 1:19¼	2,540
Brooklyn, May 24, May Stake, ¾ mile, 120 pounds; time, 1:17	2,580
Jerome Park, May 29, Juvenile Stake (divided dead-beat with Fides), ½ mile, 112 pounds; time, :51	1,375
Jerome Park, June 4, Sequence Stake, 5-8 mile, 112 pounds; time, 1:04	2,175
Jerome Park, June 11, Encore Stake, ¾ mile, 120 pounds; time 1:18¼	2,200
Total amount won	$14,350

In the minds of many the greatest two-year-old ever seen in this country was Tremont, and there is a good basis for the decision, as the number of his wins are so much larger than those of the other three, but still it must be remembered that he was never tested but once with anything like a severe penalty, and that was for the Surf stakes, in which he only met a moderate field. In this race a miserable send-off was given, and Tremont was almost left at the post, yet he had no difficulty in winning with his seven pounds extra. The winnings of the colt amounted to the following:

TREMONT.

Jerome Park, May 29, 1886, Juvenile Stake, ½ mile, 115 pounds; time, :48½	$ 2,400
Jerome Park, June 5, Sequence Stake, 5-8 mile, 115 pounds; time, 1:07½	2,275
Sheepshead Bay, June 10th, Foam Stake, 5-8 mile, 115 pounds; time, 1:04½	2,800
Sheepshead Bay, June 12th, Surf Stake, 5-8 mile, 122 pounds; time, 1:02	2,875
Sheepshead Bay, June 15th, Zephyr Stake, ¾ mile, 112 pounds; time, 1:17¾	2,075
Sheepshead Bay, June 17th, Paddock Stake, ¾ mile, 112 pounds; time, 1:17½	2,325
Sheepshead Bay, June 22d, Spring Stake, ¾ mile, 114 pounds; time, 1.16¾	2,185
Sheepshead Bay, June 24th, June Stake, ¾ mile, 117 pounds; time, 1:18¾	2,135
Sheepshead Bay, June 26th, Great Post Stake, ¾ mile, 115 pounds; time, 1:19¾	2,700
Sheepshead Bay, June 8th, Good-Bye Stake, ¾ mile, 115 pounds; time, 1:15	1,190
Monmouth Park, July 10th, Atlantic Stake, ¾ mile, 115 pounds; time, 1:16¾	2,465
Monmouth Park, July 15th, Tyro Stake, ¾ mile, 115 pounds; time, 1:19¾	4,910
Monmouth Park, August 7th, Junior Champion Stake, ¾ mile 115 pounds; time, 1:17¾	8,800
Total amount won	$39,135

It was a frequent remark from 1879 until 1886, "We will never see another Sensation," and he was a great horse in the minds of the public during his year. Eight times in all he started and his victories were mostly won with perfect ease as the time given for each race will readily show. He was the pet of the Lorillard Stable, and large amounts were won backing him, the stable hands faring unusually well. The earrings of Sensation were as follows:

SENSATION.

Jerome Park, May 31, 1879, Juvenile Stake, ½ mile, 110 pounds; time, :50	$ 2,150
Monmouth, July 8th, July Stake, 5-8 mile, 110 pounds; time, 1:07	2,475
Saratoga, July 22nd, Flash Stake, ½ mile, 110 pounds; time, :49¾	2,100
Saratoga, July 29th, Saratoga Stake, ¾ mile, 110 pounds; time 1:18	2,700
Monmouth, August 23d, August Stake, ¾ mile, 110 pounds; time, 1:16¾	2,550
Monmouth, August 26th, Criterion Stake, ¾ mile, 115 pounds; time, 1:22	2,525
Jerome Park, October 2d, Nursery Stake, ¾ mile, 100 pounds; time, 1:18	3,900
Jerome Park, October 20th, Central Stake, 1 mile, 100 pounds; time, 1:50¾	2,050
Total amount won	$20,450

When a close comparison is made of the distances, weights and time between each of the four, it will be seen clearly to the unprejudiced observer that the Winter's colt is far and away the best of the four unbeaten two-year-olds.

The Washington Park Club.

Again we have to call the attention of the breeders of thoroughbreds in this state to a new advestisement of the Washington Park Club, Chicago. The liberal and energetic management announce this week a number of new stakes, entries for which will close on January 15th. Taken with those of which mention have already been made there will be over $110;000 given in added money to the stakes and purses, during the racing season of 1890. Twenty five days racing will be given altogather, and we feel safe in saying that the California Stables will be largely represented during the coming season.

Names Claimed.

Some time ago I claimed the name of Antelope for my three year old colt, by Antevolo, dam Brownie H.; I now find that the name Antelope is already claimed so I now claim the name of Antevolo Jr. for the colt

I also claim the name of Hulda H. for black filly, one year old, by Director, dam Brownie H.

L. HEWLITT, 416 East 11th St. Oakland.

STOCK FARM PROBLEMS.

1. Getting Mares With Foal.

SOUTHER FARM, SAN LEANDRO, Dec., 1889.

More money is probably lost on stock farms through careless and improper ways of handling mares in the breeding season than in any other part of the horse business—outside of the pool box. In time this same pool box can and will be knocked out—so that may be overlooked for the present.

Any one who reads the catalogues of the different breeding establishments cannot but notice the large percentage, year by year, of barren mares. The Souther Farm may some year take its share of this general misfortune, but my experience for the past two years would seem to show that an intelligent system carefully followed out will reduce the loss from barrenness in mares to very small proportions.

In the season of 1888 I bred fourteen mares to the Souther Farm stallions Figaro and Jester D. Thirteen out of these fourteen produced foals in 1889—six out of seven bred to Figaro, and all those bred to Jester D. One of the mares bred to the latter produced twins, which died; all the others are now at the farm and are doing well—twelve foals of 1889 from fourteen mares bred in 1888.

The results of the past season of 1889 promise to be equally satisfactory. There are now on the farm twenty-eight mares—mostly my own—that were bred to Figaro and Jester D. last spring. Up to the last week or two I believed every one of them to be with foal, but I am beginning to have my doubts about two of the older mares, and it is perfectly possible that I may be mistaken in the case of one or two others, although I have little doubt but what there will be during the coming season at least twenty-five or six foals from the twenty-eight mares. The above figures do not count in the mares sent from the different parts of the State which are now at the homes of their owners, although most of those that I have heard from are reported in the foal.

This is the system followed: The season begins on or about the 10th of February, when all mares bred for the first time or any not with foal are tried. Twice a week thereafter—absolutely nothing must be allowed to interfere with this work—they are tried until one is found in season. One service is generally given, although if a stallion is not busy the mare may be bred two or even three times on *successive days*. A stallion should not be required to serve a mare more than once in a day except on unusual occasions, and the fewer of those the better, if the owner expects to have much pride in the produce of his horse.

When a mare has been bred she is not tried again for seven or eight days, but for three months thereafter she is tried regularly twice a week. The best plan is to set apart two afternoons a week for this work, dividing the time as evenly as possible; and let nothing short of an engulfing earthquake or a funeral interfere with it.

Mares sometimes refuse the horse for two months and over, even when tried faithfully twice a week, and then come in season again. Under the plan of only trying a mare once in three weeks, the getting of a colt is a lottery of the most uncertain kind. A glance at the Souther Farm record book will show that many mares come in season at exceedingly irregular periods; and as it may be said to be impossible for a mare to come in season and go out again in less than four or five days, the system of two regular trials each week will prevent their escaping notice when in season.

Mares that have foaled differ considerably in the number of days that go by before they will receive the horse. The ninth day is generally given as the most favorable time for stinting, and is probably about the average length of time, although I have seen mares bred back as early as seven and as late as fourteen days. The best plan is to begin trying about the seventh day and try every day thereafter until the mare is found in season and bred; then skip one day and stint again on the following day if the mare is still in season. Try again nine days after the first breeding and twice a week thereafter until the mare again comes in or until the end of the season. Regularity in this is the secret of success.

The good fortune of this farm is the more noticeable from the fact that many of its broodmares are well along in years. Puss by Kentucky Hunter, dam of Haverly (pacer), 2:25, will be twenty-four years old this coming spring, and is safe in foal to Figaro. Probably five or six of the mares that are safe in foal have lived on an average from eighteen to twenty summers, and goodness only knows how many winters.

I have found a proper arrangement of paddocks and other conveniences of great service; these will be described in another article if the above proves to be of interest to the readers of the BREEDER AND SPORTSMAN. GILBERT TOMPKINS.

Simmons Liver Regulator has never failed to relieve Constipation of the Bowels.

So easy in its action, harmless and effectual in relieving is Simmons Liver Regulator.

Pacing Blood Again.

EDITOR BREEDER AND SPORTSMAN:—In your issue of December 7th, Mr. Harry W. Peck, an able, entertaining and outspoken writer, who is not afraid to express novel theories on the breeding of trotters, while scolding everybody in sight, does me the honor of not over-looking without a passing breath of displeasure, something that I have written. From the way he strikes out, one might think that he graduated from Donnybrook, where the first principle inculcated is, "Wherever you see a head, hit it."

Judged by these "short stories," as he designates them, in every one of which is an arrangement of some one, I might be justified in applying to him the judgment he visits upon one of his "victims," and say that "His chief characteristic is antagonism to everybody else." But this would be uncharitable if not unjust, as his former articles have been free from captious criticism, and are admirable for their freedom from prejudice, which is a vice and weekness of so many that write on horse subjects.

In impartially over-hauling me with the rest, whose short comings have disturbed his equanimity, he says: "There seems to be an almost universal opinion prevalent that Pilot Jr, sire of dam of Maud S. and Jay-Eye-See, as well as some thirty more trotters, was a pacer. Dr. Hicks takes 'Fallstown' to task for abusing pacing blood. The Doctor says Broadhead, Mr. Alaxander's superintendent, boasts that he was 'loyal' to Pilot pacing blood when the great breeders held it as trash, and can now point with pride to Maud S., Jay-Eye-See, Nutwood and others, in justification of his judgment. Now I have no antipathy against the pacers or the pacing cross, but neither Mr. Broadhead nor anyone else can convict Pilot Jr. of being a pacer."

I am aware, as I suppose every moderately well-informed breeder is, that Pilot Jr. was not a pacer, but his sire was, and his maternal grandam was, and every intelligent breeder, whatever he may think of pacing blood in a general way, knows that absolutely all of the known speed inheritance, at the "intermediate" gait that Maud S. got from her dam, came from her dam's pacing grandsire old Pilot, and her pacing great grandam Nancy Taylor.

It is surely unnecessary to repeat that pacing and trotting are essentially the same gait, and that speed at one gait begets speed at the other.

It may be owing to my natural dullness, or because I have not yet mastered the "science" of breeding, but I confess that when two lines are brought together, one line of which produces fast trotting speed independently of the other, and the other line never produces trotting speed independently, and the result of this mating is a fast trotter (as it sometimes will be). How any one can attribute the speed to the line that never produces it, is beyond my comprehension. In speaking of a pacing cross, let it be understood that the individual used for the cross need not necessarily pace. A strong pacing inheritance, although the individual may trot, is equally valuable. The speed giving power is not lost in one remove, or ten.

History teaches us that the pacer was trained for speed at his way of going, and was raced a hundred or more years before the trotter was.

Science teaches us the laws of heredity, and that acquired habits are transmitted as well as natural instincts. May it not be that this longer line of trained habit or inheritance of the pacer will account for his giving greater speed and with more certainty than the trotter? If this is conceded, and it is certainly plausible, it will be apparent that his greater prepotency is not on account of his gait, but on account of his longer line of trained inheritance, of which his gait is only the proof. This will explain a suggestion that I made before, that it is not necessary that the individuals mated, or either of them, should have the latteral gait, provided their ancestors were strongly pacing bred.

When the trotter shall have undergone as many generations of training as the pacer has, I shall expect him to get speed with as great certainty, but until he has (which will not be in my time), or until the records show a different state of facts from what they do at present, I shall continue to use the pacing cross on the best and oldest trotting lines. I do not (as has been broadly intimated) advocate pacing blood because I have got it, but I get it because I profoundly believe in it.

It used to be thought that if a horse or mare, particularly the latter, were individually so worthless that they were fit for nothing else, they would "do to breed." There are some who have not yet quite emancipated themselves from this error, especially if they are called "well bred."

While I shall not presume to teach the art of breeding—how to in-breed, out-cross, mate individuals, or instruct in form, gait, and the multitude of minor matters that really constitute the "science" of breeding—yet I may be excused for calling the attention of those who have given the subject even less attention than myself, to a matter in which even thoughtful and well informed persons are liable, under the excitement of a "boom," to make mistakes.

I regard the Wilkes family as one of the very best trotting families yet before the people. (I am not inconsistent in this expression of partiality for the Wilkes family, for they, too, have the foundation pacing cross), but I would suggest for the consideration of those who are going wild over Wilkes blood, and paying fancy prices for it for breeding purposes, that there are *weeds* in every family.

If compelled to a choice, I would rather have, for stock purposes, an animal that was better than his breeding, but whose breeding was but second class, than to have an animal not as good as his breeding, but whose breeding was first class. One, from possessing great nerve force, vitality and individuality, is advancing, while the other, from lack of these qualities, is retrograding. We see where this retrogression will lead in the case of nearly five hundred of the sons of the great Hambletonian, who have entirely fallen out of sight.

It is easier to breed a great race horse than a great stock horse. A great stock horse will leave many great performers, but not many great producers. Nor is good breeding and great performance always a guarantee of a successful stock horse. We have here in our State three or four great race horses who are almost total failures as producers of speed.

As I have recently been reminded that "comparisons are odious," I wish to declaim any individious intentions in naming the Wilkes family to illustrate my point. It is equally true of the Nutwoods, Kentucky Princes, Electioneers, or any other family of trotters whose reputation has become so great that breeders are tempted to sell the worthless as well as the meritorious for stock purposes. It is perhaps asking too much of human nature to expect breeders to geld colts, that as stallions will sell at one year old for two, three or more thousands, which as gelding would not bring more than two hundred; and I fear there will always be speculators upon public credulity who will buy these fashionable weeds, knowing them to be such, but trusting to the reputation of the good ones of the family to give them two or three years of profitable business before their worthlessness is found out. What is true of stallions is equally true of mares. It would have been better for the reputation of Hambletonian, and vastly better for the breeding interests of the country, if nine-tenths of his sons had been gelded, and what is true of him will be true of his most popular decendants. My advice to an inexperienced breeder would be, select your family and then breed to a proved producer if you can.

M. W. HICKS.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

L. D.

Please give me the pedigree of Pope Leo, and did he ever make a record of 2:22½.

Answer—The pedigree as given by the owner is, Pope Leo by Romero 2:19½, he by A.W. Richmond; 1st dam by Crighton; 2nd dam by Dashaway he by Belmont. It is claimed that Pope Leo trotted a trial mile over the Bay District track in 2:22, but he has no record.

Tip Top.

Can any of our readers give the pedigree of the dam of Tip Top, who was bred at or near Stockton and was sired by Gen. Dana 1757.

EDITOR BREEDER AND SORTSMAN:— As H. M. Johnston desires to know about "Overland," I can inform you, that he trotted at Rohnerville Cal. a few years ago, during a Fair held there, after being distanced in a race, an exhibition heat in 2:35. At another Fair he trotted against Robert Bonner in 2:35½, but the heat was given to Bonner on account of foul driving.

Respectfully, M. LEVINGER.

E. W.

Can you furnish me with the pedigree of Eva W.?

Answer.—Eva W., foaled 1882, by Nutwood, dam Alice R. by Naubuc, second dam by Geo. M. Patchen Jr.

Back East.

Can you give me the pedigree of the horse Baywood, formerly owned in San Jose, Cal.

Answer.—E. C. Smith, who owned the horse, gives the pedigree as follows: Baywood by Nutwood, dam by Geo. M. Patchen Jr.; grandam by Champion; g g dam by Williamson's Belmont.

Amateur Breeder.

Will you kindly furnish the following information, viz:

1. What record has Nephew?
2. What record has General McClellan?
3. What record has Alexander?
4. What record has George M. Patchen, Jr.?
5. What record has Niagara?
6. What is the pedigree of Stockbridge Chief?
7. What process does one resort to to register horses? What is the expense?

Answers—(1) 2:36. (2) There have been two McClellans, on of which, by old Drew horse, has a record of 2:29; the second one, by North Star, was brought to this State in 1861 by Seneca Daniels, and was the sire of many trotters. As far as our information goes his best record was made at Sacramento, September 25, 1868, and is 2:38. (3) 2:31¼. (4) 2:27. (5) No record. (6) By Vermont Black Hawk, dam by Sir Charles. (7) Have sent you the necessary blanks by mail.

Vacaville,

Please publish the pedigree of Stockbridge Chief Jr., by Stockbridge, and also let me know if he is registerd.

Answer—Stockbridge Chief Jr. by Stockbridge Chief, dam Blue Bonnet by Tom Crowder. He is registered, the number being 672.

B. T. D.

Will you be kind enough to let me know the breeding of Abi.

Answer—Abi b f by Red Boy he by War Dance; 1st dam Abi's Daughter, by Norfall; 2nd dam Abi by Woodburn; 3rd dam Peggy Ringgold, by Ringgold; 4th dam Little Peggy by Cripple; 5th dam Mary Bedford by Duke of Bedford; 6th dam by imp Speculator etc.

Inquiry.

Can any of our readers give the address of Dr. H. M. Pratt who lived at Haywards about the year 1875, or the pedigree of a Patchen stallion, that gentleman once owned. The horse is said to have trotted at Sacramento and San Jose.

A Subscriber.

What is the breeding of Old Chieftain, who stood in Stockton about 1862-3 or 4, owned by a stock company. Was he Standard? If so, what was his number, and did he produce any colts that trotted in 2:30 or better? If so, please publish the names.

Answer.—Chieftain, 721, by Hiatoga, dam by Trimbull's Eclipse. He has in the 2:30 list, Cairo, 2:26; Defiance, 2:24 (pacing record, 2:17¾); Flora (pacer), 2:30; Onward (pacer), 2:24¾.

Henry Keith.

Will you be kind enough to answer the following questions in your next issue of the BREEDER AND SPORTSMAN? (1) What is the breeding of Robert McGregor and his record? (2) How many has he in the 2.30 class or better and their names? (3) What is the breeding of Little Arthur that did run on Long Island said to be by Glencoe? (4) What do you think of a horse that is sired by Robert McGregor, first dam by Harold, second dam by Little Arthur?

Answer.—(1) Robert McGregor, by Major Edsall, dam Nancy Whitman by American Star, 2nd dam Nance by Messenger Duroc; record, 2:17¼. (2) He has six in the list, as follows: Bonnie McGregor, 2:13¼; Earl McGregor, 2:21½; Mac D, 2:30; McGregor Boy, 2:29½; Mark Time, 2:30; Roxie McGregor, 2:20¾. (3) The Little Arthur that you probably mean is by imp Glencoe, dam Blue Bonnet by imp Hedgeford. (4) It would be necessary to see the horse before passing an opinion.

"A pair of trotting-bred mares can do the same work as a Percheron team would be required to do on an ordinary farm," says a late writer, "and do it much quicker; and when you want to drive to the post-office you can do it in a self-respecting way, as you can when you go to church or elsewhere with a team of standaid-bred trotters. You can also find much pleasant employments during the long winter months training your colts, taking much time with them that would otherwise be waisted."

VETERINARY.

Conducted by Thos. Bowhill, M. R. C. V. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Dr. Bowhill, 1523 California St., San Francisco

California State Veterinary Association.

The second annual meeting of the Association was held in San Francisco last week and was adjourned to Los Angeles. The meeting was continued on Thursday (last week) in the Rural Californian office. The following officers for the ensuing year, were elected: President, Dr. Thomas Maclay, Petaluma; vice-president, Dr. W. E. Morrison, Los Angeles; secretary, Dr. A. M. McCollum, Sacramento; treasurer, Dr. W. H. Woodruff, San Francisco; Drs. Maclay, Morrison, Whittlesey, Masoero and Egan were elected examiners of proposed members; and Dr. Spencer, Wadams and Egan, directors.

The following gentlemen were then elected members: Dr. J Blackinton, Los Angeles, graduate of Ontario Veterinary College; Dr. F C Pierce, Los Angeles, graduate of the Chicago Veterinary College; Dr. W B Rowland, Pasadena, graduate of the American Veterinary College; Dr. W J Oliver, Los Angeles, graduate of the Ontario Veterinary College. Dr. J K Witherspoon, after being examined in veterinary dentistry, was also admitted.

Letters of regret were received from Dr. Egan, Dr. Orvis, Dr. Masoero and others who were unable to be present.

On Friday afternoon, Dr. Morrison, of Los Angeles, read an instructive and interesting essay on "wounds and their treatment" which produced a good deal of discussion and evolved much scientific information. In the afternoon Mr. Heintz, of the Rural Californian, entertained the members at a recherche champagne lunch, and in the evening after dinner, at the Maison Doree, President Maclay read an erudite and concise account of the history of the society.

The Veterinary Society was organized a year ago last April at San Francisco, and reorganized as a corporation in January last. Its objects are to prevent quackery as much as possible and extend the scientific practice of animal surgery. The members of the association are: Thomas Maclay, Petaluma; C. O. McCollum, Sac.; C. B. Orvis, Stockton; J. P. Klench, Santa Rosa; P. P. Parent, Oakland; H. A. Spencer, San Jose; W. H. Woodruff, Thos. Bowhill, C. Masoero, J D. Obrock, F. A. Nief, W. F. Egan, P. Burns, W. H. Jones, J. D. Fitzgerald, all of San Francisco; W. B. Rowland, Pasadena; R. T. Whittlesey, W. E. D. Morrison, W. J. Oliver, J. C. Blackinton, F. E Pierce and J. K. Witherspoon, of Los Angeles.

The Los Angeles members from a branch association with Dr. Rowland as president; Dr. Whittlesey vice-president; Dr. Morrison secretary and treasurer. The offshoot was formed in May last and meets once each month for discussion of papers. The Los Angeles members, excepting Drs. Whittlesey and Morrison who were already members were admitted to membership in the State Association last Thursday evening.

California Horses in Kentucky

Have always sold well, and all that have brought large prices at Lexington have been shown on the covered track of the Kentucky Horse Exchange. This commodious, comfortable and splendidly lighted sale ground is owned by W. R. Brasfield & Co., who will have the exclusive use of it in February. Parties desiring to sell stock at the first place in America will do well to bear this fact in mind, our entries close December 28th, and our sale begins February 10.

W. R. BRASFIELD & Co.

For Sale.

THE CELEBRATED

RUNNERS

MIKADO

Price, $2,500.

TYCOON

Price, $2,500.

MIKADO is a handsome chestnut gelding; 5 years old; perfectly sound and in good racing condition. Among his victories this season are a mile and a quarter race at Ione; time, 2:08¾. He beat Susie S. three-quarter mile heats at Napa; time, 1:15½ and 1:15¼. He ran second to Peel at the Bay District track, a mile and a half; time, 2:36¾. Mikado is sired by Shiloh (by Cosmo), dam Margery by Error. See Bruce's Stud Book.

TYCOON is a good looking chestnut gelding; 4 years old; perfectly sound. He ran the fastest mile and repeat ever seen in California. Made the entire circuit this—his first—season, and beat, among others, Ed McGinnis, at Sacramento, a mile and repeat in 1:42½ and 1 42¾. Carrying 122 pounds, he beat Louis P., 102 pounds, a mile and a half in 2:40½. Won a mile at Stockton in 1:43, and a number of other races during the circuit. He is by Reveille, dam Margery by Error.

or JNO. G. HILL, Ventura, Cal.

Other stock for sale. Same breeding.

THE FARM.

Pacific Coast Shorthorn Breeders' Association.

During the last State Fair, held in Sacramento, a meeting was called by several of the principal breeders in the State who had in view the formation of an association for the benefit of Shorthorn breeders, and to increase the interest taken in that old established pure breed of cattle. Judge Bridgeford was appointed temporary president, and Ed. Younger secretary. A committee was formed to draw up the By-laws and report at the first annual meeting on December 11th.

On Saturday last the annual meeting was held in the Golden Eagle, Sacramento. Judge Bridgeford took the chair and Secretary Younger called the roll. The members of the association are: Judge Bridgeford, Hon. John Boggs, Colusa; E. Younger and C. Younger, San Jose; P. H. Murphy, Perkins; R. J. Merkley, Sacramento; P. S. Chiles and J. F. Chiles, Davisville; P. Peterson, Sites; E. S. Driver, Antelope; Heilbron Brothers, Sacramento; J. Marzen, Lovelocks, Nev.; S. E. Camp, Perkins; L. J. Bryant, Reno, Nev.; P. Everitt, Oakland; and W. H. Coward, Woodland.

Messrs. C. Younger, Bryson Merkley and P. Everitt were not present.

The Committee on By-Laws presented their report, and after some discussion was accepted in a slightly amended form.

The By-Laws at present are:

ARTICLE 1.—Pacific Coast Shorthorn Breeder's Association.

2. The object of this association shall be to disseminate information concerning the breeding and management of Shorthorns; to encourage improvement in the breeding of animals; to promote the general welfare of the Shorthorn interest.

3. Any person engaged in the breeding of registered Shorthorns in Nevada, Oregon, Washington, California or Arizona may, by a majority vote, become a member of this association by subscribing to the articles of the association and paying a membership fee of $5.

4. The officers of this association shall be a president, vice-president, treasurer and a board of directors. The board of directors shall consist of president, vice-president, secretary, and three members of this association, which three members shall be elected at the regular annual meeting of the association The officers shall be elected at the first regular meeting of each year which shall be held at Sacramento, on Tuesday of the last week of the California State Fair.

5 The President shall preside at all meetings of the association and Board of Directors and perform the duties pertaining to the office. In his absence the vice president shall act in his place.

6. The Secretary shall collect all moneys due the association and shall immediately pay to the Treasurer, taking his receipt therefore. He shall keep a correct record of all proceedings of this association, and of the Board of Directors. Treasurer's duties shall be to keep a true and correct account of all funds between the association and each member thereof, to safely keep all moneys belonging to the association and pay the same out only on warrants duly signed by the secretary and counter-signed by the President.

7. A majority of the Board of Directors shall constitute a quorum for the transaction of business, but no vote for the appropriation or expenditure of money by the Board of Directors shall be legal unless concurred in by three members of the board.

8. The funds of this association shall be obtained by a per capita assessment levied by the Board of Directors and not to exceed $5 per annum.

9. Any member may be expelled from this association for conduct disreputable, as a breeder of Shorthorns, or for failure for sixty days to pay assessment or other dues, by a vote of seventy-five per cent. of the members present at any regular meeting.

10. The members present at any regular meeting shall be not less than seven to constitute a quorum for the transaction of business.

11. These articles of association may be amended at any regular meeting by a vote of seventy five per cent of the members present.

The officers of the association were next elected, Judge Bridgeford being unanimously voted President; A. Heilbron, vice-President; J. F. Chiles, Secretary, P. Peterson, Treasurer Directors, J. Marzen, P. S. Chiles and E. Younger who together with the President and Secretary constitute the Executive Committee.

P. H. Murphy suggested the holding of a public sale once or twice a year under the auspices of the association, and introduced a resolution to that end. He said that the advantages of the sale would be that breeders of short-horn cattle would each offer stock, and in that way all ages of shorthorns would be represented. The sale would cause buyers to come from various parts of the country.

After a long discussion the members present agreed to offer a sufficient number of cattle to warrant a public sale. The resolutions as below were then adopted:

Resolved. That the first public sale of purebred Short-horn cattle take place under the directions and rules of this association, on Wednesday March 5, 1890 at Agricultural Park, Sacramento: said sale to be advertised and arrangements made by officers of this association.

Resolved. That where a public sale has been called by this association, any member having cattle to offer at such sale must first send in a list of the animals to the Secretary forty days before said sale, that they may be properly classed and advertised, and all the expenses of such sale shall be paid out of the gross receipts of such sale.

President Bridgeford presented an address to the State Agricultural Society which was read and a committee was formed of Messrs. Heibron, Murphy and Chiles to present the address and at the same time to consitute a committee to do their best to procure better accommodations for Shorthorns and if possible have them altogether.

The address reads·

To the Board of Directors of the State Agricultural Society' of the State of California. The breeders and exhibitors of Shorthorn cattle respectfully ask your Honorable Board of Directors to consider the advisability of increasing in the near future the value of the premiums offered this most worthy class of cattle. We do not desire to make comparison with other classes of cattle further than this: You will find by reference to your records of former years that the number and quality of Shorthorn cattle have far exceeded any other class of cattle. The exhibits of other classes of cattle have generally not been extensive, and the premiums given have fairly compensated the owners for the expense and trouble; but the exhibits of Shorthorns have been so numerous and so extensive that large division has been the result and no one has been sufficiently compensated.

There is no one class of stock that has been added in the past or probably will in the future add more to your exhibit than the Shorthorns.

This coast is now attracting widespread attention on account of her fine horses. She is producing the best horses the world affords. The East is sending to our shore and paying large prices for California-bred horses. We have the climate and all proper conditions to raise the best cattle in the world. There is no reason why we cannot excel not only any other portion of America, but Europe as well. All that is required is to arouse a proper interest. This can be accomplished by no other means so well as through proper encouragement at the hands of your society.

We respectfully suggest that an increase of 100 per cent. over the premium list of 1889 would not be extravagant. The experience of fairs in the Eastern States warrants it.

Let California be behind in nothing.

Respectfully submitted.

On Mr. Youngers's motion the same committee were authorized to wait on the State Fair Association in regard to offering prizes for fat stock.

President Bridgeford in an able manner pointed out the advantage that would be received from feeding a herd of Shorthorns and taking them through the East, thus showing that in Shorthorns as in every class of thoroughbred horses California was facile princeps, a good deal of discussion on the matter ensued and probably in two be three years time the President's idea will be realized for it will take at least two years constant preparation and feeding to fit cattle for the show ring.

The meeting was adjourned after a vote of thanks to the acting President and Secretary had been passed.

The Pile Game Fowl.

The standard colors for this well known breed as drawn up by the English Poultry are:

Cock. Head—Bright orange. Comb, Face and Jaws—Bright red. Eyes—Bright red. Beak—Yellow. Neck—Hackle—Orange or chestnut; free from stripes. Saddle—Rich red. Breast—White. Back—Dark rich red. Shoulder Coverts—White. Bow of the Wings—Rich red. Greater and Lesser Coverts—White. Wing Secondaries—Part of outer web, forming "wing bay," red; remainder of feathers forming "wing butts," white. Primaries—White. Thighs—White. Tail—White. Legs—Yellow or willow; yellow preferred.

Hen.—Comb, Face. Deaf Ear and Wattles—Bright red. Eyes—Red. Beak—Yellow. Neck—Light gold. Breast—Salmon. Thighs and Tail—White. Remainder of plumage—Creamy white. Legs—Yellow.

Dairy Prizes for 1890, Offered by American Shorthorn Breeder's Association.

Resolved. That Shorthorns contesting for dairy prizes shall be pure bred cows actually giving milk and subject to test. All other classes shall be dropped.

Resolved. That the secretary be authorized to arrange with the State Agricultural Societies or fairs of such states as have considerable dairy interests to pay from the funds of the association $225 as premiums for Shorthorn class for the productions of milk and butter upon the following conditions:

1st. That Shorthorns be permitted by such societies to contest for sweepstake premiums with other dairy breeds.

2d. That no arrangements for these premiums will be made with any society except on condition that actual tests of dairy cattle shall be made on the fair grounds under the personal supervision of proper officers or committees.

3d. That these resolutions and requirements shall be printed in the premium lists of the society accepting the offer.

For cows three-years old or over, first prize, $100; second $50.

For heifers under three years old first prize $50; second $25.

Judging Horses at Fairs.

An exchange says: The first place in which the Scale of Points was put to a practical test in the show ring was at the great Danbury Fair in 1855, where it was applied by Mr. Wallace himself, assisted by Mr. Joseph M. Ives and Mr. J. G. Davis, and such satisfaction did it give that it has ever since been retained as the method of judging at this great fair, every year growing in popularity and giving greater satisfaction as its merits become more widely known. "So successful was that test," says Mr. Leslie E. Macleod. "that the horses have not only ever since been judged systematically at Danbury, but the scale has been applied and adopted at great fairs East and West, North and South—in Pennsylvania, New York, Virginia, North Carolina, Delaware, Rhode Island, Massachusetts, Vermont, Maine, the Canadian Provinces, and in the Western States." This year the managers of the fair—so pleased have they been with the results of the scale in previous years—determined to take another step in advance, and decide the merits of the trotting bred horses by the one-judge plan. The judge selected was Mr. Leslie E. Macleod, of Wallace's Monthly, who had assisted in applying the scale on several occasions previously at the same fair, and it is needless to say that he gave entire satisfaction, and the results of his labors in this line afford strong argument in favor of the single-judge plan of judging horses. Mr. Macleod, in reviewing the fair, sums up the advantages of the single judge system about as follows: A great saving in time and promptness in despatching the work in hand; no division or shirking of responsibility or changing it to other shoulders; no excusing errors on the ground that "the other judges did it;" more scrupulous care in the making of awards; no hurrying through the work in careless and shipshape manner, but greater care, thus ensuring the greatest good to the greatest number. There are a great many other reasons in addition to those given by Mr. Macleod for the adoption of this plan, which we hope to see tried in the provinces next season. A great step in advance was made when the Scale of Points was adopted at several of the provincial shows, and we hope to see it followed at no distant date by the adoption of the single judge system, administered in each class by experts. Let standard horses be judged by a specialist in that class, and Clydesdales, Shires, Percherons and other classes by experts in those particular lines. In this way greater satisfaction will be given both the exhibitor and the public, and the greatest good to the greatest number ensured.

Distribution of Horse Values.

Data furnished by the Department of Agriculture show that horses possess a greater individual value in the states of Massachusetts, Rhode Island, New Jersey and Delaware than in any other part of the Union Following these come Maine, Connecticut, New York, Pennsylvania, Maryland, Michigan, Minnesota, Dakota, South Carolina, Georgia and Florida. The following States occupy a middle ground, their horses being of about an average value: Ohio, Indiana, Illinois, Wisconsin, Iowa, Kentucky, Tennessee, Virginia, West Virginia, North Carolina, Mississippi, Alabama, Nebraska, Kansas, Colorado, Washington, New Hampshire and Vermont. Next in order come Missouri, Arkansas, Louisiana, Montana, Wyoming, Idaho, Oregon, Nevada, California, and Arizona. And the horses of Texas, New Mexico and Utah are of less average value than those of any other portion of the country.

Notes.

Lord Wolseley's brother, Mr. Frederick Y. Wolseley, an Australian squatter, is said to be making a fortune out of the sheep shearing machine which he has invented.

There are more of the "all purpose" qualities in a sheep than in any other single animal. Good mutton, good wool, good breeding qualities, including ample milk for the young, can all be found under one pelt.

A large amount of cattle have been shipped from Santa Margarita lately, Gen. P. W. Murphy sending some exceptionally fine cattle.

Last year the Argentine Republic shipped 545 000 tons of grain to Europe. This year it will send 2,500,000 tons. The Government is at present assisting immigration. It pays the passages of all immigrants from the coast to their destination in the interior.

The experiment station at the University of Illinois is investigating the disease of cattle known as milk sickness. It is supposed to be caused by eating a plant of the genus eupatorium. In the last two weeks rabbits have been fed on it, and three of them died, and now a calf is being fed on the plant.

The Argentine Republic is booming its agricultural resources. It now has 105,000,000 sheep, as compared with 85,000,000 in the seven Australasian colonies. It has a large wool clip this year, the number of sheep being twenty per cent. greater than two years ago, and the breeds much improved. It is expected that it will export as much wool this year as Australia. In 1886 there were 729,766 horned cattle in Paraguay. The greater part of these were imported from the Argentine provinces and Brazil. Formerly this was the leading industry, and Paragnay has undoubtedly great natural advantages as a cattle-breeding country. It is conceded that the climate is too hot for sheep, of which it is estimated there are only 32,350 in the country. The recuperation in the cattle industry has been quite remarkable considering that out of the large number of stock in the country before the war, not more than 15,000 were left in 1870.

The heaviest animal in the Chicago Fat Stock Show this year is Jubilee Breastplate, owned by J. B. Sherman, of the Stock Yards, Chicago. This steer is about three-fourths Shorthorn and one-fourth Hereford, and was born December 3, 1884, making him nearly five-years old. He weighs 2,660 pounds, and since his birth has made a net average gain of a small fraction less than 1½ pounds per day for the entire period. The present ownership has lasted about three years, and the steer has been fed chiefly on ground oats and corn, about equal parts, in addition to the usual quantity of hay hay and grass during the summer months; also a portion of about a quart of ground oil cake (crushed after the oil was expressed) has been given him every day for some time past. He came originally from Dubuque, Iowa, in a car load of beef cattle, and was selected and kept by his present owner on account of his big frame. This exhibitor shows a dozen other steers of less average weight. The second prize was taken by W. H. Renick, Clintonville, Ky., Baby Mine, Shorthorn, 1361 days, 2515 pounds. The third by J. J. Hill, St. Paul, Minn., Monroe, Aberdeen-Angus, 1426 days, 2415 pounds.

It is said that the Ontario Department of Agricultural is busily collecting information regarding the swine industry from all parts of the United States which will be issued in form of a bulletin. The object of this will be to encourage farmers to adopt the American system of grazing, instead of the present process of feeding them at the pen. From the amount of pork imported and the unlimited opportunity of an export trade, there appears to be room for developing the industry. The value of hogs and products imported is over a million dollars.

For calf feeding oats stand at the head of the list of grains says Prof. Henry. When the calf is two weeks old, after he has drunk the milk from the pail, the feeder should slip a a pint of oats into his mouth just at the time when the little fellow is looking anxiously around for something to suck. At first he spits the oats out getting rid of them as quickly as possible, but after a few trials he finds the flavor satisfactory, and that it is better to retain the oats, masticate and swallow them and then have nothing to do. A little shallow feed-box should be placed in front of each calf, and in this the oats should be dropped. At first only a couple of tablespoonfuls should be supplied, when the calf is twelve weeks old, and getting twenty pounds of milk daily, he will eat from one to two pounds daily of oats.

Ground squirrels have become such a nuisance in Alameda County that when the Board of Supervisors met at their last meeting Supervisor Martin introduced a resolution declaring E street, Haywards, a public highway in Eden township, the same to be known as County road No. 2548. Adopted.

The following ordinance was introduced by Supervisor Bailey:

An ordinance to provide for the extermination and destruction of ground squirrels in the County of Alameda, State of California.

The Board of Supervisors of the County of Alameda do ordain as follows:

SECTION 1. Ground squirrels infesting lands in the County of Alameda are hereby declared a nuisance.

Sec. 2. All owners and occupants of land within the County of Alameda are hereby required within ninety days after the taking effect of this ordinance to exterminate and destroy the ground squirrels on their respective lands, and thereafter keep said lands free and clear therefrom.

Sec. 3. Any person violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor.

  - Eleanora Margrave — imp. Margrave 1455; Fanny Wright, thoroughbred

DESCRIPTION.

SILVER BOW is a handsome bay, no white; 15-2½ hands high; weighs 1075 pounds; of fine form, with the best of legs and a clean cut, intelligent head. Is remarkably level headed seldom making a break; wears 7-ounce shoes in front. His record 2:37, is no mark of his speed; he can beat 30 easy, and with his gilt-edge breeding, he is just what he ought to be, a trotter sired by a trotter whose dam was herself a trotter and his grandam the dam of two trotters. His dam Sadie being by Hambletonian 10, shows him to be bred from the cream of the trotting blood.

TERMS: $100 for the season. Mares not proving in foal returnable for the season of 1891 free of charge. Good pasturage and first-class care taken of mares for $5 per month. No responsibility assumed for escapes or accidents. For further particulars, address

Good Stock Solicited.

Respectfully, W. R. BRASFIELD & CO.

SAMUEL GAMBLE, Agent for Pacific Coast.

The Thoroughbred Stallion

INTRUDER

Will make the Season of 1890 at Agricultural Park, SACRAMENTO.

Bay Horse, foaled 1871, bred by Sir L. Newman, England. Imported by D. D. Withers, Esq., New York.

By Crater, Son of Orlando and Vesuvienne by Gladiator.

1st dam Lady Bountiful by Rataplan (Rataplan is own brother to Stockwell, and winner of 42 races, including the Doncaster Cup and 19 Queen's Plates, and proved himself the most distinguished race horse of his day in England).

2d dam Plentiful by Don John (the winner of St. Leger and Doncaster Cup).

3d dam Plenty by Bay Middleton (winner of the Derby and Two Thousand Guinea Stakes).

4th dam Plenary, own sister of Plenipotentiary, by Emilius. (Both Emilius and Plenipotentiary were Derby winners.

5th dam Harriet, dam of the renowned Plenipotentiary by Pericles.

6th dam by Selim, winner of the One Thousand Guinea Stakes.

7th dam by Pypilina, by Sir Peter.

8th dam Rally, by Trumpeter.

9th dam Fancy, by Florizel. Fancy was full sister to Diomed, the first Derby winner in England, and after his importation into this country, sired the illustrious Sir Archy, etc. See English Stud Book.

Imported INTRUDER is a beautiful bay, standing fully 16 hands high, of great length and substance, and descends through close and strong currents from the most illustrious winners and winning lines of blood of which the English Stud Book bears record.

A careful review of the first six crosses of the pedigree of INTRUDER will show nine Derby winners; five St. Leger winners; two winners of The Oaks; two winners of the Two Thousand Guineas; two winners of the One Thousand Guineas; one Goodwood Cup winner; one Cesarwich Cup winner; one Cambridgeshire Stakes winner, and four Doncaster Cups, in addition to a great number of Steeplechases and other races of less import.

INTRUDER, at the great fair held at St. Louis, Mo., in 1876, was awarded the highest stallion honors—the blue ribbon and the $500 purse—in the sweepstakes ring for stallion of any age or blood. The list of competitors embraced the large number of thirty-three animals, and they represented England, Canada, Kentucky, Tennessee, and other states. He also took first premium in his class and in sweepstakes for the best stallion of any age or breed at the State Fair at Peoria, Ill., 1882. He is the sire of Tidal Wave, George Hakes, Bernice and April Fool.

INTRUDER is the sire of Interpose, who is the dam of Spokane, winner of the Kentucky Derby, in which he beat the great horse Proctor Knott and broke the record.

TERMS: $50 for the season. Mares not proving with foal can be returned the next season free of charge. Good pasturage at $4 per month. Mares cared for in any manner owners may desire, and fed on hay and grain, either or both, at reasonable rates. While every precaution will be taken, no responsibility will be assumed for escapes or accidents. Mares sent from a distance in care of the undersigned, will be met and taken to the park. For further particulars, address

FOR STOCK

COLIC AND GRUBS.

I have used Simmons' Liver Regulator in Colic and Grubs with my mules and horses, giving them about half a bottle at a time, and have not lost one that I gave it to. You can recommend it to every one who has stock as the best medicine known for all complaints that horseflesh is heir to.
E. T. TAYLOR, Ag't for Grangers of Ga.

FOR CHICKENS.

In using Simmons' Liver Regulator (Powder) with my chickens for Cholera, I take and mix it with the dough and feed it to them once a day. By this treatment I have never lost a single chicken in the last five years from either Chicken Cholera or Gapes.
T. G. BACON, Edgefield, S. C.

HOG CHOLERA.

A reliable gentleman who raises every year about one hundred head of hogs told me he never lost one from Cholera, although the disease had often appeared among his herd. His remedy is Simmons' Liver Regulator given in drenching—about double that given to a man. I give this information for the benefit of those whose hogs may be attacked with Cholera.—PROF. F. P. HOPGOOD, OXFORD, N. C.

SIMMONS LIVER REGULATOR

is so conveniently given. The Powder mixed with the feed will be eaten by horses, cattle hogs, and chickens readily, while the Liquid (prepared) is easily given as a drench.

—ONLY GENUINE.—

Manufactured by J. H. ZEILIN & CO., Philadelphia, Pa. Price **$1.00.**

THE

BREEDER AND SPORTSMAN'S

-: Futurity Stakes :-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

$3,000. GUARANTEED $3,000.

Being the oldest established firm in the live-stock business on this Coast, and having conducted important auction sales in this line for the past fifteen years, amounting to one half a million of dollars, we feel justified in claiming unequaled facilities for disposing of live stock of every description, either at auction or private sale. Our list of correspondents embraces every breeder and dealer of prominence upon the Pacific Coast, thus enabling us to give full publicity to animals placed with us for sale. Private purchases and sales of live stock of all descriptions will be made on commission, and stock shipped with the utmost care. Purchases and sales made of land of every description. We are authorized to refer to the gentlemen whose names are appended.

THE IMPROVED NOYES ROAD - CART.

PATENTED JULY 17, 1883, *AND JUNE* 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheels—a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17¾ and Chanter a half-mile in 1 10½ to a Noyes Cart, says he would not take $250 for it if he could not get another; W. J. Gordon, Glenville, O.; W. B. Fasig, Cleveland, O.; Dave Muckel, Cleveland, O.; R. J. Moorehead, North East, Pa.; W. J. Chamberlain, Cleveland, O.; H. P. Malone, Bradford, Pa.; S. A. Brown & Co., Kalamazoo Stock Farm; Charles Marvin, Menlo Park, Cal.; W. H. Crawford, Lexington, Ky.; S. L. Caton, who gave Bell Boy a mark at Los Angeles, Cal., of 2:19¼, and drove Chanter a half mile in 1:06¾ and Lowland Girl a full mile in 2:32 to a Noyes Cart; Mike Bowerman, Lexington, Ky.; James Golden, Medford, Mass.; John E. Turner, Philadelphia, Pa.; T. L. Newton, Beaver Dam, Wis; P. V. Johnston, Marshall, Mich.; W. H. McCarthy, Los Angeles, Cal.; A. W. Dennison, El Dorado, Kan.; P. O. COLE'S OSSIDINE

An Infallible Cure FOR CURB

Splint Ring & Sidebone, Spavin ALL Bone Enlargements Sore Shins, &c.

Richard Cole

TRADE MARK

OSSIDINE

Results obtained at the well-known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used. Very respectfully yours,

S. A. BROWNE & CO., Prop's.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to

Mr. JEROME I. CASE, Mr. FRED. GEBHARD, Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),

And hundreds of others from whom we have very flattering testimonials.

One Style Only. $3.00 per Bottle.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 857 acres; one mile frontage on Clear Lake; 340 acres alfalfa land; 220 acres now seeded to alfalfa, cuts six tons per acre; 70 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,500; three barns, capacity 350 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cold spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch. The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

JOHN T. PETERS,
Agent for Sonoma Lake and Mendocino County Land.

BOYCE TABLETS.

Leg and Body Wash.

THE BOYCE TABLETS are packed in a nicely decorated metal box with hinged lid - one hundred tablets in each box; directions for use plainly engraved upon the box; therefore, the convenience of the package—no liability to leakage and breakage—economy and ready solubility, together with the absolute certainty of their action, will at once commend the use of BOYCE'S TABLETS to the intelligent horsemen of the country. TABLETS sufficient to make one hundred pints of leg and body wash are conveniently carried in an inside coat pocket or in the hip-pocket of the trousers.

The BOYCE WASH can be applied ALL OVER THE BODY WITHOUT FEAR OF BLISTERING OR AFFECTING THE KIDNEYS.

The BOYCE WASH will cure CRACKED HEELS, PUFFS, STOCKINGS, SCRATCHES, INFLAMED TENDONS and FEVERED LEGS.

Price per Box of One Hundred Tablets, $2, sent postpaid to any part of the United States; **six boxes for $10.** A sample of BOYCE'S TABLETS will be mailed to any address on application. These TABLETS are warranted to keep in any climate. Address

No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, DEC. 28, 1889.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

ROY WILKES, 2:12 3-4.

THE MOST CONSISTENT PACING STALLION IN THE WORLD. THE CHAMPION OF THE PACING BRIGADE.

This week we add another to the long list of portraits issued by the BREEDER AND SPORTSMAN, and it is with pardonable pride that we point to the exceedingly fine picture of Roy Wilkes, 2:12¾, the best of the free-for-all pacing class that contended last season on the "big circuit." His owner, Mr. L. A. Davies, has brought Roy Wilkes to California, and he is located at Pleasanton Stock Farm, where he will stand during the season of 1890, but at the same time Mr. Davies is prepared to match him against any pacer or trotter owned west of the Missouri River for any reasonable amount. The match can be made to take place over any race course within a hundred miles of San Francisco, and as there has been a great deal of bantering among the owners of pacers, it is about time that some of them should come to the front and test the merits of Roy Wilkes, particularly as Mr. Davies is eager to match his horse.

Roy Wilkes is seal-brown, 15¾ hands high, six years old, and weighs 1,050 pounds. He is by Adrian Wilkes 6560. Adrian Wilkes is by George Wilkes, dam Nellie B (dam of Ira Wilkes, 2:28 trotting and 2:22¾ pacing, and *Mike Wilkes*, 2:15¾), by Harry Patchen (Kirtly's), son of George M. Patchen 30; second dam Sophie, by Edwin Forrest 49, etc. The dam of Roy Wilkes is Flora (by Blue Bull 75; second, third and fourth dams thoroughbred). Roy Wilkes came to his speed early, and as a four-year-old he achieved a record of 2:20¼. At Cedar Rapids, Iowa, on June 22, 1887, he won second money in the 2:35 pacing class. The conflict was a keen one, and resulted in a battle of six heats. For the first heat thirteen responded to the tap of the bell, and the heat was won by Billy the Kid in 2:24½, with Duplex second and Roy third. In the second heat Roy went to the front and won the heat in 2:24½, with Billy the Kid second and Duplex third. The third and fourth heats were won by Duplex in 2.25¼ and 2:28¼, Roy being second in each heat. The fifth heat was won by Roy in 2:29½, Duplex winning the sixth heat in 2:28¾. In this contest he was first in two heats, second in three heats, and third in one heat. This was a remarkable performance for so young a horse. At Marshalltown, Iowa, on June 29th, in the 2:35 class, he again had to play second fiddle to Duplex. There were nine starters, and he won the first and second heats in 2:25½ and 2:20¼, Duplex winning the next three heats in 2:20¾, 2.28 and 2:24¾. On

September 7th, at Rochester, Minn., he won the 2.20 class in straight heats, in 2:21, 2:22 and 2:21. On September 16th, at Hamline, Minn., he started in the free-for-all class, but failed to get a place. During that season he paced under the name of Roy, but there being a trotter of that name, it was decided to change his name to Roy Wilkes.

Under his new name, on June 14, 1888, he opened the season at Iowa City in the free-for-all class. His only opponent was Toledo Girl, which won the first heat in 2:22, Roy Wilkes winning the next three in 2:26, 2:23 and 2:24. At Marshalltown, Iowa (half mile track), he won the free-for-all in the first, third and fourth heats, in 2:13, 2:18½ and 2:18¾. Jewett won the second heat in 2:21¼. On July 3rd he paced at Hamline, Minn., in the 2:20 class, winning it (in the rain and mud) in straight heats. The time was 2:17¼, 2:18½ and 2:21½, and he had behind him Johnny Woods, Dr. M. and Dr. West, in the order named. At Pittsburg, Pa , he met a good field in the 2:17 class, and was defeated by Duplex in the third, fourth and seventh heats, in 2:17¾, 2:21¼ and 2:25. The first heat was won by Charlie Friel in 2:22½. Roy Wilkes won the second heat in 2:20, and Harry Z. won the fifth and sixth heats in 2:20¼ and 2:24. This was in the mud, Roy fighting the field. At the meeting of the Northwestern Association of Trotting Horse Breeders, held at Washington Park, he competed in the 2:17 class, but failed to win a heat. At Hartford, Conn., on September 7th, he was entered in the Insurance Stake ($4 800), and under the able guidance of John E. Turner, he won this rich stake in the second, third and fourth heats, in 2:15¾, 2:17½ and 2:17. The first heat was won by Emma in 2:16½. The other starters were Elmonarch, Lady Wilkins, Allen Maid, Balsora Wilkes, Hy Wilkes, Bessemer, Doctor M., Johnny Woods, Joe Jefferson and Harry Z. At Springfield, Mass., on September 14th, he won the 2:17 class in straight heats in 2:18¼, 2:16¼ and 2:18. His greatest triumph was in the last meeting of the Grand Circuit, which was held at Fleetwood Park, New York. Roy Wilkes was entered in the 2:18 pacing class, his opponents being Allen Maid (2:16½), Ed. Annan (2:16½), Ulster Belle (2:15½), Balsora Wilkes (2:17¼), and Elmonarch (2:17½). In the first heat he took the lead and kept it to the wire, winning easily by three lengths in 2:15½. Allen Maid was sent for the second heat, but Roy Wilkes was saved for the next heat. Allen Maid won the heat in 2:16½. *The third heat was one of those memorable contests which will live in turf history.* Allen Maid led to the quarter in 32 seconds, with Ed Annan second, and Roy third. But at this point Roy broke (after being interfered with) and fell back ten lengths, and appeared to be out of the race. Allen Maid did not let the grass grow under her feet, and she passed the half mile pole in 1:04. The third quarter at Fleetwood is an up-grade, and the Maid was eased a little, when suddenly a horse shot by her as if she was standing still. It was Roy Wilkes, and he led at the three-quarter mile pole in 1:39 (some watches made it 1:37—). He won with something to spare in 2:14½. In the fourth heat he took the lead and kept it, winning the heat in 2:15. *These heats are not only the fastest heats ever paced by a five-year-old stallion*, but they cast into the shade all previous records made on the Feetwood track.

During the season just passed he has stamped himself as the very best of the pacing stallions on the circuit, his fighting finishes, being the cause of favorable comment from all who witnessed them. His first appearance for the year was at Detroit, where only three of the celebrities came to the wire, there being Roy Wilkes, Gossip Jr. and Silver Thread. The fame of Roy had preceded him, and the betting was $25 on the stallion to $8 on the field. Gossip Jr. won the two first heats in an easy manner, Roy showing plainly that he was short of work, in fact Mr. Davies admitted that the horse had been doing stud service until July 6th and between that time and the day of the race, July 25th he had only been worked three miles, one in 2:25, one in 2:20 and the last in 2:17. However, the third and fourth heats of the race he won easily, when the deciding heat was postpoted until next day. In the four first heats the owner drove, but on the 26th when the horses were rung up John Dickerson was up behind the stallion and it was only after a hard tussel that he won the deciding heat and first money in the remarkable time of 2:14¼, thus reducing Roy Wilkes record a quarter of a second.

From Detroit the horses was taken to Cleveland where he met the pick of the pacers of the country Brown Hal, 2:12½, Bessemer, 2:13¼, Gossip Jr., 2:13½, Jewett, 2:14, and the subject of our sketch were the contestants. On this occasion Dickerson again drove Roy Wilkes, and for a considerable time he was a favorite in the pools.

The first heat fell to Jewett, Roy Wilkes taking the second in 2:13, while the third fell to Brown Hal, time 2:12½; Roy being beaten only a very short nose. The excitement at this point beggars description, the betting talent were all at sea, and there was no telling what the outcome would be. The fifth heat fell to Roy in 2:15¾, he proving himself one of the gamest horses that ever looked through a bridle. The combined energies of the four other drivers were now directed toward beating him, and the four hard heats began to tell, but Roy gallantly responded and fought out the fifth heat with Brown Hal, but broke when about one hundred yards from the wire and to get second place was the best he could do. The last was a remarkable heat. At the start Brown Hal broke and was seven lengths behind Jewett at the quarter with Roy Wilkes in the centre: At the half Roy Wilkes has closed up to within two lengths of Jewett and Brown Hal within three lengths of him. Closer and closer Hal kept creeping. Rounding into the stretch he left Jewett who could not keep up the clip any longer and set sail after Roy Wilkes. The son of Adrian Wilkes was a sure winner when within eight lengths of the finish, but unfortunately for his admiring friends, after going for every heat Dickerson lost his head, struck Roy with the whip and up he went, and the crack Tennessee horse whizzed under the wire a nose the winner. Jewett third.

At Buffalo the Kings of the pacing class again met, and to their number was added Lady Wilkin under the able general-

Roy captured the two first heats, the second one being paced in 2:13¾. Gossip Jr. captured the next two, while Jewett managed to take the fifth. Roy took the sixth and last heat in 2:15.

We next find the giants at Rochester, where the field consisted of Gossip Jr., Roy Wilkes, Jewett, Silver Thread and Lady Wilkins. It was really a case of Greek meet Greek, and it was a tug of war, but the fates were against Roy at the Flour City, and he could not win. The Rochester water effected him somewhat, and he was a sick horse when the race was called. Notwithstanding his trouble, he managed to secure the first and second heats, Jewett fighting him in both every inch of the way. The strain was too much for the gallant son of Adrian Wilkes, however, and he had to lower his colors; still he made a magnificent finish in each of the last three heats, and it was only physical weakness that caused him to lose.

Poughkeepsie was the next place on the circuit for the pacers to meet, the starters being Gossip Jr., Jewett, Silver Thread and Roy Wilkes. Notwithstanding his defeat at Rochester, Roy Wilkes was made favorite over the field at $100 to $30, the horse having recovered from his trouble. Roy was an easy victor, taking the first, third and fourth heats in 2:18½, 2:16 and 2:14. We next find them at Hartord, and the story of the race is graphically told by the Spirit of the Times in the following manner: The programme opened with the free-for-all pace, with Roy Wilkes at $50, field $50. He did not win in straight heats, as was expected. Jewett led in the first heat, with Wilcox in second place to the upper distance. Roy Wilkes and Gossip Jr. made frequent breaks along the backstretch, but mended their place when the homeward way was reached. The stallion was rank and pulled a ton. At the 150 distance stand he passed Wilcox with Gossip Jr., Jewett beating the stallion two lengths in 2:16¼. For the second heat Roy sold at $50 against $65 for the field. At Davies' request, McCarthy took his place behind the stallion. "Knap" found he had a handful when his charge broke on the turn, but steadied him to the backstretch, when he again broke. Jewett kept the lead he secured at the send off to the head of the stretch. There Gossip Jr. nailed the black fellow and beat him out over a length in 2:14¾ with Roy at Jewett's wheel. For the third heat Gossip sold even with the field. Jewett led Gossip two lengths at the quarter, with Roy lapped on Gossip's wheel. At the half Roy was in second place at Jewett's head. Jewett fell back, leaving Roy and Gossip at hammer and tongs to the homestretch. There Gossip declined further argument and Jewett took up the chase, Roy beating him home two lengths in 2:12¾. The heat was finished with a reserve. Had Roy been forced out, the 2:12½ of Brown Hal would surely have been beaten. When McCarthy alighted from the sulky, he said the horse could have gone three seconds faster.

The betting was now $50 to $16 on Roy. Roy passed Jewett on the backstretch, leading him two lengths at the half, and Gossip three lengths at the third quarter. Gossip broke on the homestretch, letting Jewett in, while Roy finished with two lengths to spare in 2.17 on a jog. In the next heat Roy led Jewett four lengths at the half, with Wilcox in hot pursuit, cutting down Roy's lead to two lengths at the third quarter. Geers made one of his characteristic rushes from the distance stand, Roy capturing the heat by a half length in 2:14¾.

At the Springfield meeting the same story was repeated, Roy won the first, third and fourth heats, but Gen. Turner with his peculiar style of doing business, made the judges believe that Gossip Jr. could have won the last heat if Roy had only got out of the way, and the intelligent judges gave the fourth heat to Gossip, necessitating a fifth heat. Roy would not be denied and paced away from his field with a vim that precluded any more fouling, winning as he pleased in 2:14.

There was not a person who saw the performance but what was fully satisfied that Roy won the race twice; however, he proved his stoutness of heart and enduring courage by winning the concluding heat in the easiest of manners. The great beauty of the horse is that he could repeat as many times as he was called on, and while the other side-wheelers were willing to cry enough, he showed himself a perfect glutton for work, and seemingly could never get enough of it.

Several exhibitions through Ohio were given and then the stallion was taken to Lexington, where he started against Bessemer and Pickaway. Bessemer won the two first heats in 2:16¾ and 2:15¾, but the clip was too much for him and Roy Wilkes had no difficulty in winning the next three in 2:15¾, 2:17½ and 2:20. It will thus be seen that Roy has proved victor in seven out of nine contests this year, and without doubt has proved himself the very best pacing stallion that ever wore iron. Roy Wilkes will stand during the coming season at Pleasanton Stock Farm, where a limited number of approved mares will be served. All information will be supplied by L. A. Davies, Hotel Pleasanton, Sutter and Jones streets, San Francisco. The pedigree of Roy Wilkes for six generations is as follows:

ROY WILKES.
Seal brown horse. 15¾ hands. Foaled 1883.
Record, 2:12¾.

Sire Lillian, 2:19½ (4), Waterloo Boy, 2:30. — Adrian Wilkes 6560. — Flora

- Geo. Wilkes 519 ..... (Abdallah 1. / Clase. Kent mare)
  - Sire of Harry Wilkes, 2:13¾; Guy W ilkes, 2:15¾; Mike Wilkes, 2:15¾; Wilson, 2:16¾; Wilcox, 2:16; So So, 2 17; J. B. Richardson, 2:16¾; Rosa Wilkes, 2:18½; And 59 others in 2:30 or better.
  - Sire of Dexter, 2:17¾ / And 49 others in 2:30
- Hambletonian 10..... (Sire of Dexter, 2:17¾ / And 49 others in 2:30)
  - Nelly B..... (Harry Patchen (Kirby's) / Sophy.....)
  - Dolly Spanker..... (Henry Clay..... / Telegraph. .....)
- Harry Patchen..... (Geo. M. Patchen (20) .. / Edwin Forrest 49 (Alexander's) / Sophronia.....)
- And 59 others in 2:30 or better.

Phoebe (thoroughbred). .....

- Blue Bull 75 .. .. (Sire of Georgetown, 2:16; Zoe B. 2:17¼; Bessie, 2:17¼; Lemma Swallow, 2:19; Royal Bounce, 2:19 / Will Cody, 2:19¾; Silverton, 2:20¼; Chance, 2:20¾. / And 59 others in 2:30 or better.)
  - Sire of Georgetown, 2:16; Zoe B. 2:17¼; Bessie, 2:17¼; Lemma Swallow, 2:19; Royal Bounce, 2:19 / Will Cody, 2:19¾; Silverton, 2:20¼; Chance, 2:20¾. / And 59 others in 2:30 or better.
  - Queen..... (Young Selim. / Bet.)
- Blue Bull (Prudent's)... (Blue Bull (Merring's) / daughter of.....)
- Honest John (thoro'd).... (Bull o' the Woods) / A horse that ran for 10 years (over 100) races from ¼ mile to 4 miles and was never beaten / Trim .....
  - Bulge (thoroughbred)... (Quicksilver (Cecil's.... (thoroughbred) / Liddiet (thoroughbred).)
  - Daughter of..... (Quick Silver (Allen's) (thoroughbred). / Virginia Nigger. / Shakespere (Shively's). / American Eclipse / Shakespere..... (Quicksilver.... / Quicksilver / Mercury. / Brandon. / daughter of Fitz Diomed.)
- Brown Pilot (Parker's). (Copperbottom / daughter of..... (Bertrand. / daughter of.. (Lance)

FUTURITY STAKE.

Closes JANUARY 1st, 1890.

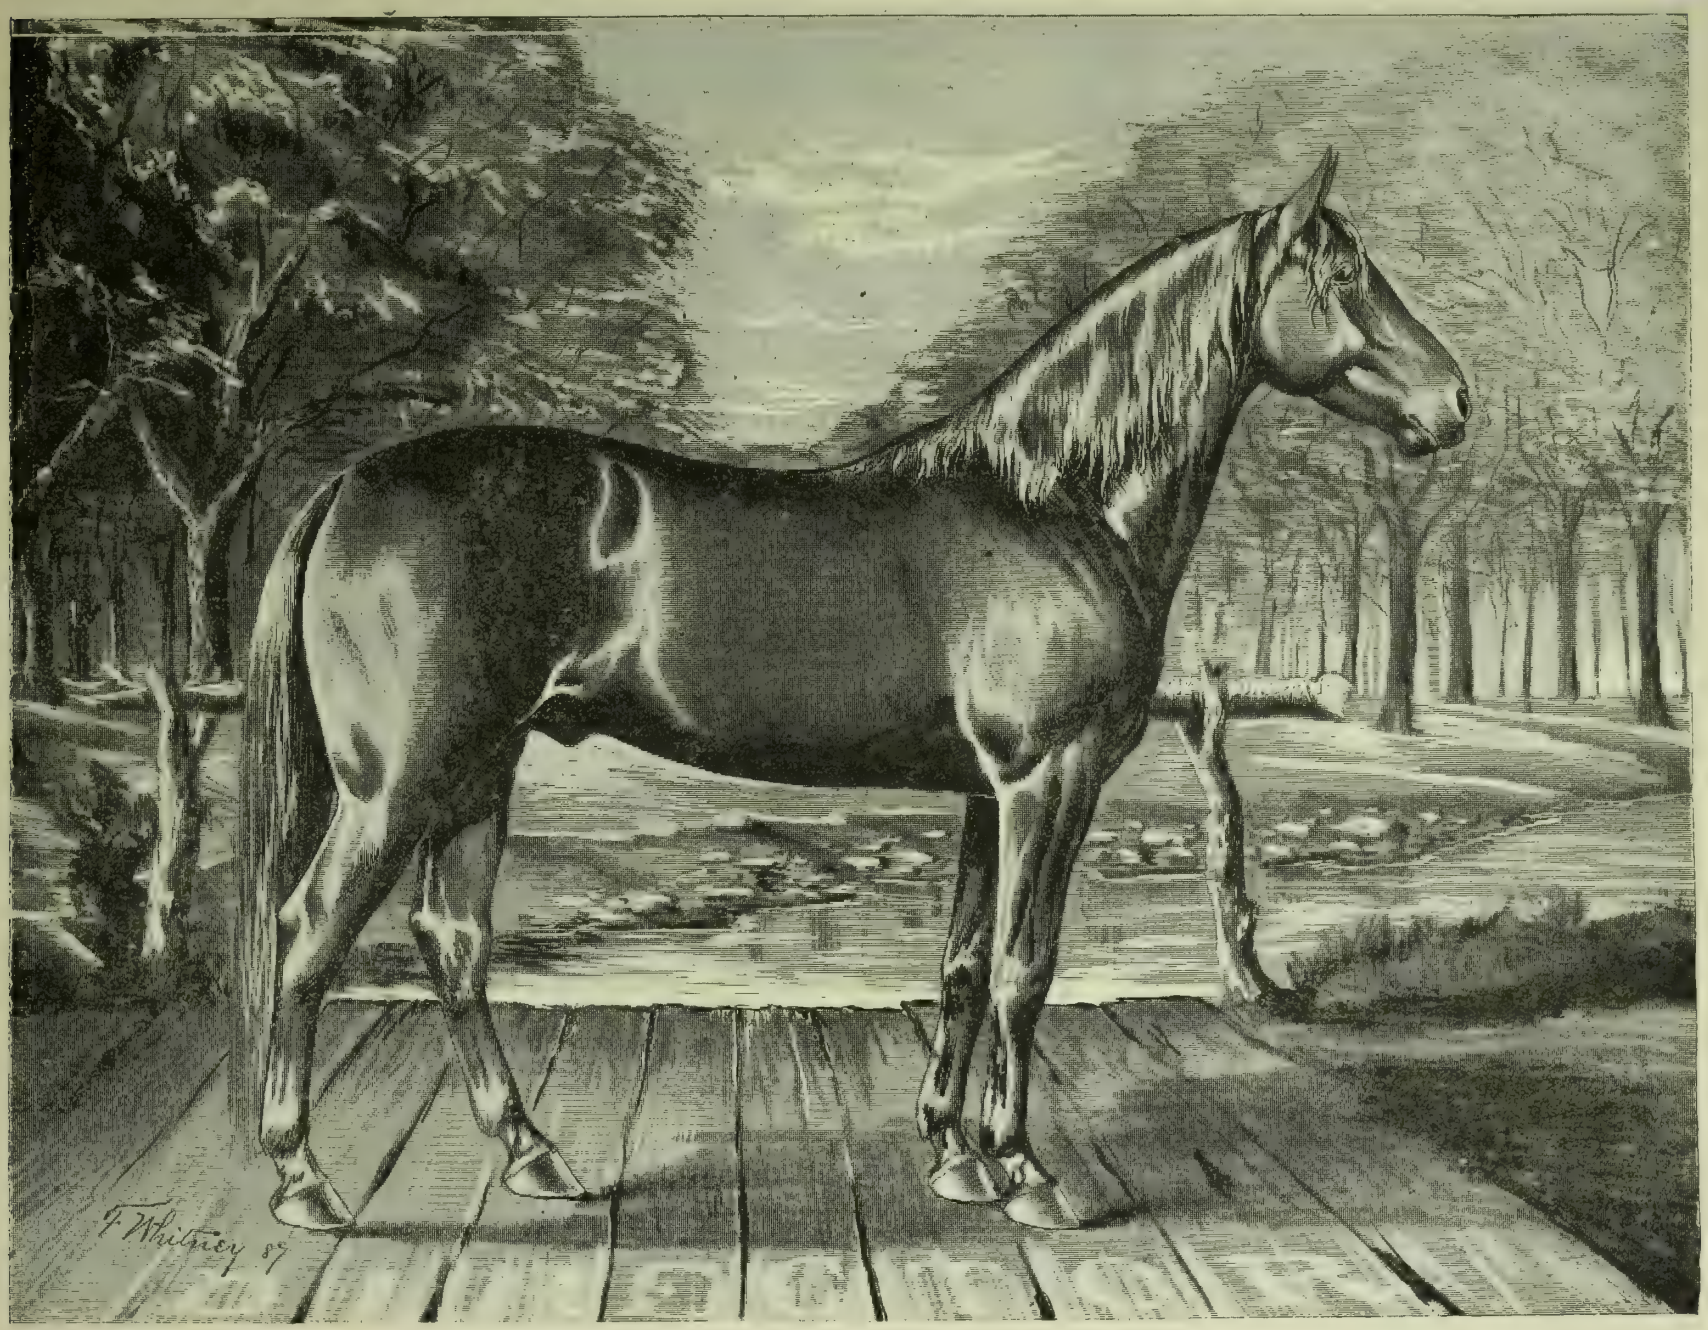
A Short Time for Work.

The recent heavy and continuous rain'all has so delayed and hindered farming work that all are behind as compared with other seasons at this period. It will be some time yet before the ground is in fit condition for plowing or seeding. Such ground has become so saturated, and in many instances submerged, that it will need re-sowing, while plowed lands have become so packed from the incessant rains as to need re-plowing.

Considering the lateness of the season, the saving of time is a very important consideration to farmers. Now the ground must be stirred up, and the question is, Which is the *quickest way of effectively doing it?*

Plowing, without question, would be the best, but that means much additional expense and slow work. Admitting this, the next point is, which is the best and quickest substitute for plowing?

There is no doubt but a spring tooth harrow loosens up the soil better than any other implement, a plow excepted. In the present condition of affairs it strikes us the advantage in favor of the harrow must be apparent to all. An eight or ten mule or horse team that draws a gang plow cutting from four to six feet can with great ease draw a spring tooth harrow cutting from twelve to sixteen feet. This is an important point when time is limited, and the greater amount of ground that can be covered in the same time is considered.



This brings us to the consideration of the harrow point itself, and while there may be several varieties, one that is well made, durable and reasonable in price must commend itself to public favor just now.

The Stevens Steel Spring Tooth Harrow, manufactured by D. M. Osborne & Co., Bluxome street, San Francisco, and illustrated on another page of this paper, possesses all these essential requirements. The frame is corrugated steel, the teeth being secured to the top of the frame by malleable iron holders. It has arched frame behind the teeth, to prevent clogging and insuring light draft. It works well in all soils and all conditions of ground; it adapts itself to any formation of ground by being hinged in the center, there being a variety of sizes—seven in all—the largest cutting eight feet; where a wider cut is desired two can be coupled together.

For orchard and vineyard work this harrow has a steering rudder attachment, giving the driver perfect control in guiding it close to the trees or vines without striking them.

I use Simmons Liver Regulator for my stock, horses and mules; it is the best medicine I know of. In cases of colic in stock it will save them if given in time. Recommend it. —R. V, Cox, Haddock's Sta., M. & A. R. R.

For grubs in horses Simmons Liver Regulator is the best remedy I have found; it has saved many horses and mules for me. Use my name as you wish in praise of the Regulator.—W. A. Cheery, Macon, Ga.

DIRECTOR, 2:17.

OWNED BY PLEASANTON STOCK FARM CO.

We present to the readers of the BREEDER AND SPORTSMAN this week, a picture and pen sketch of Director, the "Black Tornado" of the Eastern Circuit of 1883, who this past season was awarded the $200 Gold Medal, offered by the State Agricultural Society in 1886, to the sire whose get should make the best average performance in races for trotting foals, two, three and four-year-olds in 1887, '88, '89, over such competitors as Electioneer, Le Grande, Hawthorne, Guy Wilkes, Sultan, Anteeo and Jim Mulvenna.

What makes this award more remarkable is the fact that Director had but two performers to win him the honors, and if these failed there was no further sifting out or picking over fifteen or twenty trotting performers to build up his reputation and secure him the much sought for prize.

Director is a black stallion, twelve years old, stands 15 hands, 2 inches high, weighs 1120 lbs., very long and muscular built, and when one looks over this great horse he can easily account for his game trotting reputation, heavy muscled over the loins, powerful forearm, while the muscles of his hind legs stand out like whip cords, very long from the point of the hip to the point of the hock, and comparatively short from the hock to the pastern. A clear, sharp eye, large expansive forehead, (by actual measurement nine inches between the eyes across the forehead) and small, well-shaped ears. His disposition is of the very best, a characteristic which he imparts to all his foals. His appended pedigree can be studied by a student of trotting horse breeding for months and with every day's looking over new points can be discovered in connection with the breeding problem.

Dictator, the sire of Director, was the sire of the three gamest trotters ever produced by one sire, Jay Eye See 2:10, Phallas 2:13¾, and Director 2:17. Rysdyk's Hambletonian, the sire of Dictator, was the sire of three in the 2:20 list. Clara, the dam of Dictator, was the dam of Dexter 2:17¼, her sire, Seely's American Star, being the sire of the dams of six 2:20 performers.

Dolly, the dam of Director, is also the dam of Thorndale 2:22½, Onward, 2:25½, and Czarina 2:27½, thus being the dam of four 2:30 performers, all from different sires. Her sire, Mambrino Chief, was the sire of two 2:20 performers. It is easily seen that Director comes honestly with his speed and staying qualities.

Director's trotting career commenced in 1880 as a three year old, when he started in two races, winning both. In 1881 he started in three, winning one. In 1882 in five, winning four, and in 1883 he was sent East, making his memorial campaign of fifteen races, winning eleven.

A tabulated statement of his races and amounts won is as follows:—

Year.	Starts.	Won.	Lost.	Record.	Amt. Won.
1880	2	2	0	2:30	$ 3,000
1881	3	1	2	2:22½	1,200
1882	5	4	1	2:23¾	1,950
1883	15	11	4	2:17	18,325
Totals	25	15	7		$25,075

This is more money than was ever won by any single trotting horse in the world.

Beginning as a three year old in 1880 he started and won the only two events in which he was entered, getting a record the very first race of 2:40, trotting the last quarter in 34 seconds, a 2:16 gait. In 1881 he trotted in three races, loosing two, and was shipped to California in the fall. The next season, as a five year old, he trottted in the California circuit. He came out with more speed than ever, and showed the speed and gameness which have since made him famous. Beginning at Santa Rosa, he was third to Echora and Del Sur in good time, but the race was just what he needed to get him in trim, for he won a succession of races without a single defeat from then on. At Oakland, Sept. 8th, he won the 2:25 purse over a field of seven competitors, and four days later, at Sacramento, he defeated a field of nine. He then went to Stockton, winning the following week, and the next successive week winning again at San Jose. He then went home, as no horse would trot against him.

His career in 1883, as a six-year-old horse, was a marvellous one. Shipped East in May he commenced his trotting there. At Pittsburg, on the first day of June, he won the 2:22 class in 2:26, 2:28, 2:26, after the first two heats had been taken by Hambletonian Bashaw in 2:25, 2:25½. He then went to Hartford where he met a strong field Dan Smith won the first and third heats in 2:22½, 2:22½, Walnut the second in 2:21½, and when the others were ready to quit Director began and won the fourth, fifth and sixth heats in 2:22¼, 2:22, 2:22¼.

The week following at Fleetwood Park, he met the horse, Joe Bunker, who had not been beaten a race for over a year; Joe Bunker winning in 2:19¾, 2:20, 2:19¼, Director winning the third heat in 2:22.

At Albany, Director won in straight heats in 2:22½, 2:23¾, 2:22, and the following week at Washington, he beat four competitors a split, heat race in 2:25¼, 2:28½, 2:28¾. He then went to Chicago, where he started down the Grand Circuit Summer Meetings. His first race at that place was the 2:23 class.

Gladiator won the first heat in 2:23¾, and Director then went on and won the race in 2:24½, 2:20, 2:22½. Four days later at the same place he entered the great free-for-all stallion race, having for opponents such well known campaigners as Black Cloud 2:17¼, Monroe Chief 2:18¼, Santa Claus 2:17½, and Alexander 2:19.

Monroe Chief was a hot favorite, the track being ankle deep with mud, and he was known to be a good performer under such circumstances. Director won the first heat in 2:19½, Monroe Chief the second in 2:20, and Director the third and fourth in 2:22½, 2:26½.

Then came the great race of Director's life the week following, over the Cleveland track, one which in point of merit has never been equalled by any trotter. There were four starters, Director, Wilson, Gladiator and Kate McCall, then the fastest in the country. Before a heat had been trotted, it was known that the drivers of the other three horses had pooled issues and made a combination to beat Director. Director won the first heat in 2:19¼. Wilson became settled by this heat and the fight then began, three against one. The Blue Bull horse, Gladiator, was a horse of immense speed for a short distance, while Director was a little slow to get off. Gladiator could thus take the pole and carry Director out to the fence and allow the other two horses to get on the inside of them, so it will be seen that Director had to trot around both turns on the outside of three horses. What disadvantage this means, when trotting against a horse that makes a record of 2:16¼ in this very race, can be readily appreciated, even by a non-professional.

But in spite of all Director won. The second heat he could not get clear of the pocket until the homestretch was reached, and a desperate struggle ensued down the finish, the outcome being a dead heat in 2:17.

The third heat was another battle between the black stallion and the three combination, and with his helpers, Wilson was able to beat Director to the wire in 2:16¼, but he had nothing to spare as Director was at the saddle girth at the finish.

The fourth heat they went at the black horse again, and kept him in a pocket until Wilson got a good lead, but it did not avail him for Director cut down his lead by inches in the homestretch, beating Wilson out a length in 2:17¼.

The fifth heat fell to Wilson in 2:18 after an exciting struggle. Each horse had now two heats, and as Gladiator nor Kate McCall neither had one they were obliged to go to the stable. This left only Director and Wilson, and as the latter had lost his helpers and was thoroughly played out, Director just played with him, winning in a walk in 2:28¾, and only the generosity of Director's driver allowed Wilson to save his distance.

This race at once caused Director to be crowned king of all game trotting stallions, but there were other even greater triumphs in store for him. At Buffalo, the next week, he started in an exhibition race, with Jay-Eye-See and Clemmie G., taking second place in the race. At Utica, he easily defeated the fast stallion Duquesne 2:17¾, in straight heats, and at Springfield was beaten in a race with Wilson, Witherspoon and Edwin Thorn.

Then came the great turf event of the year. At Hartford, the first Charter Oak $10,000 purse and the field that opposed him was without question the best and fastest (all combined) that ever faced a starter even to this day. As it consisted of Wilson 2:16¼, Fanny Witherspoon 2:17, Clemmie G. 2:17, Director 2:17, Phallas 2:13¾, J. B. Thomas 2:18¼, Adele Gould 2:19 and Overman 2:20¼, (a field of eight starters whose average records were 2:17¼) with such drivers as Mace, Splan, Turner and Hickok, to oppose him, Johnny Goldsmith who drove Director had a hard race on his hands. Again was the combination made. Again was Wilson the favorite, and again did Director down them, combination, horses and all. The Turf, Field and Farm of that date thus describes the race.

The first heat fell to Wilson in 2:17¼, Witherspoon second, and Director third. Witherspoon won the second in 2:17, and Director fourth; but in the third heat the Black tornado pointed to the daylight which was breaking in the east for him. He got off well and was never headed, winning in 2:20. Fanny Witherspoon made a bad break on the first turn and Splan laid her up, Wilson indulging in several bobbles, but finished up very fast, Phallas being second, Thomas third

and Wilson fourth. The situation was now full of interest and perplexity. More cotton was stuffed into the ears of Fanny Witherspoon as she was wild in such company. Her owner and her driver said that it was not the purse but the glory of winning in such company.

Director was very industrious. Directly the word was given and Witherspoon, making a jim town, barely saved the disgrace of being distanced, the game Black coming down the homestretch wonderfully fresh and won handily in 2:18, Clemmie G. second and Wilson third. The story ends with the fifth heat. Director showed the way from the start to the finish, winning in 2.19¼, Witherspoon coming at him very game, but not being able to outlast the son of Dictator and Dolly.

The week following he started at Providence against a very strong field of six, and after Forest Patchen had won the first heat in 2:19½, Director won the next three and race in 2:19¾, 2:19¼ and 2:20.

The week following, at Boston, he was defeated by his half brother Phallas, but a week later turned the tables on him and won after Phallas had won the first and second heats. This closed his racing career, he having started fifteen times against the fastest horses in the country, and won eleven times.

One of the most celebrated horse writers of the times said of Director, after this season's work, "Director is among trotters what Lexington was among runners."

The Spirit of the Times says, after his Hartford race, "W. H. Crawford made some thoughtful observations after this race. Said he, 'Some horses are hitchers and rough gaited, horses who will go buck, jump, hop and change feet. They go just as long as their breeding and strength enables them to struggle against the waste of power and tire hopelessly in a race or run and rest themselves. Give me the true moving, even gaited, level headed, tireless stroke and resolute going Director to beat all other kinds, even if they are a second or two faster.' "

It was your red letter day Director, free from cloud or smoke,
When you threw down George Wilkes' great son on dear old Charter Oak;
You had to fight, you had to trot, but never did you break,
And with speed and game and Goldsmith's reins, you smashed the talents' slate.

As will be seen by reading the foregoing description of his races, Director's great trotting reputation can be accounted for by his gameness. Being able to beat horses whose records have been below or faster than his by his untiring finishes down the stretch in each and every heat, being able to start in his races and wear his competitors out by his untiring, steady, frictionless gait, being just as ready and just as fresh in the fourth, fifth and sixth heats, as in the first, second and third, and it is a remarkable fact that of all the races he ever won, but three were won in three straight heats. And it is only fair to estimate Director's speed as fast as any living stallion, as he beat Maxey Cobb, Fanny Witherspoon, Wilson, Phallas, Clemmie G, J. B. Thomas, and Adele Gonld, not only once but every time he started against them from spring till fall. They all went on training the following seasons and every one lowered their record below Director while he was in the stud. It is not necessary to describe his trotting action or gait. No horse could trot the races against such fields of horses and win almost every time as Director did, unless his action was nearly perfect. He didn't know how to break and this he imparts to his colts, for out of 30 heats trotted by Direct he never made a break, and out of 25 trotted by Margaret S, but one skip can be scored against her.

After finishing this season's trotting he returned to California, the next two seasons, 1884 and 1885, being in the stud in this State. In 1886 and 1887 he went back to Kentucky, where he was in the stud. He returned to California in the fall of 1887, and has been in the stud in 1888 and 1889, standing at Pleasanton during the season of 1888. He was entered in the National Stallion race and was being given his preparatory work during and after the stud season, but met with an accident, wrenching his shoulder which laid him up and prevented his starting. He had shown a mile over the training track in his work some two weeks previous to the accident in 2:18, and had shown enough to see that he had all his old time speed, and his owner and many admirers were greatly disappointed in the unfortunate accident which prevented his starting in the race.

And now as to his capacity to breed on or transmit his speed and game qualities to his offspring. As his first season in the stud was in 1884, his colts are but four years old this past season. Direct, 2:18½ is therefore a representative of his oldest colts; as a three year old he trotted in six races, getting a record of 2:23; as a four year old he trotted in eight races, containing 29 heats, winning 21 in 2:18½, one in 2:18½, one in 2:19¼, six in 2:19½, one in 2:20, one in 2:20¼, one in 2:21¼, and one in 2:21¾, and no four year old ever trotted as many fast heats as Direct and finished up the season perfectly sound.

Margaret S. was foaled in 1886, and is therefore a representative of Director's second crop of colts. As a two year old she trotted in three races, getting a record of 2:31; As a three year old she trotted in eight races, containing 28 heats, getting a record of 2:19½ in the 2:30 class race at Sacramento, which race, in connection with the others trotted by her the past season, gives her the record of being the gamest three year old campaigner of this year, and it is said by the best judges of trotting horses that she is the fastest, gamest and best three year old ever produced, taking into consideration that she was a late fall colt, lacking some six or seven months of being as old as other three year olds, which means a great handicap on a colt. It can safely be said that counting age by months, that Margaret S. is the fastest three-year-old trotter that ever lived.

And while Director can claim the credit of being the sire of the gamest three year old campaigner that ever lived, he can also claim the credit of being the only trotting stallion (with or without a record below 2:20), alive or dead, who has two trotting representatives in the 2:30 list, with his *oldest colts but four years old.*

A curious coincidence in connection with Director and his great three year old performer is the fact that he won his first great race which brought him into notoriety as a game race performer, over the Cleveland track in 1883, and during this past season his game daughter Margaret S. went back East to struggle for supremacy with the crack three year olds of the East, winning the Spirits great Futurity stake, over the same track that was the scene of her sires great performance six years previous. Another coincidence is the fact that Director won the first Charter Oak $10,000 purse offered, and his daughter Margaret S. won the first Spirit Futurity Stakes offered. Director's other performers within the charmed circle is "Guide" who trotted this past season as a 3 year old and obtained a record of 2:28½. He has two or three more very close up and a small number in training, a large majority of which will trot better than 2:20 baring accidents.

During the past two seasons Director has been bred to some of the best bred mares in the state, and what the produce amounts to will be closely scrutinzed by his admirers, and the present indications are that Director will be the sire of more 2:20 performers than any stallion the world has ever seen.

He is the property of the Pleasanton Stock Farm Co., of which that well known trotting turf gentleman, Mr. M. Salisbury, is the Manager.

Director's breeding is as follows:

DIRECTOR 1982.

Our Australian Letter.

EDITOR BREEDER AND SPORTSMAN:—The Cup Meeting, the meeting of all meetings in Australia, duly eventuated this month at Flemington, near Melbourne, Victoria, with its usual brilliant success. The first race of note, the Melbourne Stakes, a mile and a quarter at weight for age, brought out all the kings of the Australian turf and resulted in a grand contest. The starters were Abercorn, 5 years, Melos, 4 years; Carbine, 4 years; Chicago, 6 years; Cardigan, aged; Newmaster, 6 years; Benzon, 4 years. Antaeus, 3 years, and Sinecure, 3 years. The betting was even money on the people's idol, Abercorn, 3 to 1 Carbine, 5 to 1 that beautiful colt, Antaeus, by Sir Modred, and 10 to 20 to 1 the others The interest in the race was almost painful in its intensity. Abercorn and Carbine, the respective champions of New South Wales and New Zealand, entered the straight on level terms, and then commenced one of the grandest struggles ever seen on a course. Neck and neck came the pair amidst the yells of the tens of thousands of spectators, and all the efforts of Hales and O'Brien, the respective accomplished riders of the pair, failed to separate them. Carbine was the first to get a small advantage, but Abercon was not to be denied, and lengthening his stride, poked his nose in front. Again the erstwhile Champion Carbine made an effort, but Abercorn was able to respond, and, bar accidents, it was concluded he must win. It was not till the leaders were within thirty lengths or so of the post that it was thought another horse had a say in the matter, and then Melos came like a flash and gained every stride on the struggling pair. When challenged by the new comer Carbine failed, but Abercorn was not to be denied, and won a great race by a nose from Melos, who was a head in front of Carbine. Time 2 minutes 7 seconds, the fastest on record (in Australia.—ED.)

Of the placed horses in a previous letter I gave you some account of the great Abercorn, but he is well worth talking about, so later on I will give him a par all to himself. The second horse, Melos, is by Goldsbrough from Melody, and is owned by that unlucky sportsman Mr. William Gannon, who recently disposed of the clinking Australian Peer, by Darebin, to Mr. Eales for stud purposes. Mr. Gannon has run enough seconds to break an ordinary man's heart. Carbine is by the defunct champion sire, Musket, and until displaced by Abercorn proved himself the champion of the colonies. And by the way, it is a curious coincidence that pretty near all the Musket stock named after some weapon such as Martini—Henry. Carbine and Nordenfeldt, have turned out better than their kinspeople who were not so christened.

Eight horses sported silk for the Victoria Derby, the winner turning up in the Hon. James White's Dreadnought, an aristocratic colt by Chester from the imported mare Trafalgar by Blair Athol (Derby winner 1864) from Mosquito, from Toxophilite, grandam by West Australian from Brown Bess by Camel Richlieu, although interfered with at one portion of the race by Rudolph, ran the winner very closely, and it was thought by many that had it been so desired Rudolph could have secured pride of place. Rudolph is a speedy gelding by Mr. White's sire Martini—Henry, and in another race at the same meeting another horse of Mr. White's was without a doubt not persevered with, as it was evidently Mr. White's wish to win with his favorite Abercorn. It was for the Canterbury Plate, a 2¼ mile weight for age race, for which the cracks Abercorn, Melos, Carbine and a second horse of White's called Sinecure started. Sinecure was allowed to steal away, the three big guns watching one another until Sinecure, when only half a mile from home, must have had fully 60 lengths to the good. The trio then went in pursuit, Abercorn outstaying his companions and passing Sinecure, but there cannot be much doubt, had the latter been ridden right out, it was the next thing to an equine impossibility for Abercorn to have overtaken him. In the old days we had a rule here allowing an owner, when running two horses in a race, to *declare* to win with one or the other if able to do so, but the rule now reads that the best horse must win, and there cannot be much doubt, had Mr. White been a less influential person than he is, he would have had to explain matters before the Committee of the Victoria Racing Club. The Maribyrnong Plate, the crack two-year-old race, five furlongs, for sweepstake of 30 sovs each with 1,000 sovs and a hundred guinea cup, brought out 16 infants, Correzo starting at level money on the strength of his list of wins in New South Wales, he being looked upon as the speediest colt of his year. But the great gun was unable to run into a place, and The Admiral by Richmond, dam Footstep, won from Mr. White's Utter by Martini Henry, dam Uralla.

Twenty horses sported silk for the great event the Melbourne Cup, and the clever people connected with Bravo made a big *coup* by winning from Carbine, Melos, as per usual, running into a place. In running in the Caulfield Cup a couple of weeks previously, Bravo was said to have injured himself, and was at once taken away to Ballarat, where he was seen by day being led about bandaged up and with a perceptible limp, and sensational wagers were laid that he would not even face the starter. It now comes out that Bravo was at the time sound as a bell and was doing his gallops by the pale light of the moon, and when Cup day arrived Bravo did his preliminary in the pink of condition, to the dismay of the bookmakers, who had taken such liberties with him. Bravo is by Grand Flaneur, a horse which retired to the stud with an unbroken list of victories, including such races as the Sydney Derby, the Victorian Derby and Melbourne Cup.

As the horses were marshalled for the start, Melos, Bluenose and Carbine were on the inside, Singapore, Benzon, Oakleigh, Bravo and Prince Consort in the centre, and Rudolph and Pakeha on the outside. Mr. Watson let the flag fall without much delay. Knight of the Garter was one of the first to get on his legs. Singapore, Richelieu, Melos, Oakleigh, Prince Consort and Chetwynd also getting quickly into play. At the straight proper Prince Consort took up the running with Carrington, Rudolph, Oakleigh and Richelieu next, the last being Tinlander, Benzon and Cardigan. As they swept past the distance post Carrington supplanted Prince Consort, and then came Richelieu, Pakeha, Rudolph, Melos, Knight of the Garter, Antæus, Chetwynd, Oakleigh, Dunkeld, Bravo and Singapore, with Chicago, Cardigan and Bluenose in the rear. The order passing the stand was Carrington in front, attended by Prince Consort, Rudolph, Richelieu, Pakeha, Knight of the Garter, Oakleigh, Dunkeld, Bravo, Melos, Chetwynd and Singapore, the last three being Tinlander, Cardigan and Bluenose. Carrington had a two lengths lead ont of the straight from Prince Consort, close to whom was Richelieu, and then came Pakeha, Knight of the Garter, Dunkeld, Chetwynd, Melos, Bravo and Carbine, with Cardigan and Bluenose still in the rear. Carrington still made the pace along the river side, attended by Prince Consort, Rudolph, Melos, Dunkeld, Chetwynd, Richelieu, Chicago, Carbine and Bravo in a bunch, and Bluenose tailing off. Carrington was still cutting out the running at the bridge, Prince Consort being close up, and then following Melos, Antæus, Richelieu, Dunkeld, Bravo, Chetwynd and Pakeha in the order named. Carbine, Tinlander, Cardigan and Bluenose were in the rear.

At the abbatoirs, Carrington was in front of Dunkeld, who had moved forward to second place; the most prominent of the others being Rudolph, Antæus, Singapore, Richelieu, Prince Consort, Menotti, Chetwynd, Bravo and Melos. As they came into the straight, Carbine got up on the inside with a brilliant run, and when fairly set for home he was seen to be leading, with Chicago on the outside next, and Prince Consort, Melos, Bravo, Dunkeld, Rudolph and Antæus the most prominent of the others. The victory of Carbine and Chicago was being alternately shouted, when the yellow and black jacket of Bravo became prominent, and before the distance was reached he was in front, with Carbine, Prince Consort, Melos and Chicago next, the latter commencing to fall back. The race was now virtually over, as Anwin kept Bravo going, and never allowing anything to come near him, won as he liked by a good length from Carbine, who finished very gamely. Melos made a fast run at the finish, but Bravo and Carbine carried too many guns for him, and he finished a length behind the second horse. Pakeha also made a fine run, and was a good fourth, followed by Prince Consort, Chicago, Cardigan, Dunkeld, Menotti, Rudolph, Antæus and Carrington, the last being Singapore, Knight of the Garter, Benzon, Oakleigh, Tinlander and Bluenose. Time, 3:32½.

SUMMARY.

Melbourne Cup—Of 50 sovs. each, with 5,000 sovs. and a trophy value 150 sovs added The second horse to receive 1,000 and the third 500 sovs. out of the stake Two miles.

Time, 3:32½.

Betting: 4 to 1 against Chicago or Melos, 10 to 1 Carbine or Bravo, 12 to 1 Singapore, Benzon or Knight of the Garter 20 to 1 Cardigan, Rudolph, Antæus or Richelieu, 25 to 1 Oakleigh, Chetwynd or Pakeha, 30 to 1 Bluenose, Prince Consort, Dunkeld or Menotti, 100 to 1 Carrington or Tinlander.

But perhaps the race of the big meeting which will most interest you "Yanks," was that for the Spring Stakes, when Antaeus by Sir Modred from Nellie, showed he had something more to recommend him than being one of the handsomest colts on the Australian turf, by winning by half a length from Meteor and a good field, running the mile and a quarter in 2 minutes, 9½ seconds, with 8 stone, 2 lb. up.

And now for a finish I will give you a few jottings respecting our champion, Abercorn. He ran the last mile and a quarter of the Canterbury Plate in 2 minutes, 5½ seconds, a wonderful performance truly. He has won 21 out of 35 races; he started for and has netted his owner the handsome sum of £12,324, which is the champion record of any Australian horse. Our crack jockey, Hales, is the only man who has crossed him in a race. Abercorn, like his two half brothers now in England, is a bright chestnut, and that they may resemble in more than color their mighty kinsman, is the devout wish of all Australia, including, Yours humbly,

"THE JUNGLE."

SYDNEY, NEW SOUTH WALES, Nov. 26, 1889.

SIDNEY, 2:19 3-4.
PROPERTY OF VALENSIN STOCK FARM.

In presenting to our readers the picture of the famous young stallion, Sidney, we will not go over the well known facts that he is as perfectly bred a trotting stallion as there is in America; nor that he has proved himself a phenomenally prepotent sire, being at eight years of age, in his colthood, so to say, the progenitor of very fast young performers. But that his progeny, as far as has been seen, go early, train on to still more speed with age, and are campaigners of first-class order, as should be expected from a grandson of the great Volunteer, the "Peerless Sire of Campaigners."

Of Sidney's colts the oldest are four years, and the following, of different ages, have faced the starter:—

Goldleaf, 3 years old 2:15; 4 years old 2:11¼.
Adonis, 3 years old 2:14¼; 4 years old 2:14.
Longworth, 4 years old 2:19.
Sister V., 4 years old 2:27.
Fleet, 1 year old 2:36; 2 years old 2:24.
Faustino, 1 year old 2:35, fastest stallion on record.
Memo, 2 years old 2:49; 3 year old trial 2:20½.
George V., 1 year old 2:57¼; 2 year old trial, ½ mile track, 2:35.

We will review their performances and let facts prove our statements.

Goldleaf, as a three year old, from August 6 to October 6th, started in eleven races, almost always against old horses, won first money in six, second money in three, third money in two. Winning nineteen heats of an average of 2:20, and pacing twenty-seven heats in thirty days; closing her campaign *perfectly* sound, with a record of 2:15, made in a winning race of three heats.

As a four year old she appears again on the track, after having been driven only two heats better than 2:20 in her work up to that time, and starts against her own record of 2:15, reducing it to 2:11¼, last ¼ in 32¼ seconds. This fast mile without the necessary preparation was very severe on the filly, and she got off. Notwithstanding this fact, she came out at Petaluma and beat Adonis in 2:18, 2:16½, 2:16; three very fast heats for a four year old out of a Flaxtail mare known for her softness.

Adonis, as a three-year-old, won several good races, and also lost some, forcing Yolo Maid to 2:18, 2:14, 2:14¼ in one. Shortly after, he beat Almont Patchen and Belmont Boy in 2:18, 2:21 and 2:14¼. From San Francisco he went to Sacramento, where he beat Yolo Maid in 2:15¼, last half in 1:02¾, on a very heavy track. As a four-year-old, he paced a winning race at Stockton in 2:16, 2:16½; then to San Jose, where he won again in 2:14½, 2:21, 2:14, finishing in a jog. His owner and driver, Mr. O. A. Hickok, so well known for his fine judgment in race-horse matters, that he often has been called the "Tallyrand of the trotting turf," offered to match him for $2,500 against Brown Jug's three heats, 2:11¼, 2:11½, 2:12.

Longworth, 2:19, a lame four-year-old, who was second in 2:22, fourth in 2:23½, second in 2:22¾, and second in 2:25 at Santa Rosa, and who the following week won at Petaluma against a big field in 2:19¾, 2:20½, 2:21¾, every heat driven hard under the whip, is certainly a race horse. In Oakland he was first in 2:19, third in 2:24, second in 2:20, fourth in 2:25, second in 2:23¾, and second in 2:26. In Sacramento, lamer than ever, he was sixth in 2:18, first in 2:19¼, second in 2:18½, second in 2:20¾, and third in 2:19½; from which place he could hardly be led to Dr. G. W. Stimpson's horse hospital, where he still is. This is a showing of gameness.

Fleet, one-year-old, 2:36, who made her yearling record after going in 2:50, 2:40 2:36, shows campaigning abilities, and had it not been for her nervousness, would certainly have done better in both her one and two-year-old forms. As a two-year-old she trained on to a record of 2:24. In Sacramento her able driver, Mr. Dustin, wishing to steady her for a race in which he knew that all hands would try to excite his unruly charge, overdid the thing "Errare Humanum Est," and gave her a two-mile heat in 5:10, a repeat in 2:29, then undertook to race her; she won the first heat in 2:28½, and was beaten in 2:30½ in consequence of a bad break. By this time the two-year-old had gone five fast miles, and was so tired that she got distanced in the third heat—*her sixth* heat of the day! Feeling badly over his misfortune, Mr. Dustin drove her two exhibition miles the following week at Stockton in 2:25 and 2:24¼ without a skip; the fastest two consecutive heats on record for a two-year-old, we believe.

We will only make a passing mention of the four-year-old Sister V., 2:27, trial 2:23. After a long trip she won a hardly contested race at Anaconda in 2:28½, 2:28, 2:28, 2:27¾. While this is not a remarkable showing in our days, it still speaks very fairly for her sire.

Memo, at two years old, got a record of 2:47. Lame and with hobbles, he forced Grandee out in 2:32, 2:31½, being beaten by a short nose each time. As a three-year-old he showed a trial in the third heat in 2:20½, timed by experience and reliable men.

George V. started twice as a yearling and was never beaten. Faustino started as a yearling against Von Wilkes' record of 2:38½. He was warmed up in 2:40, and repeated in 2:35; first half in 1:20, last half in 1:15, finishing the last end at a 2:20 gait. It is the unanimous opinion of all who saw him, that he could have gone close to 2:30.

To Sidney goes the honor of having sired the fastest two yearlings ever sired by one horse, 2:36, 2:35.
The fastest yearling of 1888, 2:36.
The fastest yearling of 1889, 2:35
The fastest two-year-old filly of 1889, 2:24.
The fastest four-year-old filly (pacer), 2:11½.
The fastest four-year-old gelding (pacer), 2:14.

Kidd Edmanson and Morse Sale.

Mr. F. S. Waters, Waters Stock Farm, one of the most noted breeders in the country, consigns several head of trotters to the Kidd, Edmanson & Morse sale, for the last week in February next. We are glad to see our prominent breeders recognizing these sales. These gentlemen deserve great credit for the energy and pluck displayed in building up a combination sale in our city. The plan has worked well in Kentuckey and elsewhere to both buyer and seller, bringing together as it does the best horsemen from every part of the Union. Mr. Waters' consignment is a great compliment to these gentlemen, and we are quite sure they know how to give it due appreciation. All of our breeders should follow and help to make this the equal of any combination sale in America. At their last sale Mr. Salisbury patronized the firm and he gives them every meed of praise for the thorough manner in which the sales were made.

DON'T NEGLECT

To send in your ENTRIES for the Breeder and Sportsman's

FUTURITY STAKE.

Closes JANUARY 1st, 1890.

Kalamazoo, Mich., Dec. 24, 1889.

EDITOR BREEDER AND SPORTSMAN:—I have consigned about 25 as grandly bred brood mares to W. T. Woodward's February sale, all from producing dams, as were ever offered at public auction; they are in foal to such sires as Ambassador, Warlock, Anteeo, and Bell Boy, and are a superior lot of animals both in breeding and individuality that we have ever entered in any sale.

We have also decided to include our Stallion Warlock 3378 in this sale, he is by Belmont, dam Waterwitch, dam of Vehing 2:19½, Mambrino Gift 2:20, Scotland 2:22½ Wavelet 2:24½ Waterloo 2:28½ by Pilot Jr. It is seldom that an animal of such royal breeding and excellent individuality goes under the hammer. Warlock will prove a great sire.

Respectfully, S. A. BROWNE & Co.

TURF AND TRACK.

H. E. Smith will train for Mr. R. S. Swigert next year.

Willard Saunders says that Guy is improving every day.

Milton Young was the last genuine bidder on Spendthrift.

Both the Covingtons will ride for Capt. S. Brown next season.

General Hart's bay mare Almonta, by Tilton Almont. will be bred to Director.

Sammy Loates rode the winner of the first and last race of the season in England.

During three days' racing at Manchester, England last month 238 horses ran.

J. K. Megibben & Co. have engaged John Rodegap to train for the stable next season.

Carbine, carrying 140 lbs. with a bar shoe and cracked foot, ran a good second in the Melbourne Cup.

Dave Pulsifer is said to have offered $15,000 for Prince Fonso, the two-year-old Prince Charlie colt.

Geo. P. McNear of Petaluma sold a heavy three year old colt, weight 1800 lb. He is a half bred Norman.

Mr. Abington (Baird) has ridden successfully in fifty two races out of 118, under Jockey Club rules last season.

McCormick says that he will start out with El Rio Rey at Chicago, and go from there to Nashville and Memphis.

Messrs. Hill and Forster sold Mikado and Tycoon to L. J. Rose; the half brothers have joined his stable at Los Angeles.

John Campbell of the Beverwyck stable has bought the three year old colt Once-a-gain (Onondaga—Black Maria) for $1500.

The Doncaster St. Leger of 1891 closed with 193 entries, three of which are Australian bred, the property of Hon. James White.

Hon. W. L. Scott has sent his stable (34 horses) into winter quarters with Charles Leighton as trainer at Cape Charles.

It is said that Senator Stanford will breed Gorgo to Electioneer. It seems a pity to use such a regally bred mare for that purpose.

Over half a million dollars changed hands on the Grand International which is the crack race of the year in the Argentine Republic.

Brown Dick, the celebrated trainer swears by the Prince Charlies. He says that they train on and, like good whisky, improve with age.

Mr. Henry has sent Decorator, his four year old son of Director to Andy McDowell, who will prepare him for next years campaign.

J. C. Reynolds has bought from Milton Young the three yevr old Boatmaker (Onondaga—Nellie Booker) and intends using him as a stallion at Belknap Texas.

Bedford Lodge, Newmarket, the headquarters of Jewett, the well known trainer, caught fire. Damage to the value of £6,000 was done by fire and water.

Mr. Andrew Towne's Childe Harold 414 by Harold 413, dam Young Portia, died on October 29th. He was very highly thought of in Australia.

Harris Cohen has failed. He had fourteen horses in training (including Pat Divver), and owing to his plunging propensities had to go to the wall.

James McCormick, who is training Badge, will have him ready by the middle of March when Mr. John Mullins (his owner) wishes him to run at Clifton.

W. H. Fearing, Newminster Stud, has purchased Top Gallant (imp. by Sterling out of Sea Mark by Adventurer, a son of Newminster) to take the place of Hurrah.

Thomas Rochford gave $1200 for a three year old filly by Anteeo dam by Milton Medium. Mr. Rochford is said to have purchased her for a Kentucky breeder.

The Italian government have purchased Melton for £10,000. Melton (Master Kildare—Violet Melrose) won the Derby, Archer up, in 1885 by a head from Paradox.

The total tax paid to the State of New York by the Coney Island Brooklyn, New York, American, Saratoga and Brighton Jockey Clubs for the season of 1889 was $22,233.18.

It is said that the Westchester race course will be used in the summer, when the horses are away, as a pleasure resort. Tennis, polo, archery and athletic meetings will be held.

P. V. Johnston, the well known trainer and driver, arrived here last Sunday. He speaks exceptionally well of the prospects of Anteeo who is to make the best sire east of the Rockies.

The Manchester Sporting Chronicle says "financial astuteness was the first characteristic of C. Wood," the well known jockey. If that is so Wood should join the colored combination.

Starter Caldwell in one day last week at Elizabethtown fined McCarthy, Bergen, Soden and French $20 each and set Horton, Penny, Dingley, McCarthy and Lamley down for the meeting.

Mr. Davies, owner of Roy Wilkes, came out here to get a match and he now says that there is not a man in California trotting or pacing, who is game enough to make a match for a dollar or $1,000.

The Shippee stable went to Sacramento on Saturday last. A. Stemler went up to Stockton on Monday. Picnic Songstress, and Whisban will be relegated to the breeding department next spring.

Watt's £5,000 engagement for three years to Mr. Abington having terminated he will ride next season for Heath House in addition to the Duke of Hamilton and Enoch's stable, for which latter establishment H. Morgan will also continue to ride.

At the meeting of the new Board of Directors of Willows Agricultural Association F. G. Crawford was elected President J. R. Troxel vice-President; and W. V. Freeman, Secretary and ex-officio Treasurer.

One hundred and twenty-seven horses have won over $5,000 this year. J. B. Haggins' Salvator heads the list with $71,380, and Flyaway is at the bottom with $5,010. The 127 won $1,481, 427 among them.

W. L. Pritchard has to move all his brood mares on account of the flood. They arrived all safe at Oak Grove Park, near Sacramento, after staying several days at Rancho Del Paso, until the water subsided a little.

T. Loates, the most successful jockey last season in England, is young, rides a nice weight, has a wise head and cool, accurate judgment, very quick to take advantage of an opening, and a good story finisher.

The Governor last week appointed J. D. Byers, of Janesville, and J. McBeth, of Butte Valley, Directors of Agricultural District No. 11; also, C. A. H. Warfield of Merced a Director of Agricultural District No. 21.

The Australian bookies all lost money last season, yet "mirabile dictu" half a dozen have taken return tickets to Europe. I have not heard of any backers going to Europe except to avoid the usual weekly settling.

Janissary, by Isonomy out of Jannette, is being backed for the English Derby. Isonomy was a Leviathan in his day, while Jannette won the One Thousand, Oaks and Leger in 1878. So far the colt has not shown any form in public.

A communication was read at the meeting of the National Trotting Association from Mr. J. H. Wallace calling attention to the disreputable devices practiced by owners to get a record of 2:30 or better for their horses, so as to sell them.

Will McDaniells, who handled Poteen, Ed. Mack and others last season will train for the Talbot Bros. next year. It is very doubtful whether either of his late charges will stand training again. Ed. Mack has been fired and turned out.

Little Sister, the dam of the Warwick and Manchester winner, Mounteagle was sold by her owner, Mr. Peck, last July to Herr Luczenbacher for 1,800 guineas. She went to the Kisber Stud and was accompained by a colt foal by Saraband.

Milton Young has added the five-year-old Pirate of Penzance by Prince Charlie (imp), out of Plunder, and the seven-year-old Favor by Pat Molloy out of Favorite by imported King Ernest, to the list of stallions at the McGrathiana Stud Farm.

Milton Young has sold to E. Corrigan of Kansas City the brood mare Una, thirteen years, by War Dance, dam by imported Knight of St. George, and the mare Square Dance, ten years, by War Dance, dam by imported Mickey Free, he paying $2,500 for the two.

Kentuckians say that the bay colt by Longfellow, dam Christine by imported Australian will be the best two-year old in the Blue Grass district. He is a half brother to Montana Regent, and has a low, stealing way of going that is very deceptive but almost perfection.

The continuance of heavy betting amongst certain jockeys during the past season in England, says "Pavo," became so publicly talked about at Newmarket as to call forth renewed action on the part of the authorities, which will apply with equal force to their commissioners and "sleeping partners" of both high and low degree.

W. H. Crawford, the well-known Lexington horseman, left last Friday. While he has been here he has favorably impressed every one who came in contact with him as a good sterling judge of horse flesh and a game, straightforward better. He has as correct an idea and as high an opinion of Stamboul's form as any man.

The Monmouth Park Racing Association proposes putting up some wooden buildings on its property in New Jersey. The buildings to be constructed are 10 large stables, with 24 stalls in each; 96 stalls in the saddling paddock; the members' stand, which is to be 400 feet long, and the betting stand, which will be 350 feet long by 250 wide.

The talent are nibbling at E. Corrigan's Riley and W. P. Maxwell's Prince Fonso for the Kentucky Derby. Riley by Longfellow, dam Geneva by War Dance, proved fairly successful as a two-year-old, winning five races out of eleven, while Prince Fonso by Prince Charlie, dam May Wilson, did not show very great form.

The Queen's farm-manager at Windsor, Mr. Tait, has sold Her Majesty's two-year-old Clydesdale colt, First Choice 6746, who was first in his class at the Royal Agricultural Show last June for exportation to South America. This colt was bred by Mr. Montgomery, of Netherhall, from whom he was purchased for the Queen.

Mr. Dixon, in his book the "North Countree," says that in 1846 Touchstone stood at 30 guineas, while Venison was at 25 guineas, Lanercost 20 guineas, Bay Middleton and Orlando 10 guineas each. Hermit, a grandson in the male line of Touchstone, now stands at 250 guineas, and Galopin, a grandson of the Flying Dutchman, stands at the same price, and both are full, a year beforehand.

The Great Breeders' Produce Stakes at Kempton Park, England, closed with 406 entries. The four winners will get £9,000, while the nominators of first second and third get £300, £150 and £100 respectively; the owner of the winner gets £6 000, the second £1,500, third £1,000, and fourth £500. It is thus evident that this will be one of the largest two-year old stake run for in the world so far.

H. Luke, who rode unsuccessfully here, has since his return, been riding in France for M. Ephrussi. His successful mount on Fallowchat in the Manchester Handicap, gained him many new friends for his rare judgment in not pushing the mare too much at first, when he was almost left at the post. Twenty-eight starters turned out which was a great compliment to the handicapper.

Several English jockeys will have fresh employers next season. J. Woodburn rides for Colonel North, while Mr. H. Milner has first and Mr. Blundell Maple second call upon the services of T. Loates. The engagements of George Barrett to the Kingsclere stable and Fred Barrett to Palace House have been renewed. It is also said that John Osborne may occasionally ride for Ryan's stable, when the weight suits.

A tenner ($50) invested on any one of the six leading jockeys' mounts in England would have resulted in a loss in every instance; in fact in the first twelve, only two would have resulted in a credit balance if backed through the season, and the balance is very small in both instances.

C. W. Williams, the late owner and driver of the phenomenal Axtell, is building a track at Independence, Ia. It will be in the shape of a figure eight, or rather what is known among those that have made tracks on the ice as a kite-shaped course, with the judges' stand where the roadbeds cross. It will have but one turn and two long stretches. Mr. Williams expects to have one of the fastest tracks in the world.

The grey gelding Thapsin who had to be withdrawn at the last P. C. T. B. H. A. meeting when he won the first heat in 2:21¾, two more heats were trotted and the race postponed to Monday, when he was in such a bad fix that he was allowed to be withdrawn. It is asserted that during Wilber Smith's absence he was filled up and has since been badly foundered. He is slowly recovering, but is still at the Bay District Track and will probably never regain his form.

Any one wishing to take advantage of the declarations will take notice that they will be due and payable on the first of January in the Norfolk. Matadero (formerly Breeders), the Weinstock, Lubin & Co. Stakes and California Derby to be run at the spring meeting of the State Agricultural Society; the declarations also are due on the first for the California Autumn, California Annual, Sunny Slope and California Breeders' Stakes, which will be run off at the State Fair meeting, 1890.

The stakes of the New York Jockey Club for 1890, to close January 2nd, have been announced. The most important are the Toboggan Slide Stakes, for all ages, at six furlongs, and the White Plains Handicap for two year olds, at six furlongs, the club to guarantee the gross value of both of these stakes to be $10,000. The former will be run at the spring meeting, which begins on May 30th, and the latter at the autumn meeting, the dates of which are not yet settled.

A. Hamilton will ride for Mr. Belmont, W. Hayward for Senator Hearst, Isaac Lewis for Mr. W. L. Scott, Martin for Mr. Galway, G Taylor for Mr. Lorillard, F. Taral for Labold Bros, F. Littlefield for Mr. J. A. Morris, the two Covingtons for Capt. S. S Brown, Casey Winchell and his younger brother for Mr. T. Winters, W. Palmer and Mosier for Mr. W. Daly. Bergen will probably ride for Mr. Withers, while Isaac Murphy may ride for the Dwyers.

On the front of each bridle worn by the Hon. James White's (who has been the crack Australian race horse owner for several seasons) horses in a race, is the name of the wearer worked in white beads, the filling in being in blue beads. Besides having a pleasing effect to the eye, the adoption of the plan saves the lads who have to walk the wearers of the blue and white banner round the Birdcage, the trouble of answering the oft-repeated question of "Hi, my boy, what horse is that?"

The Act of Parliament which regulates the use of the totalisator in South Australia provides that it shall only be made use of on race courses and on a certain number of race days, so that the persons who get up totalisator sweeps in their shops or places of business know they are running the risk of being prosecuted. There are several well known places in Melbourne where the law is evaded, some of the promoters were hauled up just previous to the Melbourne cup and fines were composed from £300 downwards.

An Australian horseman writes: "I wish all horsemen knew the value of sunflower seed. It is not only one of the best remedies for heaves, but a horse which has recently foundered can be entirely cured by being given half a pint twice a day for a while in his feed. Last autumn I took an otherwise valuable young horse, which was so stiff that you could hardly get it out of its stall. In two weeks you wouldn't know that anything was the matter with it, and it has been all right ever since."

An amusing story is going the rounds about a prominent buyer of yearlings who is somewhat new at the racing game. He was the other day at his training stables, looking at his most costly purchase with some friends, when he expressed himself a little disappointed at the colt's appearance as he stood before them in his box. His worthy trainer, however, observed: "He looks much better when he's extended." "Then," said the owner, with animation, "*why don't you extend him? Extend him immediately!*" The rest is silence.

An article headed "Sitting in the Saddle" has appeared in almost every paper in America. It is written by Captain Nelson, who says, while comparing the style with the American method: "The English style is widely different from that which the best American riders used to employ. Englishmen sit far back in their saddles and rely on the pressure of the ball of the foot in the stirrup to keep them in place." The captain also says: "It is the English method of horsemanship that is being taught altogether in the riding schools of this country." With all due deference to such a well-known horseman, I would say that if he goes into the hunting field he will find that, with the exception of the military element—who are proverbially reckless—the English hunting man rides with his knees and hands, and that the thigh, knee and calf are relied on to maintain a firm, easy seat.

Mr. Hill will use Sid, who was purchased from B. C. Holly, as his premier stallion on his ranch next season. Judging from his royal breeding he should prove a success. Few know how well bred he is, so I give his pedigree.

SID	Siddartha	Pero Gomez	Beadsman
			Salamanca
		The Pearl	Newminster
			Caller Ou by Stockwell.
	Vestella	Jonesboro	Lexington
			Alice Jones by Imp Glencoe
		Vesta	Asteroid
			Lilla by Imp Yorkshire.

The only Splan gives some of his experiences in London in a letter to a Cleveland horseman. He says: "I have always thought I had a lively imagination, but the questions I am asked daily in regard to trotters paralyze even me. Here is a sample: A lady and gentleman walked to Mambrino Sparkle's stall the other day and after looking at her in silence for a few moments, noticed the card bearing her name and record, 2:17. The gentleman told the lady that meant she had gone two miles in 17 minutes, but she said no it meant that she would be be exhibited in the ring at 2:17. Finally they asked me to decide the point, and with my usual gallantry I decided in the favor of the lady, and the pair went on happily to see the other curiosities.

Miller and Sibley have sold to G. G. White Paris Ky. the black stallion Clay Wilkes by George Wilkes dam by American Boy price $15,000.

Several yearlings principally by Plebian bought at Doncaster, and shipped to South America, died en route as did a thousand guinea St. Simon yearling.

Louis P. Ezekiel will be clerk of the scales and course at Memphis, Nashville, Louisville and Latonia, and beside this will represent all the principal owners of stake winning horses of the South and West as forfeit collector.

A Sporting paper says that when the Oregon—Lavinia Belle excitement was at its height at Elizabethtown, Johnnie Campbell only wanted the best of it while Phil and Mike only wanted New Jersey.

The betting on the English Derby is 4 to 1 Surefoot, 5 to 1 Le Nord, 100 to 12 Beaume, 100 to 8 Riviera, 100 to 6 each Rightaway and Blue Green, 33 to 1 Janissary, 20 to 1 Narellan and Kirkham (coupled).

Antaeus, the three-year-old colt by Sir Modred colt, won the spring handicap at the recent V. R. C. meeting, easily carrying 114 lbs. a mile and a quarter in 2:09½. Meteor, an aged horse, was second, with 113 lbs. up.

The trotting stock from the Rancho Del Paso will leave for New York about the 20th of February. The sale will take place on or near the 10th of March. The thoroughbred yearlings will leave in May.

M. Lupin, the Nestor of the European Turf, heads the list of French winning owners this year, his horses having won stakes to the amount of £22,800. Last year M. Lupin was third with £17,500, and in 1887 he was fourth with £11,400.

There has been a good deal of anxiety as to who would train for Mr. Marcus Daly next season. His eight yearlings arrived at Matt Byrne's Eatontown farm last week, looking well, and Matt will train them in addition to Mr. Haggin's string. The six Sir Modreds are in the pink of condition, while the $22,000 St. Blaise—Maud Hampton colt is said to be looking exceptionably well.

The Belle Meade stud will be broken up on April 24 and 25. Judge H. F. Jackson having determined to retire, Gen. W. H. Jackson and John Harding, the other two partners will probably buy in several of the stallions and mares as they are not going out of the business. Among those put up will be the well known stallion Enquirer, Great Tom, Luke Blackburn, Iroquois, & Bramble, the yearlings, will be offered at the same sale.

Tom Cannon, who is one of the finest horsemen in the world, was not often seen in the saddle this year, only having passed the post first eight times, but it is hoped that next season he will be seen oftener. One of the most brilliant efforts seen in England for years was his successful ride on Enterprise in the 2,000 guineas this spring.

The following dates are claimed in the Northern District,
Oregon State Fair, Salem, Sept. 8th, six days.
Eastern Oregon, Second District Agricultural Association, The Dalles, Sept. 16th, five days.
Montana Agricultural, Mineral and Mechanical Association (Helena), July 2, four days, August 20th, ten days.
Baker County Agricultural Association (Baker City), Sept. 23rd, five days.

Mr. P. H. Reynolds, a popular Melbourne Boniface has as usual presented to Anwin, the rider of Bravo winner of the Melbourne Cup a handsome trophy viz., a riding whip mounted with gold, and a jockey's cap over the stirrups, which are supported by a hand, with the letters M. C. (Melbourne Cup). At the base is a shoe with "winner" engraved, and a spur below. A gold band with a plate and the winner's name engraved on it complete the handsome artistic trophy.

One of the best English Sporting Dailies, The Sporting Chronicle says:

The "glorious climate of California" so often quoted by its admirers, has never had a more striking illustration of the tendency to precocious developement than in the case of Mr. Theodore Winter's crack two-year-old, El Rio Rey ("The King of the River"), who is muscled and furnished throughout more like a fully developed four-year-old. Hs is a perfect equine giant, standing over 16 hands high; rather angular, and tremendously muscled, with a tendency to coarseness. He is a golden chestnut in color, with three white egs and a broad blaze.

Woodhouse's record of the Melbourne Cups, issued in Melbourne, gives a dismal synopis of the breakdown of favorites. It was held that Archer could not make Norman gallop. Banker and Lantern beat the favourites in 1863 and '64. Toryboy was an outsider in 1865. The Barb was not a favourite in 1866, nor Tim Whiffler in 1867, nor Glencoe in 1868, nor Warrior in 1869; and what terrific outsiders were Nimblefoot 1870, Pearl 1871, Quack 1872! Something of a favourite, Don Juan, won in 1873. Outsiders then went in for it again—Haricot 1874. Wollomai 1875. Then we have such memories as Calamai, Darriwell, Zulu, Assyrian, Sheet Anchor, Arsedal, Dunlop. Only two or three favourites won in all the list ot Melbourne Cups. Therefore the mere fact of a horse being the favorite is 10 to 1 against him. Just think that out.

W. T. Jones won £5767 at the late V. R. C. meeting, Bravo taking the Melbourne Cup value £150 with stakes etc., added —value £5617 while Mr. White won five races, five seconds and two thirds; total value £4308.

Andrew Town is well known as a breeder and importer of thoroughbreds, many of his yearlings having come here. Foreign papers say that last month quite a sensation was created in every part of Australia where racing is known when it transpired that the mortgagees of the Hobartville Breeding Stud Farm near Sydney had foreclosed the estate. The unfortunate proprietor was Mr. Andrew Town, whom, no doubt, many racing men in England know through his purchase time after time, of English-bred mares. Mr. Town for many years past has carried on the game of breeding thoroughbred stock for sale, and his annual sale of yearlings, footing up to from 12,000 to 20,000 guineas in the best times, was the talk of the colonies for weeks. It has been whispered for some two or three years past that a screw was loose; but even those best informed scarcely thought the crash was so near at hand. Mr. Town has hosts of sympathisers. The mortgages are Mr. W. A. Long (who raced in England half a dozen years ago) and Mr. George Hill, also a Sydney sportsman.

At the Richmond (Yorkshire) Industrial exhibition, there were many racing trophies sent by several local magnates. Sir Henry Bereseford Pierse sent the Richmond Gold Cup won by Rosina in 1787, and the Richmond Cup captured by Tuberose in 1778, as well as a massive local cup when Rosetta proved the heroine one afternoon in October, 1808. Sir Henry also showed the Preston Guild Cup, won in 1822 by Peverlar. This cup was only run for every quarter of a century, and previous triumphs were respectively by those renowned animals, Dr. Syntax and Jack Spigot. There was the Ripon Plate, a silver bowl, won by one of the animals belonging the family in 1726. Sir Charles Dodsworth, Bart., of Thornton Watlass Hall, exhibited the Doncaster Cup of 1790. There is also a list of the Richmond Cups from 1759, when the Duke of Cleveland's Dainty Davy was the victor five years successively. Thrice did the illustrious Beeswing win the Cup, and thrice did the bonnie steed X. Y. Z. Dr. Syntax won on four successive anniversaries, and it is just one hundred years ago since the Prince of Wales won the Richmond Gold Cup with Tot. There are reminiscences of the old Raby pack from 1787, a picture of Lady Hilda Dundas's grey hunter, and an old picture of Equity, by Herring, purchased at Squire York's sale. Mr. H. Abbot, o Wharshton, exhibited the racehorses, in the great match between Mr. Neville's Sir Joshua and Mr. Holdsworth's Filho da Puta, run over the Rowley Mile, at Newmarket, for £1,000 years ago, and to wind up two very ordinary pictures of Fred Archer and Charlie Wood.

EL CUERVE,

Holstein-Friesian cattle have gradually worked their way into the confidence of farmers and ranchers on this coast, and are to-day acknowledged to be the greatest producers of milk and cheese. They are now making a bold bid for supremacy as butter producers, commencing with a modest win at the Iowa State Fair in 1885, where Holsteins were awarded the first prize for dairy butter, and in 1886 at the same fair the Holsteins won the first prize for the best butter cow. After this quickly followed the victory over the Jersey at the Minnesota State Fair of 1886, where all three prizes were awarded them on the butter test. At the West Virginia Exposition and State Fair of the same year they won the butter test against all breeds, taking the four first prizes offered. In the Ohio State Fair butter test of 1887 the Holsteins won for both quality and quantity. At the Michigan Fair Holstein-Friesian butter won the first prize. The New York Dairy Show of 1887 brought them immediately to the front, where they took the first premiums against heavy competition. At the same show a Holstein cow won the sweepstakes for the best cow of any breed, twelve competing, five of which were Jerseys and one Guernsey; the second prize in this ring also was taken by a Holstein. At the American Fat Stock and Dairy Show held in Chicago in 1887, the first premium for the best butter was taken by a Holstein and was awarded sweepstakes for butter over all breeds, there being eleven entries, and scored higher than any butter in the show.

Though not bringing the first Holstein herd to this coast, Mr. Frank Burke of Menlo Park should rank as one of the Pioneer breeders, for he has probably done more to introduce these cattle on this coast than any other man here, and members of his herd have been scattered from British Columbia to Texas, and from Colorado to the Sandwich Islands, China and Japan.

THREE-YEAR-OLD HOLSTEIN BULL, PROPERTY OF F. H. BURKE, LA SIESTA RANCH.

We this week present an illustration of Mr. Burke's grand Holstein bull El Cuervo Netherland, No. 3236 of the Holstein-Friesian Herd Book, an unbeaten bull in 1888 at every fair at which he was shown as a two-year-old, and who with prizes won this year as an individual and as head of a herd, has won more first prizes, sweepstakes and gold medals than any Holstein that ever appeared in a show ring on this coast.

Below is his pedigree:

Calved May 3, 1886. Sire, Netherland King (H. H. B., Vol. 7, 1,924). G. sire, Netherland Prince (716). G. G. sire, Schemmel. G. G. G. sire, Schreuder.

Dam, Phyllis Lincoln (H. H. B., Vol. 9, 9,923), imported, by Lincoln. Grandam, Pietertje.

Through his sires he inherits the rich butter strain of the Netherlands, and through the Lincoln branch the heavy, long continued milking qualities of the Aaggies; thus combining through sire and dam the two greatest butter and milking strains.

This bull, in addition to other prizes taken this year, won the first prize for the best bull at the State Fair this year, but was not entered for the sweepstakes, nor did he appear as the head of the herd in the Herd Sweepstakes, as owing to a discussion which took place in this city, Mr. Burke declared that even without Netherland he could beat all Holstein bulls of any age in the State with a two-year-old, and kept his word by winning the Bull Sweepstakes with King of Menlo, and with the same bull at the head of the herd won the Herd Sweepstakes against the largest and best display of Holsteins ever exhibited in this State.

El Cuervo Netherland of course stands at the head of the herd of La Siesta Ranch, Menlo Park, and aside from this gilt-edged breeding is an exceedingly well-proportioned animal, evenly marked, and weighing 2,400 pounds in ordinary condition, yet it is go gentle that he was led in parades at the last State Fair by a little lad only eight years of age.

Grim's Gossip.

J. B. Haggin is on his way to Europe. It is uncertain when he will return.

L. J. Rose Jr. has leased the Sespe Ranch in Ventura and will raise cattle there.

Hiram Howe is in slightly better health and hopes are entertained of his recovery.

St. Simon had only ten starters in England last season, nine of them were winners.

The Dwyer brothers have about 70 horses in training or had previous to the weed out.

J. N. Killip was presented with an elegant set of harness by his employees on Christmas day.

Alcyron, Jack, Hendryx, Ketch, Baroness, Wanita and Frenzy, all winners in their class, are gray horses.

It is reported that the citizens of Roseburg have raised $20,000 to purchase lands and to build a race track.

The Nottingham (England) Race Committee donated upwards of £500 to the various local charitable institutions.

McLaughlins temper is said not to be equal to the strain of managing a field of unruly boys and skittish horses.

The Machiavelian Capt. Machell has been attempting to buy Abercorn one of the crack Australian race horse, but for once has failed.

They think a field of 24 or 25 very small for the Melbourne Cup and quite look down on Grand Flaneur's—year with only 22 starters and Dunlaps 17. Sheet Anchor beat 34 horses.

As an illustration of the long credit given by trainers of the old school, the veteran William Day has upon his books over £27,000 due to him from former employees, most of whom are dead.

According to the list, 612 trotters and 157 pacers have this year gone in the 2:30 list, a number far in excess of those of any other season.

In giving the list of members of the State Veterinary Association in our last issue the name of W. E. Wadams of Santa Clara was inadvertantly omitted.

Ormonde was received like a king on his arrival at Buenos Ayres. A long procession was formed, and the racehorse of racehorses walked in the van like a monarch.

The Eastern papers say that Ed Bither may secede from J. I. Case's Stock Farm and join a California stable. Inquiries fail to prove that there is any truth in the rumor.

Although the excessive rains have played sad havoc with some of the farms, Col. Harry I. Thornton reports the youngsters at Rancho Rosaca as being in splendid condition.

Luke the English jockey who rode for Mr. Belmont several years ago has ridden successfully 27 times in France this year and has several times been on the back of the winner in England.

The proposition, of whether Sunol and Axtell, can lower their records as four-year-olds, is agitating the pens of many sporting journalists. It is generally acknowledged that they will do better in 1891, than they will in 1890.

From the present outlook of affairs, the year 1890 will be a very important one to those who favor the thoroughbreds. California will be better represented than ever, and some sensational performances may be looked for.

The Haggin sale of trotting stock will take place in New York City on March 12th 1890. There will be a large assortment, and purchasers will be able to secure great bargains. P. C. Kellogg will have the management of the sale.

At the San Mateo Stock Farm a minature track is under construction, but owning to the bad weather the work of finishing has been postponed. It will not be used to prepare weanlings, but only to show prospective purchasers the gait of the various youngsters.

Reports from Hueneme, Ventura Co., confirm the statement made some time ago, that the citizens of that lively Burg will have one of the best race tracks in the United States. It has been made on scientific principles, and from the character of the ground should prove extraordinarily fast.

A meeting of the members of the Pacific Coast Trotting Horse Breeders' Association is called for Wednesday, January 8th, when it is hoped that every one whose name is on the roll will be present. The annual election of officers will take place, and other business of importance will be transacted.

Frank H. Burke, one of the best informed horsemen in the State, has added a Kindergarden track to his Menlo Park Stock Farm, and hereafter the "babies" will receive their work on the small track under the careful supervision of William Voiget, than whom there is none better to manipulate the rising generation of horses.

Mr. John Scott who is well and favorably known as an importer of Australian Clydesdales, brought another half dozen, royally bred, by the last Australian steamer. They are located at the Bay District Track and as usual will be disposed of by Killip & Co. 22 Montgomery Street. There are four stallions and two mares in the consignment.

Mr. J. F. McNaught formerly of Seattle has removed to St. Louis, but recognizing the beneficial effects of the California climate on horses has left his two fast trotting mares Sister V. and Fearless at San Mateo Stock Farm where they will be handled in the spring by J. A. Goldsmith preparatory to sending them on the Eastern circuit.

An elegant souvenir was sent to the office this week, with the compliments of J. H. Neal, Secretary Pleasanton Stock Farm Co. It is one of the shoes worn by Margaret S. when she won the Spirit Futurity Stake at Cleveland last fall. The shoe is elegantly gold plated, and will be accorded a place of honor in the BREEDER AND SPORTSMAN museum.

Not to be outdone by the Kalamazoo Stock Farm, Mr. Daves owner of Roy Wilkes will give to the owner of the first foal by his horse that enters the 2:30 list $250, for the second $200 for the third $150, and for each successive one the sum of $100 as long as he owns the stallion. This is a liberal offer and the first to make a mark will be eagerly looked for.

Mr. W. H. Wilson of Cynthiana, Kentucky, is justly proud of his great stallion Simmons 2:28, and does not fail to trumpet the merit of the horse whenever chance offers. In this State Simmons has four representatives C. A. Durfee's Raymon 2:37 and Gossiper 2:29¾ (bar record of 2:22½), G. Valensin's Simmocolon 2:29½ and W. S. Hobart's Bon Bon 2:26. ¾

In conversation with Mr. Corbitt a few days ago, he informed me that he will not send any stock to the East next year for sale, giving as a reason that he accepted so many outside mares last season for both Guy Wilkes and Sable Wilkes that he neglected his own mares and will not have enough to warrant him in shipping back. However, what few he has for sale are of the choicest and purchasers are plenty for stock of the kind.

Mention was made last week in the gossip that Hill and Foster had determined to sell those good race horses, Tycoon and Mikado. The same evening that the notice appeared L. J. Rose had a conversation with the would be sellers, and finally purchased the pair. This should add considerably to the credit account of the Rose stable when the balance sheet is made up for next year.

A farmer read in an agricultural journal; "A side window in a stable makes a horse's eyes weak on that side; a window in front hurts his eyes by the glare; a window behind makes him squint-eyed; a window on a diagonal line makes him shy when he travels, and a stable without windows makes him blind." The farmer has written to the editor of the agricultural paper asking what effect a window without a stable would have on his horse's eyes.

Parties in Ohio are trying to purchase the past pacing grandson of Electioneer, Edwin C. 2:15. Mr. Johnson, the owner, is not adverse to selling, but he has put a good stiff price on his horse, notwithstanding which, it is extremely probable that the Eastern gentlemen will secure him. Edwin C. is a good young horse, and should, in able hands, give many of the cracks on the circuit a hard game to beat him.

It may just be possible that we will not be able to publish the list of entries in the BREEDER AND SPORTSMAN Futurity Stake in our next issue, but in the succeeding issue the names of all the entries will be given in full. The time for entering has almost expired, and all who desire to have a chance to win the stake will have to send in nominations by January 1st. Make your entries at once as you are liable to forget it.

My old friend Harry Agnew writes me from Honolulu that he is fast disposing of his stock, and will shortly return to California. He has had to sacrifice considerable in selling his real estate, but got fair prices for the horses. He will bring back with him, Boswell Jr., by Boswell, a son of Almont, dam Maude; Augie Wilkes, by Guy Wilkes, dam Maude; Josie A. by Doncaster, a son of Elmo, dam Kitty Malone, by Patchen Vernon, and a filly by Marin. Harry expects to be able to leave Honolulu about the middle of February.

The royally bred stallion Regal Wilkes will have six mares sent to his harem the coming season, five of them the property of his owner Mr. Corbitt, and the other a mare beloning to W. H. Crawford of Lexington, Ky. The winner of Rose's wager saw the two year old make the stallion record for that age, and determined to breed to him if money would accomplish the object, so he said to Mr. Corbitt "breed my mare to Regal and send in your bill, I do not care what you charge."

Acting on the advice of L. J. Rose of Los Angeles, Wm. Corbitt, Esq., of the San Mateo Stock Farm, has paid over to W. H. Crawford of Lexington, Ky., the money wagered by the two gentlemen on the result of the time to be made by Stamboul during the year 1889. The following is a copy of the receipt: Received from Mr. Corbitt ten thousand dollars, the amount wagered between L. J. Rose and myself on Stamboul acquiring a public record of 2:12 or better during the season of 1889.

W. H. CRAWFORD.

There is no doubt but, accidents not happening, Mr. T. Winters' famous son of Norfolk and Marian, El Rio Rey, will be seen at St. Louis next June. Mr. Winters has already engaged stable room, and the horse has been entered for next year's Derby. Stronger corroboration, even, is at hand, for Trainer McCormick has sent word to his friends there that the stable will start at Memphis, and racing right up the circuit to Chicago, then go East to Saratoga or Monmouth.

Immediately after purchasing Mikado and Tycoon, Mr. Rose had them forwarded toward Los Angeles. Rico was also put in the same car, and although that was several days ago, they have not arrived at their destination yet. The washout on the railroad between Mojave and Los Angeles is the cause of their detention at the former place. Mr. Miller, owner of Daisy D. and other race horses, had to return from Mojave, and took the boat yesterday morning for the Angel city.

I have received a note from H. G. Crickmore, secretary of the Monmouth Park association, in which he says that declarations are due January 1st, 1890, on the following stakes to be run next year: For three year olds—Lorillard and Omnibus at $25 each; Stockton, Stevens, Monmouth Oaks, and West End Hotel Stakes at $20 each. For two year olds—Hopeful, July, Tyro, Sapling, Junior Champion, August, and Criterion Stakes at $10 each. For stakes to be run in 1891. For three year olds—Lorillard, Monmouth Oaks, Stockton, Stevens, Omnibus and West End Hotel Stakes at $10.

Our Australian exchanges give glowing accounts of the race for the Melbourne Cup which was run off on the 5th of last month. Last year Mr. Donald Wallace won the coveted prize with Menlo, and tried to duplicate the win this year with Carbine, the most successful of last season's three year olds. The colt had shown such high form that the handicapper gave him the enormous impost of 140 pounds. When he appeared at the post he was founed to have on a bar shoe and the hoof was bound with tarred rope, the poor beast being handicapped in an extra manner, by a badly cracked hoof. Notwithstanding the bad foot and frightful weight he came second, finishing in a very game manner.

Mr. Charles Kerr of Bakersfield was in the city a few days ago, and I learn that he has purchased two valuable colts from Rancho Del Paso. The first is a bay horse colt foaled 1888 by Darebin, dam Mariposa (sister to Marchioness) by Monarchist, he by Lexington; 2d dam Heliotrope by imp. Knight of St. George; 3rd dam by imp Glencoe etc. The second one belongs to the trotting division and is by Albert W., dam by Kentucky Prince, 2nd dam Wayward by Volunteer. Mr. Kerr has many fine broodmares on the home ranch and these two youngsters will add greatly to the future stock. The price paid is not given.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

Quartz.

Are Gracie S. and Gracie full sisters.

Answer—No, Gracie was by Speculation 928, dam Henrietta by Alexander 490, and Gracie S. was by Speculation 928, dam Jenny (pacing mare) by Bull Pup, he by January's St. Lawrence, 2nd dam by Williamson's Belmont.

F. C. B.

Please inform me the name of the driver and trainer of Maud S, when she made her 2:08¼, and oblige.

Answer.—W. W. Bair.

F. E. Booth.

Can you let me know the pedigree of a horse called Bismarck said to be owned by J. B. Haggin.

Answer—Bismarck by McCracken's David Hill Jr., dam by McCracken's Black Hawk.

B. D., San Bernardino:

Can you give the pedigree of Edwin Booth, a horse bought in San Francisco, by Senator Conn about eight years ago, and brought here? Has he any record?

Can any of our readers answer the above question.

C. E. B.

Please inform me if there is any horse registered by the name of Navigator. Please answer through your paper and oblige.

Answer.—There is a horse already registered by that name. Navigator 1388.

Mr. Fortin.

In answer to your query as to the breeding of Dave, Mr. Solomon sends us word that the horse was by Young Niagara, dam by Rifleman.

R. J. H.

I will be greatly obliged to you, if you will give me the breeding of Lady Graves, also her best record. Do you know who formerly owned her and by whom she is owned now.

Answer.—Lady Graves 2:43½. We do not know her pedigree, nor who owns her.

Quartz.

The grey gelding you allude to was bred by J. B. Haggin, Rancho Del Paso, Sacramento County, and is bred as follows, by Echo, 462, dam Sally Come Up, by Geo. M. Patchen Jr. 31, he by Geo. M. Patchen 30; 2nd dam, Millinette by Grey Eagle; 3rd dam, Maid of Athens by Priam; 4th dam, Lady Chesterfield by Arab; 5th dam, by imp. Knowsley; sixth dam, by imp Dion, etc.

F. D. H.

Will you please let me know the pedigree of Capt Cole on his mother's side, and who owned him when he was foaled, and what is his color, and is he registered in Wallace's Stud Book; if not, is he bred well enough to be registered? I think I own the horse but bought him under another name.

Answer —Captain Kohl, foaled 1873, was bred by Mr. Whipple, and was sold at one of his sales to a party named Luce, who took him South. When he left San Francisco his name was changed to "Luconia." He is not registered, and is not eligable, as the pedigree of his dam is unknown.

A. W. B.

(1) Will you please publish in your next issue the pedigree of Biggart's Rattler? (2) The pedigree of Lady Crum, dam of Alexander 490? (3) Also the dam of Top Bellfounder?

Answer.—Biggart's Rattler, foaled 1844, by Sir Henry, son of the Garret Horse, by imp. Leonidas, dam by the Hyde Horse, son of Long's Magnum Bonum; second dam a mare said to be of Messenger blood. The above is the pedigree as given, but there is a doubt as to which Leonidas it was—whether the imported horse or a son of his. (Lady Crum was bred in Ohio, and is represented to be by Brown's Bellfounder. (3) There is nothing known of the dam of Top Bellfounder.

INFORMATION WANTED.

EDITOR BREEDER AND SPORTSMAN:—Can you give me the pedigree or tell me anything of the breeding of a mare which trotted in this State principally around Sacramento, about twenty years ago? She was a large chestnut and named Fancy, she was said to have been owned by a man named Miller, by some E. H. Miller of the Railroad Company. Any information about this mare would be highly appreciated by

Yours respectfully,

PETER J. SHIELDS.

NAPA RATTLER.

We have had many inquiries in regard to the breeding of Napa Rattler, and have at last received the following, which throws some little light on the subject:

WOODLAND, Cal, Dec. 17, 1889.

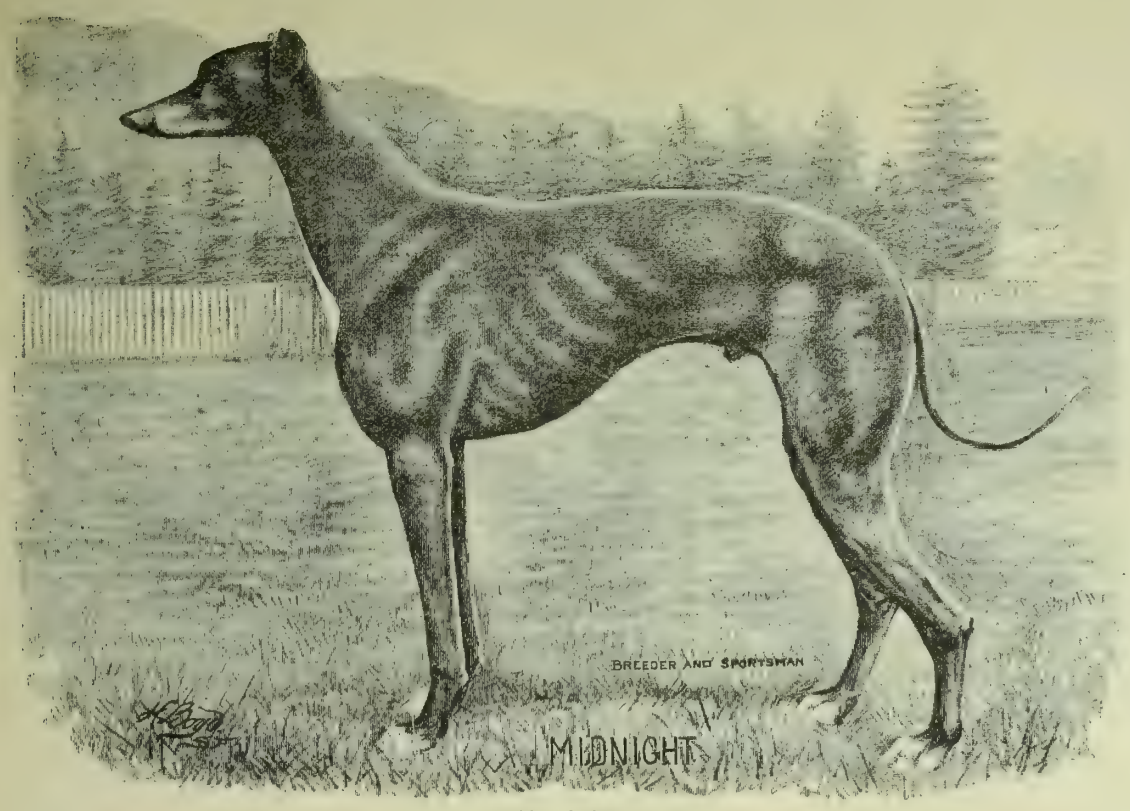
EDITOR BREEDER AND SPORTSMAN:—Mr. Geo. W. Woodard, of Yolo, requested me to send you what information I had obtained about the breeding of Napa Rattler, as he promised you he would when he was in the city a few days ago. Will enclose the statement with the request that you return the same when you have done with it. Mr. G. W. Steves told me that Mr. Stever is dead Precluding the best evidence in matters of this kind, I take it that Mr. Steves is correct in his statement, because he was a resident of that immediate vicinity (Milton, N. Y.), previous to coming to this State (Napa his present address), where the horse was bred, raised and owned until sold to him by Mr. Stever, a cousin. Of the first dam Poll, he states that she was bred by Mr. Stever. The second dam, he says, was Betsy Baker, sired, he thought, by a son of imp. Messenger (probably by Mambrino). Said Betsy Baker was quite a running mare in her time.

Very respectfully, A. W. BOUCHER.

The statement which accompanies the above letter is as follows:

NAPA, August 27, 1889.

G. W. Steves, now of Napa, Cal., bought the bay horse Napa Rattler, foaled 1854, of David Stever, of Milton, Saratoga County, N. Y., and brought him to California in 1859. He was sired by Biggart's Rattler, first dam Poll (bred by David Stever) by imp. Consternation; second dam Betsy Baker by a son of imp. Messenger.



(Signed) G. W. STEVES.

DON'T NEGLECT

To send in your ENTRIES for the Breeder and Sportsman's

FUTURITY STAKE.

Closes JANUARY 1st, 1890.

Midnight.

Dog fancying readers will be interested in studying the lines of Doctor W. E. Wadams' very handsome greyhound Midnight. Doctor Wadams resides in Santa Clara, where good roads and facilities for training hounds are adequate, the natural consequence being that his dogs are always sent up to public meetings in superb form. Midnight was bred by Mr. H. W. Smith at Worcester, Mass; was whelped October 29, 1885; is black with white brisket, toes and tip of tail. He stands twenty-six and one-half inches at the shoulder, girths thirty inches, weighs fifty-five pounds in condition and sixty pounds at other times.

His pedigree is unexceptionable on both sides, being field stock, of winning strains, as will be seen by the subjoined table.

MIDNIGHT.

"Friday Night"

Master Sam — Carlton. Contango
- Cashier — Cardinal York (Jacobite, Forest Queen) / Lady Stormont (Blue Ruin, Holiday)
- Bab at the Bowster — Boanerges / Mischief

Polly — Master Walker.
- Patent — David (Motley, Wanton) / Lady Clara
- Restless Belle — Patrician (Black Cloud, Prize Flower) / Romping Girl (Bedlamite, Redwing)

Playful.
- Brigadier — Boreas (Figaro, Berry Bedlam) / Wee Nell (Seacombe, Lady Waterford)
- Belle of Bygrabe

"Mother Demdike"

Penselve Laddie — Cavalier.
- Cauld Kail — Union Jack (Bridegroom, Attemire) / Scotia's Thistle (Selby, Meg)
- Princess Mary — Cardinal York (Jacobite, Forest Queen) / Meg o' the Mill (Bonnie Prince Charlie, Fanny)

Pensive.
- Master Nat — Master Nathaniel (Banjo, Lady Bella) / Gift (The Brewer, Blitz)
- Gentle Zephyr — Spring, Fancy

Playmate — Countryman,
- Regulus — Patrician (Black Cloud, Prize Flower) / Romping Girl (Bedlamite, Redwing)
- Ristori — David (Motley, Wanton) / Racketty Hoppicker (Larriston, Hopvine)

Playful.
- Peer — Cock Robin (King Death, Chloe) / Princess Mary (Rambler, Black Bess)
- Sans Reproche — Samuel (David, Patch) / Slighted Idea (Patent, Polly)

As a performer, Midnight has been singularly out of luck. He has been coursed but very little. At Newark he beat speedy Peasant Girl, and the finish of the stake being postponed, Doctor Wadams withdrew Midnight and took third money. At Merced the dog ran once, unplaced, being entirely out of condition. At Gilroy he was slipped unsighted, but, nevertheless, won to rule in good style, although the race was given against him.

At Ocean View, on Thanksgiving Day, Midnight beat Benelon II. the previous winner in the Occidental Club, and a good field of dogs, and won first, $70 and a beautiful crayon portrait by Mr. H. Boyd. In the opinion of several good judges, he is a fine model of a greyhound, being well legged and footed, nicely sprung, strongly loined, and very clean all over. He is a rusher from slips, having the foot of about any dog in the State, and being a clever, close and tasty workman. The portrait is fairly good, and brings out the points of the dog sufficiently well to enable those in the fancy to judge him.

His owner is an enthusiastic admirer of coursing and may be relied upon to advance the dog at every fitting opportunity.

Sale.

Mr. A. B. Truman (Elcho Kennel) has sold to Mr. F. M. Smith, Oakland, the white and liver pointer bitch Cricket Croxteth, whelped August 5, 1888, by Rush T—Champion Patti Croxteth T.

Mary's Little Pup.

Mary had a little brute, as fat as it could waddle, and everywhere that Mary'd scoot this little pup would toddle. It tagged her down the street one day, close up behind her buggy; oh, how it loved to run away, this naughty little puggy. 'Twas always doing something wrong when Mary turned her back; and all the time he seemed to long to walk the railroad track. One day, when Mary was at church, this frisky little scamp thought he would leave her in the lurch and go and play the tramp. So down upon the ties he trod, the one the poor tramps use, till worn out on the track he squats, and drops into a snooze. He, fast asleep, did not observe—ah, sad indeed the story—the fast express come around the curve; that pup went up to glory. There came along a butcher man who once had loved that pup, and with a brush and big dust pan he swept that poor dog up. Next Wednesday Mary got him back· he did not look the same; he would not come when she called "Jack!"—Bologna was his name.—*Nobody willing to father it.*

Coursing in a Millinery Store.

The most awful and unexpected things are constantly happening to our friend Mr. Nick White of Sacramento. Not that he invites calamity—in fact, he is averse to continued excitement, but somehow his best laid plans "gang aft" and result in most extraordinary denouements. The other day he organized a coursing match at Sacramento in the hope that the citizens might be induced to love the sport. We subjoin his description of the affair.

Several embryo sportsmen—or, rather, boys—caught a jack-rabbit Saturday over on the Yolo side, and brought the long-eared animal home with them in a bag.

The services of several greyhounds, a Newfoundland, two setters and a dozen curs were secured, and a grand coursing match was announced. I street was chosen as the coursing ground, and the rabbit was turned loose. Residents of I street in the vicinity of the Court-house thought all the dogs in town had gone mad when they witnessed from their windows the terrible race of yelping and stumbling canines after the fleet footed rabbit. The race grew more exciting as it progressed, and the greyhounds were at the prey when the latter suddenly took refuge under a lumber pile.

This occasioned a temporary delay, but the festive sportsmen succeeded in chasing the fugitive out of his retreat, and then the race was renewed with increased fury, confusion and scattering of mud.

The rabbit tore along the street at a terrible rate, and finally turned into J street and headed down town. Ladies screamed and men dodged into doorways, horses began to pitch and plunge, and runaways and destruction were imminent.

Again were the greyhounds in advance, and were fast closing in upon the fleeing rabbit. But Jack was a tricky one, and just as the foremost hound opened his jaws to grab him the rabbit suddenly described a semi-circle and darted into a millinery store. But this time the dogs were not to be outdone and they, too, followed into the store in hot pursuit.

What was the result?

Well, the story about the bull in the China shop will henceforth be shelved. It is the dogs in the millinery shop now.

The dogs didn't catch Mr. Jack after all, but they created the impression—particularly at the millinery establishment—hat their intentions were of the best.

A wrinkle for dog owners is handed us by Mr. A. B. Truman. It is, never put distempered dogs upon hay bedding; always use bright oat straw. There seems a reasonable ground for action in the fact that all hay is more or less musty.

BASE BALL.

An Important Movement Among California Players.

There is evidently something of great importance on the minds of the local ball p ayers just now, but what it is cannot be definitely ascertained. The account of the proposed California Brotherhood which was published exclusively in the Breeder and Sportsman three weeks ago has caused them to be carefully guarded in their conversation, and the most artful plying fails to make any of them let slip a single remark that might give an inkling as to what is going on. When asked if the organization of the Brotherhood has been accomplished, some of the men stare blankly and ask what is meant; others deny that any such scheme has ever been considered, but there are old timers who will look a manager square in the face and deny that they have touched a drop of liquor during the season, while even as they talk they are struggling to conceal their load. A few of the men refuse positively to say a word on the subject, and all seem determined that their plans for the future shall not be further exposed to the world, at least for the present.

Whether the Brotherhood is a reality or not, one thing is certain, and that is the boys are in no hurry to attach their autographs to a contract for next season, and the managers are getting deeper into hot water day by day. In former years the ball tossers have been most eager to sign for the following season and draw down the comfortable advance that enables them to while away the dreary winter days and drearier nights playing "peanuckle" and soaking their parched throats with frequent draught of the vintage of '89, labeled Fredericksburg. This winter, however, tempting offers of advance money and increased salaries fail to induce them to respond in the way that is desired, and to the pleadings of the muchly worried manager they hint of engagements in the East, of retiring from the diamond, and other improbabilities, but they will not sign a contract.

The most likely explanation of their action is that the California Brotherhood is an accomplished fact, and that the men dream of an independent League formed with the aid of outside capital. It is a well known fact that certain moneyed men in this city have for several years talked of establishing a rival to the California League, and it may be that they are about to carry their ideas into effect. Meanwhile Messrs. Harris, Finn and Enright are casting their lines in the East for ball players, and if the local men are not following out some well defined plan some of them are liable to find themselves McGintyized when the season opens next March.

Hardie is going to try another season in the East. This time he goes to Boston, and his many friends on the Coast hope he will became as great a favorite with the Beaneaters as he is in San Francisco. It is not decided whether Coughlan will go with him or not, but he probably will. They will make a great battery.

Jerry Hurley has jumped his Milwaukee contract and signed with the Pittsburg Brotherhood Club. He will alternate with Fred Carroll in backstop work.

Harris has signed two men for his San Jose club. The first is George Spear, a San Diego man, who was highly recommended to Mike Kelly by Cal. McVey as being a first class catcher. The other is Harry Howard, who played with Stockton last season, and who will guard the second sawdust bag for the Garden Cities.

Tom Power is one of the local men who is in no hurry to sign away his liberty. He has received offers from every club in the State, but has refused them all. Come Tom, tell us! is it the California Brotherhood that impells you to hold off this way?

Can it be that Charlie Sweeney is to be shelved? Finn is negotiating with an Eastern second baseman for the Friscos, and none of the other managers seem to want him. This great ball player will not want for an engagement, however, for he is in receipt of several tempting offers from Eastern clubs.

Two more desertions from Ward & Co's, great Brotherhood fake! Thompson and Myers have signed Philadelphia League contracts for three years and now a howl will go up that these men are traitors. They are not traitors, but simply refused to become the tools of that baseball demagogue, John M. Ward. They have foresight enough to see that this arch scheme is leading them into a trap; the foundation of the Brotherhood is rotten, and that the whole snap is gotten up not with any idea that it will succeed for any length of time, but the Ward, Kelly, Pfeffer and Haulon may reap the benefits of its brief popularity and then let their dupes look out for themselves after the fake has smashed itself.

O'Neill is not meeting with the success in forming the Oakland club for next season that he anticipated. He counted on securing Dooley, Stallings, Long, McDonald and Smalley without any trouble whatever, but somehow his calculations have miscarried. The first two have under consideration, offers from the Eastern Clubs, Dooley from one of the Brotherhood fakes, and Stallings from the Chicago League Club, and it is likely both will pace around foreign paths in 1890. Long will retire from the diamond if the League is increased to six clubs, as his business will not permit him to play four games a week. Smalley is holding out for an increase of salary, and may sign with Finn as the latter is willing to accede to the Haywards boys demands while O'Neill declares that not a man will be paid more money than he got last year. McDonald is the only member of last seasons pennant winners who is satisfied to sign at his old salary. The chances are that the Colonels will be composed principally of imported talent.

The American Association ia a dead cock in the pit. The desertion of the Cincinnatis, Brooklyns and Baltimores has left the organizstion in such a crippled state that it is impossible to build it up again. In addition many of the best players of the remaining clubs have joined the Brotherhood and now comes Von der Ahe with a proposition to transfer the Browns in a body to the Wardfake. Louisville, Kansas City, Columbus and the Athletics will either be absorbed by the League or else join some minor association. This will leave the Brotherhood and League to fight for supremacy with the conditions all in favor of the latter organization coming out on top.

Robinson would like to secure Meegan for next season but Finn will not give up his claim to his King-pin twirler.

Anson is very sore at Van Haltren over his desertion of the Chicago club. The old man has every season to be sore. He it was who developed the Californian into the fine player, he paying him a large salary all the time he was learning how to play ball and to have try to his benefactors in such a manner as to say the least most ungrateful.

THE GUN.

Mr. Loud Locates.

EDITOR BREEDER AND SPORTSMAN:—I am pleased to inform you that I have located my kennel at Pacific Beach, seven miles from San Diego, which will be known as the Bay View Kennels. I shall devote my time to breeding and training setters and pointers, also breeding fancy pet stock and pit games. T. Fitzpatrick of Rome, Ga., will soon join me with his kennel of setters and pointers, also his celebrated pens of pheasants and pit games, and in time we hope to work up an interest among dog men in Southern California. False Bay, inside of Pacific Beach, affords fine duck and geese shooting, and in the hills back from the beach good quail shooting can be found. San Diego County is badly in need of a game and fish warden. Only a few days since two deer, a doe and a fawn, hung in front of a market on Fifth street for several hours; both had the evidences of sex removed, and I am told the fish laws are violated shamefully; in fact the game law seems to be a blank in this part of the country, while there are many true sportsmen who would be glad to assist in maintaning the law. C. A. LOUD.

PACIFIC BEACH, SAN DIEGO, Dec. 15th, 1889.

Preserving the Quail.

Says the Saturday Globe, published at Utica, Wy.: The day is not far distant when the quails will be preserved in every State in the Union, and the privilege to shoot them over a given territory will be paid for in good sums. Indeed, there are also established in this country quite a number of preserves where the right to shoot is purchased. At present there is no great necessity for preserves, as the shooting is almost unlimited without it. Still, there are a number of places where thousands of acres are let to clubs, and these furnish a man to patrol the grounds occasionally, provide food and in bad weather suitable shelter for the birds. The birds breed so rapidly and prosper so well under good treatment that the fashion for quail preserves is taking a firm hold, and in time will become quite general.

Deer Killed.

The high water on the bottom lands along the Feather River below town has driven all the animals to the levees or other high grounds, and during the past week several deer have been killed. Fred Hauss sighted one near his place last Friday and procuring a rifle killed the animal. It was a fine large buck weighing over 175 pounds. Mr. Hauss will have the head mounted. Some men on the Graffis farm also killed two deer last week and treated their neighbors. On Bear river near the farm of C. P. Berry several deer have been killed, and wood-choppers near Nicolaus also secured several large bucks. As the deer season closed last Sunday it now makes it a misdemeanor to kill these animals and parties should be careful.—Sutter County Farmer.

Match at Colton.

EDITOR BREEDER AND SPORTSMAN:—The Fifth Match for Selby Standard Challenge Medal, representing the title of Championship for Southern California, at artificial targets, takes place at Colton, California, under the auspices of the Colton Gun Club, December 25th.

Conditions, 50 single and 25 pairs Blue Rocks. American Association rules to govern.

Balance of the day made up to suit the shooters present. Shooting to commence at 9 A. M. sharp.

E. D. ROBERTS, Secretary.

[We rely upon Mr. Roberts for full scores.—ED.]

To the Top of Mt. Whitney.

[By C. E. Sherman.]

XVI.

August 14th, at 6:30 a. m. as fresh as larks, confident and hopeful the cavalcade took to the trail, which still followed along the river banks, except where rockey abutments forced roundabout climbing on the mountain sides. Bear tracks were everywhere. The Doctor chased a bear into a pile of rocks and immediately formed a plan of campaign in which it was arranged that the bear should fare very badly. But time pressed, and this was no place for loitering, so reluctantly, the Doctor gave up his dream of sporting glory and kept company with the band.

The gusty air was full of life and vigor and each individual Pilgrim body thrilled with healthy enjoyment of such unwonted scenes and places. At noon Camp Bountiful was the resting place. It was in a beautiful little meadow green with verdure and abounding in natural grasses, let alone by sheep men because of difficult access. The trail was an evasive creature all the afternoon, getting itself lost about every five minutes, requiring constant care to keep it and continual watching to find it again. At one time no two of the band agreed upon anything concerning the trail except that there was none. In which direction one might perchance exist was a theme upon which a good deal of individual bias was manifested.

The Counselor's incident occurred hereabouts. His horse naturally long and pretty light forward, during his trip had gradually been stretching apart. A short turn around a rock had to be made, and he was too lengthy. So he unbalanced over backward, landing most fortunately against the uphill side of a huge fallen tree. After a rest—from everything but tantalizing tongues, amid which the Counselor's was not conspicuous—the animal was righted, but no one noticed that the saddle girths were loosened. Just afterward a shelf of granite rock was reached, to surmount which a horse had first to place his fore feet thereon and then with a mighty spring land upon the shelf on all fours. Old lengthy got his fore feet in place and was about to do the grand when the saddle slipped and with frenzied kicking away went one stirrup, then the other, and piece by piece all that was mortal of a dearly beloved saddle. Meantime the Counselor was at the head end of the beast pulling upon a bridle as hard as it would bear. But all declare that the old horse never would have got all of himself upon that shelf only that the velocity of the kicks compressed the air and really lifted the working end of the horse into safety. And the Electrician declared after the agony was over that the horse had kicked himself shorter and into reasonable limits. In fact he proved it by some galvanometric calculations which were so deeply beyond the rest of the party that they were afraid not to believe. There were many boisterous jests and much breezy laughter. But the Counselor took no part therein.

The country opened as elevation was gained and that night 10,800 feet above the sea, almost at the very headwaters of Kern and Kings River in a country of desolate grandeur, Camp Hardscrabble was made. It had been a trying and wearisome day, winding among huge cliffs, gigantic boulders and getting around fallen timber, by devious and, almost impossible ways, but progress had been made and so far the prediction of an Inyo County man, "you cannot go to Mt. Whitney by that way up Kern River," remained unfulfilled. Yet it was not with any profound feelings of gratified vanity that any of the Pilgrims retired that night, for between them and their yet unreached summit what might there not be?

When nearing the goal with almost absolute certainty of triumphant arrival there are not always the happiest moments in human life. There may be a haunting fear that at the supreme moment the grateful cup may be dashed aside. There will arise disagreeable questionings as to whether some other path might not have been surer trod, some other way have given greater certainty. And, not to be put down, in reviewing the whole plan, looms drearily the question, may there not be some hidden flaw which at the last will crash and topple everything into ruins? It may be granted that the Pilgrims went to bed with the blues.

The chef's fire was at the root of a hugh tamarack which had fallen down hill. Another had fallen nearly at right angles across its top branches, and close to this mixed up with its branches was a third tamarack, dead but still standing and from which the needles had not yet dropped. The Doctor, Enthusiast and Artist made their beds directly under this standing tree. The Counselor started a fire. It is supposed he was busy getting even. At any rate he knew the supreme moment for about 2 A. M. he remarked 'get up and look. May be I wont' be even with some smart men pretty soon." And so the Counselor sat on watch and chuckled, until in an instant, with the roar of a tornado, the whole standing tree was blazing mightily, the points of surging flame reaching hundreds of feet into the air. The Doctor grabbed his rifle and one boot and slid out into the gloom; the enthusiast grappled a corner of bedding and made the best down hill time on record; the artist instantaneously disappeared with a few things portable; the counselor would shake, then shout out "saddle, eh!" then howl, while back from the gloom of rude awakening and speedy disappearance, there came no answering sound.

August 16th was a slow march to the south, up and down cross ridges well away from the river bed through the barrenness of rocky desolation, but night placed the Pilgrims in the bleak and forbidding fastnesses of Camp Uncertainty 10,500 feet above the sea and at the supposed base of Mt. Whitney.

From here on August 17th bright and early the Pilgrim Band started on foot to make the final ascent, the first hour reaching 12,850 feet elevation, the second 13,500 feet, and then with a further ascent of about 500 feet, they gained a summit—and lo! it was not the top of Mt. Whitney, but a misguided peak, mistakenly climbed. The temperature of disgust boiled over, the valor of the Pilgrims went down into their boots, and disgruntedly all returned to Camp Uncertainty for a fresh start. This was made at 1 P. M. Up, up, up, through almost impassible chasms, over beetling cliffs where one false step would have opened the gates of death, with dogged persistence and through great tribulation, the very last of the way through the roughest of glaciers, and then—the 15,087 feet high summit of Mt. Whitney was reached and the band of Pilgrims stood higher than almost all the rest of the whole world. To the east, 14,000 feet below them, nestled the town of Big Pine, Inyo County, in the valley of Owens River. Valley and river could be seen for most of their course. Southwesterly lay Kern River with its intricate windings and tremendous detours in its attempt to escape from the mountains. Westerly lay the great plains of the San Joaquin Valley, bounded on the west by the Coast Range. There was too much haze to look beyond this and view the Pacific Ocean, but it was there and to be seen under favorable auspices. Northerly to the horizon stretched away the towering cliffs of the Sierra Nevadas. Underneath the broken rocks upon which they stood every crevice showed layers of solid ice. Nineteen lakes could be counted from this vantage ground.

Near by are two monuments carefully built of stone, the larger about eight feet high, within the crevices of which were many mementos placed as records by those who have scaled this rugged height. Some records were within tin cans, some in bottles. A copper had engraved upon it the names of two citizens of Inyo County. Within a tin can were some Government records, which have been sadly mutilated by vandals. Among them is the following:

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, D. C., July 6, 1881.
[Special order No. 152.]

By direction of the Secretary of War, Paragraph 4, Special Order No. 150, July 2, 1881, from this office relating to Captain O. E. Michaelis, Ordinance Department, was so amended as to direct that officer to proceed from this city via Philadelphia and Pittsburg, Pa., to San Francisco, Cal., and then via Mojave, Cal., to Mt. Whitney, Cal., and there establish a Signal Service Station under such instructions as he may receive from the Chief Signal officer of the army.

By order of GEN'L. SHERMAN,
R. C. DRUM, Adj-Gen'l.

Alpenstocks in great quantity were found at the foot of the climb and were of great service. One after another, turns were taken in carrying the camera and its attachments to the very summit, where perhaps, place and circumstances both considered, the rarest views in the world were taken.

The moment came for returning when the captain faced eastward and said, speaking for all, "Mountains that we love, hail and farewell. Our eyes linger lovingly upon your grateful summits, but our feet may no longer tarry. Unto us it is spoken 'go downward, back to homes and busy cares amid the haunts of men. By your majesty we are awed; in your graceful moods we revel; your varied allurements lift us above all care; in your sunny moments you cradle us in peace; with your storms you rouse our darling; your beauty entrances; your variety delights; your grandeur inspires, but we, Pilgrims of a day, while ye stand forever and forever, above all do envy the certitude of your eternity. Mountains that we love, hail and farewell."

THE END.

At Central Market during this week, Mr. S. Solomon has had hanging in his stall three fine fat cinnamon bears, all young and choice. Stall-fed bear loses much of the flavor peculiar to the wild beast, and is much like coarse grained pork.

Mr. C. A. Loud writes us: "What becomes of our quails?" Answer.—One man brought forty-seven dozens of quail into San Diego on December 7th and sold them for thirty-five cents per dozen. He was out only two days.

An immense cottonwood tree went down the Sacramento, past Colusa, last Saturday morning. Its only passenger was a brown bear that seemed paralyzed with fright. As the tree swept under the bridge the bear saw its chance, and by a rapid swing caught the lower bent, pulled himself up on the railway and trotted off in the country.

The Petaluma Sportsman's Club will be apt to make it sultry for a couple of Italians who have been fishing in the creek with nets and traps. Last Saturday they had a wire trap on the end of a long pole and made quite a haul of catfish, trout and smelt. When they get to fishing a little further up the creek where the black bass are located, the trouble will set in.

The Saturday Globe of Utica, N. Y., publishes a good portrait of Mr. Harvey McMurchy, travelling representative of Mr. L. C. Smith, and with it an interesting sketch of the universally admired sportsman and champion shot. Mr. McMurchy is the projector of the shooting tour to be made of this country, some of the details of which were sent out a few days ago by the Associated Press. An Eastern and a Western team will, in Pullman palace and sleeping cars built for their especial comfort, consisting of five men in each, leave Cincinnati on the 7th of next month on the exhibition tour, which will comprise, among other places these cities: St Louis, Memphis, New Orleans, Houston, Dallas, Austin, San Antonia, El Paso, Los Angeles San Francisco, Sacramento, Portland, Tacoma, Seattle, Ogden, Salt Lake City, Denver, Kansas City, Omaha, Des Moines, St. Paul, Minneapolis, Detroit, Cleveland, Pittsburg, Buffalo, Syracuse, New York and Boston, where the party will disperse with a big blow-out about the 20th of March.

In some of the cities prizes have been offered and will be shot for between the teams. Baseball grounds will be chosen wherever such an arrangement can be made. This is the first trip of the kind ever undertaken. It is the beginning of a series of such contests and it is quite likely that the five men who make the best records on the present trip will be members of a team that will go to Australia and around the world on a two or three years' trip challenging all comers. There is no doubt whatever but that Mr. McMurchy will be one of the successful five as he is known to be one of the two or three best shots in the world.

The teams are to be designated as the Eastern and Western, with dividing lines at Ohio. These are the teams as at present selected:

Eastern team—H. McMurchy, of this city, captain; H. B. Whitney of Phelps, N. Y; W. Wolstencroft, Philadelphia, Pa; W. Perry, Worcester, Mass., and W. Perry of Boston, Mass. The Western team will be composed of C. W. Budd of Des Moines, Iowa, captain; B. Heiket of Dayton, Ohio; J. Stice of Jacksonville, Ill., and John Ruble of Beloit, Wis.

The improvements projected by the Pacific Land and Improvement Company at Ukiah, are progressing rapidly, and the game preserve will soon be an accomplished fact. Mr. T. R. Lucas writes of the dam being built in Robinson Creek Canyon:

The dam has been put down to bed rock at a rocky point in the canyon about two hundred yards below Mr. Lucas' house, at a point where the cliffs come close to the canyon on both sides. It was ascertained last summer, which as all know was a very dry season, that the least flow of water would, if seepage were prevented, be sufficient to work the electric plant. To prevent the seepage a strong, concrete dam is put to the bedrock on the bottom and sides, a distance of 17 feet below the surface, and carried six feet above the bed of the creek. The dam is now over twenty feet above bed rock leaving only a few feet in height to be built. A ledge of very fine sandstone was found a short distance from the dam, and will be quarried out for its completion. The club who have leased Mr. Lucas' place for twenty years as a game preserve, now intend to use this sandstone in building an elegant club house on the place. The members of the club number some of the wealthiest men in California. They will shortly turn loose a lot of Mongolian and golden pheasants.

"The provisions of the game law are finally beginning to take firm hold in Humboldt County. A penalty of $50 is the surest way to bring law-breakers to a realization of the fact that laws are not made to be laughed at. The press of county has given all sufficient warning in this matter. Those who suffer have only themselves to blame.

As a result of the vigilance of Fish and Game Commissioner Smith, E. S. Phillips, merchant at Rohnerville, pleaded guilty before Justice Cloud of having illicit deer skins in his possession. A young man named Elliott, in the employ of Davis & Davis at Fortuna, for attempting to secrete skins of a similar nature, was assessed $50, and the firm last named are under arrest for having such skins in their possession. When dealers who unguardedly purchase deer skins which the law prohibits them from handling are make to know that they are paying the penalty for the vandal and illegal acts of those who kill the deer, an end will be put to the traffic and the unwarranted slaughter of deer will cease. The only recourse the dealer has is to enter complaint in turn against the parties from whom they purchased."

[The foregoing sentences are from the Humboldt Standard published at Eureka, and are most encouraging. If the press takes firm ground against violations of the game and fish laws, the battle will be more than half won.—ED.]

Coyote scalps are worth $15 each in Lake County.

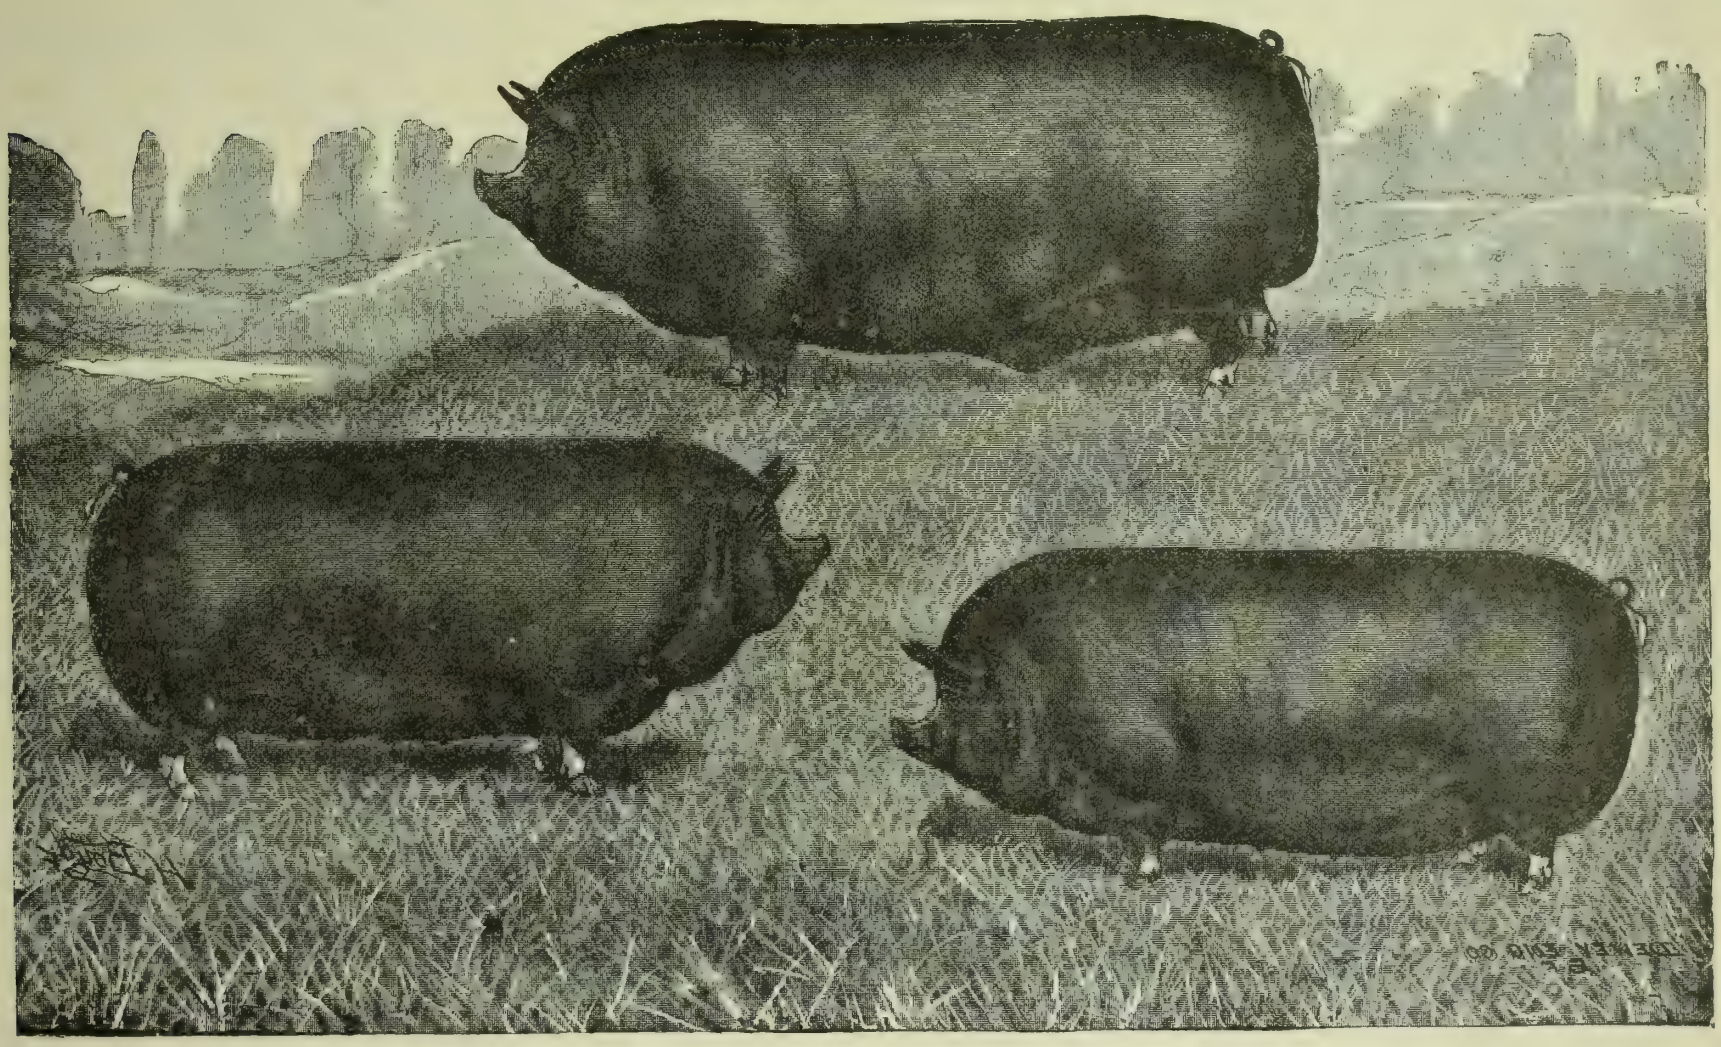
Ortolans and larks are very plentiful in the Paris markets just now, and you may see thousands of these dainty ornithological specimens strung up outside poulterers' shops awaiting the arrival of the cooks or *chefs* of *gourmets*, by whom they are bought largely. The ortolan is generally caught in the fields of Berry and on the plains of Provence and Languedoc. Most of the birds now on view in the shops of poulterers and *marchands de comestibles* are sent up from Provence. Some are first caught in nets, and then placed in cages, to which by their strains they entice their fellows, who are then peppered by persons on the lookout for them, armed with fowling-pieces. In Languedoc the ortolans are usually put when caught into dark rooms, where they are fed and fattened for market.

SWEEPSTAKES, BERKSHIRES.

The above cut, taken from a photograph from life by our artist, is a true picture of three of the family of dishfaced Berkshires, from the famous herd owned by Andrew Smith, Redwood City, Cal. A visit to his ranch, situated near Redwood, will well repay any lover of fine stock. The farm is beautifully located in the foot hills, commanding a magnificent view of the Santa Clara valley and surrounding country, and is admirably adapted for the breeding of fine stock. The proximity to San Francisco, only one hours' ride by cars, brings the stock within easy reach of breeders, and Mr. Smith invites intending purchasers to visit the farm and inspect the stock and judge for themselves. He has without exception the finest herd of Berkshires to be found in America, and as good as can be had in England. He imports yearly from England direct, the best blood that money can procure, from the most fashionably bred herds, and he has now select animals from all the noted families, and by judicious blending of the different strains of imported blood, has established a herd on his farm whose fame is known all over the Pacific Coast as prize winners, and his exhibit at the last State Fair was acknowledged to be the finest ever made in California. He is richly entitled to the honors received.

The boar Model Duke, at the head of this picture, was purchased last summer by Mr. Smith at a cost of $750, and he has never been beaten in any show-ring. He is admitted by all to be the best boar of his age living to-day. He has been bred to some of the famous Sallie and Stumpy sows in the herd, and great results are expected from the crosses. Mr. Smith has three other imported boars, Redwood Duke, Baronet and Peploe, all magnificent animals and grand producers, and all of different strains of blood. He has four separate and distinct families, and can provide purchasers with boars and sows, no kin whatever.

The sow Redwood Sallie II. was bred by Mr. Smith; sire, imported Redwood Duke, dam imported Redwood Sallie. This sow has taken every first premium in her class, and sweepstakes for the best sow of any age for two years in succession; also the gold medal, along with Redwood Duke, for the best boar and sow in the State.



Pandora, the other sow in this picture, represents another strain of imported blood, the dam being imported Queen, one of the finest in the herd. There are six imported sows—all brought over from England by Mr. Smith—in this herd, and twenty young sows—the direct produce of his own importations—all fit to exhibit at any State fair, and for uniform quality, size and standard points, are a credit to any herd.

On this farm, lately introduced, can be seen a small herd of Poland-China, each individual selected from the best herds in Iowa, Indiana, Illinois and Wisconsin. The best that could be found, and out of four entries at last State Fair (all youngsters), Mr. Smith captured four first prizes and one sweepstakes, the latter with the elegant yearling sow Exquisite, who won over sows of any age. We predict as brilliant a success for this herd of Poland-Chinas as has been achieved by Mr. Smith with his unequalled herd of Berkshires.

We also noticed a fine herd of Holstein cattle, several imported direct from Holland; also a small herd of Durhams. Out of these herds, three shipments have been made recently to Japan, and he has orders for Holstein cattle and Berkshire swine for Japan, to be shipped by February steamers, and he states, his orders for fine stock are steadily increasing, showing that shipments already made have given universal satisfaction.

A fine flock of imported Shropshire Down sheep attracted our attention, but time being limited, we did not examine them closely.

We forgot to state that all the stock on this farm which we have referred to, viz., Berkshires, Poland-Chinas, Holsteins, Shorthorns and Shropshire sheep, are all recorded in their respective herd books. All the youngsters shipped from this farm are eligible, and can be recorded on application.

OWNED BY ANDREW SMITH, REDWOOD CITY, CAL.

The Golddust Family.

EDITOR BREEDER AND SPORTSMAN:—At the Palace Hotel one night last week, there were quite a party of gentlemen, horse lovers and breeders, assembled together talking over the merits of different trotting families, and their good and bad qualities. Among others the Golddust family was discussed; as to its merits one gentleman in the party said it was a family of *no merit*, and as a family they had never done anything of interest as producing speed of note. I said to the erudite speaker who had the floor that I thought he was a little mistaken, that it would be for his interest to examine without prejudice, the merits of the Golddust strain. He said that he would like some one to show him their merits if they had any. I said to the gentleman that it was rather late in the evening to go into further details of the merits of the Golddust breed, but as I was perfectly unbiased and unprejudiced about any great family with merit, I would show him that they were a family of great value and that the blood of Golddust was crossing out here and there all along the line, and for good reasons that readily suggest themselves, it will be of interest to examine without prejudice, and state with fairness the case of a horse of which much has been written and spoken, yet with very little definitely known on the subject among horsemen whose views on the subject of breeding in the days of Golddust are by no means the views of this day. Thus the opportunities of Golddust for leaving behind him a distinguished trotting progeny, that in turn would transmit the fine qualities and capacities by such means obtained were of the most limited sort, and the wonder of wonders is that we have preserved to this day a type of horse so derived, as marked in every way as any that can be named, recognized as superior to all other types in its combination of style and beauty of the first water, of courage and endurance, and the outcome of tested speed that under the circumstances is of all perhaps the most surprising to many horsemen. In early days when trotting was in its infancy, Golddust had fame equal to that of any Kentucky trotter. A real knowledge of the Golddusts is now confined to one corner of Kentucky, and that, until recently, a corner little known in connection with trotting horse breeding. The corner of Kentucky referred to is Jefferson County. Here Golddust lived and died, and here his blood has been given the only opportunity it has had anywhere under the present advanced ideas of breeding. It is not necessary here to go into further details, but I will show the great value of the blood of Golddust—blood that in the face of strong prejudice, backed by the money power that is only too often used to push its advantage too far, has forced its way to the front. It is frequently overlooked that the Golddusts are not really a separate class, but only a branch of the great Morgan family; a family that taken all in all, is usually accorded foremost rank among the roadsters of this country, and exists in two noted stallions of this day, who stand at the head of two great breeding farms at a service fee of $500 each. This is better understood in the East than here. Generally the Golddusts have, from this Morgan point of view, been much and favorably discussed, and there the best representatives of the Morgan blood is in demand. In commanding relationship it crops out here and there all along the line. The stud career of Golddust was a short one, foaled as he was in 1855, and with his death occuring in 1871, he passed away in his prime. Of the years in which it was possible for him to do stud service he lost five years during the late war, and it is authoritatively stated that the total number of foals got by him was under two hundred and fifty. Few of these were out of mares of any note in breeding and yet in Chester's Record it is shown that twenty-three of his get have records of 2:40 or better. His direct contributions better than 2:30, Rolla Golddust 2:20, Indicator 2:23, Fleety Golddust 2:20, Tennyson 2:30, Lucille Golddust 2:16¼, etc. The best son of Golddust is Zilcaadi Golddust 2:25, the sire of Fanny 2:25, Estell 2:29, Tennessee 2:30, Whirlwind 2:24, Dorsey Golddust sire of Arthur 2:28, Fancy Golddust sire of Fred Golddust 2:27¼, Forest Golddust sire of Standard Bearer 2:29, Lexington Golddust sire of Sir Roger 2:23¼, Glenco Golddust sire of George W. Davis 2:26, Golddust 17 sire of T. L. D. 2:22, Messenger Golddust sire of Harry Golddust 2:29, Sam Golddust sire of Bay Diamond 2:24, Golddust Jr. sire of James H. 2:21, Brilliant Golddust sire of Billy G. 2:21 and others, the son's produce on, as your readers will see. The female descendants of Golddust in this relation is also of interest. From the daughters of Golddust have come Lucilla's Baby 2:23, Isabella 2:25, Farce 2:29, Romance 2:29, Orient 2:30, Lady Jerauld 2:24, Gossip, pacer 2:18, Jessie Hammond 2:23, Pathfinder 2:25, Sprague Golddust 2:22. Grandaughters of Golddust are the dams of Rosalind Wilkes 2:14½, trial 2:12, John W. 2:22 Emery's Alexander 2:25, Fiction 2:26, Four Corners 2:20, Bracelet 2:26, General Wilkes 2:23, Reference, fifth heat, 2:18, Justina 2;18, Bashaw Golddust sire of Johnston, pacer, 2:06¼. So you can see that the blood of Golddust breeds on and produces a high rate of speed which such flyers as Rosalind Wilkes 2;14, Gossip Jr., pacer 2;14, Johnston 2;08¼, Four Corners 2:20, Reference 2;18, and others which have the blood of Golddust in their veins, goes to prove to me that there must be merit in the family and I am after the good things of this earth.

Yours, SAMUEL GAMBLE.

SAN FRANCISCO, Dec. 16, 1889.

The Hon. James White, the Australian millionaire, is in very bad health. He has several entries in the English Derby for 1890 and 1891, being very anxious to win in the mother country.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent. discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff.

San Francisco, Saturday, Dec. 28, 1889.

New Year Greeting.

The year 1889, the last of its own decade which ushers in the opening year of the last decade of the century, is a year that will be long remembered by those living, and will be recorded as a year of extraordinary events and most extraordinary disasters, of unprecedented calamities. Shipwrecks in which hundreds of lives were destroyed occurred in the first month of the year. From bad to worse the reckoning progressed until the horrible culmination at Johnstown, in which thousands met death by flood and fire, and millions of property was wrecked The saddening chapters of disasters and holocausts continued. From every portion of the globe have come reports to mark the expiring year of the decade as one of sorrow. And in our own State there has occurred a season which is phenomenal and without parallel in the memory of that universal authority—the oldest inhabitant. It *is* the "racing season" in California. Since October the rains have poured, out of all precedent, beyond the measure of past experience.

But the full record of the year does not embrace gloom only; it has its bright and gratifying occurrences to note upon the tables of Time. In the round world view, Brazil has cast off empire and monarchy and donned the republicanism which much assimilates with that of the United States. Stanley and Emin Bey have announced the closing steps to the formation of systems in Africa, which shall in good time redeem that continent to the benefits of civilization. The Paris Exposition was an illumination of enlightened nations to brighter blaze the paths to accomplishments of superior science with the arts combined, and America's Edison, brilliant beyond the conceptions of Franklin and of Morse, has further astounded the world with his marvellous training of electricity to the uses of mankind.

The BREEDER AND SPORTSMAN has, to the chosen fields in which its course is directed, surpassing events to put upon the record. California has proved that the palm of excellence is her own without successful disputation. El Rio Rey, Regal Wilkes, Sunol and Faustino have made the lines which trace their distinctive triumphs as uncontested highways to the world of the turf. Never in the annals of racing in any country was there such a smashing up of records as was made at the Bay District track the day on which the breeding farms of Palo Alto, San Mateo and Pleasanton demonstrated their respective entitlement, in the distinctive performance, to the championship of the trotting turf. Robert Bonner has subscribed to the higher doctrine of the California equipment and system by his visit here, and his noteworthy purchase of Sunol at a price beyond that ever before given for a trotter of her sex, and by his great enconiums of California breeding, training and worth, since his return to New York.

Grand as have been the achievements of the California horses during the year, it is not an extravagant prediction that during 1890 there will be surpassed, at trials in the States eastward and at home. And in good time will come the invincible conviction with accomplished horsemen that California is best adapted of any country to the perfection of horses for speed and endurance, the qualities of the equine. It is further a safe prophesy that before the expiration of the closing decade of the century a California bred trotter will demonstrate that a full mile can be trotted in two minutes. Some are so sanguine of consequences, in the light of events of the year, which have hammered down old beliefs and astounded even the optimistic, as to express the opinion that the mile will be trotted below the two minute mark. If it can be, the BREEDER AND SPORTSMAN feels contented in the thought that the marvel will be to the record of a California trotter.

In happenings in the fields of noble sport apart from the turf, the year has not been uneventful.

Another year will bring in the regular biennial session of the State Legislature, and without doubt that body will so amend the Game laws as to actually protect every species of game from the depredations of those who slaughter and destroy without care or conscience. Meantime the game clubs throughout the State and the lovers of good sport in every community can do excellent service in detecting transgressors and bringing them to justice, which will lead to the needed reformation of the laws.

In the general wind-up of the year, the BREEDER AND SPORTSMAN notes more for congratulations than for mourning, and precedes the initial day of 1890 with a hearty "Happy New Year" and as Tiny Tim wished, "God bless every one!"

The Roy Wilkes Case.

On the 16th of last October a free for all pacing race took place at Lexington, Ky., under the auspices of the K. T. H. B. A. It was a very sensational affair, as on the following morning every newspaper in the United States that receives telegraphic despatches contained an account of how Roy Wilkes had been pulled in the two first heats, that Robens had been taken out of the sulky, Ed. Geers put up, and that the stallion had finally won, but that the owner, L. A. Davies, was fined $1000 and Robens $500. When the Eastern sporting papers arrived with an account of the race the major portion of them simply stated that the fine had been inflicted and made no comments. The Breeders' Gazette, however, had an able article which supported Mr. Davies in the premises and proved rather conclusively that the fine was placed on the presumed offenders, not for pulling the horses, but for laying up two heats. Being so far away from the scene of action, it was impossible for us to speak knowingly of the circumstances, but within the past week we have seen most of the testimony which will be produced before the Board of Appeals. When the fine was imposed Davies at once entered an appeal as follows:

"L. A. Davies, of lawful age, being first duly sworn, deposes and says that he has good and sufficient grounds, to wit, innocence, for an appeal, and does hereby protest the application of any money now in the hands of the National Association upon a certain fine put upon him by the Kentucky Trotting Horse Breeders' Association of Lexington, Ky."

What could have induced the judges to inflict such a penalty is beyond our knowledge, but it must have been on an equality with the magistrate who said to a prisoner, "I do not want to hear your case. Six months." The appellant will present a very strong affidavit in regard to the matter, in which is shown all the work given the horse for three weeks prior to the Lexington race; attention is called to the state of the weather prior to the 16th; the horse had travelled continuously for sixty hours before arriving at Lexington; the orders given Robens are clearly stated, to win in straight heats; the amount of money played in the pool box the night before the race is stated, and also the amount hedged out after the second heat; in fact, there is a plain statement which any one will be able to understand. To corroberate the testimony which will be given by Mr. Davies, there are also affidavits from the ex-president of one of the prominent Western associations, one from the secretary of a well known driving park, one from a friend of Mr. Davies who went from Chicago to play money on the race for himself and the appellant; one from the gentleman who hedged out the Davies money and the attendant circumstances; one from the cashier of the Mutual pools, and one from the cashier of the auction pools. There is also an affidavit from a gentleman who overheard the instructions given by Davies to the person who came from Chicago to bet money on the result, and there is also a strong affidavit from one of the owners of the pool privileges. The strongest testimony, however, is that presented in the affidavit of Ed. A. Tipton, Secretary of the Association, who gives direct evidence in favor of Mr. Davies. In fact, taken all in all, it is almost a foregone conclusion that Davies will be exhonorated from blame, and the fine remitted. All of the witnesses testify to the excited state of Davies after the second heat, and two of the parties assert that, acting under the orders of Davies, they tried to secure the services of another driver to handle the horse in the third heat prior to the time that he was called to the stand. It would be unjust to give the evidence in full, but it can be safely asserted that Mr. Davies will be relieved from any odium that may attach to him at present from those who do not understand the merits of the case.

The St. Louis Jockey Club.

We have to call attention to the closing of entries for the next meeting of the St. Louis Jockey Club, which take place on January 15th. The Directors have prepared an unusually good programme, particular attention having been paid to the two and three-year-olds. The two-year-olds have a large number of races assigned to them and there is $8,900 in added money for the youngsters to run for, while the three-year-olds are even more liberally dealt with, $10,300 being given to them. Quite a number of the stakes are still open, and those in which there is a chance still to enter, are advertised in another column. The entries from California should be of a liberal character as there are a number of stables going East in the spring, and this will be a splendid opportunity to break the journey and assist in paying expenses. Read the announcement carefully and make entries.

BILLIARDS.

A few friends of Prof. J. F. B. McCleery contributed money enough to purchase an elegant watch and chain for the celebrated billiard expert, and last Tuesday evening they assembled at the Baldwin Hotel, W. H. Barnes acting as spokesman for the party. The presentation speech was as follows:—

Life is somewhat like a billiard table. It has its "angles," its "corners," its "frames," its "spots" and its "counters."

Mankind is continually "stringing for the lead." Individuals strive to "push" their way, and sometimes, regardless whether the stroke is "fair or "foul," "force" themselves to the front to gain the confidence of the "masses."

We "follow" our various pursuits, and often endeavor to "draw" custom, approbation or applause.

Frequently our most careful calculations are upset by a "miscue;" our warm aspirations get "frozen" when we least expect it, and we have to commence a "new lead."

From time immemorial some "kisses" have been typical of treachery, disappointment and betrayal, and in the game of billiards, if not carefully arranged for legitimately, the "kiss" is sure to spoil the even tenor of "the run."

I might enlarge upon this theme and trespass upon your time by ringing charges upon the technical terms of the scientific, beautiful and "winsome" game of billiards. But such is not the object for which I have asked your attention for a few moments.

For some years in this city there has been a growing taste for this healthy and commendable game. No residence now can be said to be complete without a billiard table. It is a source of recreation and pleasure alike to old and young, to parents and to children. It receives the unqualified endorsement of the thinking mind, and the greatest physicians, such as Sir Astley Cooper of England, and that renowned American, S. Marcy, have given it their most hearty approval.

But it will be conceded that the most meritorious inventions, the best discoveries, and even those matters necessary and useful to the race, have to be introduced and earnestly presented by some one, and here I come to the point of my remarks.

I feel confident that no exception can be taken to the assertion that no one has done so much to introduce, improve, awaken an interest in and bring into general and favorable notice the noble game of billiards upon the Pacific Coast as Professor J. F. B. McCleery.

In this direction his enterprise has been persevering and his energy indomitable. Regardless of time, money and toil, and often at a sacrafice of all three, he has presented his attractive science, until to-day scores of ladies and gentlemen in San Francisco play excellent games, and the public at large recognize the value and beauty of this healthful and agreeable exercise.

Possessed of a wealth of knowledge and skilled by experience in this pleasant art, it has been a pride and pleasure for him to communicate it to his pupils and friends, and recently in an admirable book upon the subject, to throw open this fount of information to the world.

It is said that republics are ungrateful and unappreciative, but I do not think that the remark is true of American citizens, as a rule, and especially those of San Francisco.

Professor McCleery, a number of those familiar with your work, courtesy and painstaking efforts have requested me to present you with a token of their recognition of the same.

I will not allude to its intrinsic value or enlarge upon its beauty. These speak for themselves. It is a kindly Christmas gift, with the good wishes of many on this natal festal eve.

If bad "breaks" occur in life, and unexpected "freezes" come, as they will in this pilgrimage, may this be a talesman to give your thoughts the proper twist that will overcome all emergencies.

Accept this friendly token as an evidence of regard and esteem; as a reminder that there are those who have a kindly interest in you and yours.

May this little incident serve to inspire you to still greater effort in the years that may be before you, and be long remembered as a sunny spot in the journey of life.

And now, go forward, with our best wishes for your success, to play your part in the great game to which all living are engaged.

I know of no better words with which to conclude than those you give your pupils on Page 31, of your book.

Don't—Lose your temper.
Don't—Spare the chalk.
Don't—Play on the ball farthest away.
Don't—Keep your feet together.

DON'T NEGLECT

To send in Your ENTRIES for the Breeder and Sportsman,s

FUTURITY STAKE.

Closes JANUARY 1st, 1890.

Names Claimed.

I claim the name of Echo for bay horse colt with black points, two hind feet tipped with white and small white crescent in forehead, foaled March 1, 1889, by Judge McKinstry, he by Grinstead, out of Katy Pease, dam Lottie L. by Wildidle, her dam Vixen by Belmont. E. F. FALLON.
Hollister.

I wish to change the name of Day Time to Day Dawn for the chestnut colt by Dawn, dam Gazelle. P. J. SHAFTER.

The Howe Scale Company.

An advertisement elsewhere in the paper announces that The Howe Scale Company at 411 and 413 Market street, San Francisco is prepared to furnish scales for weighing livestock, seed, feed, etc., and also Flake's Vanes made of copper and gilded with pure gold leaf. The Howe Scale is in use at Latonia and most of the other Eastern tracks for weighing jockeys and drivers. The fact demonstrates their excellence and superiority.

"Knapp" McCarthy of Los Angeles, considers the Boyce Wash the finest preparation for a sore horse in the market.

ATHLETICS.

Athletic Sports and Other Pastimes.

Edited by Arphippus.

SUMMARY.

The rain still continues, but as we go to press the indications for a dry spell are very favorable.

The organization of the Alpine Athletic Club a couple of weeks ago, was a move in the right direction and the Olympic and University Athletes are by this time cognizant of the fact that three Richmonds will be in the field on May 30th, instead of two. At the present time it would be hard to say which of the three clubs will come out first, but from an unprejudiced point of view it should be safe to assert that while the older clubs may continue to hold their own, the new organization, owing to all the inducements which it offers to its members. will daily grow in the favor of the athletes, so that by the date of the next championship meeting the Alpine Amateur Athletic Club will have enlisted in its services more than fifty per cent. of the champion amateur athletes of the Pacific Coast. Therefore the other two leading clubs would have but fifty per cent. of the athletes between them which fact would imply that the Alpine Club should have a walk over for the pennant while the University and the Olympic Clubs would have a hard fight for second honors.

Like the athletes, the oarsmen are awaiting the dry weather that they may resume practice.

The wheelmen are talking about holding a monster tournament in the Mechanics' Pavilion.

RUNNERS, WALKERS, JUMPERS, ETC.

Cooley thinks that he will not only beat Cassidy in the mile run at the championship games, but that he will also lower the coast record.

James Sexsmith, the champion pole vaulter and general athlete, has joined the Alpine Club.

We have it on reliable authority that the champion long distance runner of America has also joined the Club.

P. F, Gafney has fully made up his mind to train properly for the next games. He is determined to prove himself worthy of the organization which he helped to found.

Scott, Jordan, McArthur and several other of the old time runners will again go into training in order to help the club out on May 30th. Had the Alpine Club not sprung into existence, the Olympic Club would have had an easy battle for first honors at the Championship meeting.

The Harbor View Grounds will be ready for use by January 15th and the Alpine boys will have an excellent track to train on. The track will be put in fine condition, a wire fence will be built around the inside. The space enclosed by the track will be levelled off and nicely laid out for hammer throwing, shot putting and jumping, Large and comfortable dressing and bathing rooms will be erected, and in fact everything necessary will be done by the club for the comfort and accommodation of the members.

Owing to the rain, the track at the new out-door grounds of the Olympic Club will be in very bad shape for the Washington Birthday games. By May 30th, however, it will be in condition for record breaking.

THE WHEELMEN.

In this line of athletic sports is dull. The wheelmen have been unable to use their machines for some weeks past on account of the same old chestnut, the rain. With the beginning of fine weather may be expected the beginning of a prosperous wheeling season. During the next year it is generally anticipated that more interest will be taken in bicycling and that rival clubs will join hand in hand in an effort to boom the pastime on the Pacific Coast.

The Oakland Bicycle Club of '89 is determined to make itself known during the next year. Its membership is daily increasing.

It is proposed by the Bay City Wheelmen to hold a monster tournament in the Mechanics' Pavilion sometime within the next two months. The newly organized Alpine Amateur Athletic Club also intends holding an indoor athletic meeting within the same space of time, and as the suggestion has already been made that both clubs unite and have one monstrous tournament, we heartily approve of the plan and only hope that proper arrangements can be made for the meeting of the two organizations. The Bay City Wheelmen may hope for success through its well known name, while the large membership of the Alpine Club would prove a great help as far as the financial success of a meeting is concerned.

AT THE OARS.

Ed Finley, C. Pless, H Pless and Johnson Hardy, who aspire for the amateur championship in 1890, went to the boat house of the Ariel Club on Sunday and after waiting several hours for the rain to stop, returned home somewhat disheartened.

Owing to the damage by the recent storm to the Ariel float, and to the possibility of the Railroad Company removing the boat clubs from Long Bridge, the chances are that the Ariel Club will try to establigh its headquarters close to the Alameda mole. The S. P. Co. should try and induce the club to make the change, for in the long run it would prove profitable to both.

The next meeting of the Pacific Rowing Association will be held at 818 Howard St., on Wednesday evening, January 8, 1890.

Charley Long, the single sculler of the Pioneer Rowing Club has been laid up for the past week with a complication of complaints. Fears are entertained that he will never regain his former good health and speed in rowing.

Several prominent members of the Ariel Rowing Club have joined the Alpine Athletic Club, and will try to establish an amateur champion crew at Harbor View.

CLUB JOTTINGS.

In about a week the programme of events to be contested at the opening of the Olympic Club's new grounds, February 22d, will be issued.

Now that the P C A A A is a member of the American Athletic Union, we hope the programme committee will decide to strictly adhere to the A A U championship list of games.

It is thought that the Golden Gate Athletic Club will not apply for re-admission to the P C A A A, at the end of the present term.

Last Saturday evening, December 21st, the Y. M. C. A. gave a very interesting athletic exhibition at its Gymnasium Hall, 232 Sutter street. Over 200 persons were estimated to be present. The Gymnasium was tastefully decorated with ferns, draperies and lanterns, which gave to it an elaborate appearance.

The programme consisted of performances on the horizontal bar, the flying rings, the parallel bars, the horse and fencing. The participants were Messrs. E. Barr, Will Henry, W. Clinton, E. Cherry, J. H. Harrison, S. Edwards, L. Poltenghi, J. Graham and F. Rogers. all of whom were loudly applauded for the graceful and difficult tricks which they did.

Frank Hart, the champion club-swinger of the Pacific Coast, gave a very interesting exhibition of club-swinging, for which he received many plaudits from the spectators.

The evening's entertainment ended with a tug-0f-war between teams of six, both of whom were successful in gaining a pull.

JOTTING FROM ALL OVER.

About two thousand persons were present at the annual winter meeting of the Twelfth Regiment Athletic Association, held at the Armory, New York City, on Wednesday evening, December 11th. The different events, nearly all of which were highly interesting, resulted as shown in the following summary:

Sixty yards run—F. J. Lee New Jersey Athletic Club, 1ft, first; W. H. Morgan, New Jersey Athletic Club, 6ft, second. Time, 6 4-5s.

Four hundred and forty yards run—E. B. Barnes, New Jersey Athletic Club, 3ft, first, in 56 4-5s; F. S. Greene, New Jersey Athletic Club, 16yds, second.

Half mile run, novices—G. Sory, Allerton Athletic Club, scratch, first; E. Billings, scratch, second. Time, 2m 17 1-5s.

One mile walk—J. B. Keating, Pastime Athletic Club, scratch, first, in 7m 12s; C. Wolf, Pastime Athletic Club, 3s, second.

Two mile bicycle race—F. Sterner, Lenox Wheelman, 80 yds, first; J. F. Boreland, Brooklyn Bicycle Club, 70yds, second. Time, 6m 37 3-5s.

Two hundred and twenty yards hurdle race—J. Lally, Pastime Athletic Club, 10yds, first, in 29 4-5s; Sarre, Manhattan Athletic Club, 5yds, second.

Obstacle race—R. G. Woodruff, New Jersey Athletic Club, scratch, first; W. A. Wade, New Jersey Athletic Club, scratch, second. Time, 1m 23s.

One thousand yards run—C. Britton, American Athletic Club, 25yds, first; P. D. Skillman, New York Athletic Club, second. Time, 2m 30 3 5s.

The Ninth Regiment Association held their annual winter indoor sports at the armory, New York City, on Friday evening, Dec. 13th, and they were witnessed by the customary large crowd, a goodly portion of those present being ladies. The feature of the evening was the performance of C S Busse and C L Jacquelin, in creating a new record at their specialty, three legged racing.

SUMMARY.

Sixty yards run, open to members of the National Guard—First heat: H Barr, Ninth Regiment, 5ft, first, in 7 1-5 s; P Brower, Forty-seventh Regiment, 3ft, second. Second heat: C L Jacquelin, Seventh Regiment, scratch, first in 7 3-5s; T Rauschkolb, Ninth Regiment, 6ft, and C S Busse, Seventh Regiment, 6ft, dead heat for second place. Final heat: Busse first in 6 4-5s; Jacquelin second by 6in.

Four hundred and forty yards run, members of the Ninth—W R Dawson, Company D, 5yds, first in 1m 9s; G L Walker, Company K, scratch second.

Two hundred and twenty yards hurdle race, National Guard—C S Busse, Seventh Regiment, 16yds, first in 32s; C F Bostwick, Seventh Regiment, scratch, second.

Two mile run, members of the National Guard—W S French, Seventh Regiment, 55yds, first in 10m 42 3-5s; A S McGregor, seventy-first Regiment, 20yds, and J D Lloyd, Thirteenth Regiment, scratch, dead heat for second place.

Half mile run, open to all amateurs—First heat: E Hjertberg, New Jersey A C, scratch, first in 2m 20⅘s: G Miller, Prospect Harriers, 17yds, second; A Baier, Pastime Athletic Club, 24yds, third. Second heat: C M Raymond, Corinthian Athletic Club, 7yds, first in 2m 19 3 5s; W Kuhlky, Prospect Harriers, 7yds, second; G Fitzgerald, Star Athletic Club, 20 yds, third. Final heat: Hjertberg first in 2m 13 2-5s; Baier second.

Tug of war, National Guard, limit 550lbs—Company B, Seventy-second Regiment, defeated Company G, same regiment, by 7in.

Tug of War, open to all amateurs, limit 550 lbs—Acorn Athletic Association defeated Halsey School team by half an inch; Berkeley Athletic Club defeated Company E, Ninth Regiment, by 5in, and then won the final pull by 3ft 1im.

C S Busse and C L Jacquelin then made a successful effort to break the 50yds three legged record, covering the distance in 6⅘s.

Five miles professional race between F V Torres and R C Chadsey of the Ninth Regiment—Chadsey won easily in 30m 10s.

Sack race, open to members of the Ninth—W H Ebrman, Company F, first in 20s; E G Morrissey, Company F, second.

W H Gilmore and R Duval, both of Chicago, Ill., will shortly undertake the task of walking from New York City to the capital of Brazil, S. A. What next?

A trophy valued at $500 will be given to any athlete in the world. not barring Sandow, Samson, Cyclops, Atilla or Apollo, who can lift the "Police Gazette" champion dumbbell weighing 1,000 pounds.

The following are the rules and conditions to govern the competition for the Police Gazette champion dumbbell:

Rule 1—The competition is open to any man in the world, professional or non-professional.

Rule 2—Competitors must only use one hand, and the dumbbell must be lifted fairly one foot from the ground.

Rule 3—There will be no restrictions as to the number of trials, nor any limit to the number of times the competitor shall make an effort to lift the Police Gazette champion dumbbell.

Rule 4—All trials must take place at the Police Gazette office any day in the week, except Sunday, between 9 A. M. and 3 P. M.

Rule 5—All parties who desire to compete for the $500 prize offered by the Police Gazette must send in their names 12 hours before the time they intend to make the trial.

Rule 6—The competitor who lifts the Police Gazette champion dumbbell will be awarded a medal valued at $500, and will also be presented with the dumbbell and title of champion dumbbell lifter of the world.

Rule 7—Judges and referee will be selected from the sporting reporters of the New York city newspapers.

William O Conner offers to row any man in the world for $2;500, or $5,000 a side. Naturally it would seem that he is entitled to the title of champion since the death of Searle, but many are of the opinion that he cannot fairly claim the title. There are a couple of men in the world to-day who would not be afraid to meet O'Connor in a single-scull race but who, if Henry E. Searle still lived, would not attempt to aspire for championship honors. There is one thing certain and that is that William O'Connor, champion oarsmen of America, will be compelled to fight for the championship of the world before he can legitimately claim it.

The Eastern prize fighters are beginning to realize that California has had a surfeit of their ability, hence the tide of pugilistic emigration westward daily becomes less.

The Alpine Amateur Athletic Club was permanently organized on Friday evening, December 20th. The meeting was held at 539 California Street. After the Constitution and By-Laws were adopted, the following officers were elected to serve for a term of six months: President, M. C. Gity (unanimously); 1st vice-President, T. J. Cunningham; 2d vice-President, F. M. Howard; Treasurer, H. O. Farrell; Recording Secretary, P. N. Gafney; Financial Secretary, Charles Vultee; Corresponding Secretary, E. P. Moody; Sergeant-at-Arm, James Sheehan; Executive Committee, Richmond J. Lattrenger, George Armbruster, E. Sullivan.

There were two candidates nominated for the office of Treasurer, and the election in this case was very exciting. On the first vote the result was a tie, each man receiving forty-four votes. On the second count the result was forty-five for Farrell against forty-three for E. Sullivan.

The Charter roll was closed with about 150 names.

Many of the best athletes on the coast joined the club, and several more are expected to follow suit. The Committee on Training Grounds reported that Harbor View had been secured. The place will be ready for use by January 15th. Games, open only to members, will be given there about the second week in February. The club will also try and make arrangements for the holding of a monster indoor athletic meeting in the Mechanics' Pavilion in March. The Committee on Club Rooms and Gymnasiums reported that the new building on Tenth street would not be ready until the end of January.

The Committee were empowered to rent temporary rooms.

The meeting adjourned to Friday evening, December 27th, at 839 California street.

The Pool Rooms.

The pool-room business of the city was never in a more flourishing condition than at present, yet the proprietors of the turf exchanges are not happy. There is a general howl of complaint all along the line. While the Legislature was in session a year ago the existence of the pool-rooms was threatened, but the proprietors were not nearly so badly frightened as they are now. The factors that have now conspired to squeeze them are the Western Union Telegraph Company and the correspondents at the track. "The squeeze has reached such proportions," said a prominent pool-room man yesterday, "that we will have to close up or go broke: Until a short time ago the services of a track correspondent were $5 a day, and the money was collected for him every day by the Western Union. A short time ago the correspondents hoisted their wages to $10 a day, and as they controlled the privileges and had an air-tight monopoly, we had to submit or quit. Nearly all the rooms takes three sets of races. This week we have Guttenberg, Clifton, and Birmingham, and this means $30 a day for each room for correspondents. Then come the Western Union tolls. The company has a monopoly of the racing services, and they make us pay about five times what it is worth. The telegraph tolls in a room taking three sets of races is $60 a day, when a couple of years ago it was about $30. In commercial affairs the merchant pays the telegraph company for the messages, but he does not pay the operator. The Western Union not only collects five prices for the race service it furnishes, but compels us to employ and pay operators. The fact of the matter is, we are all doing merely a commission business. Nearly all the money taken in by the pool-rooms is handed over every day to the telegraph company. The public may win and lose, and we frequently win and lose a great deal; but the telegraph monopoly has a double-breasted cinch on the whole business. One illustration will show the greed of the monopoly. Two bookmakers, who have been conducting separate pool-rooms, decided to occupy the same room and cut off one race service. Then the telegraph company raised thunder and threatened to cut off the room. This system of bulldozing has been resorted to a number of times, and nearly always with success."—St. Louis Republican.

ROD.

Opposed to Dynamiting.

EDITOR BREEDER AND SPORTSMAN:—For Heavens sake don't advocate the destruction of the inferior fishes by the use of explosives. It would open the way for the advocates of those destructive agencies to the ruthless slaughter of the finer tribe, under the pretense of killing suckers.

Especially would this be so in Napa County, where the volume of water in the streams is not sufficient to permit trout to readily pass from pool to pool, as suggested by Mr. C. C. Sherman, and again our experience (and we are not without some experience from actual observation) is that trout as a general thing do not leave the pool in which they are lying upon being alarmed, but immediately hide under the nearest object which offers them shelter, while the indifferent suckers would lay in plain sight, yet the killing of the one would result in the destruction of the other.

As to the suckers eating the eggs of trout and other fishes, it is no new thing but has been going on for ages without any noticeable depreciation of the better class of fishes from these causes, and it is exceedingly doubtful if the eggs that are eaten up in this way would ever be hatched or matured, but are simply those that are drifting from the spawning beds down the streams.

I am not an expert on trout or their manner of spawning, but it is exceedingly doubtful in my mind if the sucker was ever known to ferret out and devour trout eggs that had been properly deposited and cared for on the spawning beds according to Nature's laws.

This is not an appeal for the sucker, but it makes me shudder to think of the inevitable result if his destruction is permitted and advocated by the use of explosives.

WM. WEST.

NAPA, CAL., Dec. 21, 1889.

Chief of Patrol F. P. Callundan is doing grand work in stopping the stealing of small fish by Chinese and others. On Thursday of last week four men were convicted and fined $150 each by Judge M. H. Bailbache at Martinez, making an aggregate of about $2500 fines imposed at Martinez during the sixty days last passed. All of those convicted in Contra Costa County have gone to jail rather than pay their fines, but as soon as the weather clears and the prisoners are incited to work upon public improvements it is probable they will pay up in preference.

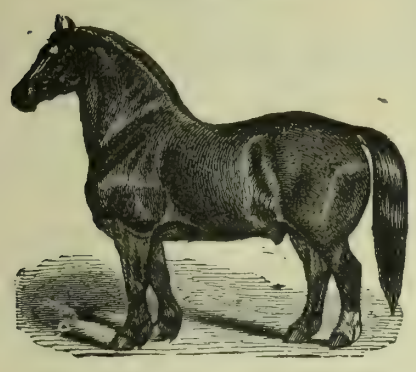
Highland Farm,

LEXINGTON, KY.,

Home of Red Wilkes.

Standard-bred Trotting Stock

For Sale,



Sired by Red Wilkes, Wilton, 2:19¼; Allandorf and Sentinel Wilkes, out of highly bred Standard Mares of the most fashionable blood of the day.

SIDNEY, 2:19 3-4.

At Eight Years of Age Sire of the following Fastest on Record:

FAUSTINO, yearling stallion, record of the world	2:35
FLEET, fastest yearling record in 1888	2:36
FLEET, fastest two-year-old filly in 1889	2:24
GOLD LEAF, fastest four-year-old Pacing record in the world	2:11¼
ADONIS, fastest three-year-old Pacing Gelding in the world	2:14¼
ADONIS, four-year-old Gelding Pacing record	2:14

—Also the Sire of—

LONGWORTH, four years old	2:19
SISTER V., four years old (trial 2:23)	2:27
SANTA RITA	2:39
MEMO, two-year-old (three-year-old trial 2:20½)	2:49

And many others.

SIDNEY is the sire of Faustino 2:35, and Fleet 2:36, the two fastest yearlings the world has ever known, and the slowest yearling is faster than the great Electioneer's fastest.

Terms, $250, with usual return privileges, for a limited number of approved mares. Book rapidly filling.

SIMMOCOLON, Four-year-old, 2:29 1-2.

Trial, 2:24; Half Mile in 1:08; Quarter in 33 1:2 Seconds.

Chestnut Horse, foaled 1885.

SIMMOCOLON.

- Simmons 2774 — Sire of Bon Bon, 4 y. o. rec., 2:26, Raymon, 4 y. o. rec., 2:27, Black Storm, 3 y. o. rec. 2 27¾, and six others with records of 2:30 or better.
  - George Wilkes 519 — Sire of 65 in 2:30 list; Sire of 11 dams of 12 in 2:30 list
    - Hambletonian 10 — Sire of 41 in 2:30 list; Sire of 107 sires of 567 in 2:30 list; Sire of 44 dams of 50 in 2:30 list
    - Dolly Spanker
  - Black Jane — Dam of Rosa Wilkes, 2:18¼; Dam of Simmons, 2:25
    - Mambrino Patchen 58 — Sire of 14 in 2:30 list; Sire of 21 sires of 37 in 2:30 list; Sire of 24 dams of 28 in 2:30 list
    - Lady Stanhope
- Colon — Dam of Simmocolon, 4 y. o. rec., 2:29½; Dam of Patchmore, 2.32½
  - Strathmore — Sire of 27 in 2:30 list; Sire of 6 dams of 8 in 2:30; Sire of 3 sires of 3 in 2:30
    - Hambletonian 10 (Same as above)
    - Lady Waltermire — Dam of Marshall Ney
  - Coral — Trial at 2 years, 2:30; Dam of Coralloid, 2:29½
    - Clark Chief 89 — Sire of 6 in 2:30 list; Sire of 9 sires of 27 in list; Sire of 11 dam with 11 in list
    - Colon — Dam of Caliban, sire of 3 in 2:30 list

As will be seen, Simmocolon is by a performing and producing son of George Wilkes, 2:22. He has back of him three producing dams, and combines the blood of the great sire George Wilkes handsomely blended with the blood of the greatest broodmare families. On his dam's side Mambrino Patchen Strathmore, Clark Chief and Clay. A fine individual himself, pure gaited and very fast.

Terms, $150, with usual return privileges, for a limited number of mares. Season to close JUNE 15th, when he will be prepared for track purposes Pasturage $5 per month. Reasonable charges if fed hay and grain. Best of care taken of mares, but positively no responsibility assumed for accidents or escapes. For further particulars address

G. VALENSIN, Pleasanton, Cal.

The Trotting Stallion

Silver Bow

Will make the season of 1890 at the Oakland Race Track.

Pedigree,

SILVER BOW, 2 y. o. rec., 2:37. Robert McGregor 647, 2:17¼

Sire of
- Major Edsall, 2:11, 2:29 — by Harris' Hambletonian 2.
  - Alexanders's Abdallah 15 — Sire of Goldsmith Maid, 2:14.
    - Hambletonian 10, sire of Dexter, 2:17¼
    - by Young Patriot
  - Bishop's Hambletonian
  - The Munson Mare
- Bonnie McGregor 2:13¾
- Earl McGregor, 2:21¾
- Mac D. 2:30
- McGregor Boy, 2:29½
- Mark Time, 2:30
- Roxie McGregor, 2:20¾
- Nancy Whitman, 2:30¼
  - American Star 14
    - Stockholm's American Star
    - Sally Slouch
  - Nance — Dam of Madeleine, 2:23¾.
    - Durland's Young Messenger Duroc
    - untraced

Sadie
- Hambletonian 10
  - Abdallah
    - Mambrino
    - Amazonia
  - Chas. Kent Mare.
    - imp. Bellfounder
    - One Eye
- Lady Wynne
  - Wm. Welch 341 — Sire of Jeremiah, 2:24¾.
    - Hambletonian 10
    - the dam of Prince, 2:27
  - Eleanora Margrave
    - imp. Margrave 1455
    - Fanny Wright, thoroughbred

DESCRIPTION.

SILVER BOW is a handsome bay, no white; 15-2¼ hands high; weighs 1075 pounds; of fine form, with the best of legs and a clean cut, intelligent head. Is remarkably level headed seldom making a break; wears 7-ounce shoes in front. His record 2:37, is no mark of his speed; he can beat 30 easy, and with his gilt-edge breeding, he is just what he ought to be, a trotter sired by a trotter whose dam was herself a trotter and his grandam the dam of two trotters. His dam Sadie being by Hambletonian 10, shows him to be bred from the cream of the trotting blood.

TERMS: $100 for the season. Mares not proving in foal returnable for the season of 1891 free of charge. Good pasturage and first-class care taken of mares for $5 per month. No responsibility assumed for escapes or accidents. For further particulars, address

Limited to 15 approvedmares.
Season to end June 1st, 1890.

P. J. WILLIAMS.

W. R. BRASFIELD & CO.'S

BREEDERS' SALE

Will Close Saturday, December 28, 1889.

Sale at Lexington, Ky., Feb. 10 to 15, 1890.

Good Stock Solicited.

Respectfully, W. R. BRASFIELD & CO.

SAMUEL GAMBLE, Agent for Pacific Coast.

The Thoroughbred Stallion

INTRUDER

Will make the Season of 1890 at Agricultural Park, SACRAMENTO.

Bay Horse, foaled 1871, bred by Sir L. Newman, England. Imported by D. D. Withers, Esq., New York.

By Crater, Son of Orlando and Vesuvienne by Gladiator.

1st dam Lady Bountiful by Ratiplan (Ratiplan is own brother to Stockwell, and winner of 42 races, including the Doncaster Cup and 19 Queen's Plates, and proved himself the most distinguished race horse of his day in England).

2d dam Plentiful by Don John (the winner of St. Leger and Doncaster Cup).

3d dam Plenty by Bay Middleton (winner of the Derby and Two Thousand Guinea Stakes).

4th dam Plenary, own sister of Plenipotentiary, by Emilius. (Both Emilius and Plenipotentiary were Derby winners.)

5th dam Harriet, dam of the renowned Plenipotentiary by Pericles.

6th dam by Selim, winner of the One Thousand Guinea Stakes.

7th dam by Pypilina, by Sir Peter.

8th dam Rally, by Trumpeter.

9th dam Fancy, by Florizel. Fancy was full sister to Diomed, the first Derby winner in England, and after his importation into this country, sired the illustrious Sir Archy, etc. See English Stud Book.

Imported INTRUDER is a beautiful bay, standing fully 16 hands high, of great length and substance, and descends through close and strong currents from the most illustrious winners and winning lines of blood of which the English Stud Book bears record.

A careful review of the first six crosses of the pedigree of INTRUDER will show nine Derby winners; five St. Leger winners; two winners of The Oaks; two winners of the Two Thousand Guineas; two winners of the One Thousand Guineas; one Goodwood Cup winner; one Cesarwich Cup winner; one Cambridgeshire Stakes winner, and four Doncaster Cups, in addition to a great number of Steeplechases and other races of less import.

INTRUDER, at the great fair held at St. Louis, Mo., in 1876, was awarded the highest stallion honors—the blue ribbon and the $500 purse—in the sweepstakes ring for stallion of any age or blood. The list of competitors embraced the large number of thirty-three animals, and they represented England, Canada, Kentucky, Tennessee, and other states. He also took first premium in his class and in sweepstakes for the best stallion of any age or breed at the State Fair at Peoria, Ill., 1882. He is the sire of Tidal Wave, George Hakes, Bernice and April Fool.

INTRUDER is the sire of Interpose, who is the dam of Spokane, winner of the Kentucky Derby, in which he beat the great horse Proctor Knott and broke the record.

TERMS: $50 for the season. Mares not proving with foal can be returned the next season free of charge. Good pasturage at $4 per month. Mares cared for in any manner owners may desire, and fed on hay and grain, either or both, at reasonable rates. While every precaution will be taken, no responsibility will be assumed for escapes or accidents. Mares sent from a distance in care of the undersigned, will be met and taken to the park. For further particulars, address

SAN MATEO STOCK FARM

HOME OF GUY WILKES,

Record, 2:15 1-4.

Guy Wilkes' Book is full for 1890, and positively no more mares will be received. Book now open for 1891, at $500 the Season.

Sable Wilkes, three-year-old record 2:18, will be allowed to serve 25 mares in addition to those already engaged at $250 the season of 1890. SABLE Wilkes, 15½ hands, black horse, by Guy Wilkes, first dam Sable by The Moor; second dam Gretchen by Mambrino Pilot; third dam Kitty Kirkman by Canada Chief; fourth dam by Fanning's Tobe; fifth dam by imp. Leviathan.

Leo Wilkes, brown horse, four years, 16 hands, full brother to Sable Wilkes, will be allowed to serve 30 mares at $100 the season

Mares not proving with foal may be returned the following season free of service fee. Parties engaging the services of any of the above horses must send a deposit of 10 per cent. of service money with engagement. Pasturage $6 per month, and when the condition of the animal requires it, hay or grain, or both, are fed, the charge will be $12 50 per month. Good care will be taken of all mares sent to the Farm, but no liability will be assumed for accidents or escapes.

All bills are due at time of service, but must be paid by August 1st of each year. No stock will be allowed to leave the place until all bills are paid.

WILLIAM CORBITT.

BOYCE TABLETS.
Leg and Body Wash.

THE BOYCE TABLETS are packed in a nicely decorated metal box with hinged lid—one hundred tablets in each box; directions for use plainly engraved upon the box; therefore, the convenience of the package—no liability to leakage and breakage—economy and ready solubility, together with the absolute certainty of their action, will at once commend the use of BOYCE'S TABLETS to the intelligent horsemen of the country. TABLETS sufficient to make one hundred pints of leg and body wash are conveniently carried in an inside coat pocket or in the hip-pocket of the trousers.

The BOYCE WASH can be applied ALL OVER THE BODY WITHOUT FEAR OF BLISTERING OR AFFECTING THE KIDNEYS.

The BOYCE WASH will cure CRACKED HEELS, PUFFS, STOCKINGS, SCRATCHES, INFLAMED TENDONS and FEVERED LEGS.

Price per Box of One Hundred Tablets, $2, sent postpaid to any part of the United States; **six boxes for $10.** A sample of BOYCE'S TABLETS will be mailed to any address on application. These TABLETS are warranted to keep in any climate. Address

$3,000. GUARANTEED. $3,000.

THE

BREEDER AND SPORTSMAN'S

-: Futurity Stakes :-

For Mares Covered in 1889.

Trotting Foals of 1890.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations close; $10 August 1st, 1890; $10 January 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Race to be mile heats three in five in harness; to be trotted on a course in California offering the largest amount of added money. Race to be governed by the Rules of the Association, of which the selected track is a member. Nominators not making all payments forfeit former ones, and the entire amount of forfeits and payments, together with added money, will be divided as follows: 65 per cent. to first horse, 20 per cent. to second horse, 15 per cent. to third horse.

The BREEDER AND SPORTSMAN guarantees $3,000, to be divided as above stated.

If the payments, etc., amount to more than $3,000, the additional amount, after deducting cost of advertising, will also be divided in the same proportion to the winning horses.

Nominators whose mares prove not to be in foal, will be refunded the amounts paid upon furnishing a written statement to that effect before August 1, 1890.

In nominating, give name of mare and stallion to whom she is bred, and within sixty days after foaling forward description of foal.

NOMINATIONS close on JANUARY 1st, 1890, but may be made any time BEFORE THAT DATE, WITHOUT RISK OF LOSS, AS PAYMENTS ARE REFUNDED FOR MARES NOT PROVING IN FOAL.

ADDRESS,

BREEDER and SPORTSMAN,

313 BUSH STREET, SAN FRANCISCO.

$3,000. GUARANTEED $3,000.

The Washington Park Club,

All declarations in the above Stakes void unless accompanied with the money.
All Purses and Handicaps, $600 to $800.

Please observe that in the above stakes declarations are permitted for a small forfeit.
Turfmen failing to receive entry blanks can obtain them by applying to the Secretary.
Nominations and all communications to be addressed to the Secretary, Room 32, Palmer House, Chicago, Illinois.

J. E. BREWSTER, Secretary.

BUCKEYE DRILLS.

New Buckeye Low Down Shoe Drill with Chain Coverers.

When Press Wheels are used in place of Chain Coverers the Drill is so arranged that the principal weight of both the machine and operator can be placed on the Press Wheels, or if so desired, a portion of this weight can be put on the Shoes by means of the levers, furnished with either Chain Coverers or Press Wheels.

All our Shoe Drills are furnished with the Chain Coverers, but the Press Wheels are an Extra Attachment which is not furnished unless specially ordered.

Reasons Why the Buckeye is the Best.

Because it has a Limber Tongue with no weight on the horses' necks.
Because it is supported both in front and rear by wheels, making it light draft and easy to control.
Because the operator can regulate the depth that the Shoes run in the ground, and amount of pressure on both Shoes and Press Wheels, with the same levers.
Because it is better finished, neater looking and easier to operate than any other Shoe Drill on the market

OSSIDINE

Results obtained at the well-known **KALAMAZOO FARM.**

KALAMAZOO, MICH., Sept. 15, 1888.

GENTLEMEN:—We have used **OSSIDINE** for the past two years, and consider it invaluable for Sprung Tendons, Curbs, Ringbone, and Spavins; there is nothing equals it: and for us it effected a permanent cure where firing failed, although performed by one of the most successful veterinarians on the continent. We have recommended it to others with like success, and believe it has more merit than any blister ever used.

Very respectfully yours,
S. A. BROWNE & CO., Prop's.

This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish.

Acknowledged by leading horsemen of the world to be the **ONLY** preparation that will remove a Bone Spavin after it has become ossified.

We have authority also to refer to
Mr. JEROME I. CASE, Mr. FRED. GEBHARD,
Mr. JOHN PORTER (Trainer to H.R.H. the Prince of Wales),
And hundreds of others from whom we have very flattering testimonials.

One Style Only. $3.00 per Bottle.

THE IMPROVED NOYES ROAD - CART.

PATENTED JULY 17, 1883, *AND JUNE* 8, 1886.

Some of the Advantages of the Noyes Cart Over All Others.

There is no bar for the rider to climb over in getting in or out. The horse can be hitched eighteen inches nearer than any other road-cart made. You can get in or out with perfect safety—no danger of being thrown into the wheel—a great advantage in breaking colts. THE EASIEST CART FOR ROAD OR TRACK. The only cart that a horse can be speeded to within one second as fast as to a sulky. All our carts are made of the very best materials and are warranted. Manufactured by the NOYES CART COMPANY, Kalamazoo, Mich.

They are indorsed by the following horsemen, all of whom are using them. Ask their opinion of the Noyes Cart: John Splan, who drove Guy a full mile in 2:17¾ and Chanter a half-mile in 1:10¾ to a Noyes Cart, says he would not take $250 for it if he could not get another; W. J. Gordon, Glenville, O.; W. B. Easig, Cleveland, O.; Dave Muckel, Cleveland, O.; R. J. Moorehead, North East, Pa.; W. J. Chamberlain, Cleveland, O.; H. P. Malone, Bradford, Pa.; S. A. Brown & Co., Kalamazoo Stock Farm, Charles Marvin, Menlo Park, Cal.; W. H. Crawford, Lexington, Ky.; S. L. Caton, who gave Bell Boy a mark at Los Angeles, Cal., of 2:19½, and drove Chanter a half mile in 1:06¾ and Lowland Girl a full mile in 2: 2 to a Noyes Cart; Mike Bowerman, Lexington, Ky.; James Golden, Medford, Mass.; John E. Turner, Philadelphia, Pa.; T. L. Newton, Beaver Dam, Wis.; P. V. Johnston, Marshall, Mich.; W. H. McCarthy, Los Angeles, Cal.; A. W. Dennison, El Dorado, Kan.; P. O. Shank, Cleveland, O.; Charles Barnard, Boston, Mass.; Johnson Bros., Greenville, Mich.; John G. Avery, Buffalo, N. Y.; General R. L. Howard, Buffalo, N. Y.; Howard Conklin, Buffalo, N. Y.; W. D. Ham, Hennepin, Ill.; R. G. Henry, Waterbury, Conn; J. E. Hayer, Newburgh, O.; J. C. Hart, Jefferson, Tex.; A. W. The Latest in Harrows.

The "Stevens" All Steel Spring Tooth

HARROW,

For Grain, Orchard or Vineyard Work

With or Without Steering Rudder.

Combining new features which make it superior to and different from any other in the market. Seven Sizes, cutting from 4 ft. 8 in. to 8 ft. Can be coupled together when wider cut is needed for Grain.

POINTS OF EXCELLENCE.

It is hinged in center, which admits its adapting itself to any formation of ground. The frame is arched behind teeth, which prevents clogging. It is suitable for gravel, loam, or adobe soil. The teeth are secured on top of frame by malleable iron holders, which are simplicity itself. The Rudder enables driver to guide it close to trees or vines without danger of striking them

NO WOOD, BUT WHOLLY STEEL,

MAKING IT PERFECTLY INDESTRUCTIBLE.

Prices less than the cheap Wood Frame Harrows.

To Horse Breeders and Stockmen.

SPECIAL OFFER.

I offer for sale, title warranted, the best bargain in stock ranches on the coast. The ranch contains 857 acres; one mile frontage on Clear Lake; 300 acres alfalfa land; 120 acres now seeded to alfalfa, cuts six tons per acre; 75 acres in timothy cuts four tons per acre, both without irrigation. The rest of the land is fine rolling pasture, or can be cultivated. There are two dwellings on the property, one new, cost $2,000; three barns, capacity 350 tons of hay; two artesian wells, with pipes laid to houses, barns and dairy house. Fine cool spring on premises. An orchard of apples, pears and cherries now in bearing. Peaches, prunes, apricots, strawberries and all other fruits do well. At option of purchaser with the property will be sold 600 head of sheep, 60 head of cattle, 22 horses, and 7 young brood mares in foal. Also wagons, harness, farming implements, etc.

This is a grand opportunity to establish a stock ranch The S. F. & N. P. R. R. now runs within 35 miles of the property and will in a short time be extended quite to the place. Price $35,000, half cash. For further particulars, apply to

JOHN T. PETERS,

Agent for Sonoma Lake and Mendocino County Land.
